ELECTRIC FENCES
ZOOTECHNICAL EQUIPMENT

2026

Agro Electrosistemas is a dynamically developing company operating in Romania, in the Transylvania region, which has quickly become a key player on the market. Our success is based on a simple but consistent approach: hard work, precision, fast service, and continuous attention to our partners needs.

Our main activity is the manufacturing of electric fence devices, as well as the distribution of equipment for animal husbandry. Our product range includes, in addition to electric fencing systems, milking machines, drinkers, feeders, tools, consumables, animal care products, bale cover tarpaulins, and many other products used daily in livestock farming. With a continuous stock of over 1000 pallets, we ensure fast and reliable service for our partners.

We strive to dispatch orders on working days on the same day whenever possible, always carefully and securely packed. We keep our prices stable throughout the season, allowing our partners to plan ahead. Our products are in demand on the market, and we provide competitive margins for our resellers.

We believe that the foundation of long-term cooperation is transparency, precision, and predictability. If our partners grow, we grow as well.

Electric fencing system

Operating principle

Electric fences are designed exclusively for animals, for fencing them in, or for keeping out other wild animals. We distinguish between temporary and permanent electric fences as follows: temporary systems operate for days, weeks, or months, while permanent systems operate for several years.

The electric fence works with high voltage pulses. The period of the pulses is about one second and their voltage is about 6000-10000 V. The impulse generator is connected to the fence wires. The moment an animal touches the wire, the electric circuit is closed through the earth. Electrocutation is not dangerous, but it is extremely unpleasant. Animals will quickly learn to keep their distance from the electric fence wires.

A Electric fence energizer (the impulse generator)

The electric fence generates short, high-voltage electrical pulses of about one second. The most important parameter of the device is the stored energy, expressed in Joules. For the electrification of small fences (1-2 km long) a device with a power of 1-2 Joules is needed. For longer fences, a powerful device with a power of 4-7 Joules is required.

B Power supply

The device is powered with 12 V DC. Power can be supplied in two ways: with a 230/12 V mains adapter, or in areas without mains power with a 12 V car accumulator, which, if charged, can keep the appliance running for about a week. The accumulator can also be charged with a solar system.

C Grounding

Grounding is a very important element of an electric fence system, so its quality is essential. A metal bar, preferably galvanized, with a minimum length of one meter, should be used for grounding. For longer fences, more than one grounding shall be constructed to ensure proper functioning of remote areas of the electric fence. The grounding shall be constructed as close as possible to the electric fence energizer. The ideal grounding location is a damp, shaded area.

D Post, pole

Posts can be poles made of wood, plastic, metal, etc. that support the electric fence insulators. If necessary, the posts of an existing fence or even the walls of a building can be used. At fence ends, corners and gates, more solid posts should be fitted. Otherwise, after a while the fence wire will lose tension and gradually sag.

E Insulator

The support and galvanic insulation of electric fence wires is provided by insulators. Any undesirable contact of the wire with poles, vegetation, or any other ground object decreases the effectiveness of the fence. Always use insulators intended for electric fences and avoid using makeshift insulators.

F Electric fence wire

Electric fence wire contains metal inserts. According to shape and thickness we distinguish between wire, rope

or tape. The right choice depends on a number of factors, mainly the animal species:

- **Visibility:** the wire is less visible, the rope has better visibility, and the tape is the easiest to see.
- **Breaking strength:** for wild animals, a wire with a breaking strength of at least 100 kg is recommended, for domestic animals breaking strength below 100 kg is sufficient.
- **Electrical resistance:** is expressed in ohms per meter (Ω/m). The higher the resistance, the greater the voltage loss across the wire. This parameter is particularly important for long fences.
- **Maximum enclosure length:** depending on the electrical resistance, the manufacturer recommends a maximum enclosure length at which the fence will operate normally. If the fence consists of several rows of wires, the recommended maximum length can be doubled.

G Corner or fence end insulator

This insulator is more solid, suitable for corners or fence end points. Caution: do not use ring insulators at corners or fence ends!

H Warning sign

Electric fence wires that are installed along streets or public roads must be marked at 5-20 m intervals with warning signs.

I Gate Connector

The connector is a set of metallic connectors, which ensure a good connection between the wire and the gate elements.

J Gate insulator

This insulator is fitted with a hook. The fence wire is connected on one side and the gate handle or gate bow on the other.

K Gate handle

The gate handle is made of plastic, fitted with a hook. It is an indispensable item for building electric fence gates. Inside it contains a spring, which ensures tensioning of the wire.

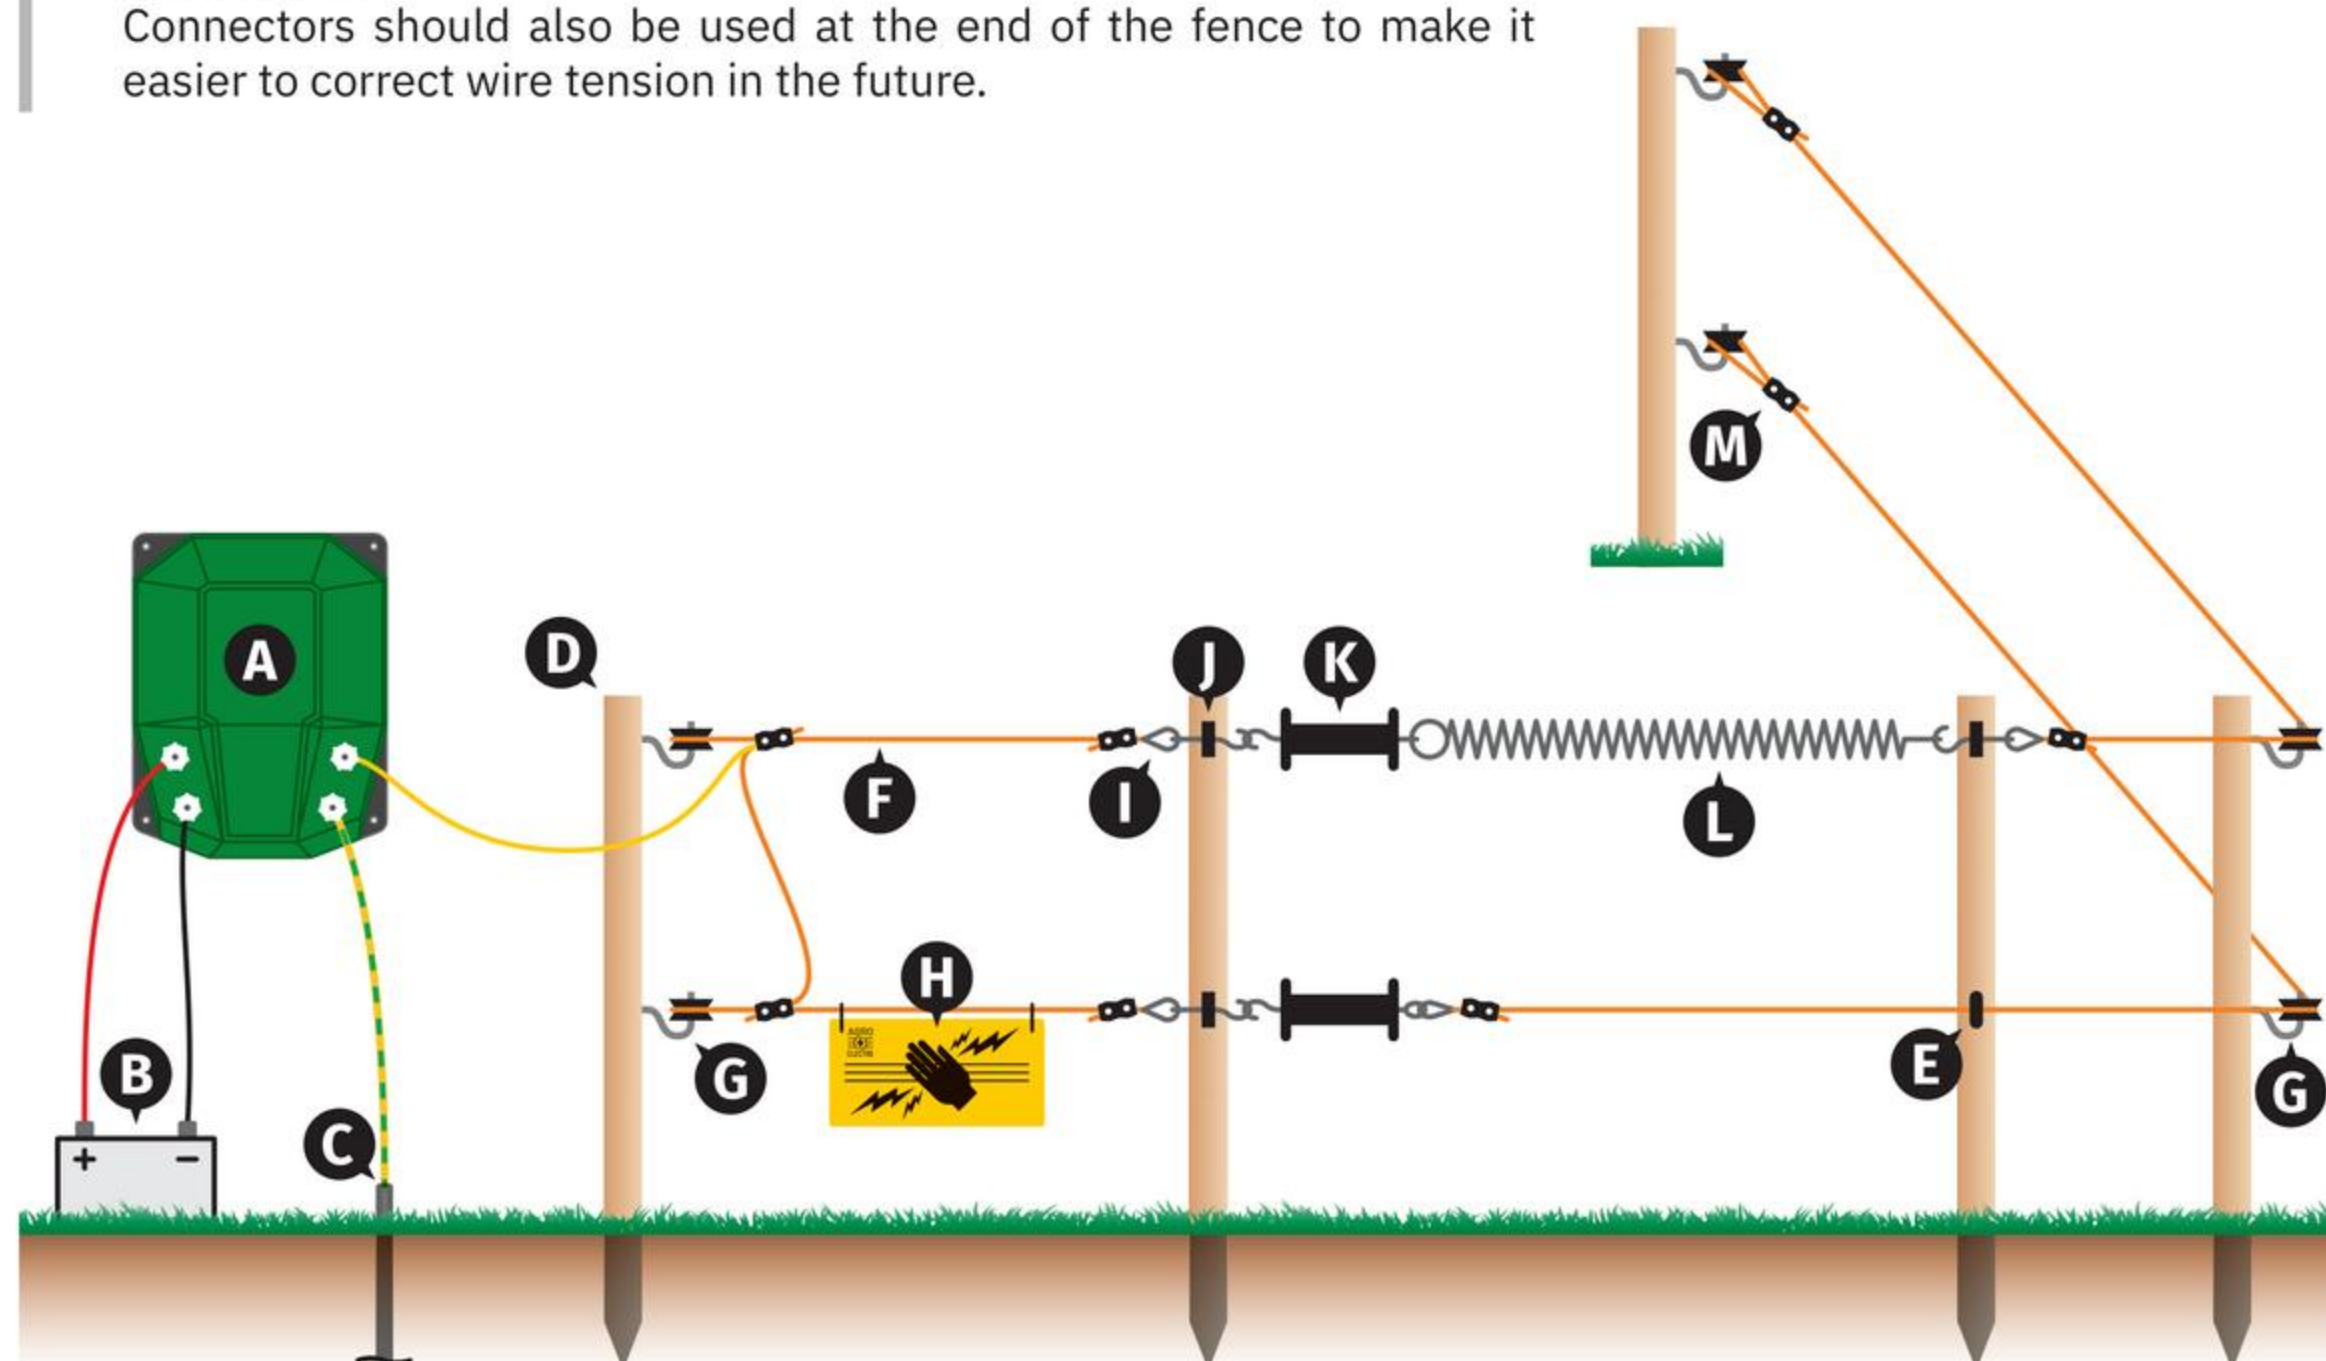

L Spring

The spring is made of galvanized steel, and stretches to a considerable length. It is used to build durable gates.

M Connectors

Connectors are indispensable parts for connecting or extending electric fence wire. Caution: extending or connecting the wire by knotting or twisting is never sufficient because durable galvanic connections are not formed!

Connectors should also be used at the end of the fence to make it easier to correct wire tension in the future.

Fence parameters by animal

Sheep

- Conductor type: **Wire.**
- Distance between posts: Max. 7-8 m.

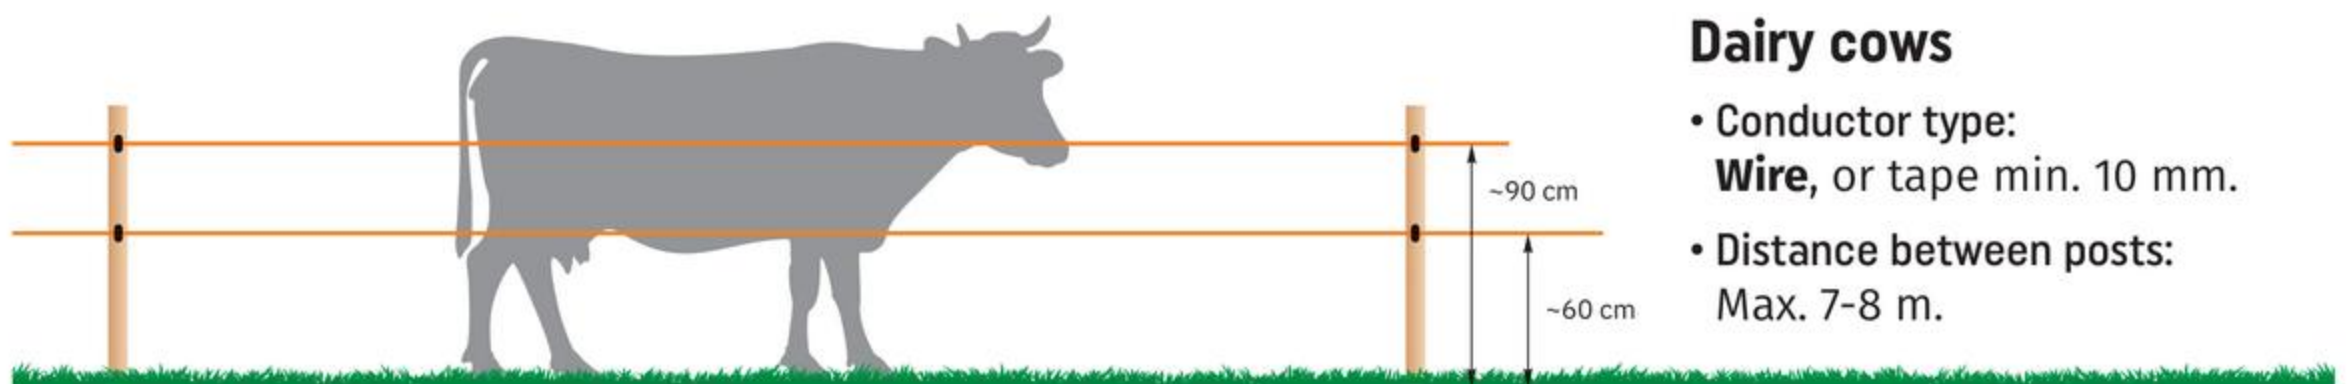

Goats

- Conductor type: **Wire.**
- Distance between posts: Max. 7-8 m.

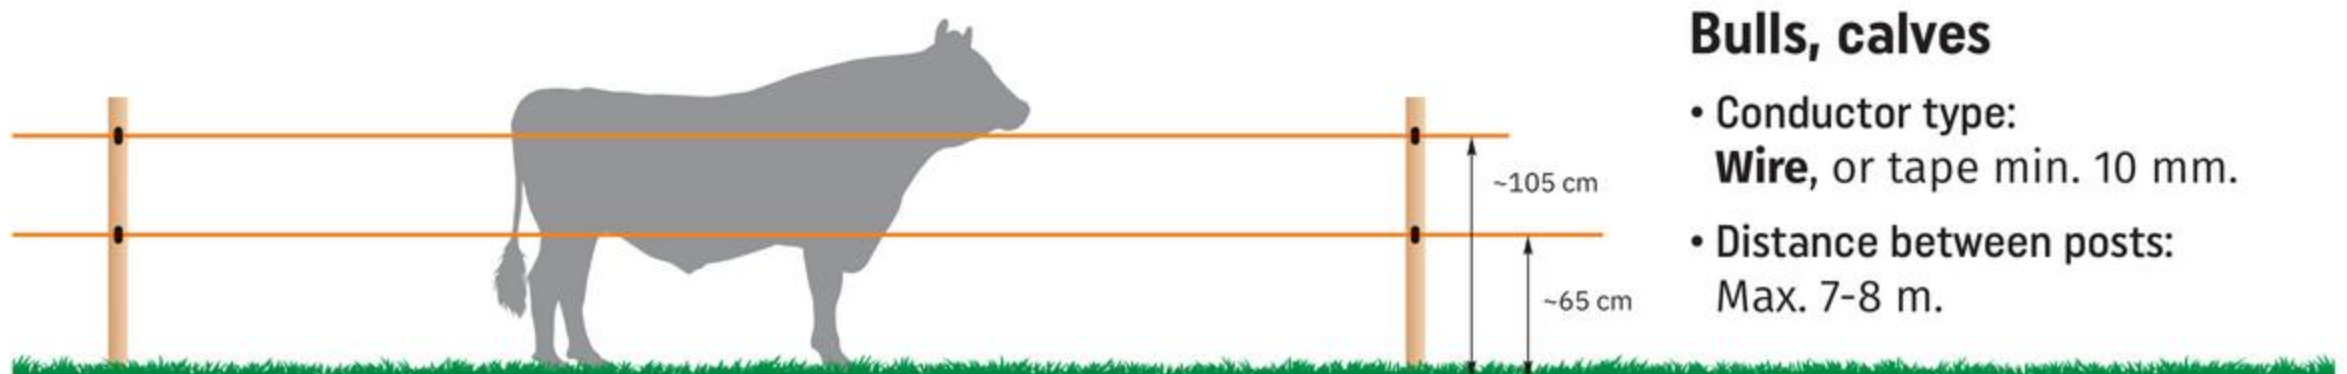

Small horses

- Conductor type: **Rope, or tape** min. 20 mm.
- Distance between posts: Max. 6-7 m.

Dairy cows

- Conductor type: **Wire, or tape** min. 10 mm.
- Distance between posts: Max. 7-8 m.

Bulls, calves

- Conductor type: **Wire, or tape** min. 10 mm.
- Distance between posts: Max. 7-8 m.

Horses

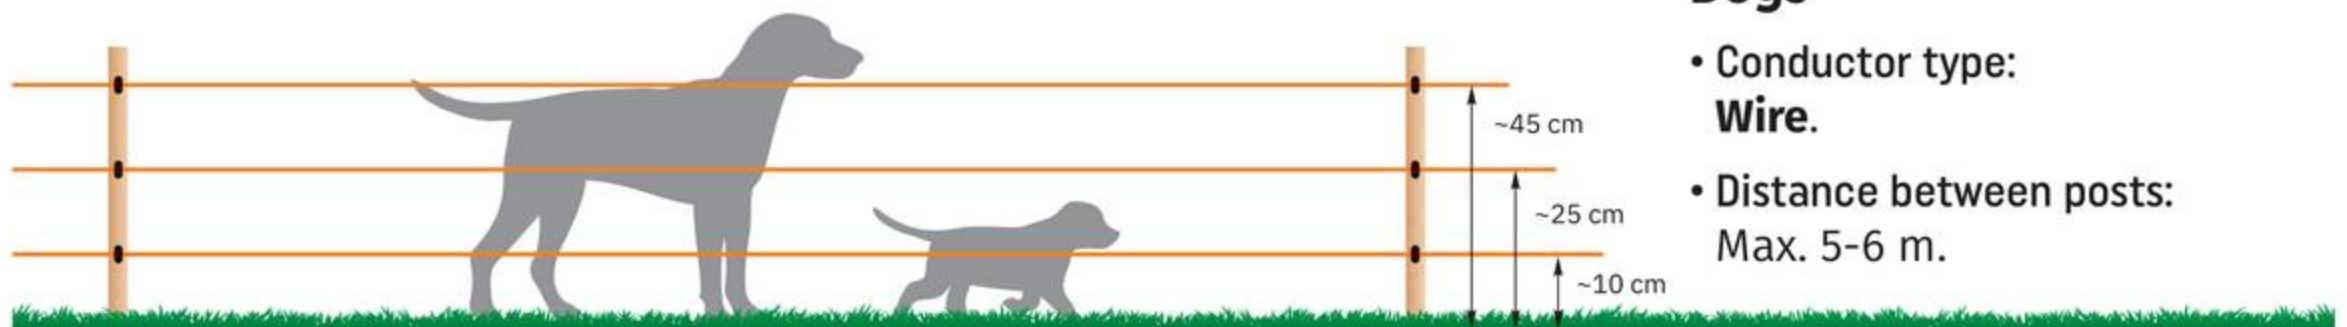

- Conductor type: **Tape** min. 20 mm, or **rope.**
- Distance between posts: Max. 6-7 m.

The wire heights given are for guidance only and can be adapted to suit the species of animal.

Fence parameters by animal

Dogs

- Conductor type:
Wire.
- Distance between posts:
Max. 5-6 m.

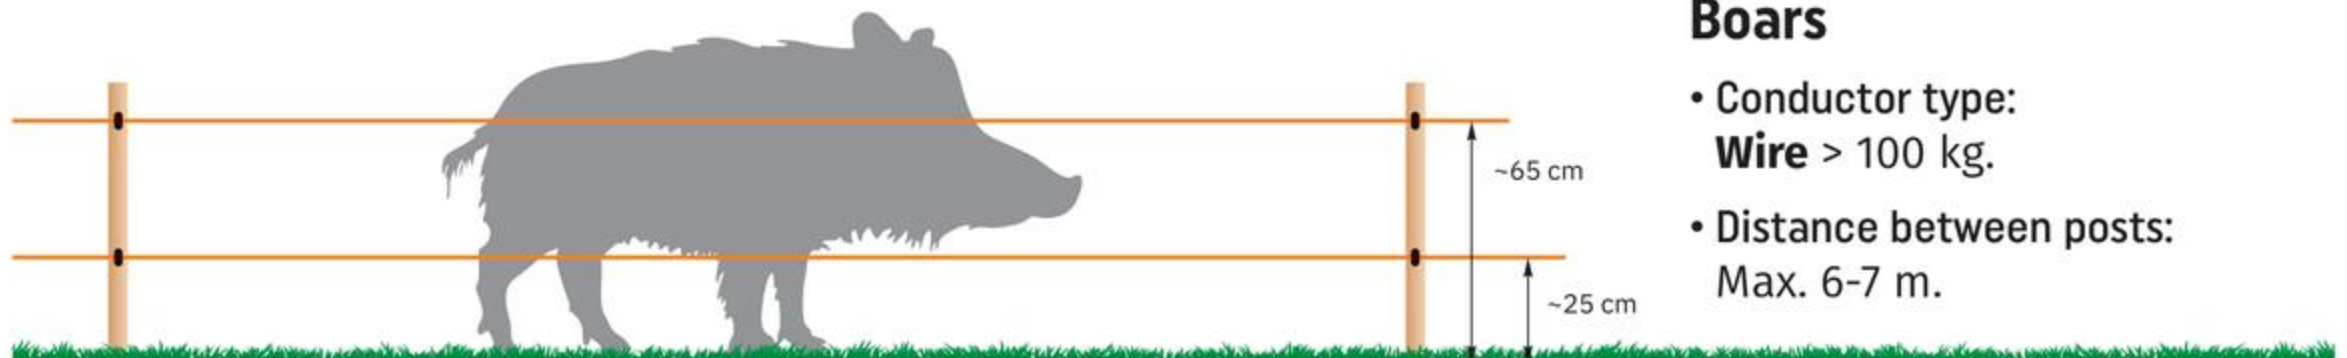

Pigs

- Conductor type:
Tape min. 10 mm, or wire.
- Distance between posts:
Max. 6-7 m.

Boars

- Conductor type:
Wire > 100 kg.
- Distance between posts:
Max. 6-7 m.

Stags

- Conductor type:
Wire > 100 kg, or rope.
- Distance between posts:
Max. 6-7 m.

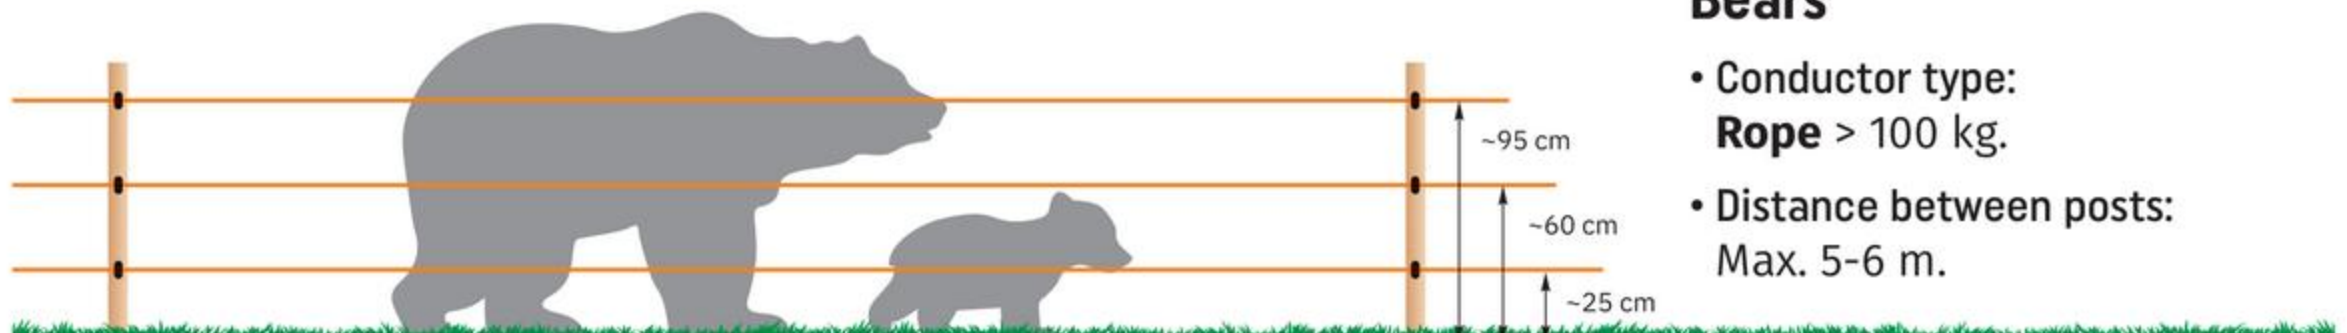

Deer

- Conductor type:
Wire > 100 kg, or rope.
- Distance between posts:
Max. 6-7 m.

Bears

- Conductor type:
Rope > 100 kg.
- Distance between posts:
Max. 5-6 m.

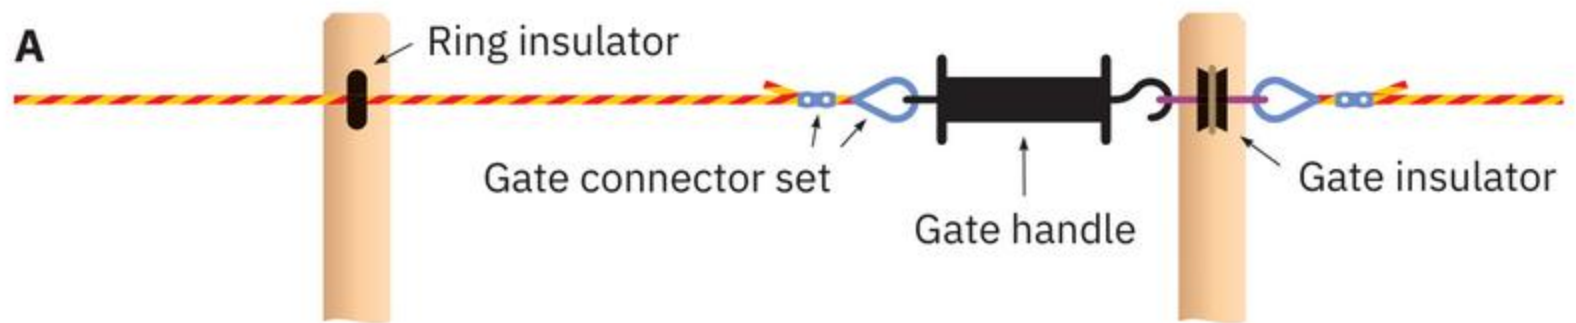

The wire heights given are for guidance only and can be adapted to suit the species of animal.

Gate types

The gate is an important element of the electric fence. People, agricultural machinery or animals can pass through the gate. The optimal width of a gate is 2-5 m. There are three basic types: **A.** rarely used gate, **B.** frequently used gate and **C.** durable gate. So the most appropriate type of gate depends on the frequency of use.

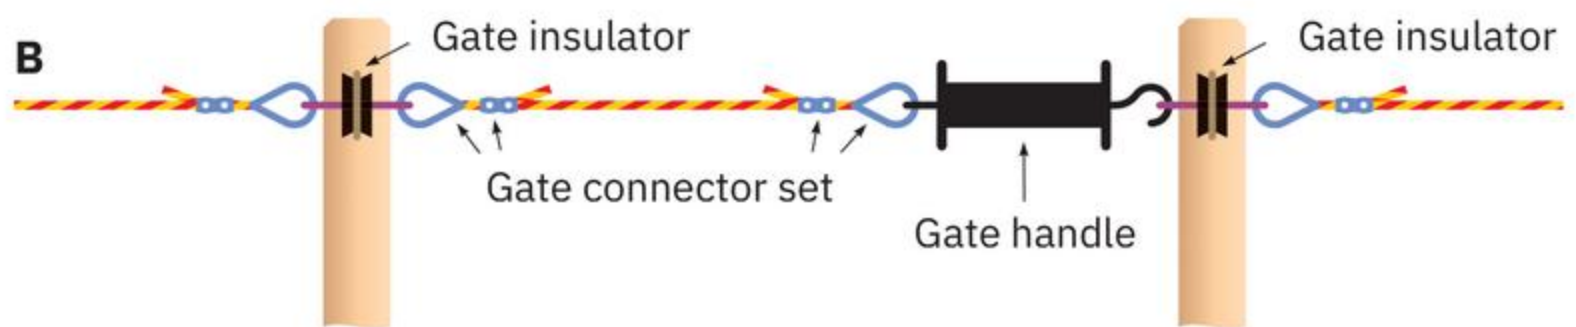

A. Rarely used gate

The construction of this gate is the simplest, consisting of a gate insulator, a gate handle and two sets of gate connectors. When opening the gate, the fence wire will lose some of its tension, which can be a disadvantage.

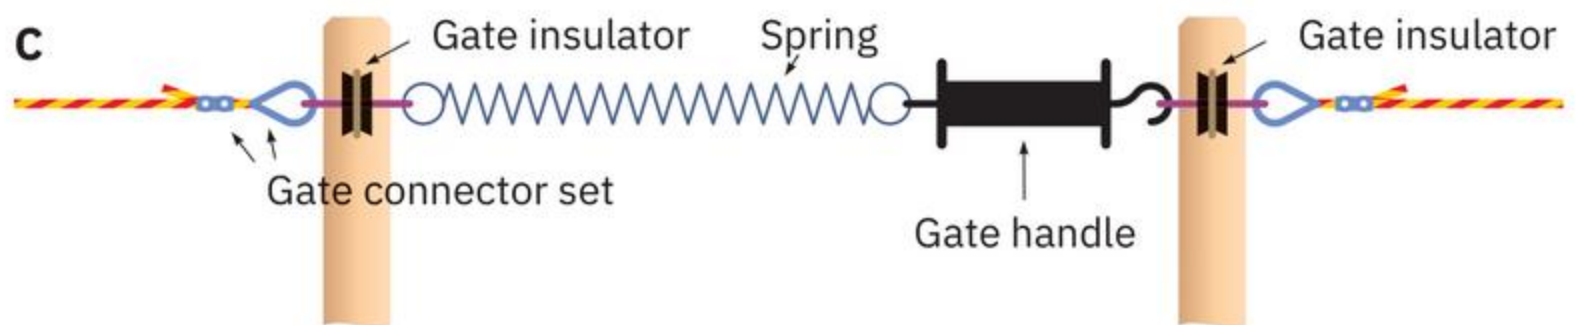

B. Frequently used gate

It is constructed of one gate handle, two gate insulators and four sets of gate connectors.

C. Durable gate

It is constructed of two sets of gate connectors and one special gate set (product code: 0104, contains two gate insulators, one gate handle and one spring).

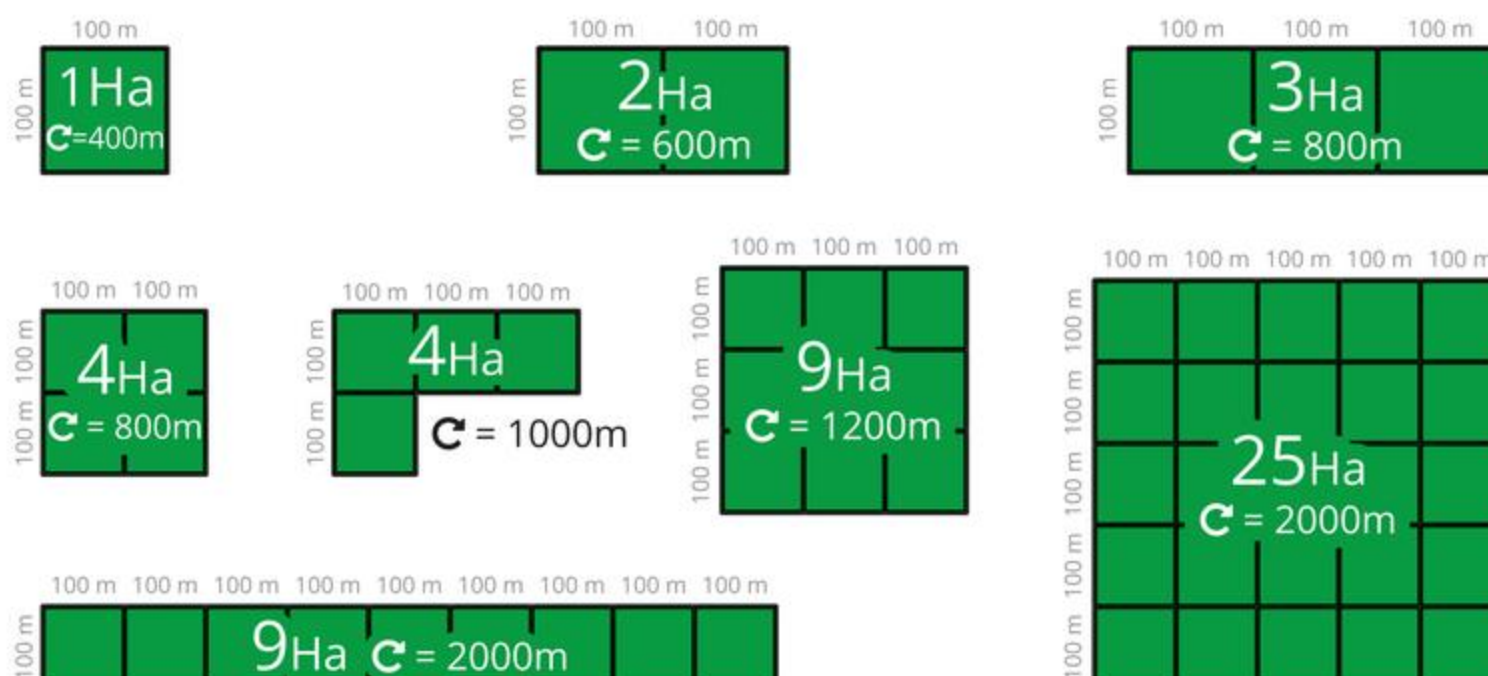

Correlation between area and perimeter – examples

Usually the area of the land to be fenced is at hand, yet calculating the perimeter can be misleading. Consider the shape of the area, or at best, take measurements to determine the correct length.

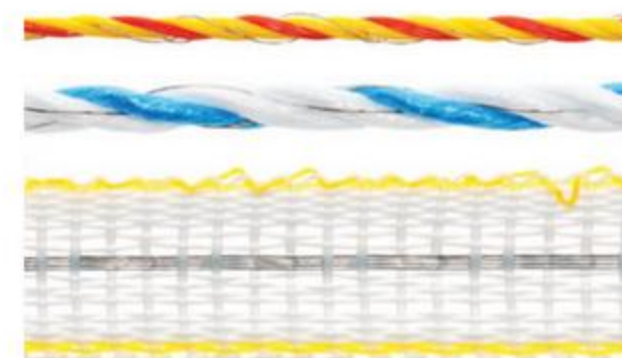

Beware: the shape of the land can greatly affect the perimeter – for example, a 9 Ha plot of land may have exactly the same perimeter as a 25 Ha plot.

Here are some examples:

Choosing the right conductor type – wire, rope, tape, or metallic wire

With so many types of wires, ropes and tapes on the market, choosing the right one can seem difficult. By going through the points below, the possibilities of choice decrease significantly once you have correctly determined the parameters of the wire.

Conductor type – polywire/rope/tape/metallic wire

The main factor in choosing the right type of conductor is first of all good visibility, taking into account the abilities of the species of animal fenced or kept at a distance. For example, for horses, tape is more suitable than thin wire. But the same type of thin wire is more than sufficient for sheep. The secondary reason for the choice of conductor type is durability over time. For example, rope is the best long-term choice.

Metallic wire is recommended for permanent electric fencing, but its disadvantage is low visibility. The appropriate choice is galvanized steel wire with a minimum diameter of 2.5 mm.

Breaking strength

This is expressed in **kg** and represents the maximum tensile strength of the wire. A maximum of 100 kg is sufficient for domestic animals and a stronger wire is recommended for wild animals. Of course, the higher the breaking strength, the safer is the electric fence. Breaking strength decreases over time – after several years, the parameters of the wire decrease, so if you're planning for the long term, consider this detail too.

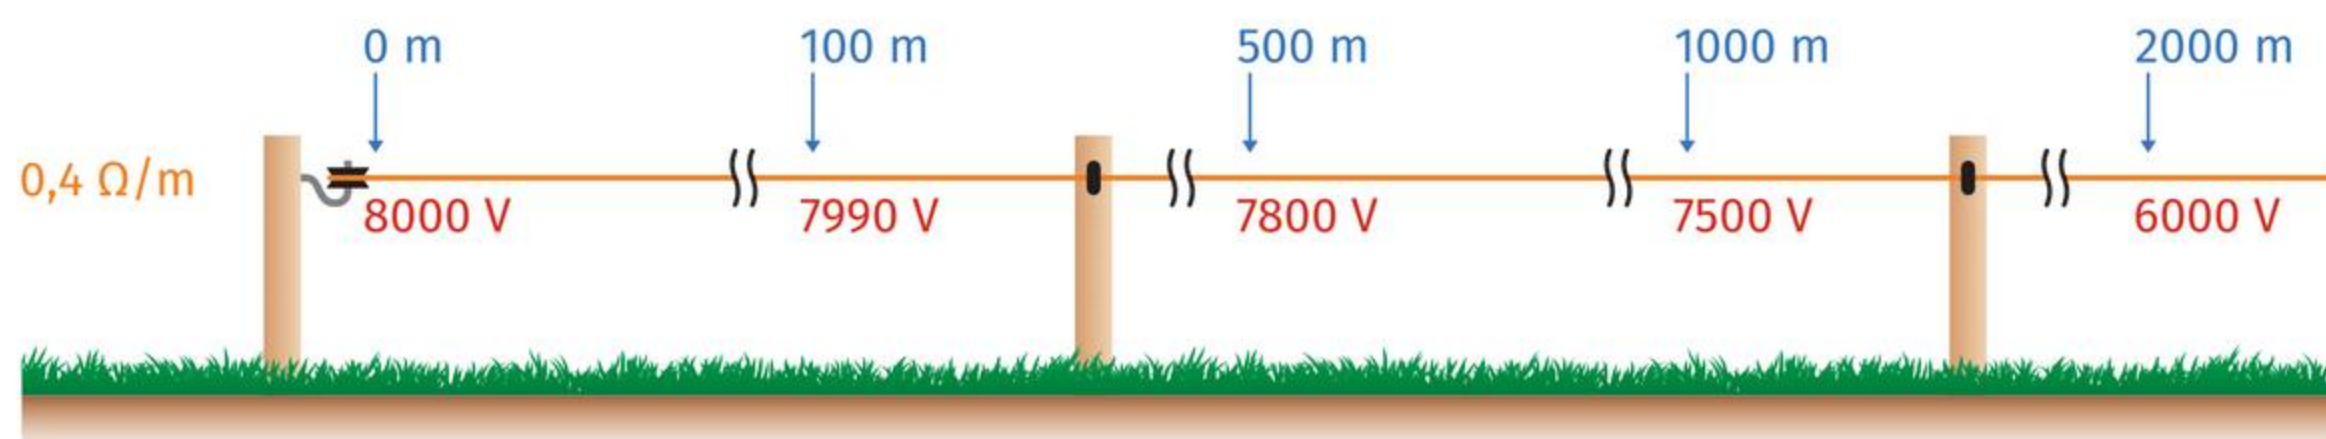

Electrical resistance

An important parameter of the electric fence wire is its electrical resistance. This is expressed in **Ω/m** (ohm/meter). The higher the resistance, the greater the voltage loss over longer lengths. The lower the Ω/m value, the more suitable the wire is for building longer fences (see examples below). Low resistance wire has 0.1-1 Ω/m , medium resistance wire has 1-5 Ω/m , and high resistance wire has 5-15 Ω/m .

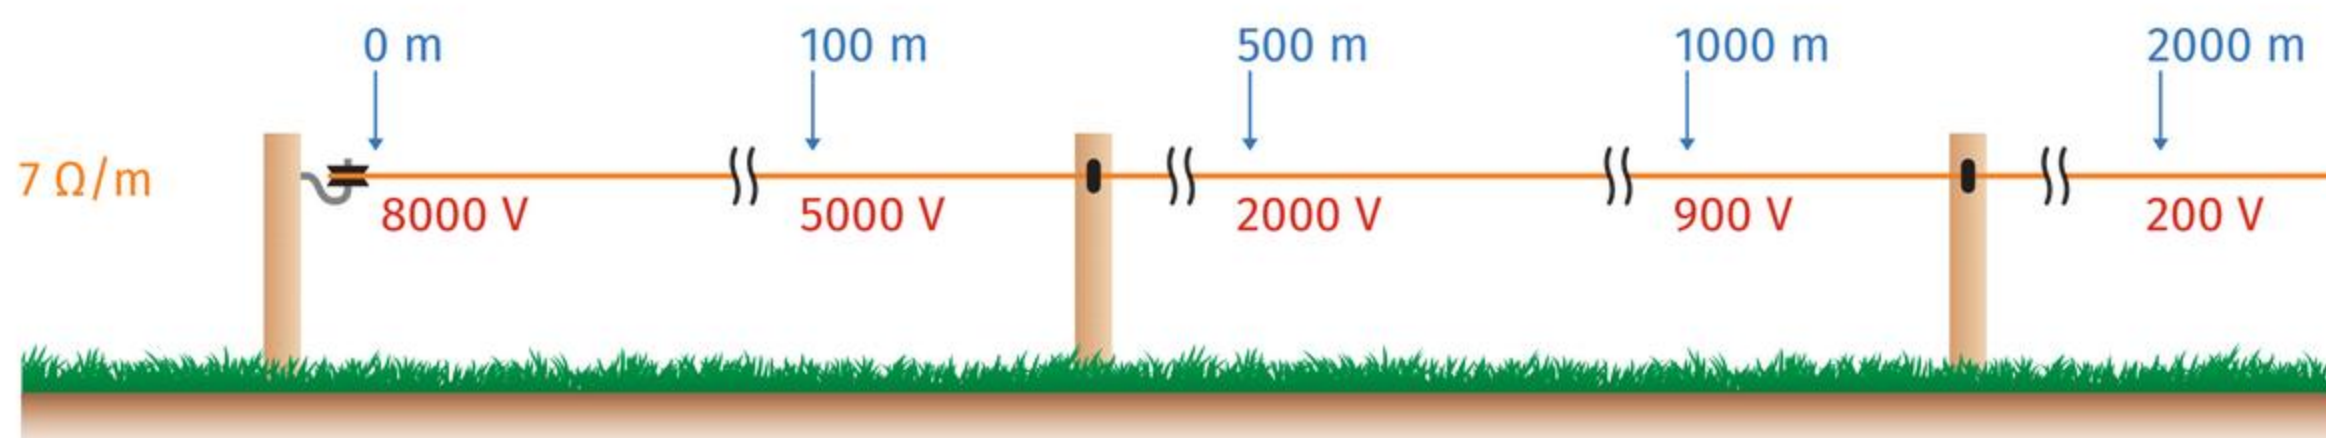

In the case of short electric fences (100-200 m) high resistance wire (proportionally cheaper) can be used, but for long fences (1 km+) definitely a low resistance wire must be used. So the electrical resistance of the wire determines the maximum length of the electric fence. This parameter can be found on the label of the wire (or on-line on our website), where it is called "maximum fence length". Examples:

- A wire of 0.4 Ω/m can build an electric fence of a maximum length of 10000 m.
- A wire of 7 Ω/m can build an electric fence of a maximum length of 500 m.

Although high resistance wires can be disadvantageous, in the case of short fences and especially in the case of fences having several rows, the voltage drop is not significant, so the intention of always buying low resistance wires is not a rule to follow.

Voltage drop in an electric fence built with 0.4 Ω/m wire

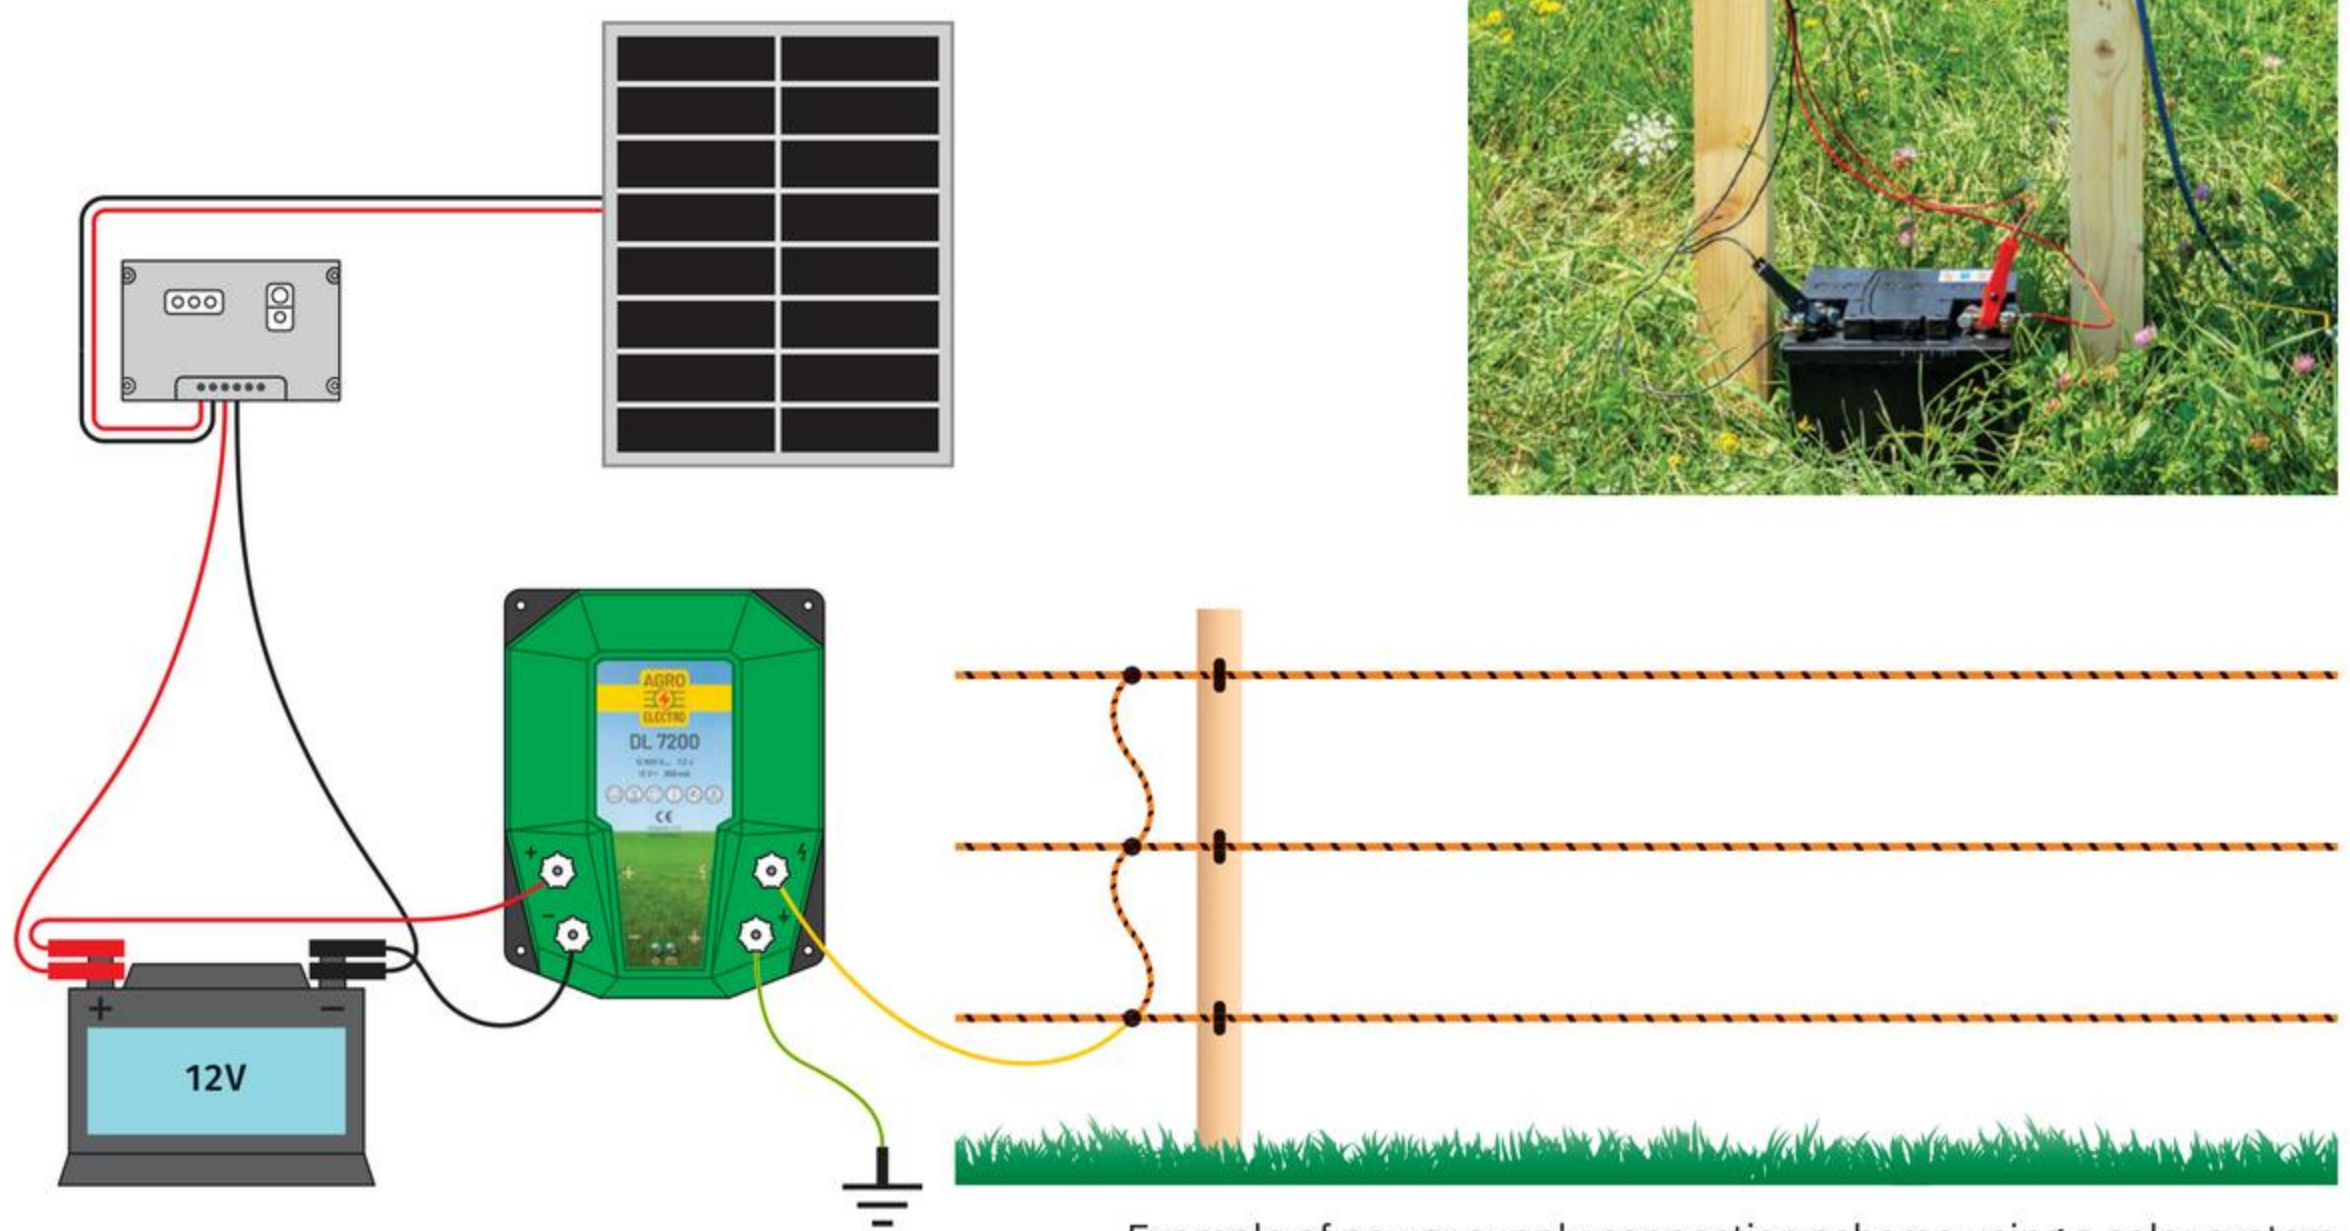

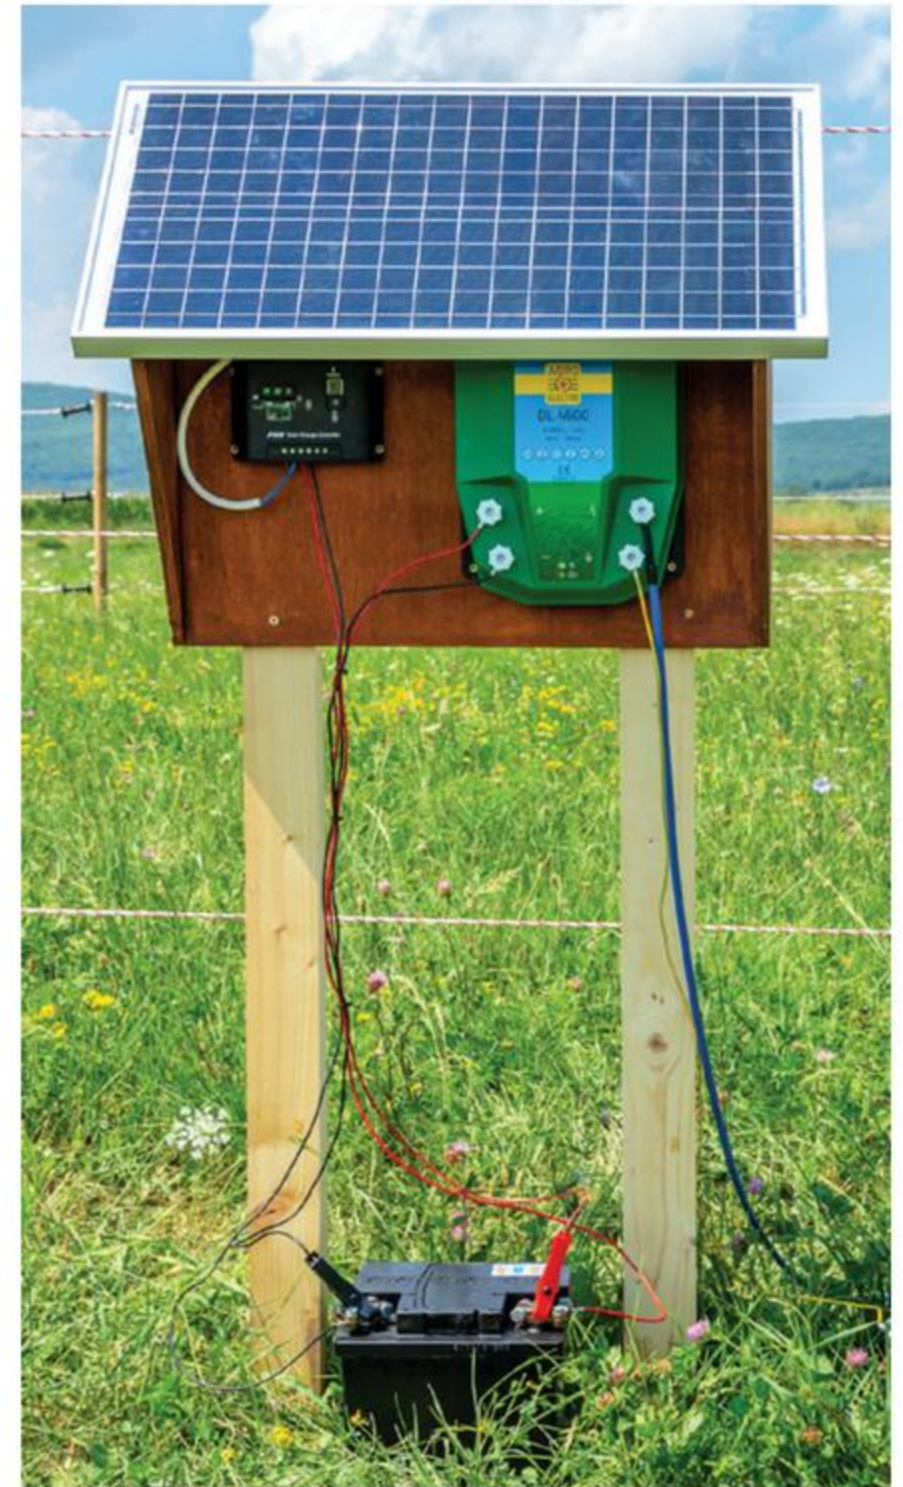

Voltage drop in an electric fence built with 7 Ω/m wire

Powering the impulse generator

To supply power to the impulse generator, you will need a 12 V DC voltage source. Depending on the location of the generator, there are three main power supply modes:

- In inhabited areas, or close to 230 V mains, the power supply can be made with a 230/12 V adapter.
- In areas without electricity, power supply can be provided by a 12 V car accumulator. A charged accumulator can power the device for about one week. In this scenario, you will need to periodically recharge the accumulator, and in the meantime, you may also need to use a backup accumulator to keep the system running.
- In areas without electricity, power supply can also be provided using a 30-100 W solar system. This consists of a solar panel and a charge controller. The collected energy is stored in a 12 V accumulator. Other low power consumers – LED light bulbs, cell phone chargers, etc. – can also be powered by this system.

Example of power supply connection scheme using a solar system

Grounding

Grounding is a very important element of an electric fence. Therefore, choosing the grounding area is essential right from the planning stage. As with the power supply, choosing the final location for the energizer also depends on the place where a proper grounding may be created.

The grounding consists of one or more galvanized metallic bars, driven at least one meter deep into the ground. Most appropriate for this purpose is using a one-meter long threaded metallic bar. The number of needed groundings depends on the length of the fence, but also on the moisture of the soil – the longer the fence and the drier the soil, the more groundings are needed.

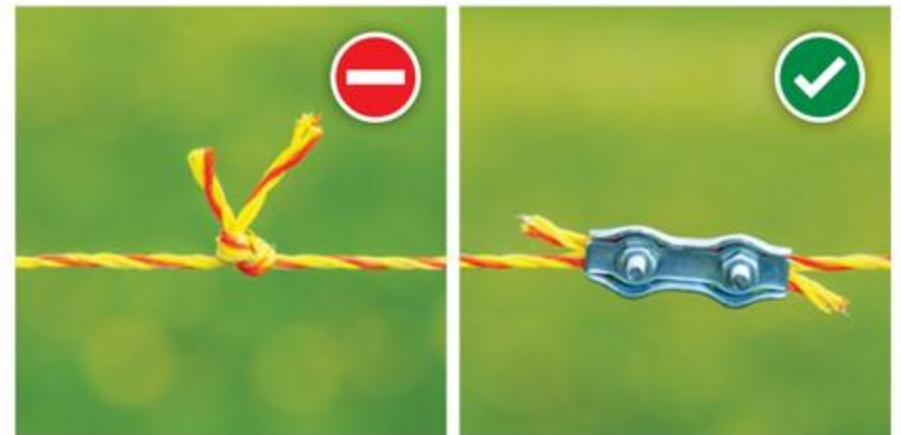

Non-recommended methods

Do not apply knots on the wire!

A common mistake is extending or connecting the electric fence wire through knots. The knot provides insecure contact over a very small area, so it will only work properly for a short time. Beware, the wire has only a few metal inserts that do not connect properly through a knot!

Only use special connectors for wire extension! These connectors provide a relatively large surface area for good electrical contact. They are also galvanized, so they are protected against corrosion.

Do not apply knots on the wire!

Do not wind the wire on the insulator!

Winding the wire on the insulator in order to fix it securely is a very serious mistake. The result is just the opposite of what you might expect...

The wire must pass smoothly through all insulators along the fence, thus ensuring the following:

- The wire tension can be corrected at one end of the fence.
- If an animal or machinery strikes the fence, the length of the wire shall allow sufficient elasticity to prevent breakage of the wire or insulators. If the wire is twisted on the insulators, the elasticity of the fence segments is minimized, forcing of the wire leads to wire breakage, or damaged insulators.
- In rainy weather or at dawn, twisted electric fence wires can short-circuit the supporting post, resulting in a significant reduction in the efficiency of the electric fence.

Do not wind the wire on the insulator!

Do not use ring insulators at the corners

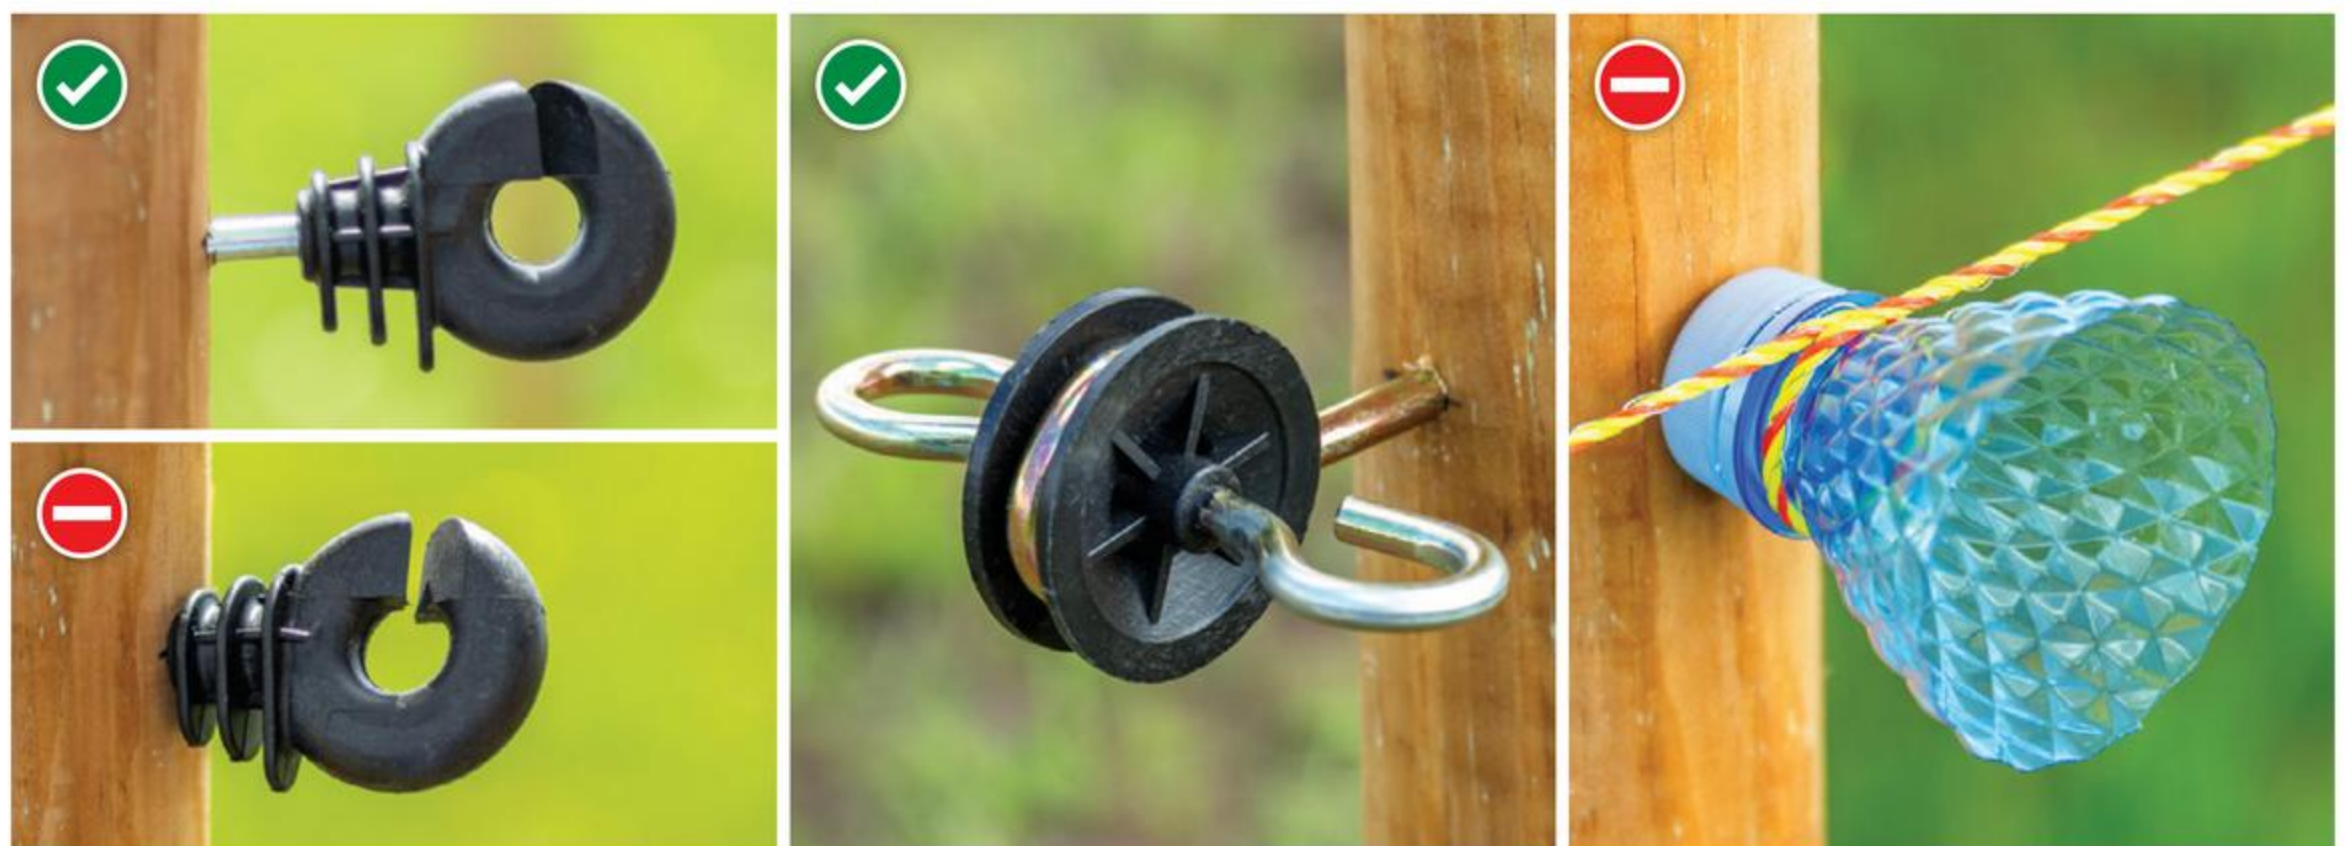

Insulators

Ring insulators used at a corner, or at the end of the fence will, sooner or later, break. Furthermore, a ring insulator used at the corner does not provide adequate flexibility to the wire.

Screw-bolt insulators should not be threaded all the way in. It is advisable to keep the fence wire as far away as possible from the post to prevent unwanted short-circuits.

Never use makeshift insulators. The savings on insulators are irrelevant compared to the potential damage caused by improper insulators. Loss of impulse energy due to makeshift insulators may easily cause escaped animals, which is a hugely more significant loss than some economy on relatively cheap insulators.

Electric fence energizer DL 3200

0222

The DL 3200 energizer is the perfect choice for fencing in or keeping out domestic or wild animals – dogs, sheep, goats, pigs, horses, cows, boars, deer, wolves, foxes, etc.

The DL 3200 is designed for enclosures up to 7000 m in length.

It can be powered from 230 V via a 12 V adapter or from a 12 V car accumulator (neither included in the package). A 12 V / 45 Ah car accumulator provides enough energy to power the unit for 12-16 days.

Technical specifications

Power supply voltage	12 V $\overline{\text{---}}$
Power consumption	110 mA
Maximum output voltage at 500 Ω load	7600 V
Maximum fence length	7000 m
Maximum stored energy	4.16 Joule
Maximum impulse energy	3.2 Joule
Degree of protection	IPX4
Dimensions	210 × 265 × 100 mm
Weight	1.6 kg

Electric fence energizer DL 4500

0223

The DL 4500 energizer is the perfect choice for fencing in or keeping out domestic or wild animals – sheep, goats, pigs, horses, cows, dogs, boars, deer, wolves, foxes, etc.

The DL 4500 is designed for enclosures up to 12000 m in length.

It can be powered from 230 V via a 12 V adapter or from a 12 V car accumulator (neither included in the package). A 12 V / 45 Ah car accumulator provides enough energy to power the unit for 7-14 days.

Technical specifications

Power supply voltage	12 V $\overline{\text{---}}$
Power consumption	170 mA
Maximum output voltage at 500 Ω load	8900 V
Maximum fence length	12000 m
Maximum stored energy	5.85 Joule
Maximum impulse energy	4.5 Joule
Degree of protection	IPX4
Dimensions	210 × 265 × 100 mm
Weight	1.76 kg

Electric fence energizer DL 7200

0224

The DL 7200 energizer is the perfect choice for fencing in or keeping out domestic or wild animals – horses, cows, dogs, boars, deer, bears, wolves, etc.

The DL 7200 is designed for enclosures up to 25000 m in length.

It can be powered from 230 V via a 12 V adapter or from a 12 V car accumulator (neither included in the package). A 12 V / 45 Ah car accumulator provides enough energy to power the unit for 5-10 days.

Technical specifications

Power supply voltage	12 V $\overline{=}$
Power consumption	300 mA
Maximum output voltage at 500 Ω load	9700 V
Maximum fence length	25000 m
Maximum stored energy	9.36 Joule
Maximum impulse energy	7.2 Joule
Degree of protection	IPX4
Dimensions	210 × 265 × 100 mm
Weight	2.45 kg

Electric fence energizer DL 10000

1296

The DL 10000 energizer is the perfect choice for fencing in or keeping out domestic or wild animals – horses, cows, dogs, boars, deer, bears, wolves, etc.

The DL 10000 is designed for enclosures up to 35000 m in length.

It can be powered from 230 V via a 12 V adapter or from a 12 V car accumulator (neither included in the package). A 12 V / 45 Ah car accumulator provides enough energy to power the unit for 2-3 days.

Technical specifications

Power supply voltage	12 V $\overline{=}$
Power consumption	600 mA
Maximum output voltage at 500 Ω load	9900 V
Maximum fence length	35000 m
Maximum stored energy	12.9 Joule
Maximum impulse energy	10 Joule
Degree of protection	IPX4
Dimensions	210 × 265 × 100 mm
Weight	2.52 kg

Electric fence energizer Classic DL 4100

2074

The Classic DL 4100 energizer is the perfect choice for fencing in or keeping out domestic or wild animals – dogs, sheep, goats, pigs, horses, cows, boars, deer, wolves, foxes, etc.

The Classic DL 4100 is designed for enclosures up to 9000 m in length.

It can be powered from 230 V via a 12 V adapter or from a 12 V car accumulator (neither included in the package). A 12 V / 45 Ah car accumulator provides enough energy to power the unit for 4-5 days.

Technical specifications

Power supply voltage	12 V $\overline{\text{---}}$
Power consumption	275 mA
Maximum output voltage at 500 Ω load	8100 V
Maximum fence length	9000 m
Maximum stored energy	4.41 Joule
Maximum impulse energy	4.1 Joule
Degree of protection	IPX4
Dimensions	200 × 140 × 70 mm
Weight	1.52 kg

Benefits of DL 3200, DL 4500, DL 7200, DL 1000 and Classic DL 4100

These devices are offered at manufacturer price, so do not contain the extra percentage charged by distributors.

High and stable power

We have developed an electronic circuit that efficiently produces powerful impulses at relatively low power consumption. The result is the ability to efficiently electrify fences up to 35 km long.

Gift: Electric Fence Design & Construction Guide

The booklet entitled “Electric Fence Design & Construction Guide” is included with each energizer. It provides rich information on the design and construction of electric fences. English language, 36 color pages.

Indicator lights

The devices are equipped with LEDs to check the power supply. The green LED confirms the presence of voltage. If the power supply voltage drops below 10.5 V (when the accumulator is discharging), the red LED lights up.

Compact electric fence energizer systems with DL 3200, DL 4500 and DL 7200

Compact electric fence energizer systems are the ideal solution for electric fences to be installed in places where there is no possibility to connect to the mains. The system has an autonomy of non-stop operation for several years. The system is very simple to install: it is fixed vertically on a wooden support with the solar panel facing south and the output wires connected to the grounding and the electric fence, respectively. The only requirement is to place away from objects that may shade the solar panel.

The system is rain and snow resistant. The box can be locked with an attached key.

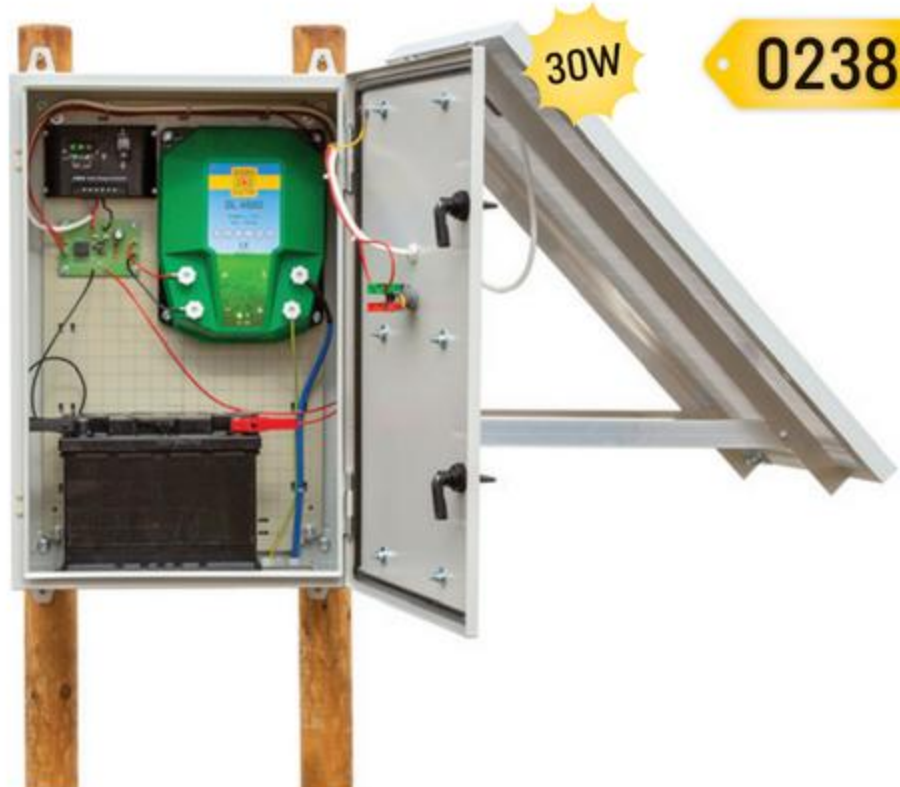

30W

0237

Compact energizer system DL 3200

The system consists of a DL 3200 impulse generator (3.2 Joule output), and a 30 W solar panel system + a charge controller. A 12 V car accumulator (min. 45 Ah, not included in the package) will be used to power the system.

30W

0238

Compact energizer system DL 4500

The system consists of a DL 4500 impulse generator (4.5 Joule output), and a 30 W solar panel system + a charge controller. A 12 V car accumulator (min. 45 Ah, not included in the package) will be used to power the system.

50W

0239

Compact energizer system DL 7200

The system consists of a DL 7200 impulse generator (7.2 Joule output), and a 50 W solar panel system + a charge controller. A 12 V car accumulator (min. 45 Ah, not included in the package) will be used to power the system.

ECO-compact electric fence energizer with solar panel 30 W

The compact electric fence energizer is a convenient and safe solution for the electrification of temporary or permanent electric fences in areas where there is no access to the 230 V mains.

The system can operate autonomously even for years, requiring minor interventions such as checking that the accumulator is working properly, regular cleaning of the solar panel and maintenance of the electric fence line.

The system is completely assembled in a box and contains all the necessary elements to operate independently from the 230 V electricity mains.

0562 • DL 3200 (3.2 Joule, 7 km)

0563 • DL 4500 (4.5 Joule, 12 km)

Advantages

- Robust box, resistant to moisture (rain, snow, splash water).
- On the outside, the system is equipped with a switch, which makes it easy to turn the electric fence on/off without having to open the box.
- The accumulator is continuously recharged by the solar panel.
- Over-voltage protection – disconnecting the accumulator in full sunlight can cause the voltage generated by the solar panel to increase, which can damage the energizer. The box includes an additional electronic circuit to protect against this.
- Moving the system (for the purpose of moving the temporary electric fence) is very easy, reassembly in another place is very simple.

System elements

- ❶ – Electric fence energizer.
- ❷ – Accumulator (not included).
- ❸ – Solar panel.
- ❹ – Charge controller.
- ❺ – Over-voltage protection circuit.
- ❻ – Electric fence on/off switch.
- Ⓐ – Impulse output cable (electric fence connection); Ⓑ – Grounding cable;
- Ⓒ – Accumulator positive pole clamp;
- Ⓓ – Accumulator negative pole clamp; Ⓔ – Solar panel connection cable;
- Ⓕ – Charge indicator;
- Ⓖ – Charge level indicator.

Installation

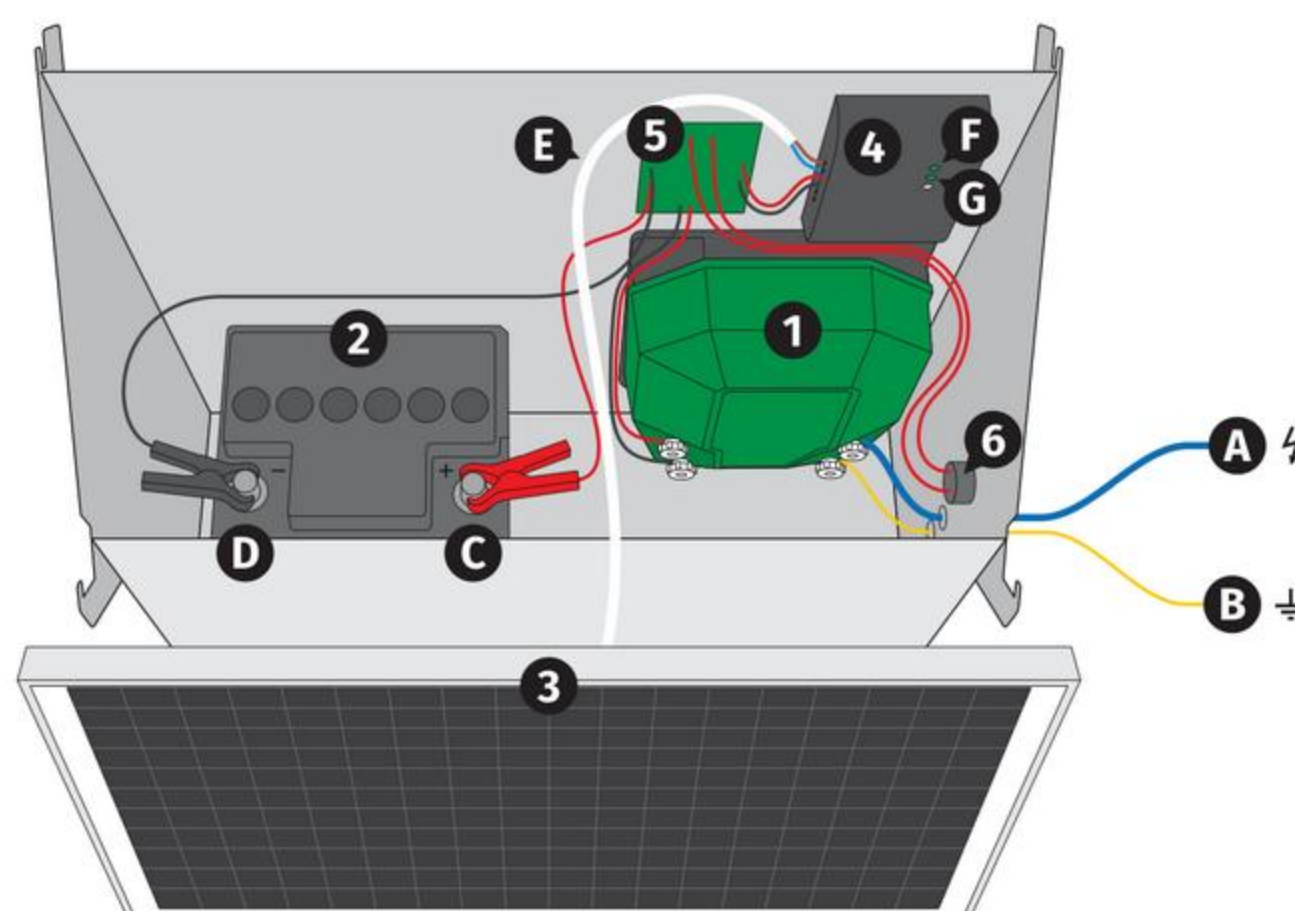

Mount the box in a place out of shade, near the electric fence, with the solar panel ❸ facing south. Create the grounding, connect the grounding cable to it Ⓑ, then connect the blue cable Ⓐ to the wires of the electric fence by using a connector.

Grounding

For proper operation, the system needs an adequate grounding. For grounding you can use an M12 threaded metal bar or an L-profile metal bar. Please note: the grounding bar is not included in the package!

Accumulator

For energy storage, use a 12 V accumulator (acid or gel) ❹. **Please note: the accumulator is not included in the package!** Do not use Ni-MH or Li-ion accumulators! Use an accumulator with at least 45 Ah capacity. The maximum capacity is determined by the size that fits in the system box.

Electric fence energizer DL 500

0228

The DL 500 energizer is the perfect choice for fencing in domestic animals – pigs, horses, cattle, dogs, poultry, etc.

The DL 500 is designed for enclosures up to 1000 m in length.

It can be powered by the included 230/12 V mains adapter. It is also possible to power the device using a 12 V car accumulator, in which case you do not need the mains adapter.

Technical specifications

Power supply voltage	~12 V or ~230 V
Power consumption	57 mA
Maximum output voltage at 500 Ω load	8400 V
Maximum fence length	1000 m
Maximum stored energy	1 Joule
Maximum impulse energy	0.5 Joule
Degree of protection	IPX4
Dimensions	205 × 105 × 64 mm
Weight	0.65 kg

Electric fence energizer DL 250

0344

The DL 250 energizer is the perfect choice for fencing in domestic animals – sheep, goats, pigs, horses, cattle, dogs, etc.

The DL 250 is designed for enclosures up to 1000 m in length.

The DL 250 can be powered by a special dry 9 V, 120 Ah or 175 Ah dry battery or a 12 V car accumulator (neither included in the package).

The device has two operating modes: extreme and ECO. In ECO mode the consumption of the appliance is lower, the energy of the impulses is lower.

Technical specifications

Power supply voltage	9-12 V ~
Power consumption	24 mA
Maximum output voltage at 500 Ω load	9400 V
Maximum fence length	1000 m
Maximum stored energy	0.5 Joule
Maximum impulse energy	0.25 Joule
Degree of protection	IPX4
Dimensions	150 × 235 × 280 mm
Weight	1.12 kg

Dry battery 9 V, 120 Ah

0343

Dry battery for supplying power to electric fence energizers. Warning: the battery is not rechargeable!

Voltage	9 V
Capacity	120 Ah
Dimensions	166 × 111 × 113 mm

Dry battery 9 V, 175 Ah

1025

Dry battery for supplying power to electric fence energizers. Warning: the battery is not rechargeable!

Voltage	9 V
Capacity	175 Ah
Dimensions	190 × 126 × 160 mm

230/12 V mains adapter

0240

The 230/12 V adapter can be used to power the DL 3200, DL 4500, DL 7200, DL 10000 or Classic DL 4100 electric fence energizers directly from the mains (purchase adapter separately). The output voltage is stabilized.

Input voltage	~100-240 V, 50 Hz
Output voltage	12 V
Output current	1 A
Short-circuit protection	Yes
Stabilized	Yes

AKO mains adapter, 230/13.8 V

0930

230/13.8 V mains adapter with special plug for AKO electric fence energizers.

Input	~100-240 V, 50-60 Hz
Output	13.8 V, 800 mA
Stabilized	Yes

Mains adapter with transformer, 230/12 V

0014

230/12 V mains adapter with transformer for supplying power to DL 4000 energizer.

Input	230 V, 50 Hz
Output	12 V, 500 mA
Stabilized	Yes

AKO electric fence energizers

AKO Power N Series

AKO Power N energizers are suitable for fencing in or keeping out domestic or wild animals. The devices are powered by 230 V mains.

AKO Power N 1200

AKO Power N 3500

AKO Power N 4800

	N 1200	N 3500	N 4800
Consumption	5 W	7 W	7 W
Maximum output voltage	12500 V	11500 V	9000 V
Maximum fence length	2000 m	6000 m	8000 m
Maximum impulse energy	1.2 Joule	3.5 Joule	4.8 Joule

AKO Duo Power X Series

AKO Duo Power X energizers are suitable for fencing in or keeping out domestic or wild animals. The devices are powered by 230 V mains (via the included mains adapter), or by a 12 V, min. 45 Ah car accumulator.

AKO Duo Power X 1000

AKO Duo Power X 2500

AKO Duo Power X 4000

	X 1000	X 2500	X 4000
Power consumption	40-115 mA	75-193 mA	77-300 mA
Maximum output voltage	12000 V	9600 V	9600 V
Maximum fence length	1500 m	4000 m	12000 m
Maximum impulse energy	1 Joule	2.5 Joule	4 Joule

AKO electric fence energizers

AKO Power A 2000, 12 V, 2 Joule

AKO Power A energizer is suitable for fencing in or keeping out domestic or wild animals. The device is powered by a 12 V, min. 45 Ah car accumulator.

0792

Consumption	75-193 mA
Maximum output voltage	9600 V
Maximum fence length	4000 m
Maximum impulse energy	2 Joule

AKO Power Profi Ni 10000, 230 V, 10 Joule

AKO Profi Ni 10000 energizer is designed for large fences with a maximum length of 80000 m. The device operates exclusively on 230 V mains power supply (without adapter).

0807

Power consumption	13 W
Maximum output voltage	10200 V
Maximum fence length	80000 m
Maximum impulse energy	10 Joule

AKO Mobil Power AN 4000, 12 V, 3.8 Joule

The AKO Mobil Power AN 4000 energizer has two operating levels, mode I and II, with different parameters. It is intended for fencing domestic and wild animals and operates on a 12 V, min. 45 Ah car accumulator.

0856

	I	II
Consumption	55-245 mA	60-300 mA
Maximum output voltage	10000 V	11000 V
Maximum fence length	30000 m	35000 m
Maximum impulse energy	3 Joule	3,8 Joule

AKO Duo Power X 6000 smart, 230/12 V, 5 Joule

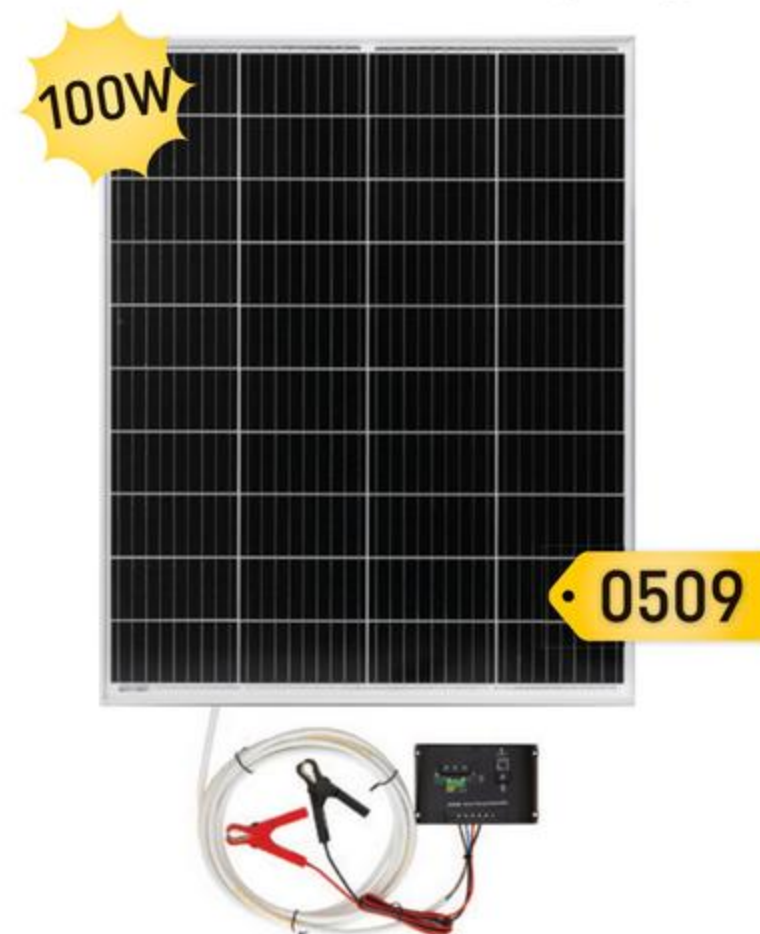

The AKO Duo Power X 6000 smart energizer has two operating levels, mode I and II, with different parameters. It is intended for fencing domestic and wild animals and operates on 230 V mains power or a 12 V, min. 45 Ah car accumulator.

0921

	I	II
Consumption	42-152 mA	42-386 mA
Maximum output voltage	10000 V	12400 V
Maximum fence length	30000 m	40000 m
Maximum impulse energy	2 Joule	5 Joule

Solar systems

Photovoltaic systems can be used in places where there is no possibility of connection to the mains electricity, primarily for the purpose of charging lead-acid accumulators.

These systems are supplied partially assembled. The accumulator is connected to the charge controller. The controller will indicate if the charge level of the accumulator is low. The accumulator can be used to power the electric fence energizer, or any low power 12 V DC consumer – telephone charger, 12/230 V inverter, LED bulb, etc.

Cell type	30 W, monocrystalline	50 W, monocrystalline	100 W, monocrystalline
Approximate dimensions*	650 × 360 × 25 mm	665 × 500 × 30 mm	840 × 670 × 30 mm
Charge controller	12 V, 10 A	12 V, 10 A	12 V, 10 A
Accumulator capacity	Max. 70 Ah	Max. 100 Ah	Max. 200 Ah
Connection cables	Panel → Controller: 5 m Controller → Accumulator: 1 m	Panel → Controller: 5 m Controller → Accumulator: 1 m	Panel → Controller: 5 m Controller → Accumulator: 1 m

* The dimensions may vary within ±15%.

Solar system charge controller

The charge controller controls the voltage and the current between the solar panel and the accumulator. This component is essential between the solar panel and the accumulator.

Operating voltage	12/24 V
Current	10 A
Dimensions	14 × 9 × 3 cm
Operating temperature	-20...+60 °C

12 V LED light bulb

Energy-saving bulb suitable for lighting. The use of LED bulbs is essential where power is supplied by an accumulator.

Power supply voltage	12 V, AC/DC
Power consumption	8 W
Socket type	E27
Brightness	800 lm, 4100 K

Solar lighting system

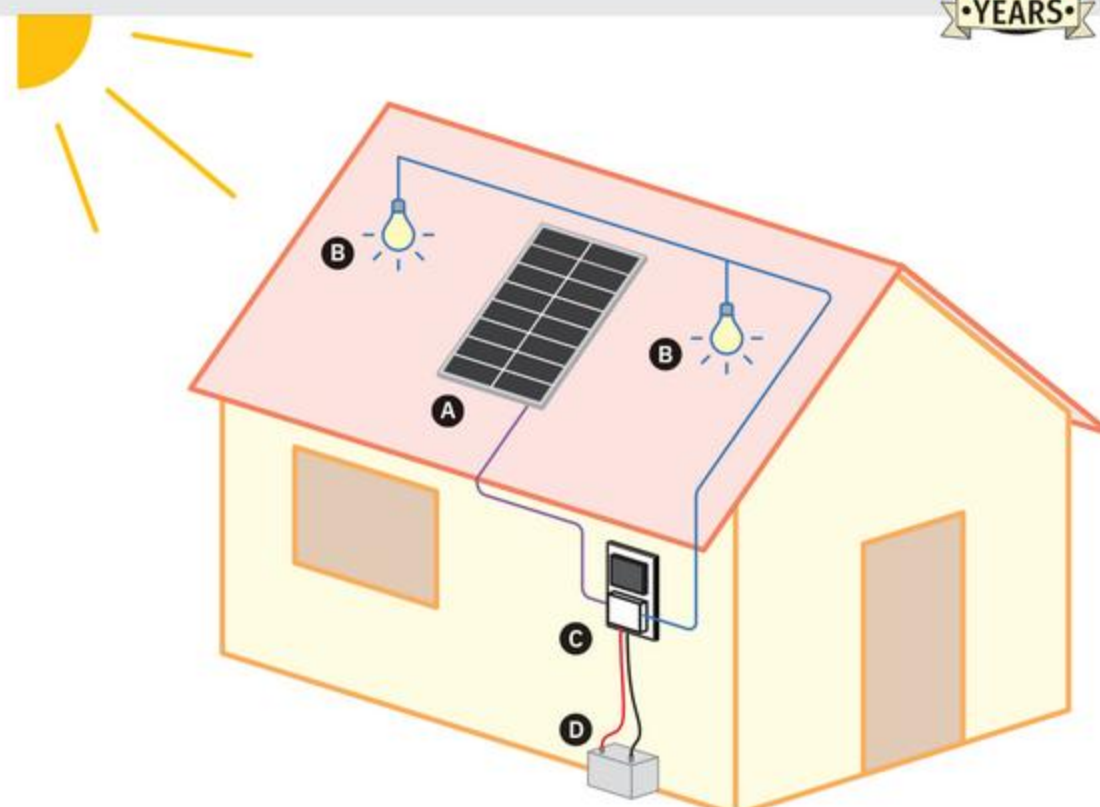

Photovoltaic lighting systems are a very efficient solution in places where there is no possibility of connection to the mains electricity, for example: cabins, caravans, sheepfolds.

The system is supplied partially assembled. Installation is very easy: the solar panel is positioned towards the south, tilted at 45 degrees. It can be attached through the holes on the aluminum frame.

A 12 V, 45-100 Ah car accumulator (not included in the package) will be used for energy storage. The accumulator is connected to the charge controller. Depending on the power of the accumulator and the number of bulbs, the system can run 4-8 hours per day.

In addition to the controller and light switch, the panel contains a cigarette lighter socket which can power any device suitable for use in the car – e.g. USB phone charger, 12/230 V inverter or FM music transmitter.

Example of installation

The solar panel **A** can be mounted on the roof of a building if one roof surface faces south.

The bulbs **B** can be placed anywhere by preference, provided they are protected from extreme humidity. Even if the bulbs are fully insulated, the contacts of the plugs will only last for a short time in excessively damp conditions.

The panel **C** shall be mounted in an accessible place but away from damp (rain, snow). Please note that the light switch is located on the panel, the car cigarette lighter socket can also be accessed from here (to charge a cell phone or to power an FM transmitter).

The car accumulator **D** (not included in the package) shall be placed near the control panel.

Technical specifications

Cables	Solar panel → controller: 5 m
	Controller → accumulator: 1.5 m
	Controller → bulbs: 5 m
	Bulb ↔ bulb: 5 m
Bulbs	12 V, 8 W, 650 lm, LED
Accumulator	12 V, 45–100 Ah Not included in the package!
Solar panel cells	Monocrystalline
Solar panel power	50 W

Please note: the warranty only covers the solar panel and the charge controller, bulbs are not included!

2-bulb system

3-bulb system

4-bulb system

Electric fence wire – 11 Ω/m • 45 kg • 250/500 m

The wire is suitable for small enclosures, exclusively for domestic animals.

It can be used for temporary or seasonal fencing.

Maximum fence length	500 m
Diameter	2 mm
Breaking strength	45 kg
Electrical resistance	11 Ω/m
Metallic inserts	3 × 0.16 mm inox

Electric fence wire – 4.8 Ω/m • 65 kg • 250/400/1000 m

The wire is suitable for small and medium enclosures, exclusively for domestic animals.

It can be used for temporary or seasonal fencing.

Maximum fence length	500 m
Diameter	3 mm
Breaking strength	65 kg
Electrical resistance	4.8 Ω/m
Metallic inserts	6 × 0.16 mm inox

Electric fence wire – 0.45 Ω/m • 90 kg • 250/500 m

The wire is suitable for small, medium and large enclosures, exclusively for domestic animals.

It can be used for temporary or seasonal fencing.

Maximum fence length	9000 m
Diameter	3 mm
Breaking strength	90 kg
Electrical resistance	0.45 Ω/m
Metallic inserts	3 × 0.2 mm inox 1 × 0.25 mm copper

Electric fence wire – 0.4 Ω/m • 130 kg • 500/1000 m

The wire is suitable for small, medium and large enclosures, for domestic and/or wild animals.

It can be used for temporary or seasonal fencing.

Maximum fence length	10000 m
Diameter	3 mm
Breaking strength	130 kg
Electrical resistance	0.4 Ω/m
Metallic inserts	5 × 0.2 mm inox 1 × 0.25 mm copper

Electric fence wire – 0.11 Ω/m • 130 kg • 500/1000 m

The wire is suitable for small, medium and large enclosures, for domestic and/or wild animals.

It can be used for temporary or seasonal fencing.

Maximum fence length	20000 m
Diameter	3 mm
Breaking strength	130 kg
Electrical resistance	0.11 Ω/m
Metallic inserts	3 × 0.2 mm inox 3 × 0.25 mm copper

Electric fence wire – 0.45 Ω/m • 100 kg • 250/500/1000 m

The wire is suitable for small, medium and large enclosures, for domestic and/or wild animals.

It can be used for temporary or seasonal fencing.

Maximum fence length	9000 m
Diameter	3 mm
Breaking strength	100 kg
Electrical resistance	0.45 Ω/m
Metallic inserts	3 × 0.2 mm inox 2 × 0.25 mm HPWA

Braided electric fence wire - 0.09 Ω/m • 150 kg • 200 m

The wire is suitable for medium and large fencing, for domestic and wild animals. The wire is suitable for both permanent and temporary fencing.

The structure of the wire is not the usual one, compared to other wires on the market, it has a braided structure. Due to its tangle-free characteristic, braided wire is recommended for temporary, frequently moved systems.

Maximum fence length	25000 m
Diameter	3 mm
Breaking strength	150 kg
Electrical resistance	0.09 Ω/m
Metallic inserts	6 × 0.2 mm SS 3 × 0.25 mm Cu

Electric fence rope - 0.33 Ω/m • 330 kg • 400 m

The rope is suitable for small, medium and large fencing, for large domestic and/or wild animals.

It can be used for permanent or temporary fencing. The important feature of the rope is its high breaking strength – it does not easily break if a large animal forces the fence.

Maximum fence length	12000 m
Diameter	4 mm
Breaking strength	330 kg
Electrical resistance	0.33 Ω/m
Metallic inserts	6 × 0.3 mm zinc

Electric fence rope - 2.3 Ω/m • 590 kg • 200/500 m

The rope is suitable for small, medium and large fencing, for large domestic and/or wild animals.

It can be used for permanent or temporary fencing. The important feature of the rope is its high breaking strength – it does not easily break if a large animal forces the fence.

Maximum fence length	6000 m
Diameter	6 mm
Breaking strength	590 kg
Electrical resistance	2.3 Ω/m
Metallic inserts	3 × 0.4 mm inox

Electric fence rope – 0.4 Ω/m • 590 kg • 200/500 m

The rope is suitable for small, medium and large fencing, for large domestic and/or wild animals.

It can be used for permanent or temporary fencing. The important feature of the rope is its high breaking strength – it does not easily break if a large animal forces the fence.

Maximum fence length	10000 m
Diameter	6 mm
Breaking strength	590 kg
Electrical resistance	0.4 Ω/m
Metallic inserts	5 × 0.2 mm inox 1 × 0.25 mm copper

Electric fence rope – 0.65 Ω/m • 330 kg • 400/1000 m

NEW

The rope is suitable for small, medium and large fencing, for large domestic and/or wild animals.

It can be used for permanent or temporary fencing. The important feature of the rope is its high breaking strength – it does not easily break if a large animal forces the fence.

Maximum fence length	7000 m
Diameter	4 mm
Breaking strength	330 kg
Electrical resistance	0.65 Ω/m
Metallic inserts	4 × 0.28 mm zinc

Braided electric fence rope – 0.65 Ω/m • 400 kg • 400/1000 m

NEW

The rope is suitable for small, medium and large fencing, for large domestic and/or wild animals.

It can be used for permanent or temporary fencing. The important feature of the rope is its high breaking strength – it does not easily break if a large animal forces the fence.

The structure of the wire is not the usual one, compared to other wires on the market, it has a braided structure. Due to its tangle-free characteristic, braided wire is recommended for temporary, frequently moved systems.

Maximum fence length	7000 m
Diameter	4 mm
Breaking strength	400 kg
Electrical resistance	0,65 Ω/m
Metallic inserts	4 × 0.28 mm zinc

Electric fence tape 10 mm – 11 Ω/m • 60 kg • 200/500 m

The tape is suitable for small and medium enclosures, exclusively for domestic animals.

It can be used for temporary or seasonal fencing. Important features of the tape are its good visibility and high elasticity.

Maximum fence length	400 m
Width	10 mm
Breaking strength	60 kg
Electrical resistance	11 Ω/m
Metallic inserts	3 × 0.16 mm inox

Electric fence tape 20 mm – 9 Ω/m • 90 kg • 200/500 m

The tape is suitable for small and medium enclosures, exclusively for domestic animals.

It can be used for temporary or seasonal fencing. Important features of the tape are its good visibility and high elasticity.

Maximum fence length	400 m
Width	20 mm
Breaking strength	90 kg
Electrical resistance	9 Ω/m
Metallic inserts	4 × 0.16 mm inox

Electric fence tape 40 mm – 3.8 Ω/m • 120 kg • 200/500 m

The tape is suitable for small and medium enclosures, for domestic and/or wild animals.

It can be used for temporary or seasonal fencing. Important features of the tape are its good visibility and high elasticity.

Maximum fence length	2400 m
Width	40 mm
Breaking strength	120 kg
Electrical resistance	3.8 Ω/m
Metallic inserts	8 × 0.16 mm inox

Electric fence tape 10 mm – 0.45 Ω/m • 60 kg • 200/500 m

The tape is suitable for small and medium enclosures, exclusively for domestic animals.

It can be used for temporary or seasonal fencing. Important features of the tape are its good visibility and high elasticity.

Maximum fence length	9000 m
Width	10 mm
Breaking strength	60 kg
Electrical resistance	0.45 Ω/m
Metallic inserts	3 × 0.2 mm inox, 1 × 0.25 mm copper

Electric fence tape 20 mm – 0.4 Ω/m • 90 kg • 200/500 m

The tape is suitable for small, medium and large enclosures, exclusively for domestic animals.

It can be used for temporary or seasonal fencing. Important features of the tape are its good visibility and high elasticity.

Maximum fence length	10000 m
Width	20 mm
Breaking strength	90 kg
Electrical resistance	0.4 Ω/m
Metallic inserts	4 × 0.2 mm inox, 1 × 0.25 mm copper

Electric fence tape 40 mm – 0.38 Ω/m • 120 kg • 200/500 m

The wire is suitable for small, medium and large enclosures, for domestic and/or wild animals.

It can be used for temporary or seasonal fencing. Important features of the tape are its good visibility and high elasticity.

Maximum fence length	11000 m
Width	40 mm
Breaking strength	120 kg
Electrical resistance	0.38 Ω/m
Metallic inserts	5 × 0.2 mm inox, 1 × 0.25 mm copper

Steel wire 1.6 mm – 0.12 Ω/m • 200 kg • 200/400/1000 m

Steel wire is particularly suitable for permanent electric fencing. The material is protected against corrosion by galvanizing. Due to its mechanical and electrical properties, it is best suited for permanent electric fencing.

Maximum fence length	13000 m
Diameter	1.6 mm
Breaking strength	200 kg
Electrical resistance	0.12 Ω/m
Strands	7

Galvanized steel wire for electric fence – 0.035 Ω/m • 650 kg • 625 m

Galvanized steel wire, suitable for permanent electric fencing.

Due to its low resistance, it conducts electric current very well over long distances without significant loss.

The material is protected against corrosion by galvanization.

Diameter	2.5 mm
Breaking strength	650 kg
Electrical resistance	0.035 Ω/m
Strands	1

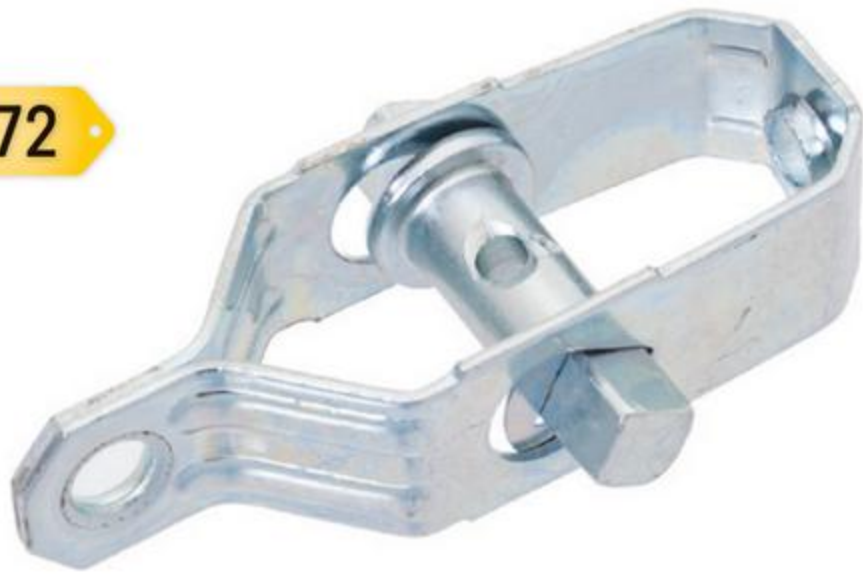

Wire dispenser

The wire dispenser makes it extremely easy to install the wire of the permanent electric fence. Effectively prevents unwanted twisting of the wire.

Wire tensioner, 80 mm

0172

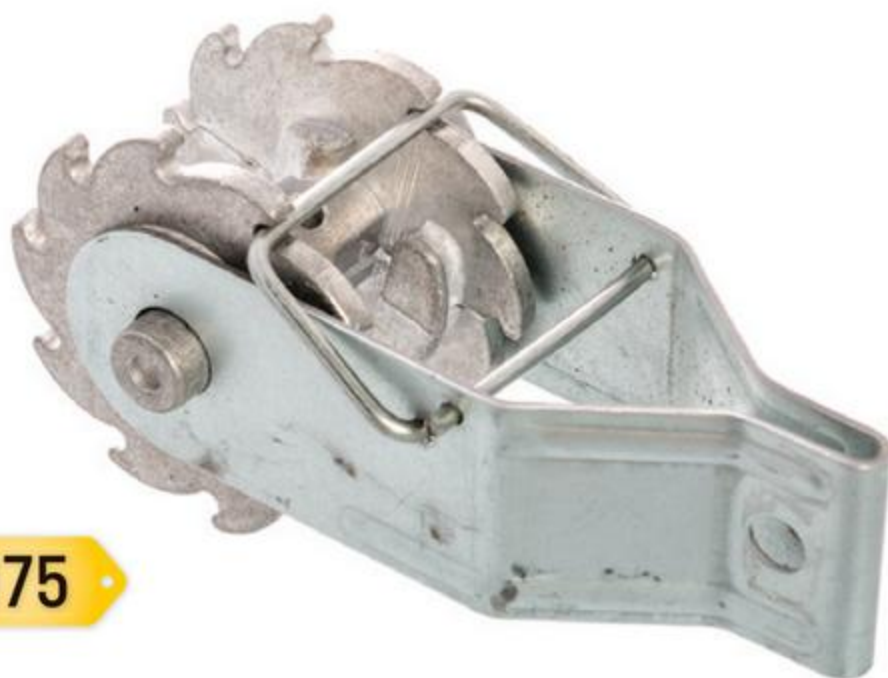

Tensioning device with automatic locking system (full length is 80 mm). Recommended for 1.6 mm diameter electric fence wire.

Ratchet wire tensioner

0175

Robust ratchet tensioning device with locking/unlocking system. Suitable for wire diameter 1.6–2.5 mm.

Tensioning spring for 1.6 mm wire

Tensioning spring for electric fence wire of max. 1.6 mm. Used for permanent fencing to compensate for expansion caused by temperature variations.

0126

Diameter: 20 mm
Length: 130/185 mm

Tensioning spring for 2.5 mm wire

Tensioning spring for electric fence wire of max. 2.5 mm. Used for permanent fencing to compensate for expansion caused by temperature variations.

0174

Diameter: 40 mm
Length: 250/330 mm

Rotating wire tensioner

0837

Device for adjusting the tensing degree of the permanent electric fence wire. Can be mounted without removing the wire.

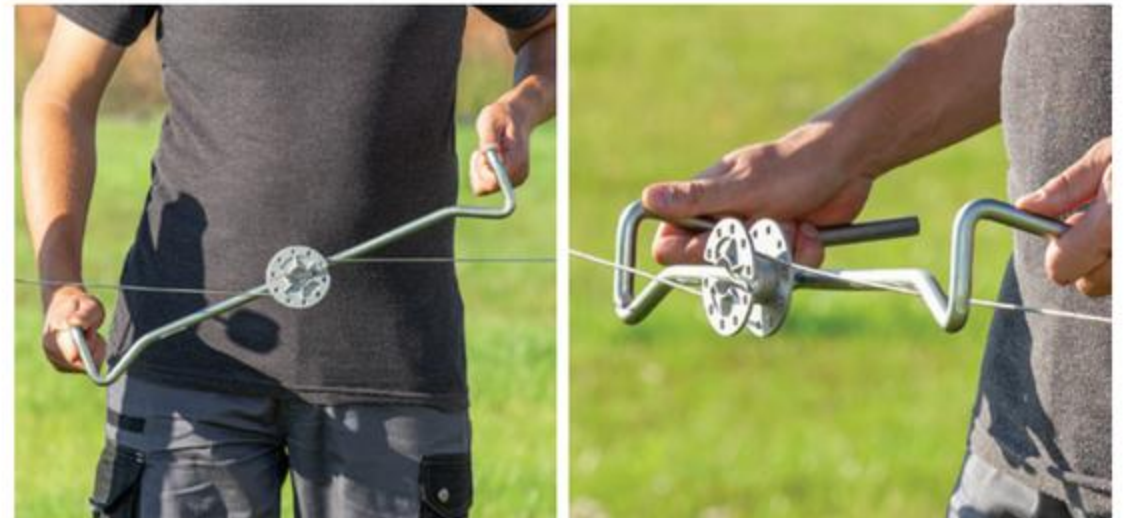

Tensioning arm for rotating wire tensioner

0838

Indispensable tool when constructing permanent electric wire fences. Used to adjust the wire tension with the rotating wire tensioner.

Reel 32 × 15 cm with sole and strap

Reel to store the electric fence wire while moving the fence or during storage.

Capacity: approx. 2000 m of 3 mm thick electric fence wire.

0193

Reel 32 × 15 cm

Reel to store the electric fence wire while moving the fence or during storage.

Capacity: approx. 2000 m of 3 mm thick electric fence wire.

0105-2

M12 threaded metallic rod for grounding

0088

Galvanized, threaded metallic rod for grounding the electric fence system. With M12 thread and two nuts. Length: 1 m.

T-profile metallic rod for grounding

NEW

0088-1

T-profile 20 × 20 mm galvanized metallic rod for grounding the electric fence system. With M6 screw for connection. Length: 1 m.

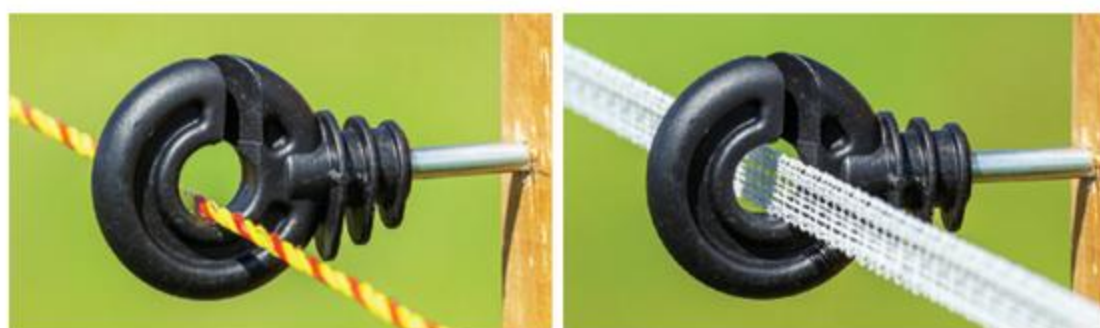

Ring insulator with wood screw

The most commonly used insulator, recommended for wooden structures. 25 pcs./pack.

0074

25 pcs.

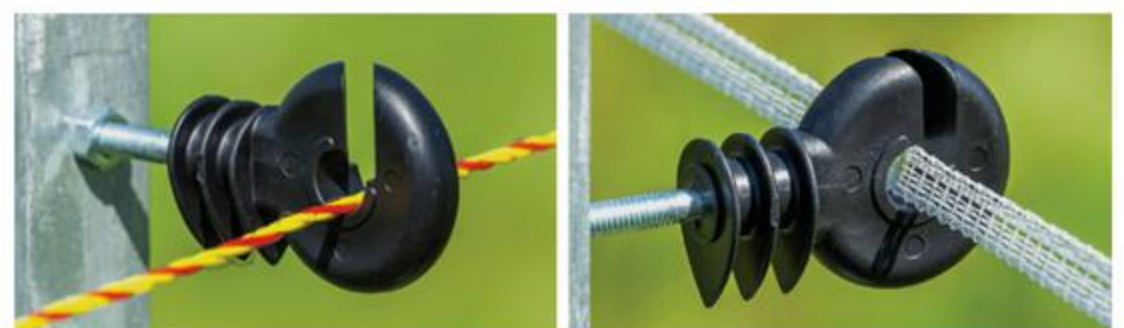

Ring insulator with M6 metric screw

Insulator with M6 metric thread, recommended for metal posts and structures.

0124

1 pc.

Reinforced ring insulator

Reinforced ring insulator, recommended for wooden structures. 25 pcs./pack.
The plastic ring is reinforced internally by the extension of the metal screw.

Ring insulator set 100 pieces + gift

Ring insulator for wooden structures. Set of 100 pcs./box + free drill chuck.

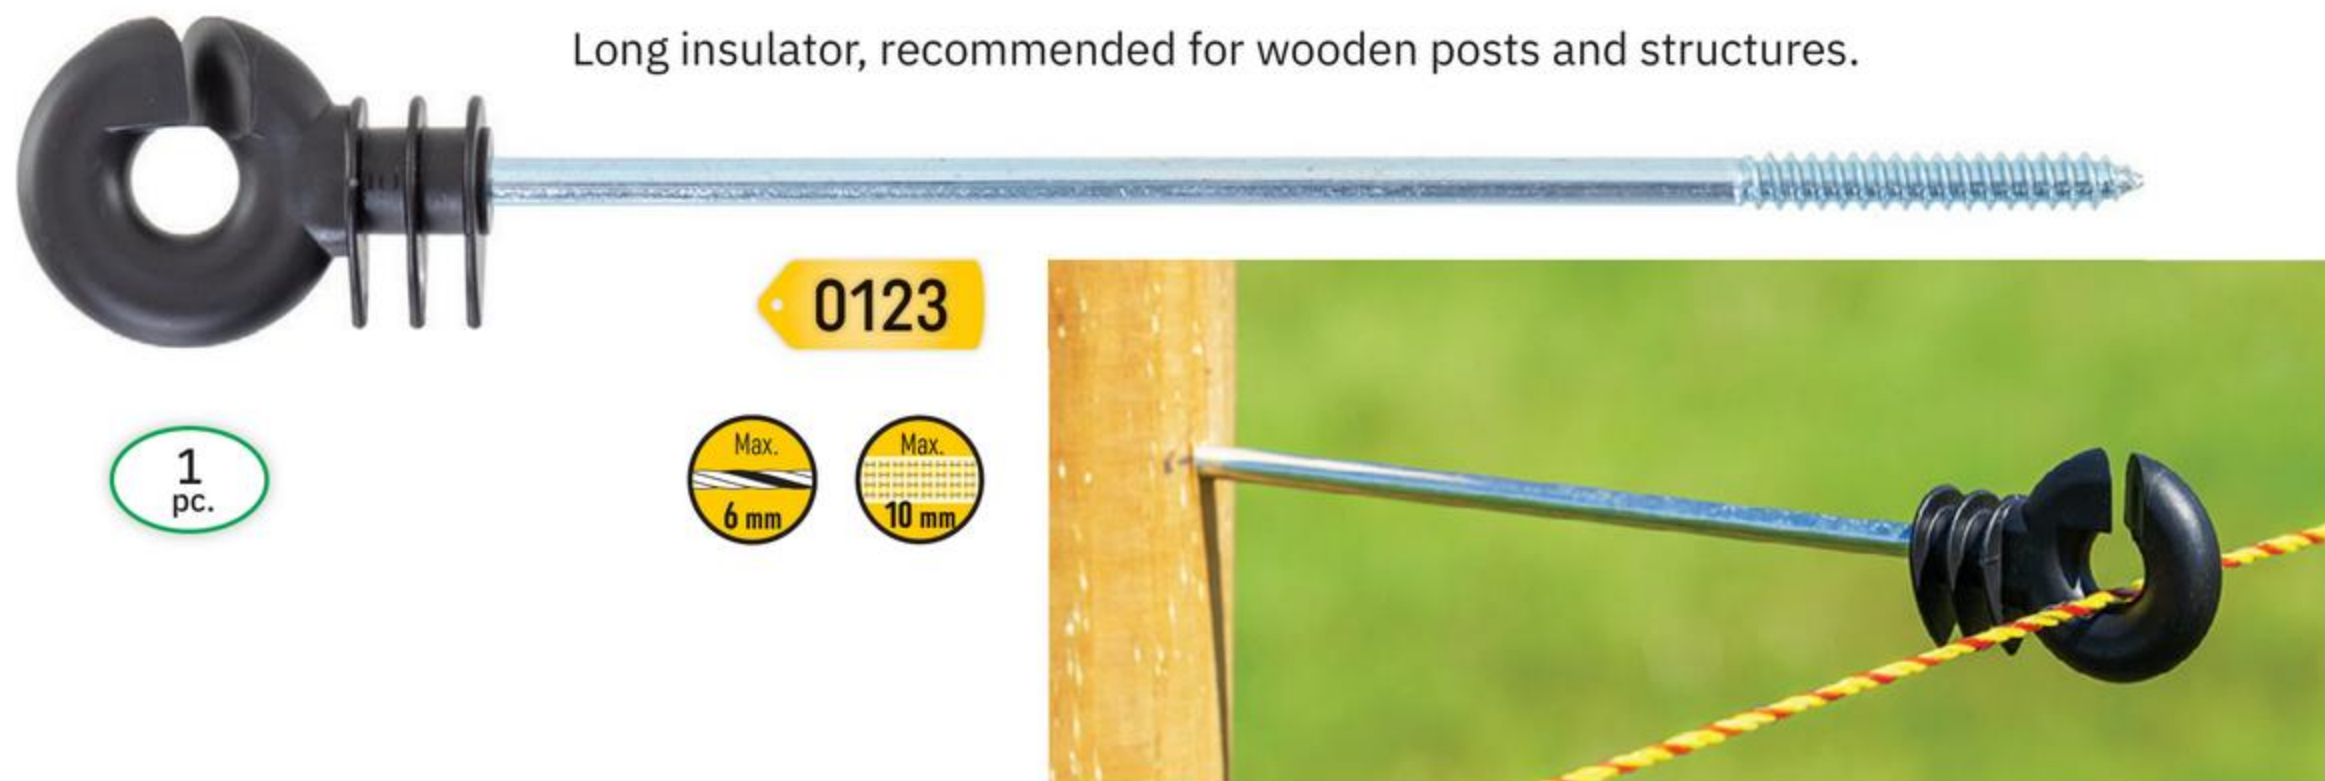

Ring insulator set 300 pieces + gift

Ring insulator for wooden structures. Set of 300 pcs./box + free drill chuck.

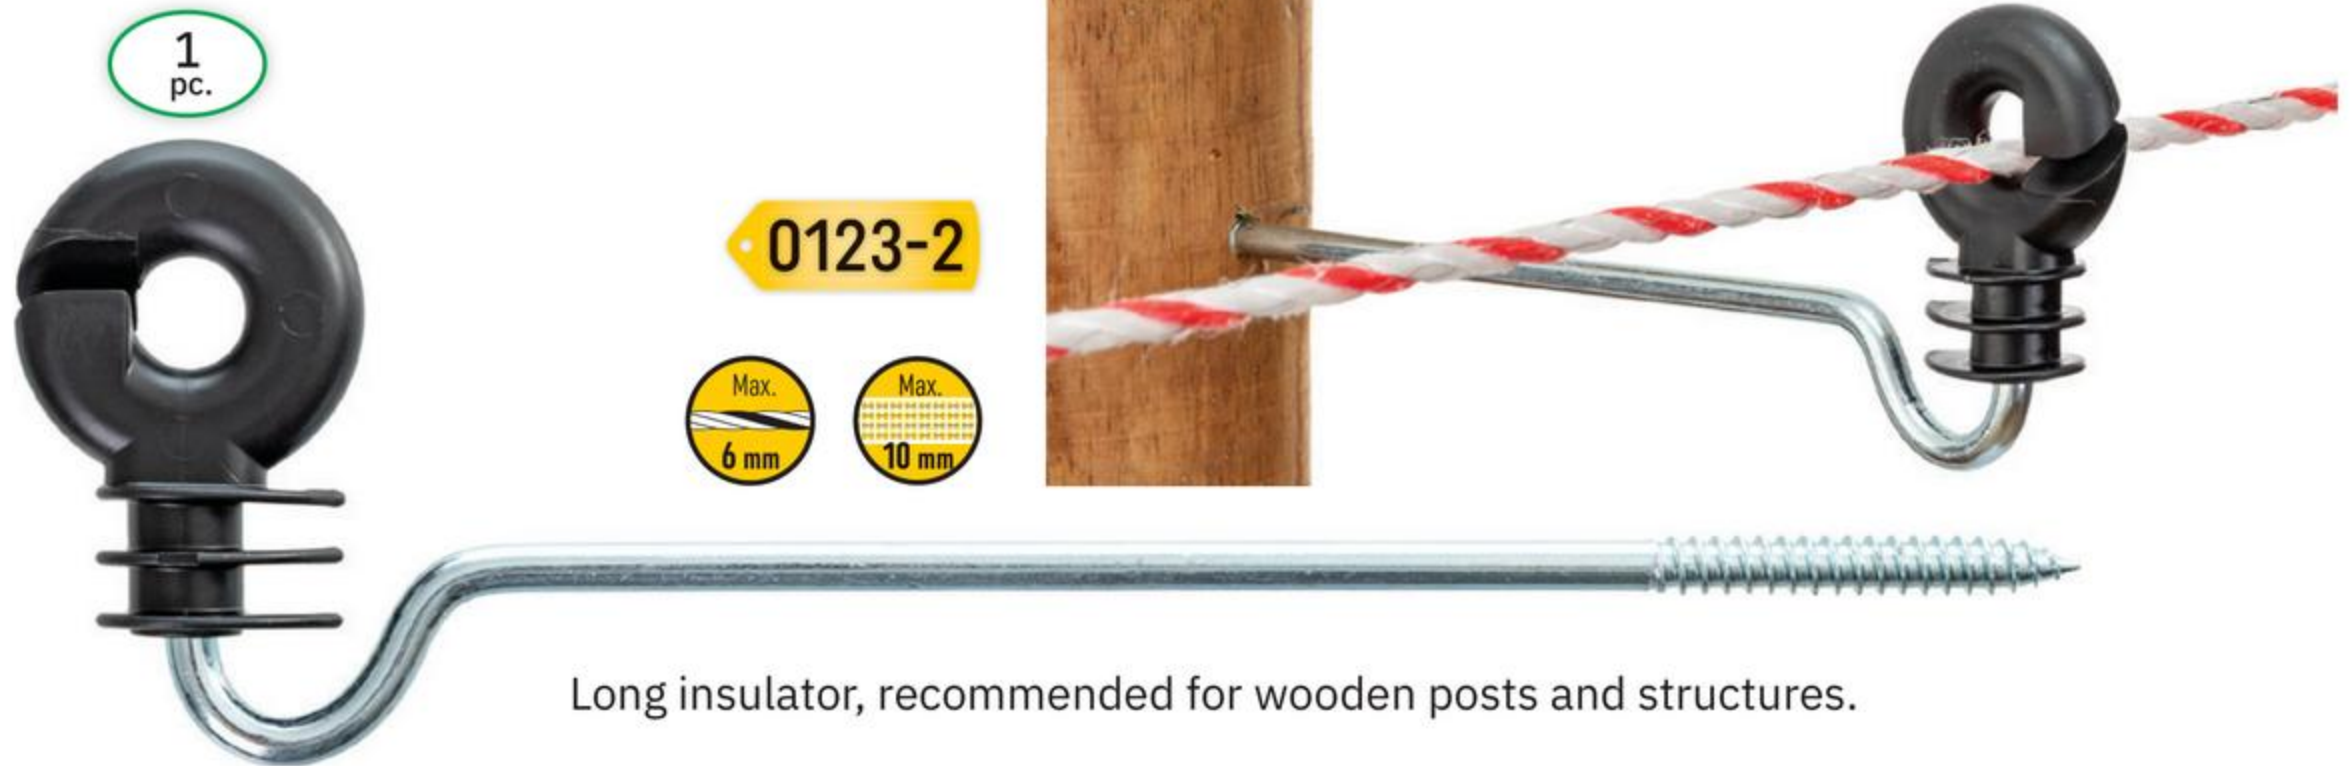

Long ring insulator with wood screw

Long insulator, recommended for wooden posts and structures.

Long ring insulator with wood screw, 220 mm

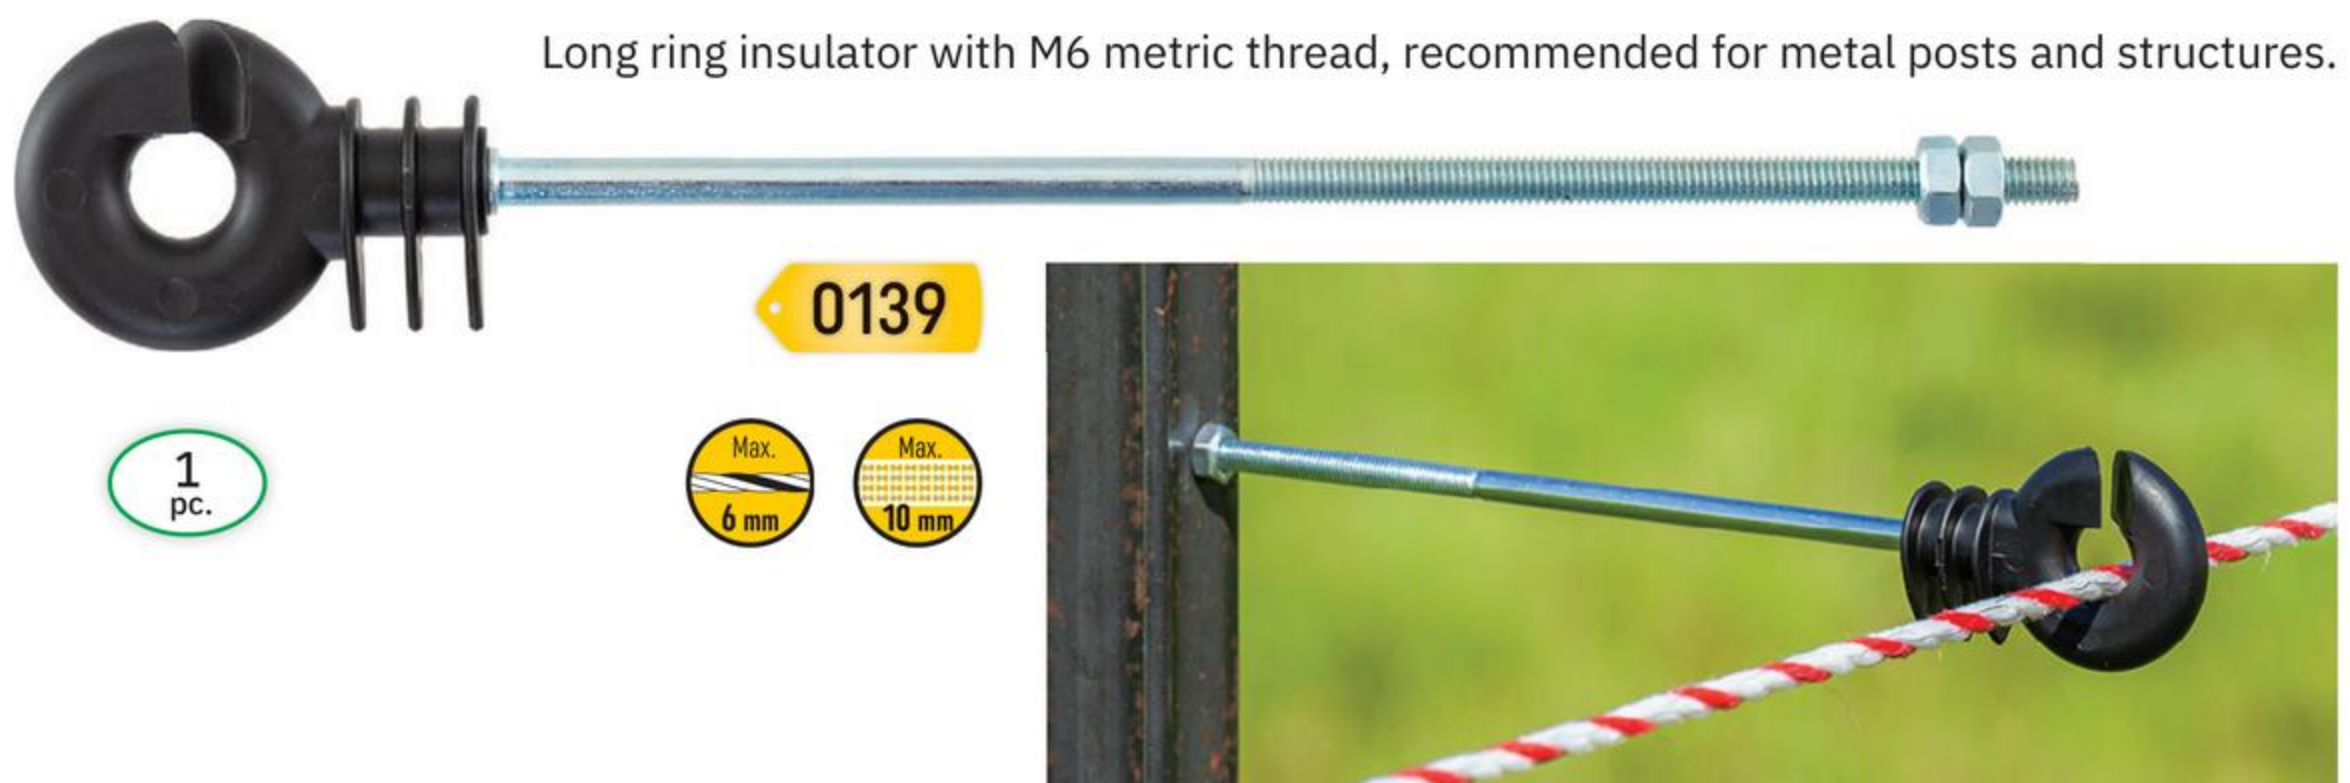

NEW

Long insulator, recommended for wooden posts and structures.

Long ring insulator with M6 metric screw

Long ring insulator with M6 metric thread, recommended for metal posts and structures.

Tape insulator with wood screw

Tape insulator, recommended for wooden posts and structures. 25 pcs./pack.

0094

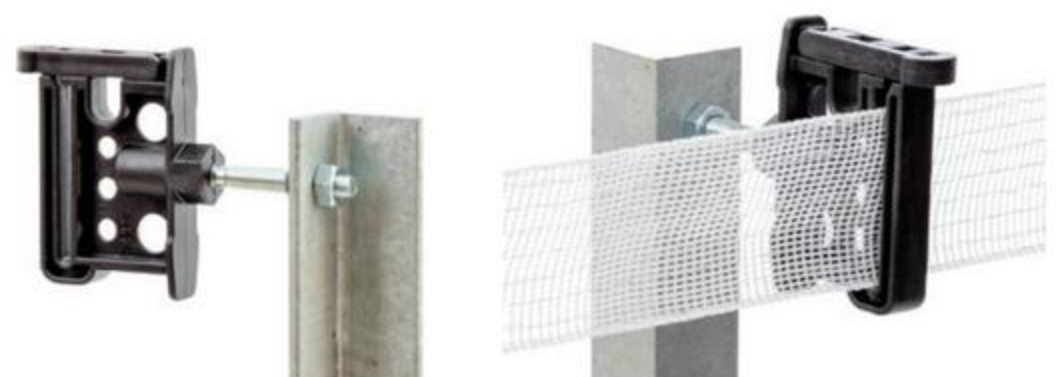

Tape insulator with M6 screw

NEW

Insulator with M6 metric thread, recommended for metal posts and structures.

0153

Long tape insulator with wood screw, 200 mm

NEW

Long tape insulator with wood screw, recommended for wooden posts and structures.

1802

1 pc.

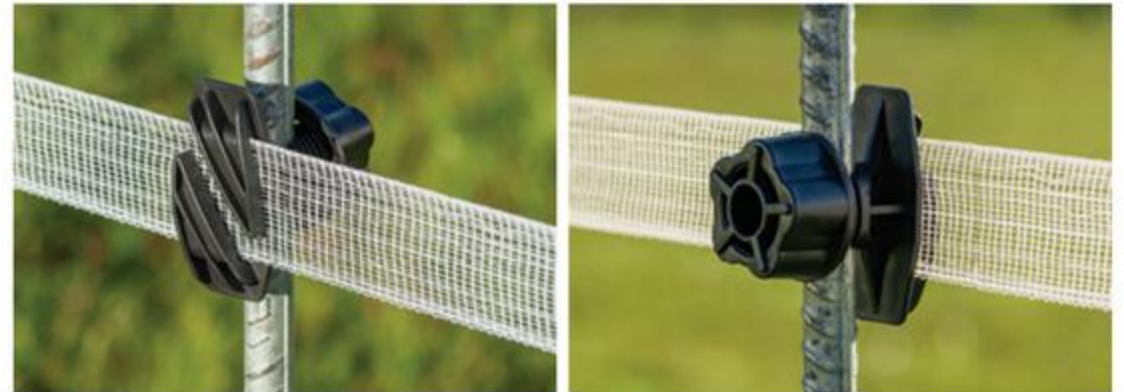

Ring insulator for metal posts

Ring insulator, recommended for metal posts with a maximum diameter of 19 mm. 10 pcs./pack.

10 pcs.
0883

Tape insulator for metal posts

Tape insulator, recommended for metal posts with a maximum diameter of 17 mm. 10 pcs./pack.

10 pcs.
0834

Corner insulator with wood screw

Corner insulator for wooden posts and structures. Its robust construction ensures adequate rigidity at corners and ends of the electric fence.

0106
1 pc.

Corner insulator with M6 screw

Corner insulator for metal posts and structures. Its robust construction ensures adequate rigidity at corners and ends of the electric fence.

0165
1 pc.

Gate insulator with wood screw

Special insulator for setting up gates. Its robust construction ensures proper rigidity at the ends of the gates.

0072

Gate insulator with M6 screw

Special insulator for setting up gates. Its robust construction ensures proper rigidity at the ends of the gates.

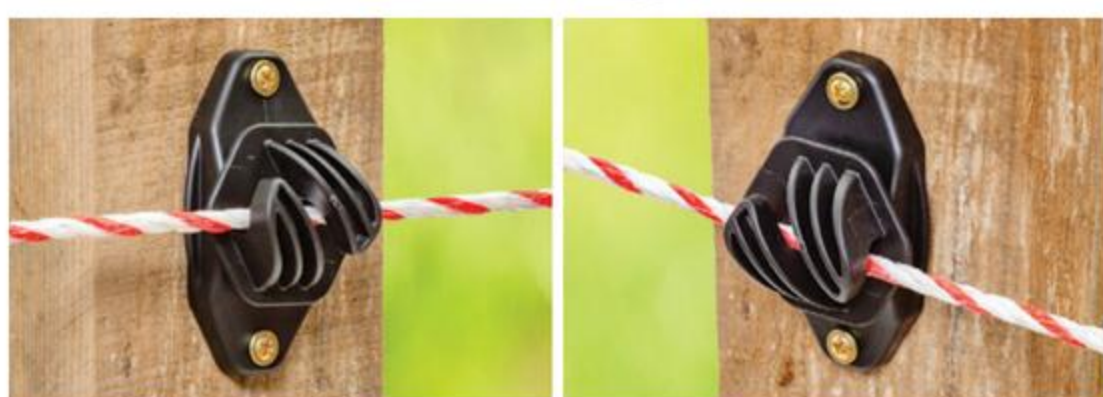

0166

Insulator for permanent electric fence

Insulator for permanent electric fences, suitable for wire, rope or metallic wire of max. 6 mm diameter.

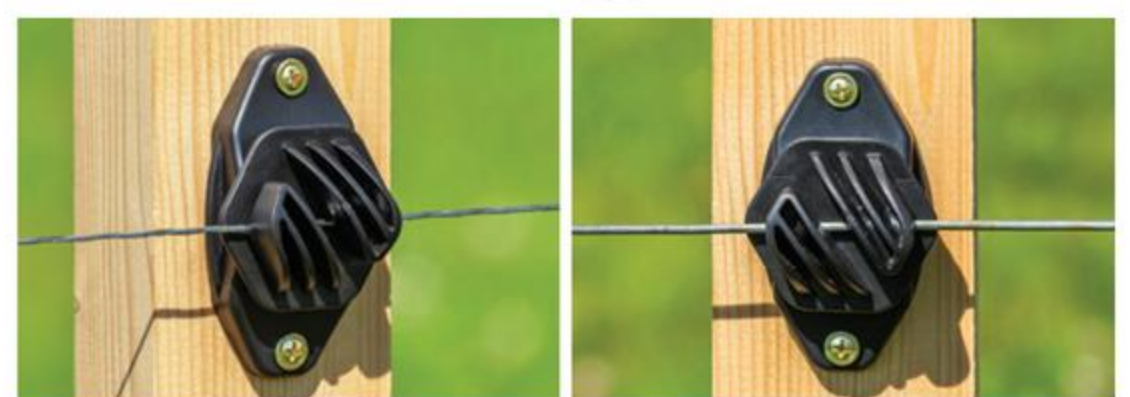

0868

Insulator for permanent electric fence

Insulator for permanent electric fences, suitable for metallic wire of max. 2.5 mm diameter.

0796

Corner insulator for permanent fence

The perfect insulator for permanent electric fence corners or ends.

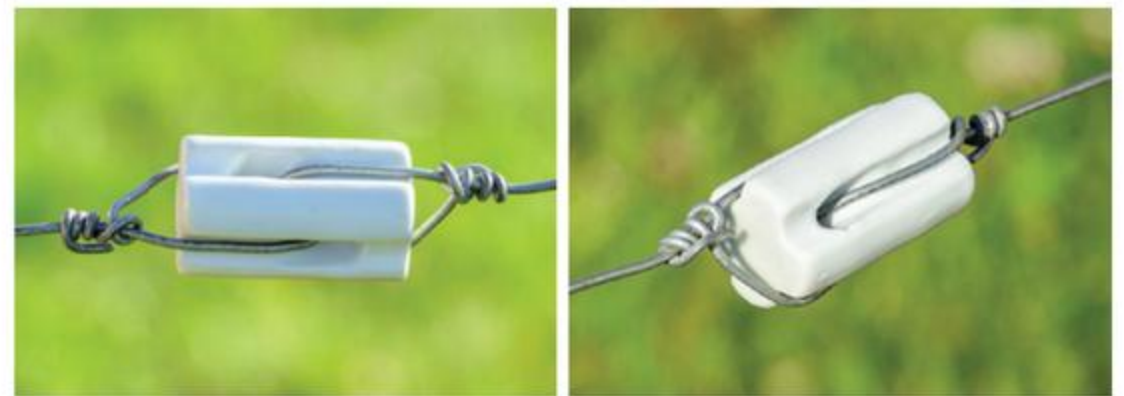

0095

Porcelain corner and end insulator

The perfect insulator for permanent electric fence corners or ends.

0920

Gate insulator for permanent fence

Insulator mainly recommended for permanent electric fences. Used for fixing the gate handle. With three anchor points.

0168

Permanent gate insulator X³

NEW

Primarily recommended for electric fence installations, insulator fixed with a wood screw. Used for attaching the gate handle and has three anchor points.

1786

Mounting clamp for M6 insulators

NEW

Clamp used in electric fence systems for fixing insulators with metric M6 thread onto round metal posts without drilling. Compatible with posts with a diameter between 35 and 70 mm.

1948

Drill chuck for insulators

It is compatible with most insulators on the market. Its hexagonal socket fits perfectly into a cordless screwdriver.

Universal gate handle, type 1, 7 colors

The gate handle provides adequate isolation for people at the points of passage through the electric fence.

The gate handle is universal, it can be used for all types of electric fence conductor – wire, rope, tape (with appropriate adapters).

Universal gate handle, type 2

The gate handle provides adequate isolation for people at the points of passage through the electric fence.

The gate handle is universal, it can be used for all types of electric fence conductor – wire, rope, tape (with appropriate adapters).

Gate handle for 10 mm wide tape

Gate handle with special connector for max. 10 mm wide tape.

Gate handle for 20 mm wide tape

Gate handle with special connector for max. 20 mm wide tape.

20 mm

Gate handle for 40 mm wide tape

Gate handle with special connector for max. 40 mm wide tape.

40 mm

Gate handle set with 5 m spring and 2 gate insulators

The gate built with this set can easily be used where frequent passage through the electric fence system with agricultural machinery or livestock is required.

The set contains all the necessary elements for building a gate. The spring can be extended up to 5 m.

0104

Gate handle with 5 m spring

0156

The gate handle with spring has the following benefits:

- 2 in 1 handle + spring (instead of separate handle and spring).
- Thin, lightweight spring, does not bend too much if the gate is wide.

The spring can be extended up to 5 m.

5 m spring for electric fence gate

Electric fence gate spring. To be used together with a universal gate handle.

The spring can be extended up to 5 m.

0155

AKO Flexigate electric fence gate set

Electric fence gate set equipped with a retractable handle and integrated rewinding mechanism, which keeps the conductor tensioned during opening and closing. Ensures the electrical connection of the gate to the fence system and allows quick access to the enclosed area. Suitable for temporary and permanent installations.

Electric fence net 50 m × 90 cm

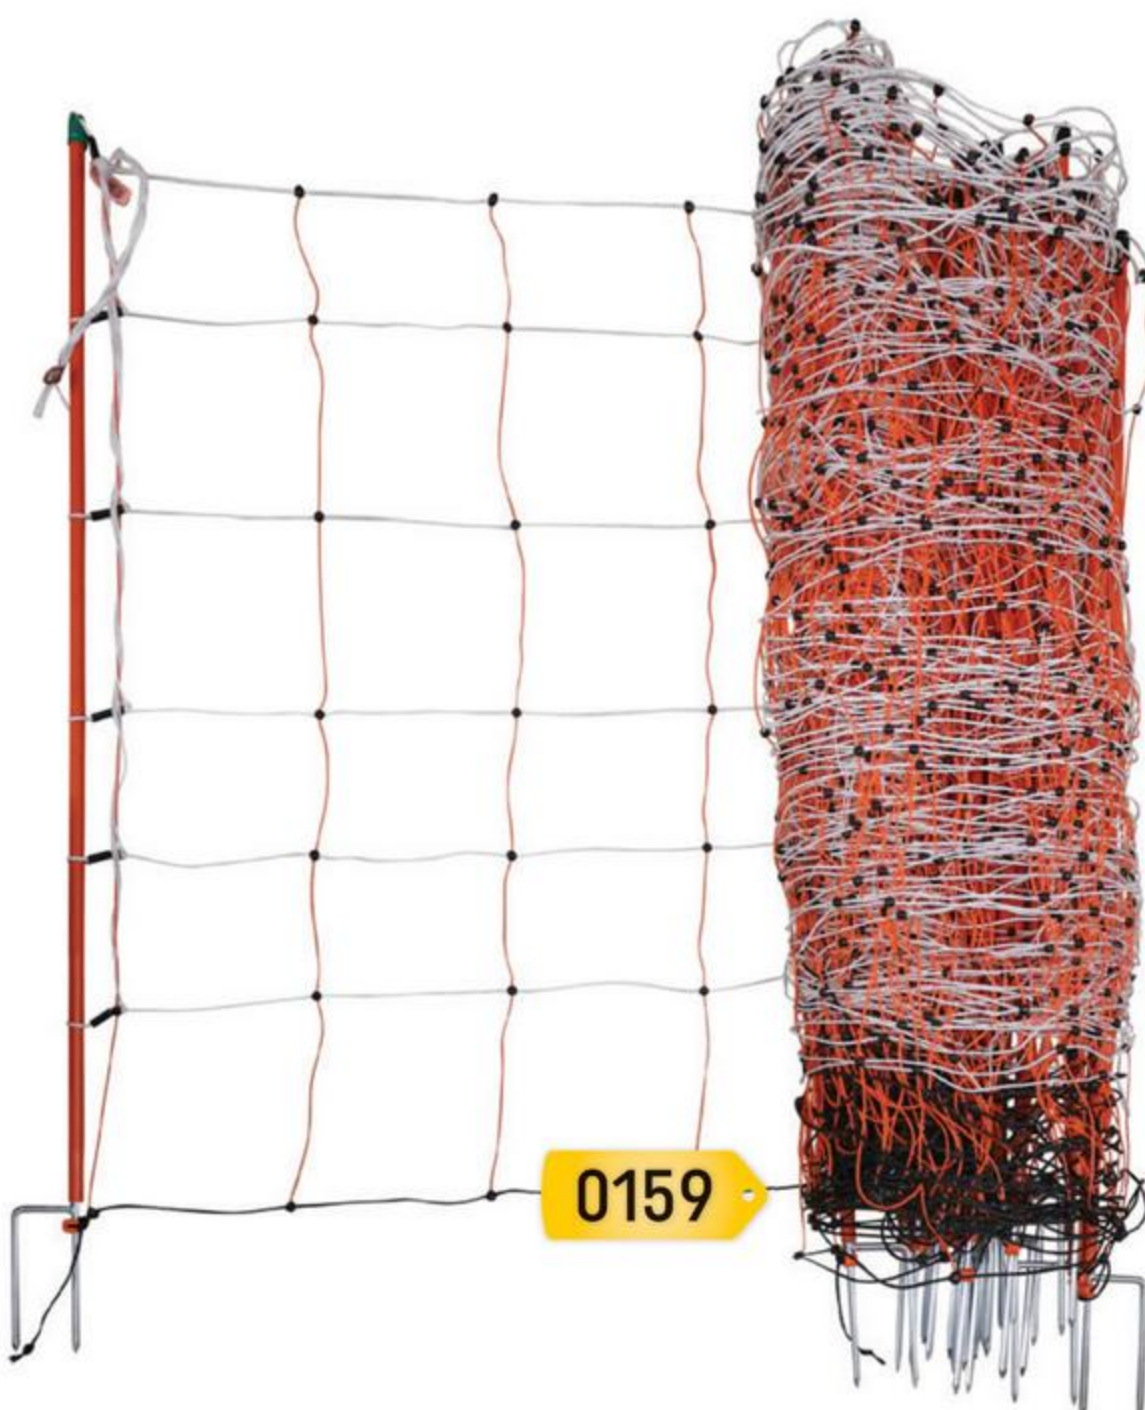

The net is ideal for small animals – sheep, dogs, pigs, chickens, etc. It can be used especially for temporary electric fences, since it can be easily moved. Plastic posts are included in the kit.

Length	50 m
Height	90 cm
Electrical resistance	0.27 Ω/m
Metallic inserts	Upper wire - 5 Intermediary wires - 3
Insert material	Stainless steel
Insert diameter	0.2 mm

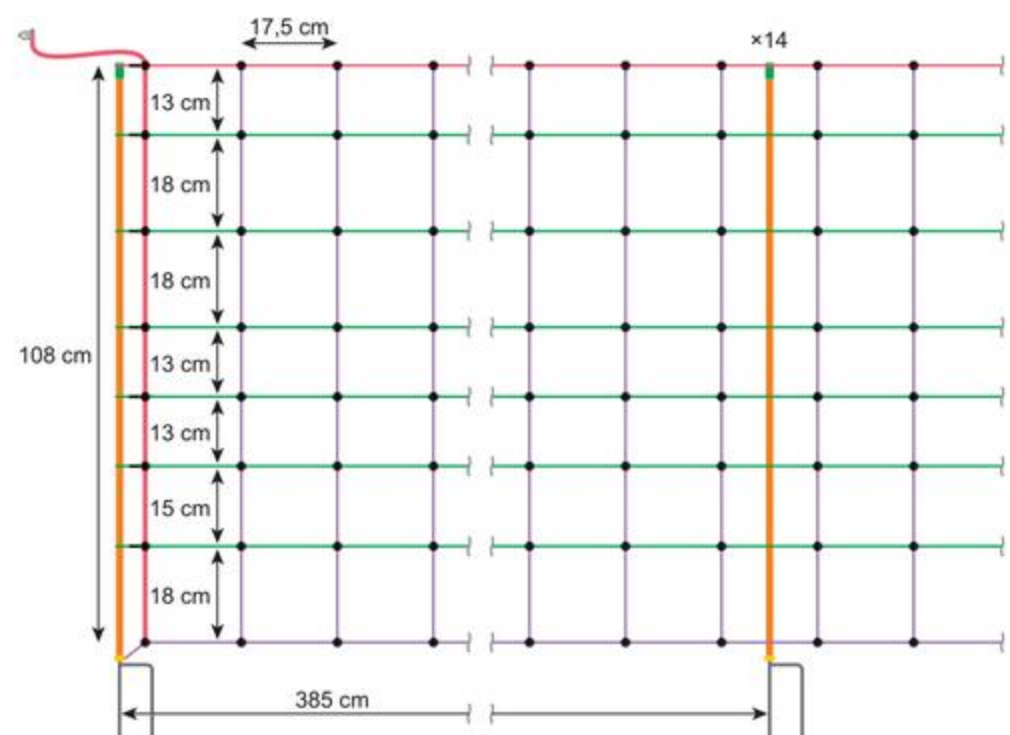

Electric fence net 50 m × 108 cm

The net is ideal for small animals – sheep, dogs, pigs, chickens, etc. It can be used especially for temporary electric fences, since it can be easily moved. Plastic posts are included in the kit.

Length	50 m
Height	108 cm
Electrical resistance	0.27 Ω/m
Metallic inserts	Upper wire - 5 Intermediary wires - 3
Insert material	Stainless steel
Insert diameter	0.2 mm

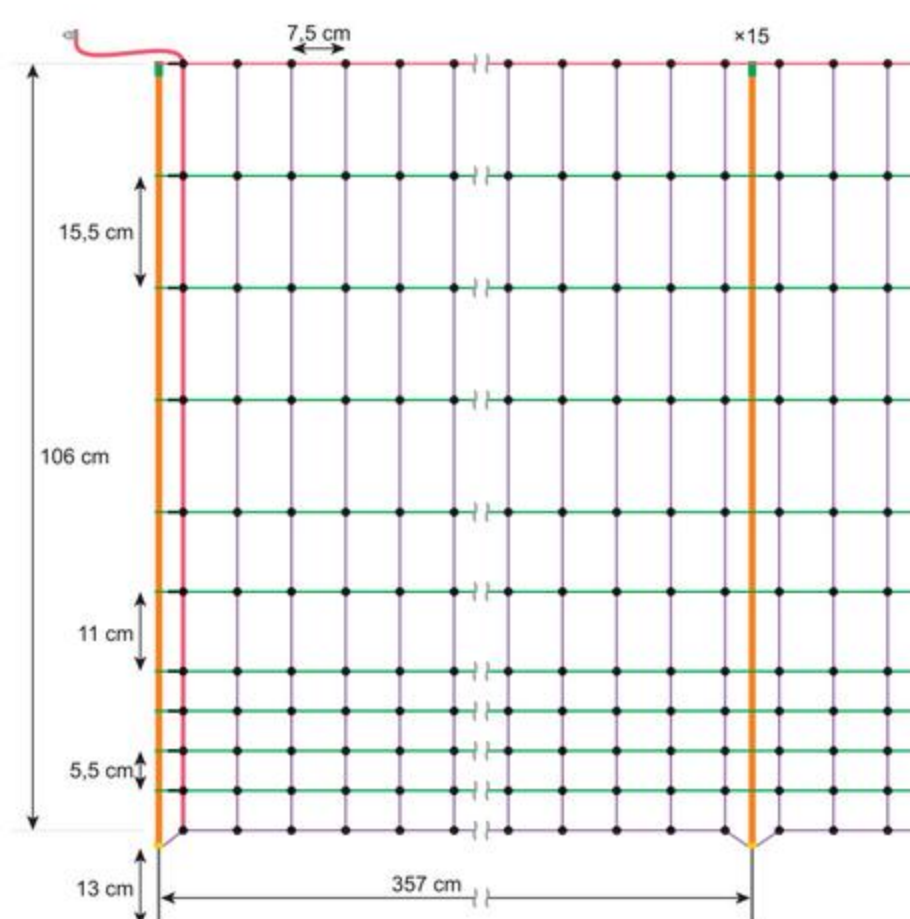

Electric fence net for poultry, 50 m × 106 cm

The net is ideal for small animals – sheep, dogs, pigs, chickens, etc. It can be used especially for temporary electric fences, since it can be easily moved. Plastic posts are included in the kit.

Length	50 m
Height	106 cm
Electrical resistance	0.77 Ω/m
Metallic inserts	3 × 0.2 mm, inox

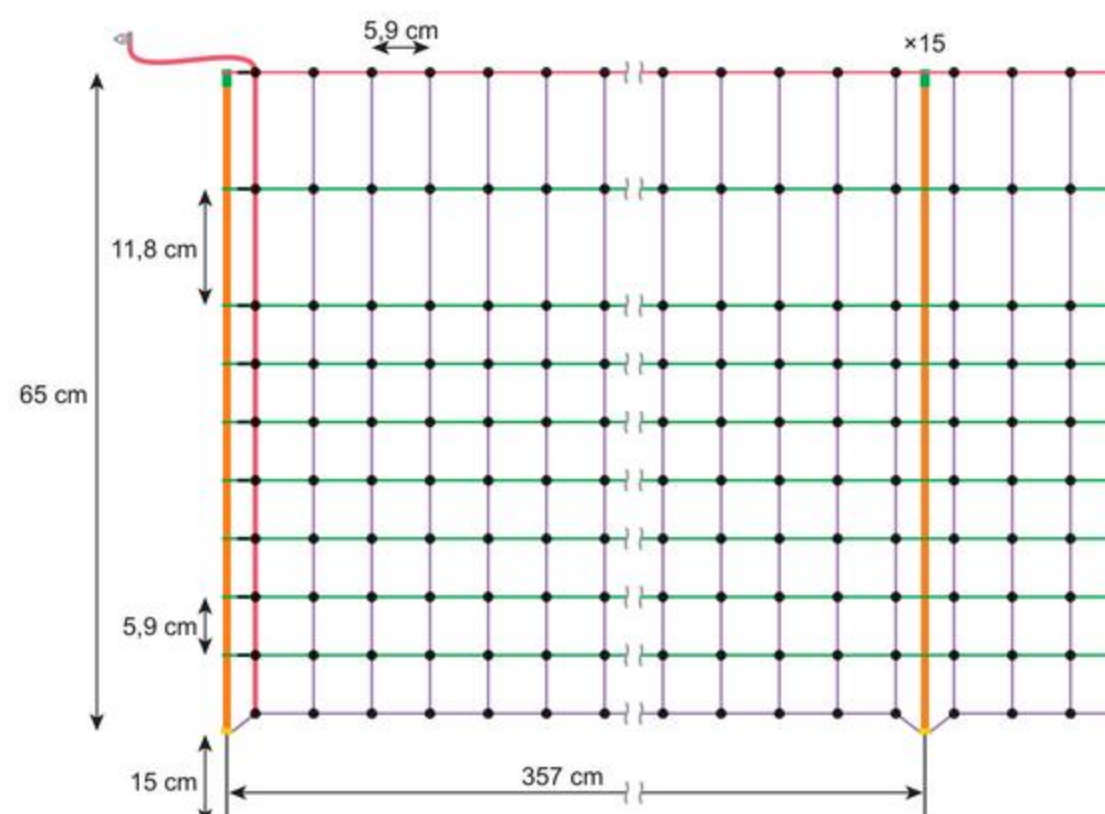

Electric fence net for rabbits, 50 m × 65 cm

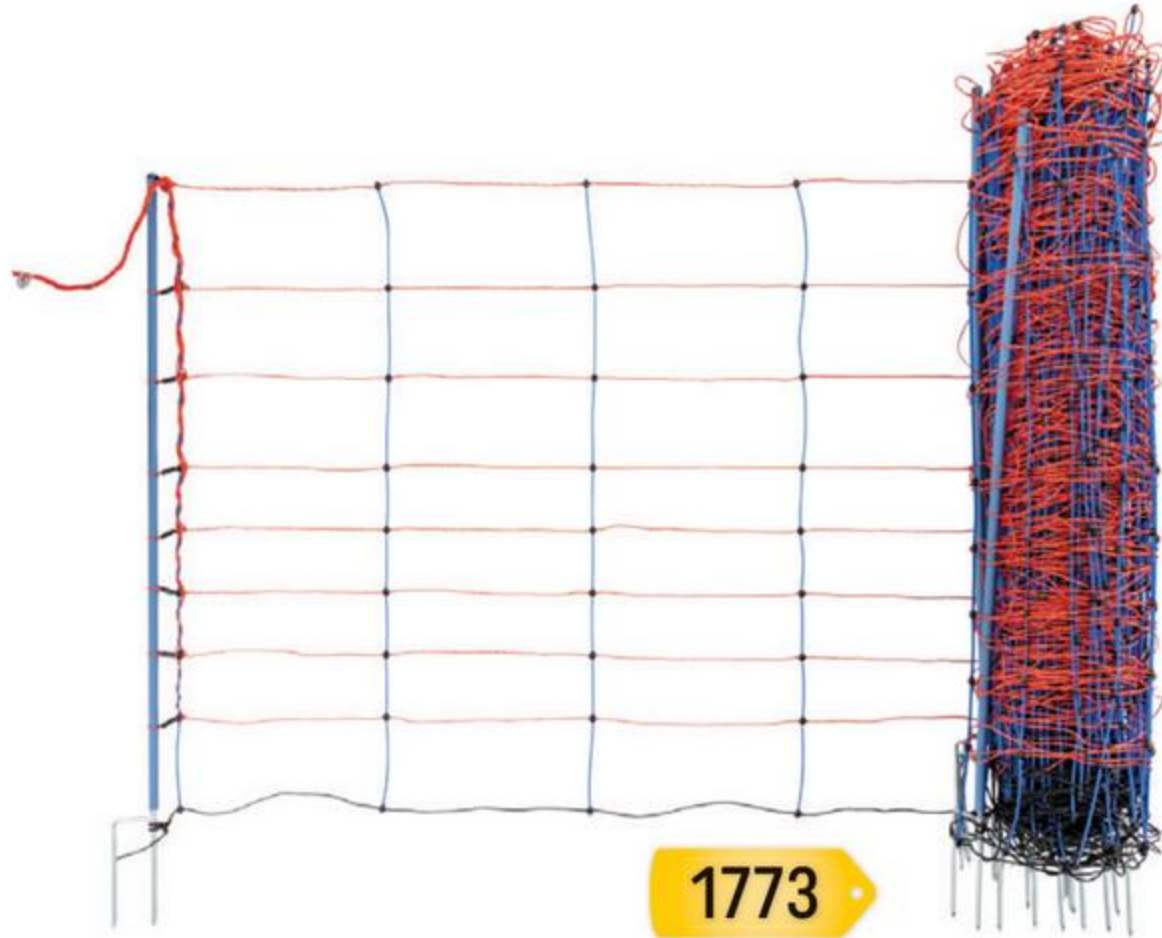

The net is ideal for small animals – rabbits, chickens, geese, turkeys, etc. It can be used especially for temporary electric fences, since it can be easily moved. Plastic posts are included in the kit.

Length	50 m
Height	65 cm
Electrical resistance	0.86 Ω/m
Metallic inserts	3 × 0.2 mm, inox

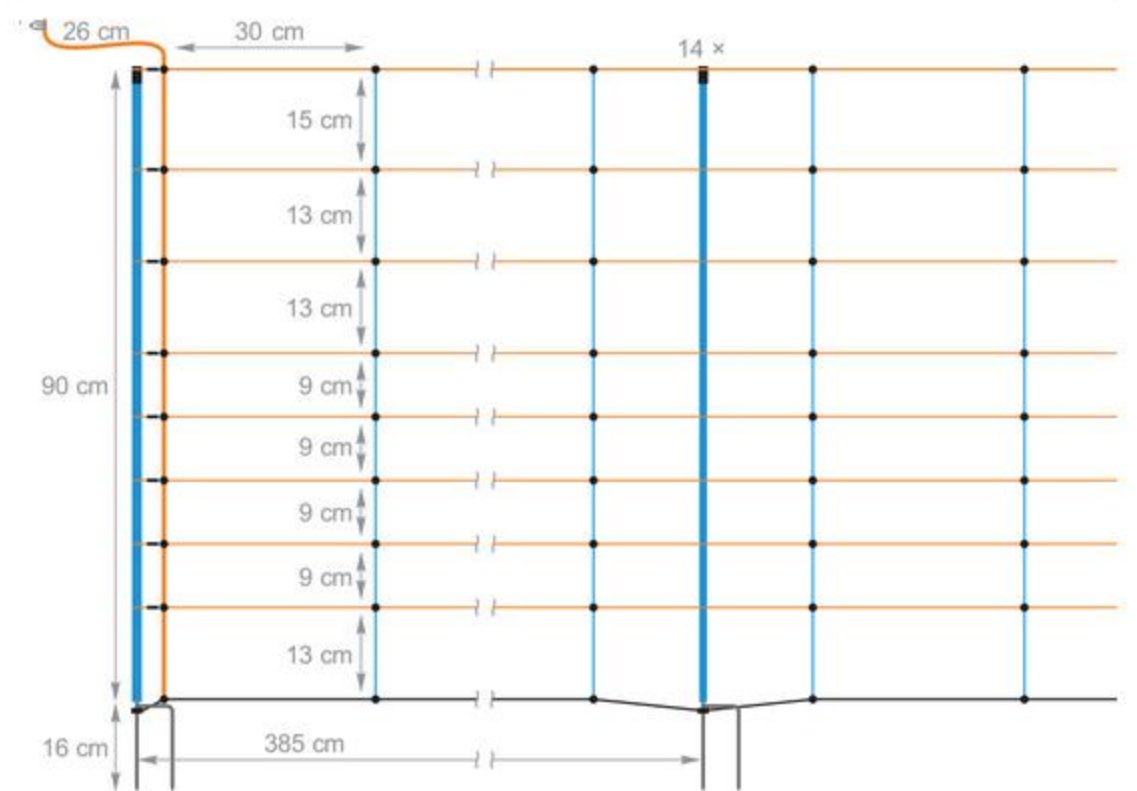

Electric fence net, TitanNet Premium, 50 m × 90 cm
NEW

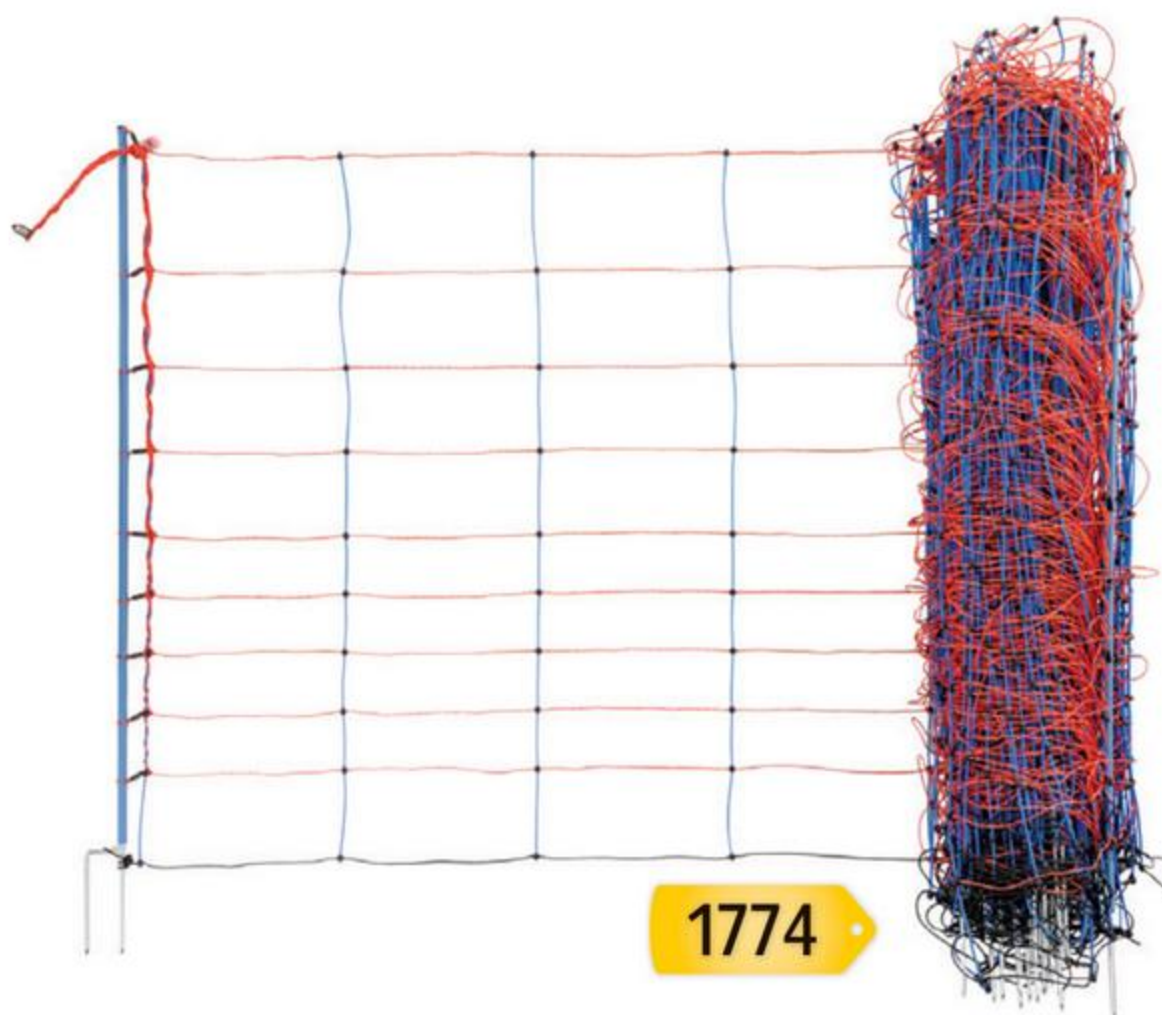

The net is ideal for small animals – sheep, dogs, pigs, chickens, etc. It can be used especially for temporary electric fences, since it can be easily moved. Fiberglass posts are included in the kit.

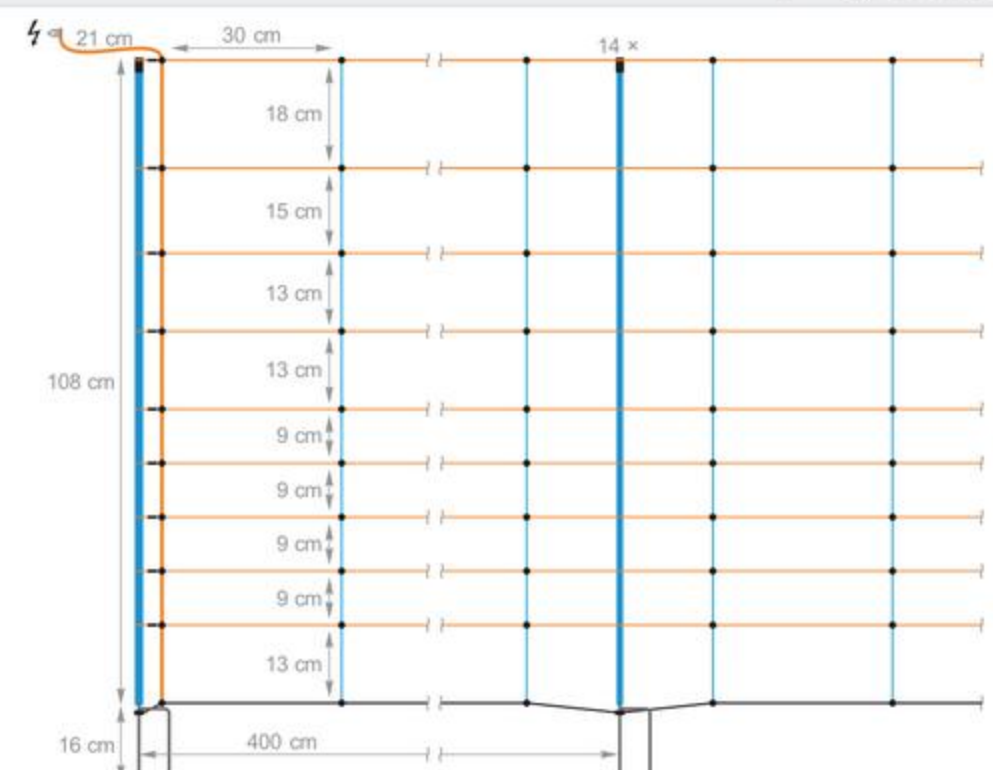

Length	50 m
Height	90 cm
Electrical resistance	0.27 Ω/m
Metallic inserts	Upper wire - 6 Intermediary wires - 3
Insert material	5 × 0,2 mm inox and 1 × 0,25 mm Cu 3 × 0,2 mm inox

Electric fence net, TitanNet Premium, 50 m × 108 cm
NEW

The net is ideal for small animals – sheep, dogs, pigs, chickens, etc. It can be used especially for temporary electric fences, since it can be easily moved. Fiberglass posts are included in the kit.

Length	50 m
Height	108 cm
Electrical resistance	0.25 Ω/m
Metallic inserts	Upper wire - 6 Intermediary wires - 3
Insert material	5 × 0,2 mm inox and 1 × 0,25 mm Cu 3 × 0,2 mm inox

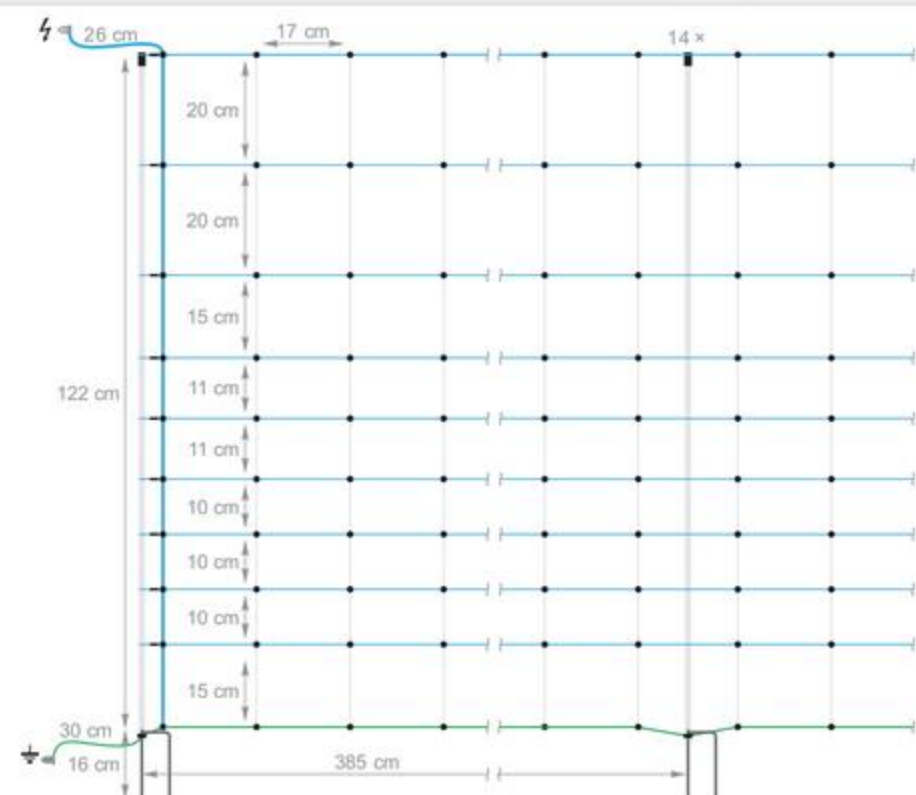

Electric fence net, OviNet Maxi, 50 m × 122 cm

NEW

The net is ideal for small animals – sheep, dogs, pigs, chickens, etc. It can be used especially for temporary electric fences, since it can be easily moved. Plastic posts are included in the kit.

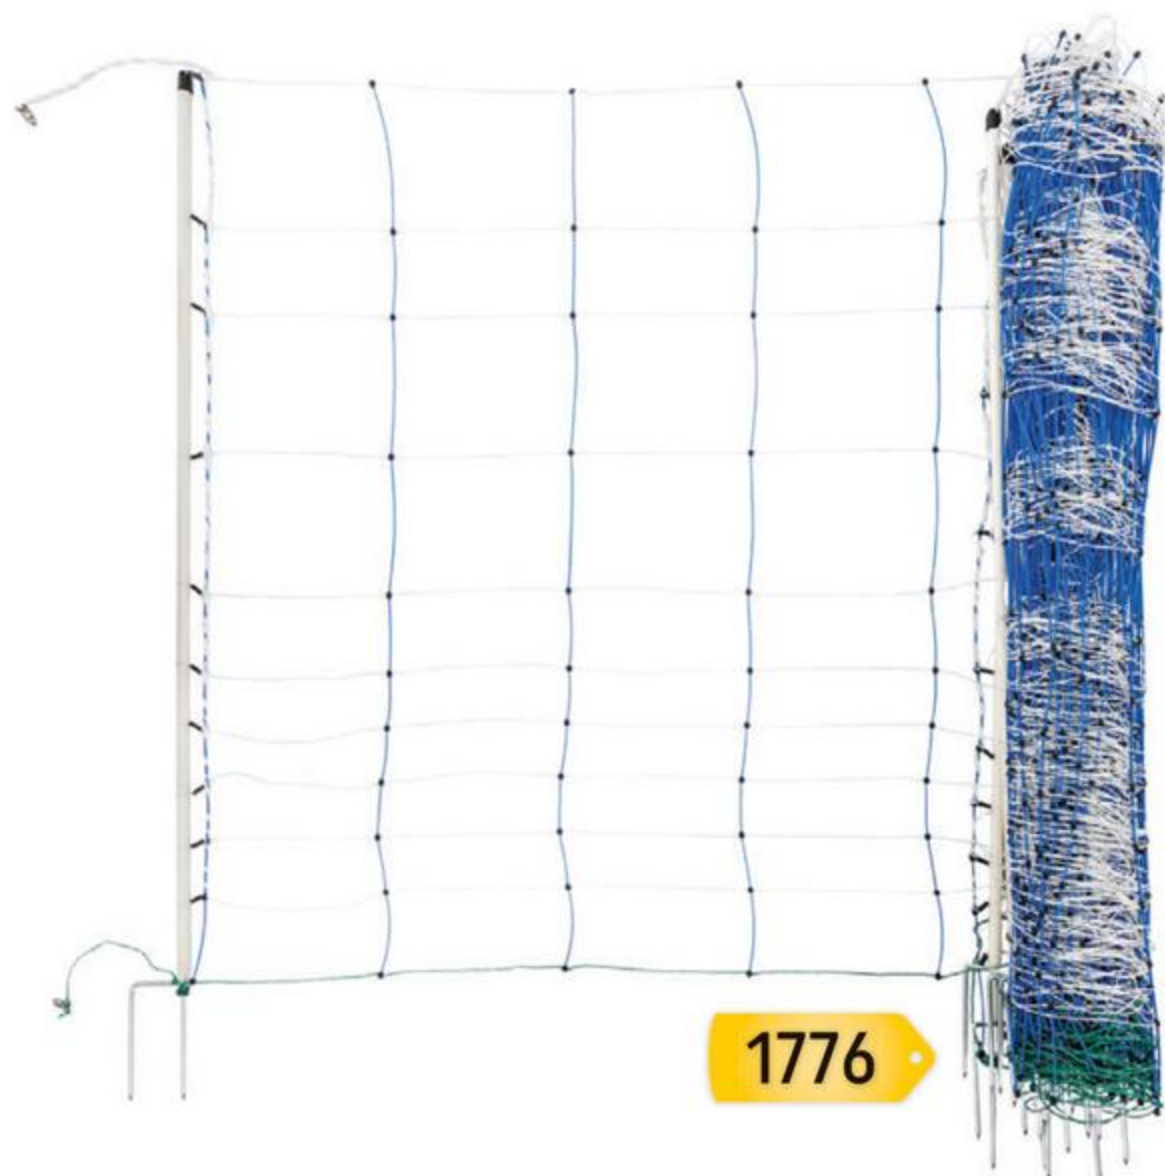

Length	50 m
Height	122 cm
Electrical resistance	0.06 Ω/m
Metallic inserts	Lower wire - 6 Intermediary wires - 3
Insert material	5 × 0,2 mm inox and 1 × 0,25 mm Cu 3 × 0,3 mm TriCOND

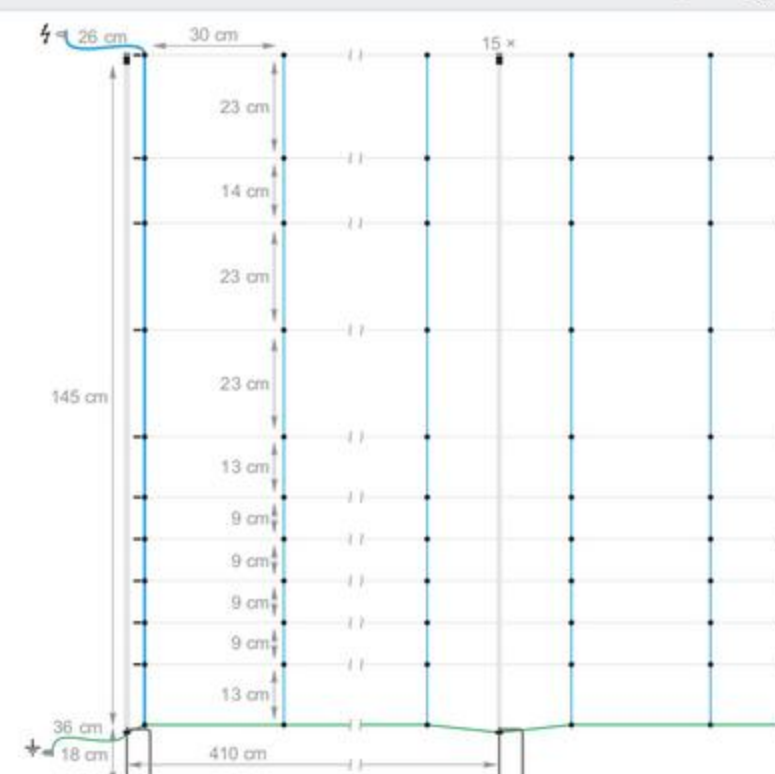

Electric fence net, TitanNet, 50 m × 145 cm

NEW

The net is ideal for small animals – sheep, dogs, pigs, chickens, etc. It can be used especially for temporary electric fences, since it can be easily moved. Plastic posts are included in the kit.

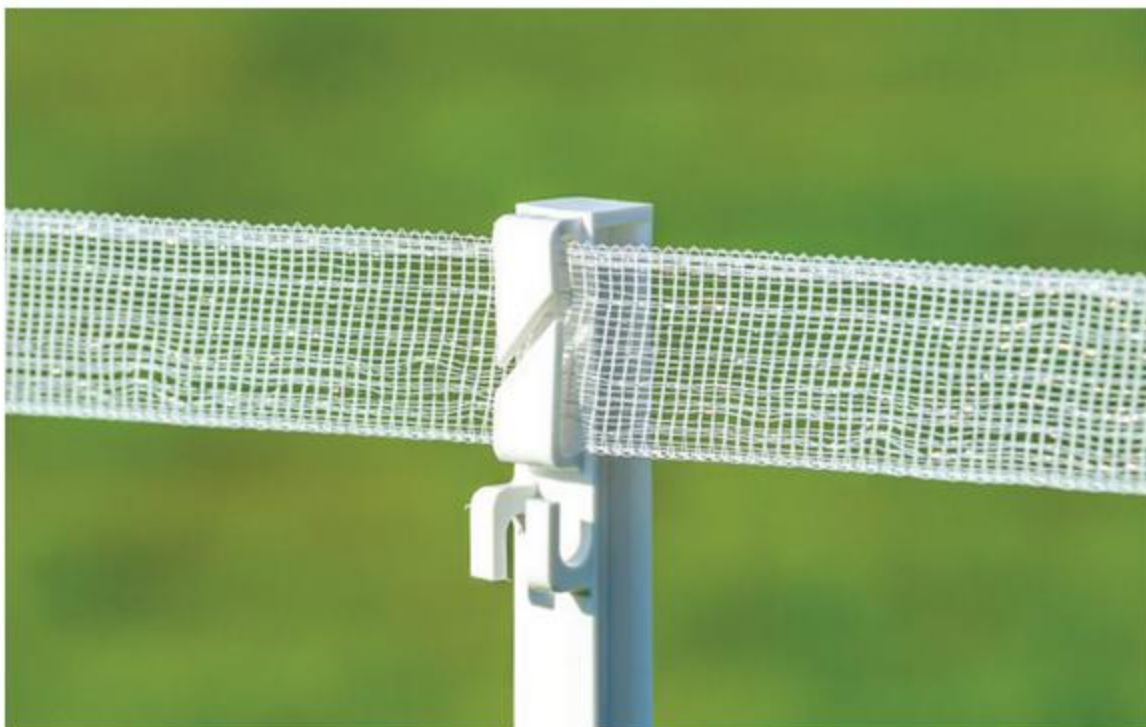

Length	50 m
Height	145 cm
Electrical resistance	0.25 Ω/m
Metallic inserts	Lower and upper wire - 6 Intermediary wires - 3
Insert material	5 × 0,2 mm inox and 1 × 0,25 mm Cu 3 × 0,3 mm inox

Plastic post

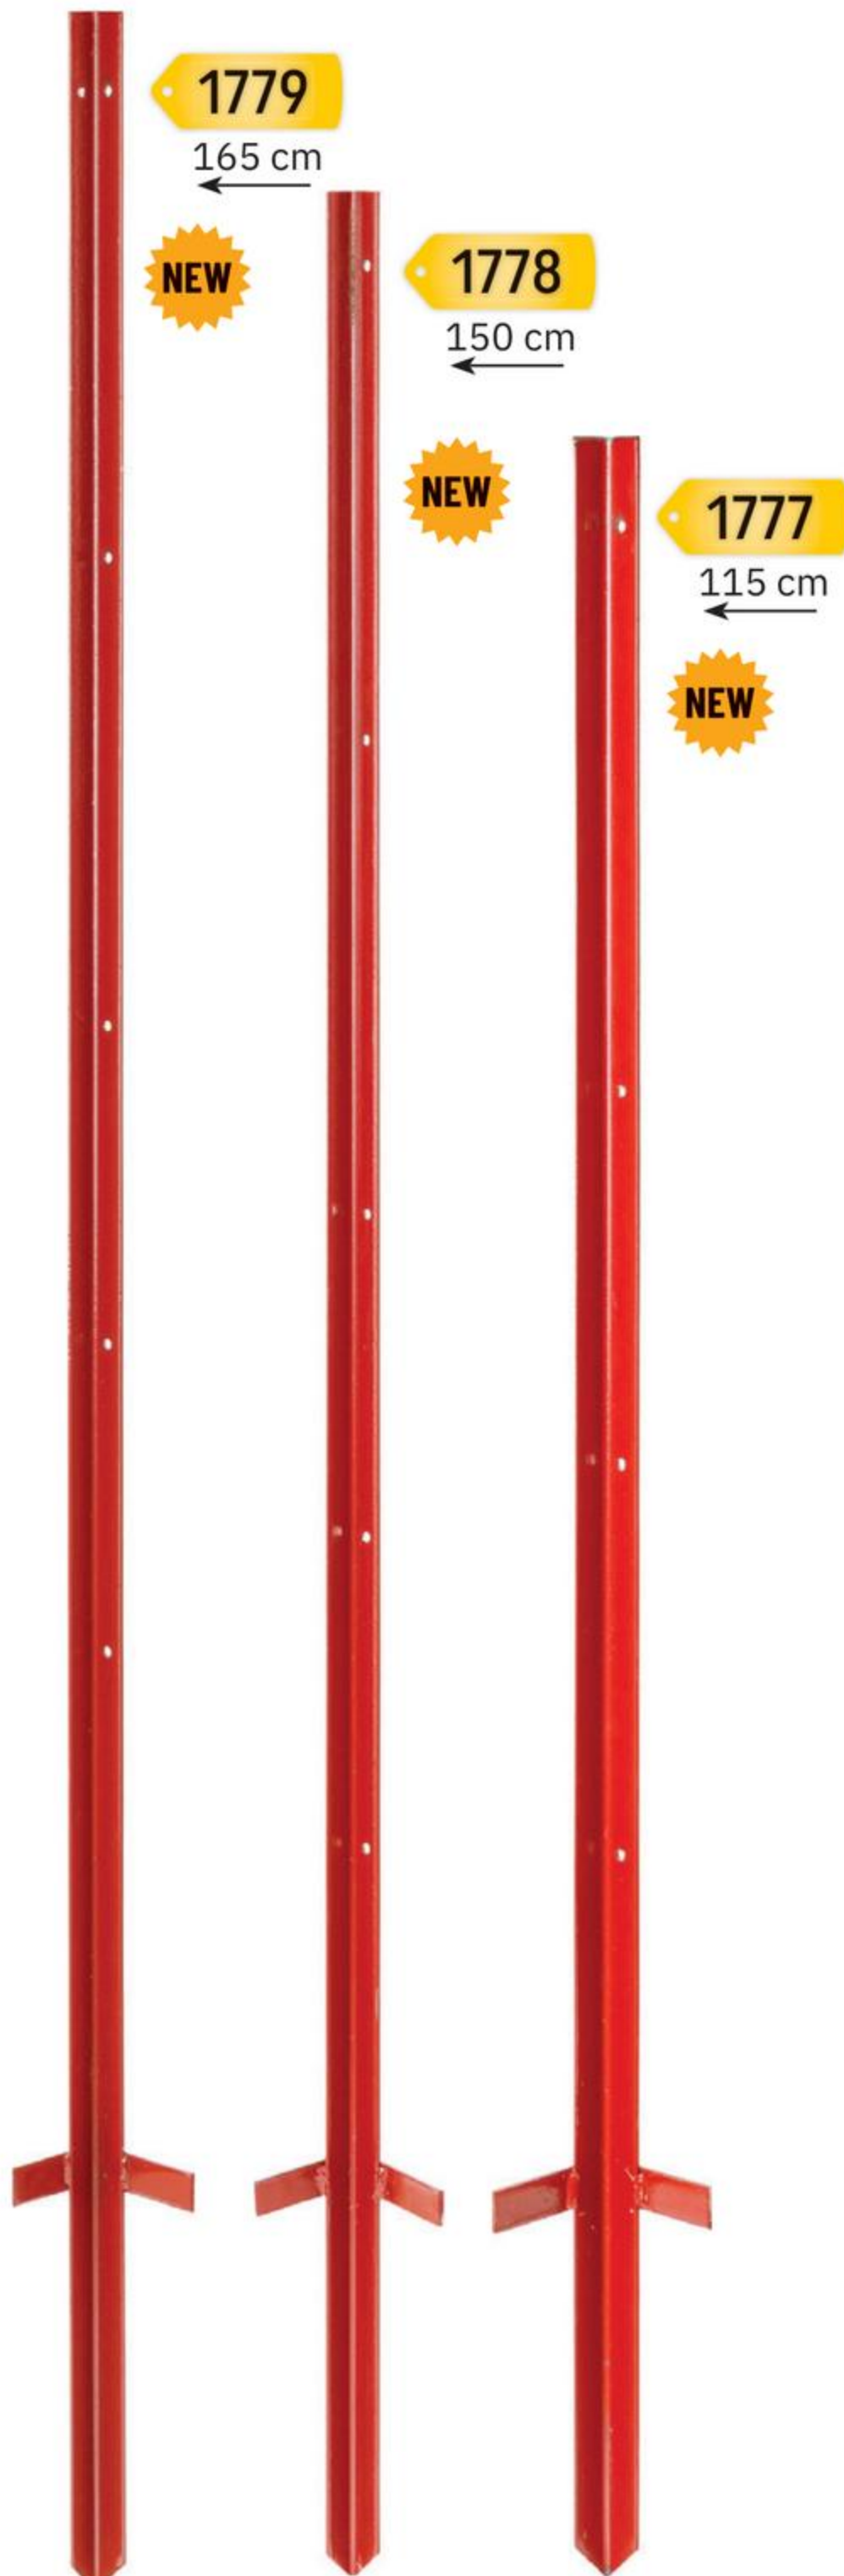

This plastic fence post is ideal for temporary electric fencing systems designed for enclosing domestic animals.

At the bottom of the post there is a steel spike that can be driven into the ground. There is no need for separate insulators when using these posts. The electric fence wire can be installed at different heights.

Steel angle post

NEW

This post is primarily used for permanent installations. It is made of 25 × 25 mm angle steel and is driven directly into the ground, equipped with a metal stabilizer for fixation. It features Ø6 mm holes compatible with insulators with metric M6 thread, which can be mounted at different heights depending on the fence configuration. The steel construction ensures stability during operation.

Fiberglass post, AKO Oval Premium, 110 cm

NEW

1780

The AKO Oval Premium electric fence post is made of fiberglass, has a height of 110 cm and features an oval profile, being flexible due to the material and returning to its original shape after load.

It is equipped with a top insulator for wire or tape, and additional insulators can be mounted on the body to create multiple conductor lines.

Insulator for AKO Oval Premium

NEW

Additional insulator for AKO Oval Premium fiberglass post, suitable for wire up to 6 mm or tape up to 20 mm.

Steel post for electric fence, Ø8 mm × 107 cm

NEW

1782

This steel post is used as an intermediate element. It is equipped with a top insulator suitable for wire up to 6 mm in diameter or tape up to 10 mm wide, and additional insulators can be mounted on the post body to create multiple conductor lines.

Stability in the ground is ensured by a welded metal plate positioned approximately 20 cm from the base, which facilitates installation by pressing. It is intended for intermediate fence sections and is not suitable for corners or gates.

Insulator for round steel post

NEW

Replacement insulator for round steel post, suitable for wire up to 6 mm or tape up to 10 mm.

Energizer power supply cable, type 1

The power supply cable is 1 m long and is made of 1.5 mm² copper wire.

One end of the wire is fitted with crocodile clips that connect to the accumulator terminals. The other end is fitted with Ø6 ring lugs for connection with the impulse generator.

0086

Energizer-fence + grounding connection cable

The connection cable is 1 m long and made of copper wire with a cross-section of 1.5 mm².

The yellow wire provides the connection between the impulse generator and the fence, while the yellow-green wire provides the connection between the impulse generator and the grounding.

0087

Energizer power supply cable, type 2

The power supply cable is 1 m long and is made of 1.5 mm² copper wire.

One end of the wire is fitted with crocodile clips that connect to the accumulator terminals. The other end is fitted with Ø6 mm ring lugs for connection with the impulse generator.

0227

Connection cable for multiple groundings

Connection cable for multiple grounding. The cable is designed especially for groundings created with M12 threaded metal rods – fitted with one Ø13 mm ring lug on both ends.

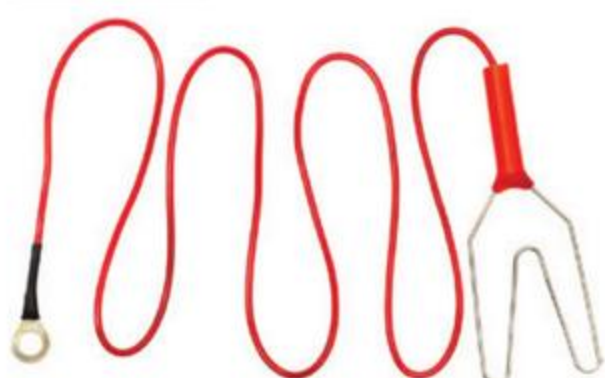

0570

Impulse output cable

The impulse output cable is 1 m long and is made of 1 mm² copper wire. The special connector is designed to create easy but secure connection to the electric fence wire or tape.

0177

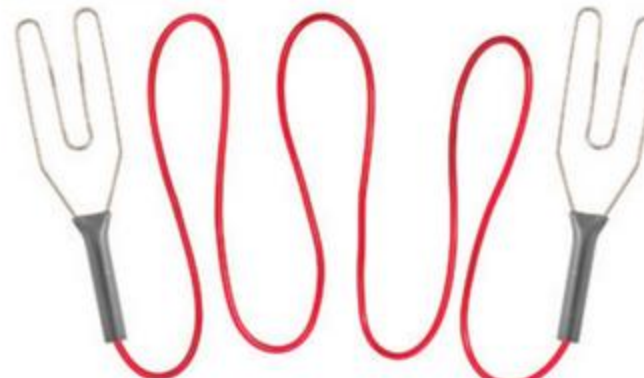

The end fitted with a Ø8 mm ring lug has to be connected to the energizer.

Connection cable for tape and wire **NEW**

The tape and wire connection cable has a length of 96 cm and is made of 1 mm² copper wire.

The connection cable is used to ensure electrical continuity between two fence segments. It is equipped with metal ends compatible with both tape and wire.

1803

Special insulated cable for energizer to fence connection

Connection cable electric fence energizer + fence, for carrying high voltage impulses. The cable can touch any ground object – posts, buildings, trees, etc., or can also be routed underground.

One end of the cable is fitted with a ring lug which fits perfectly onto an M6 screw.

High-voltage cable

Specially insulated cable designed to carry high-voltage of the electric fence, especially underground. It is ideal for energizer-fence connection. Sold in quantities of 25, 50 or 100 m.

Wire diameter: 1.4 mm
Cable diameter: 8 mm

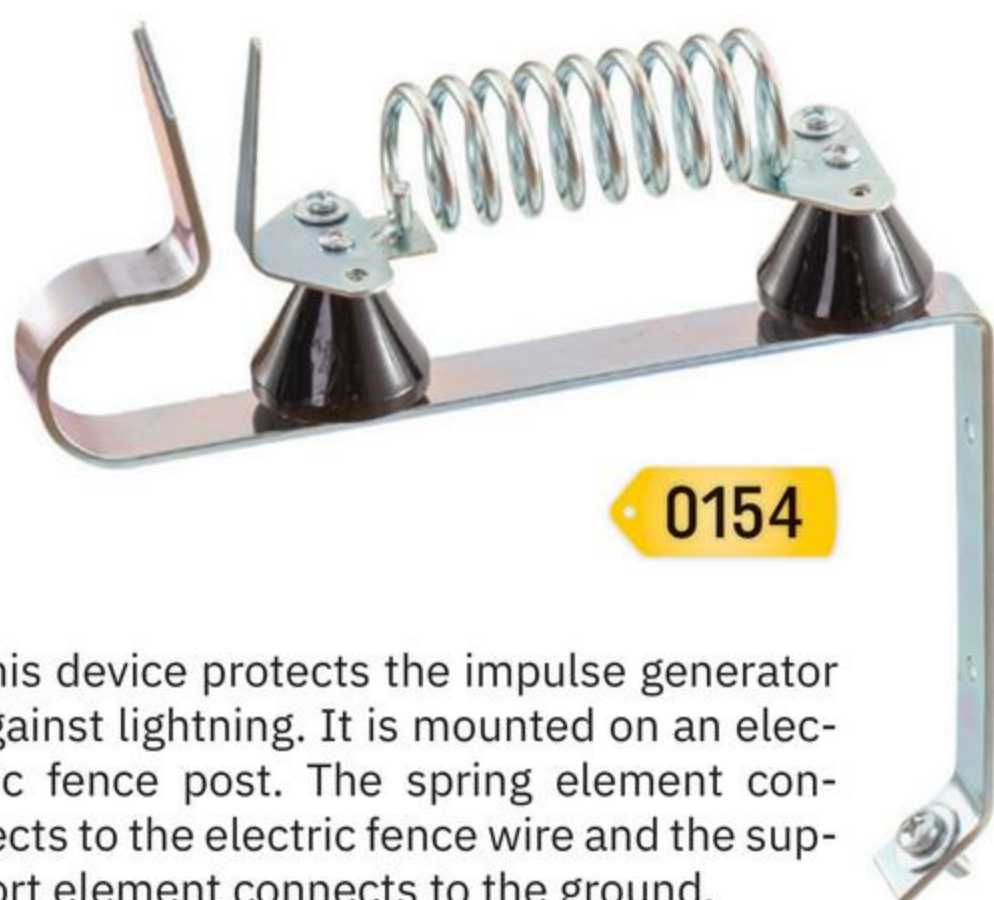

Electric fence cut-out switch

The switch is the ideal element to turn off/on the high voltage in a portion of the electric fence without stopping the impulse generator.

The switch allows you to simultaneously control the operation of two separate sections of the electric fence.

Lightning protection for electric fence

This device protects the impulse generator against lightning. It is mounted on an electric fence post. The spring element connects to the electric fence wire and the support element connects to the ground.

Warning sign

All sections of an electric fence to be installed along streets or public roads must be marked at 5-20 m intervals with warning signs.

The warning signs shall be mounted on the wire of the electric fence using the collars included in the package.

Connector for 2-4 mm wire

0109

5 pcs.

Special element for connecting or extending 2-4 mm thick electric fence wire. Sold in packs of 5 pieces.

Gate connector kit for 2-4 mm wire

0125

2 sets

Pair of connectors for connecting 2-4 mm thick electric fence wire to the insulator or gate handle. Sold in packs of 2 sets.

Rope connector 4-6 mm, single

0119

1 pc.

Special element for connecting or extending 4-6 mm thick rope.

Rope connector 4-6 mm

0118

1 pc.

Special element for connecting or extending 4-6 mm thick rope.

Ring connector for 4-6 mm rope

0138

1 pc.

Element for connecting 4-6 mm thick rope to the tensioning spring, gate insulator or gate handle.

Connector for 10-12 mm tape

0120

1 pc.

Special element for connecting or extending 10-12 mm wide electric fence tapes.

Connector for 20 mm tape

0107

5 pcs.

Special element for connecting or extending 20 mm wide electric fence tapes.

Connector for 40 mm tape

0108

1 pc.

Special element for connecting or extending 40 mm wide electric fence tapes.

Tester 1-10 kV, without grounding, AKO

Device for testing and measuring voltage between 1000 and 10000 V. The tester operates without grounding, with a 9 V battery (included in the package).

Tester 1-10 kV, model 2023

Device for measuring and testing high voltage. Measuring range: 1000-10000 V, in 2000 V steps. The instrument can be operated without a power source. During the measurement, the grounding spike is inserted into the ground, while the hook of the instrument is hung on the electric fence wire.

Tester 1-10 kV

Device for measuring and testing high voltage. Measuring range: 1000-10000 V. The instrument can be operated without a power source. During the measurement, the grounding spike is inserted into the ground, while the hook of the instrument is hung on the electric fence wire.

Digital tester 3-18 V and 500-13000 V

Multi-functional voltmeter-tester for measuring low and high voltages:

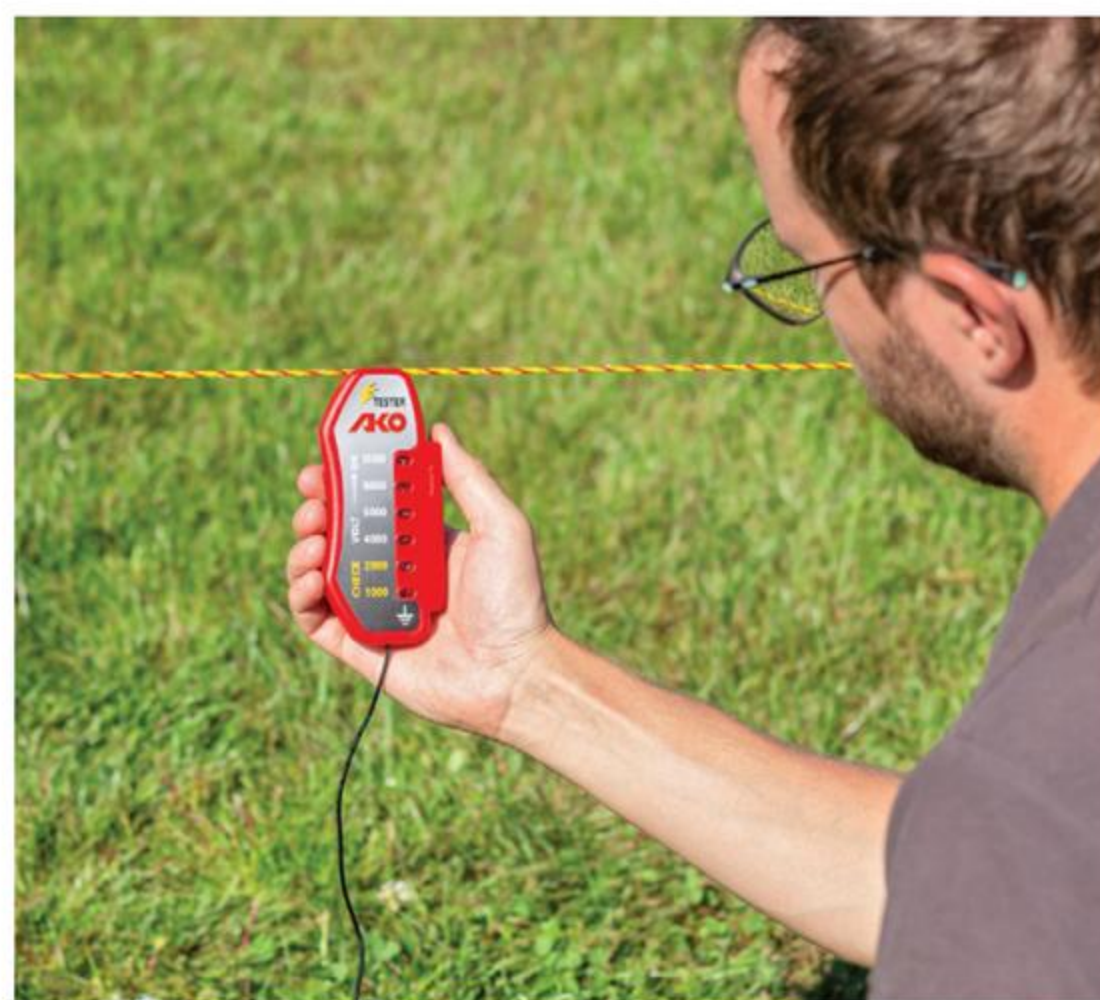

- DC voltage between 3 and 18 V.
- High voltage between 500 and 13000 V.

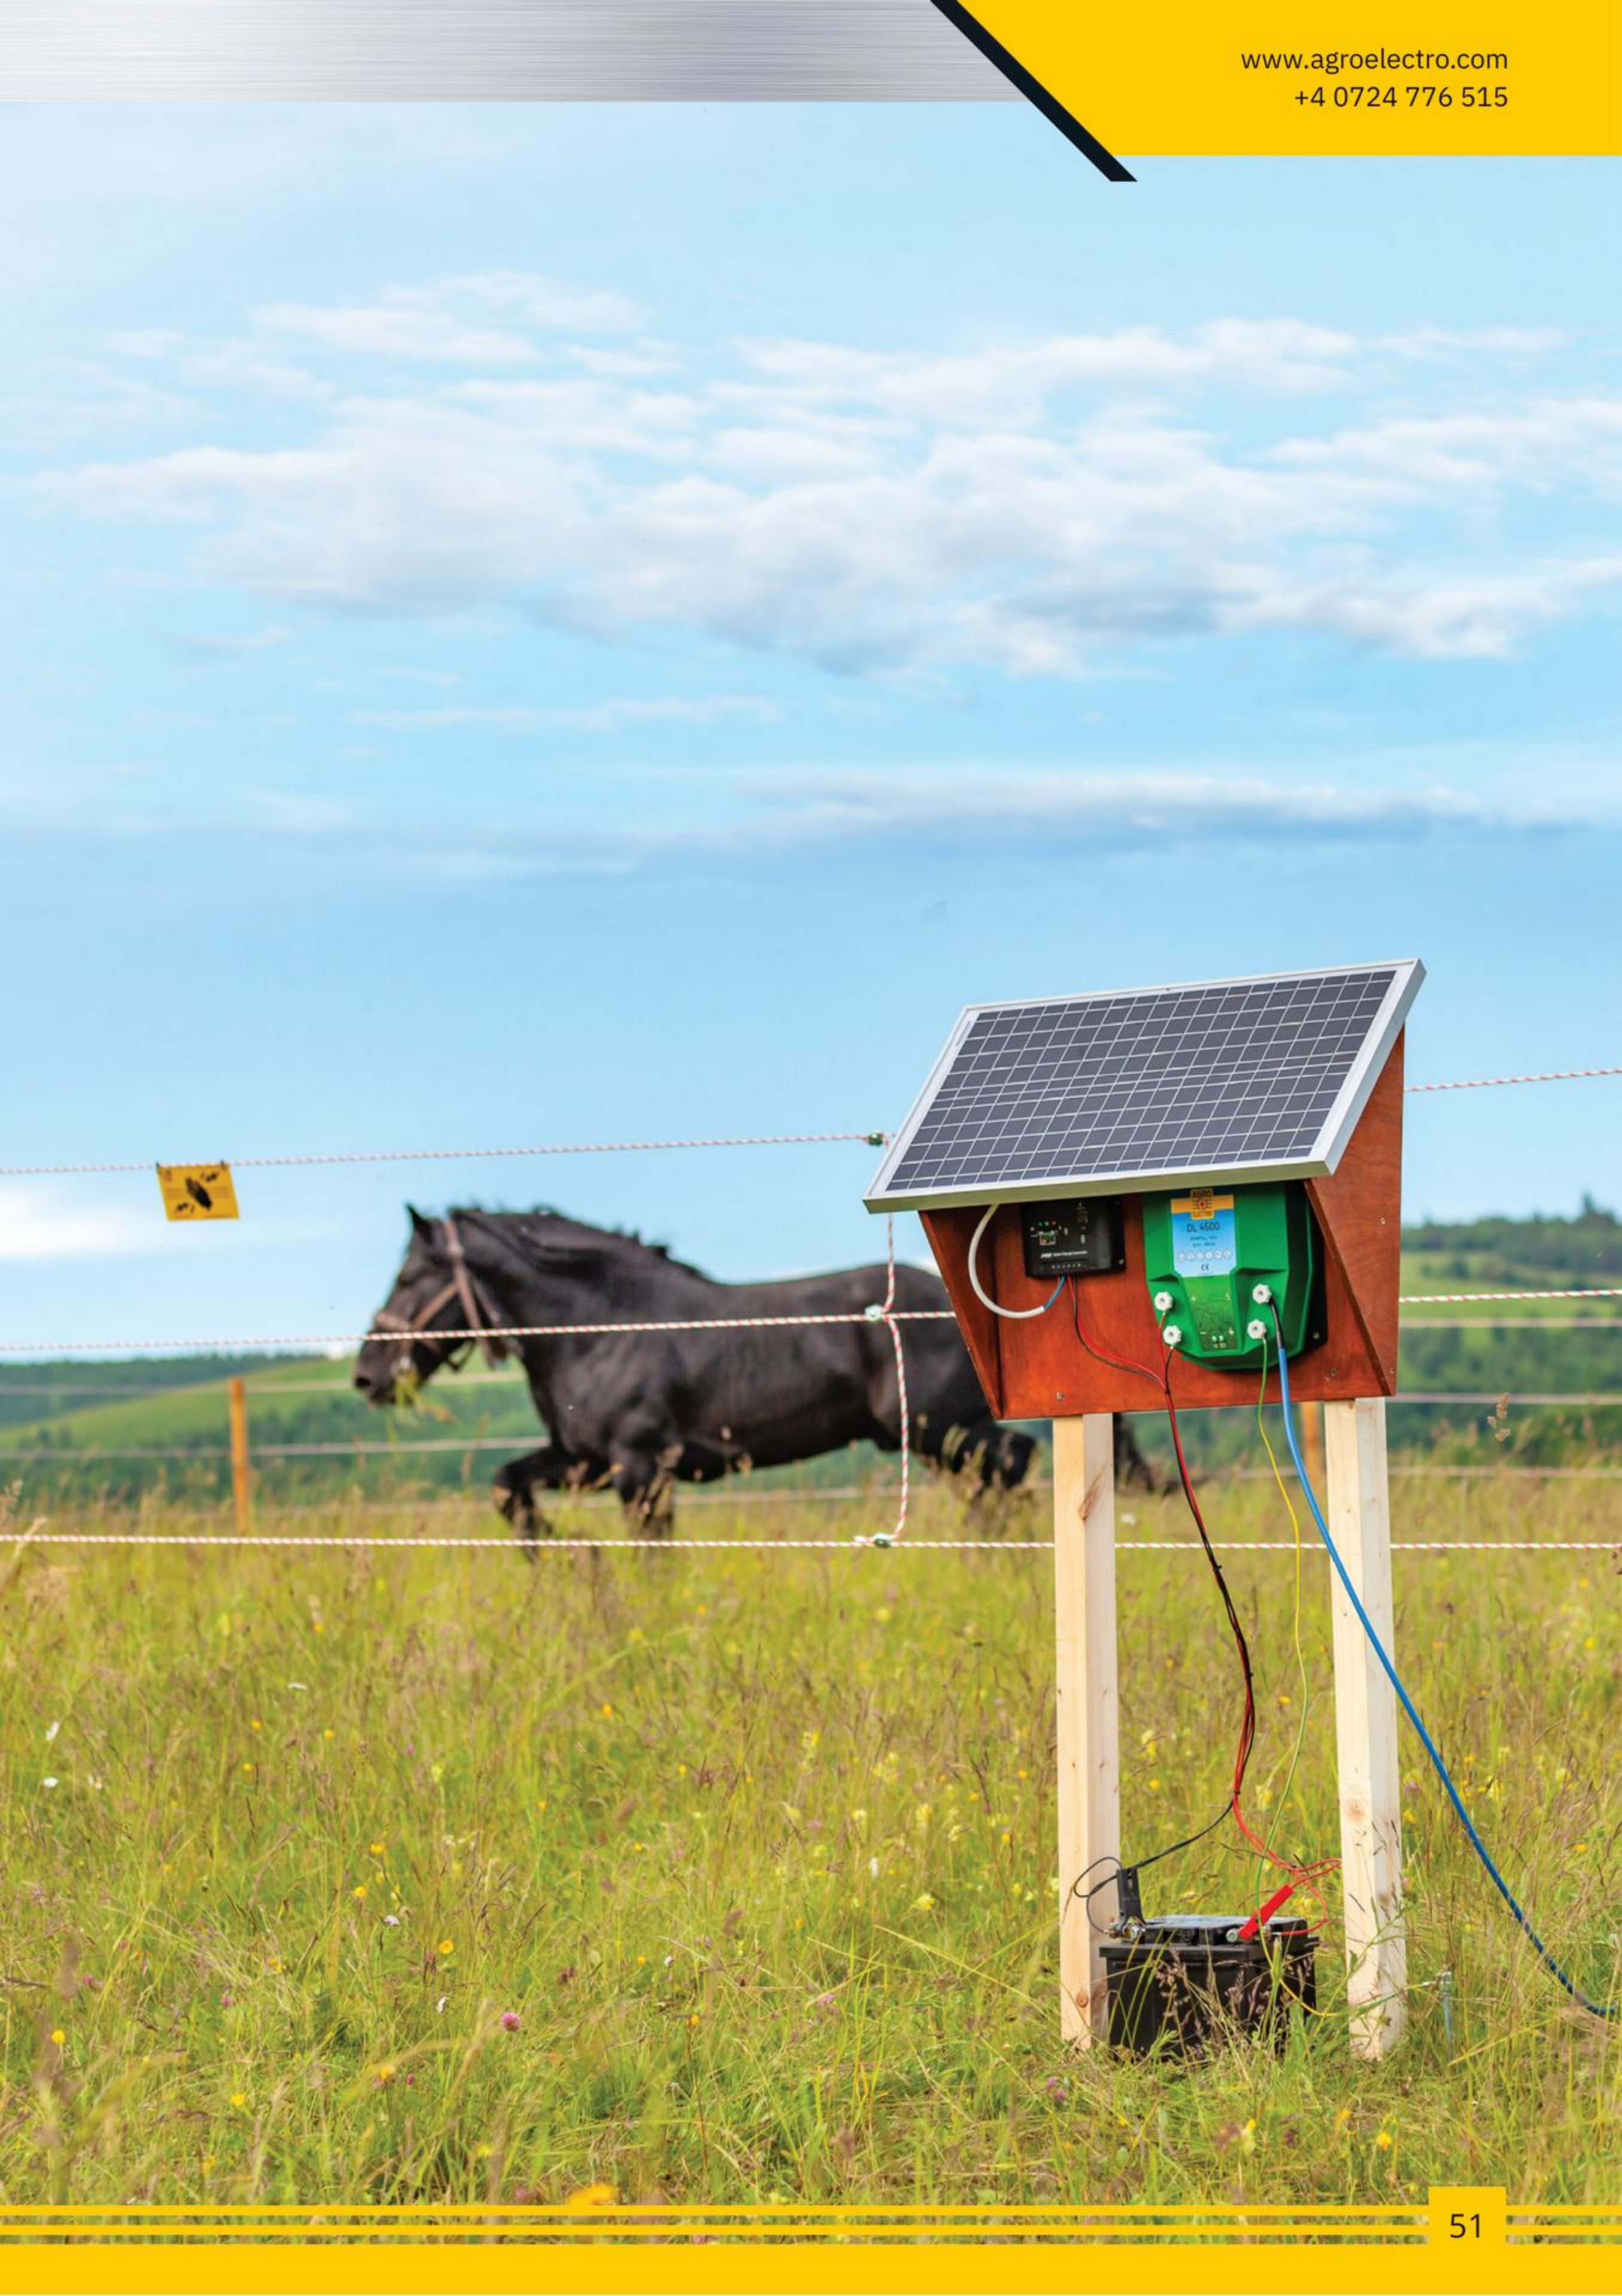

The tester is powered by an included 9 V battery.

Voltage indicator

Device for indicating the presence of impulses in the electric fence wire/tape – it allows you to visually observe, from a distance, whether the electric fence is working, or whether it has the required minimum voltage of 3000 V.

Cow milking machine, with 1 cluster, 1 inox bucket 25 liters, eco

Portable cow milking machine, with one inox 25 liters bucket, pulsator 60/40, vacuum pump 200 liters/minute, without a vacuum tank.

Technical specifications

Bucket	1 × 25 liters, inox
Milking cluster	1 cluster, for cows, 200 cm ³
Pulsator	1 pc., 60/40, 60 pulses/minute
Vacuum pump	200 liters/minute, with oil
Vacuum pump motor	230 V, 550 W
Vacuum tank	No vacuum tank
Weight	46.6 kg

Please note: the 2 year warranty is for the vacuum pump motor, the other parts of the milking machine are not covered by warranty!

Cow milking machine, with 1 cluster, 1 inox bucket 30 liters

Portable cow milking machine, with one inox 30 liters bucket, pulsator 60/40, vacuum pump 230 liters/minute, vacuum tank of 18 liters.

Technical specifications

Bucket	1 × 30 liters, inox
Milking cluster	1 cluster, for cows, 240 cm ³
Pulsator	1 pc., 60/40, 60 pulses/minute
Vacuum pump	230 liters/minute, with oil
Vacuum pump motor	230 V, 550 W
Vacuum tank	18 liters
Weight	57.2 kg

Please note: the 2 year warranty is for the vacuum pump motor, the other parts of the milking machine are not covered by warranty!

Cow milking machine, with 2 clusters, 1 inox bucket 40 liters

Portable cow milking machine, with 2 milking clusters and one inox 40 liters bucket, pulsator 60/40, vacuum pump 230 liters/minute, vacuum tank of 18 liters.

Technical specifications

Bucket	1 × 40 liters, inox
Milking cluster	2 clusters, for cows, 240 cm ³
Pulsators	2 pcs., 60/40, 60 pulses/minute
Vacuum pump	230 liters/minute, with oil
Vacuum pump motor	230 V, 550 W
Vacuum tank	18 liters
Weight	62.7 kg

Please note: the 2 year warranty is for the vacuum pump motor, the other parts of the milking machine are not covered by warranty!

Cow milking machine, with 2 clusters, 2 inox buckets 30 liters

0586

Portable cow milking machine, with 2 milking clusters and 2 inox 30 liters buckets, pulsator 60/40, vacuum pump 230 liters/minute, vacuum tank of 18 liters.

Technical specifications

Buckets	2 × 30 liters, inox
Milking clusters	2 clusters, for cows, 240 cm ³
Pulsators	2 pcs., 60/40, 60 pulses/minute
Vacuum pump	230 liters/minute, with oil
Vacuum pump motor	230 V, 550 W
Vacuum tank	18 liters
Weight	72.2 kg

Please note: the 2 year warranty is for the vacuum pump motor, the other parts of the milking machine are not covered by warranty!

Sheep milking machine, with 2 clusters, 1 inox bucket 25 liters, eco

0587

Portable sheep milking machine, with 2 milking clusters and 1 inox 25 liters bucket, pulsator 50/50, vacuum pump 230 liters/minute, without a vacuum tank.

Technical specifications

Bucket	1 × 25 liters, inox
Milking clusters	2 clusters, for sheep
Pulsator	1 pc., 50/50, 120 pulses/minute
Vacuum pump	200 liters/minute, with oil
Vacuum pump motor	230 V, 550 W
Vacuum tank	No vacuum tank
Weight	46.25 kg

Please note: the 2 year warranty is for the vacuum pump motor, the other parts of the milking machine are not covered by warranty!

Sheep milking machine, with 2 clusters, 1 inox bucket 30 liters

0588

Portable sheep milking machine, with 2 milking clusters and 1 inox 30 liters bucket, pulsator 50/50, vacuum pump 200 liters/minute, vacuum tank of 18 liters.

Technical specifications

Bucket	1 × 30 liters, inox
Milking clusters	2 clusters, for sheep
Pulsator	1 pc., 50/50, 120 pulses/minute
Vacuum pump	230 liters/minute, with oil
Vacuum pump motor	230 V, 550 W
Vacuum tank	18 liters
Weight	56.2 kg

Please note: the 2 year warranty is for the vacuum pump motor, the other parts of the milking machine are not covered by warranty!

Sheep milking machine, with 4 clusters, 1 inox bucket 40 liters

0589

Portable sheep milking machine, with 4 milking clusters and 1 inox 40 liters bucket, pulsator 50/50, vacuum pump 230 liters/minute, vacuum tank of 18 liters.

Technical specifications

Bucket	1 × 40 liters, inox
Milking clusters	4 clusters, for sheep
Pulsators	2 pcs., 50/50, 120 pulses/minute
Vacuum pump	230 liters/minute, with oil
Vacuum pump motor	230 V, 550 W
Vacuum tank	18 liters
Weight	62.4 kg

Please note: the 2 year warranty is for the vacuum pump motor, the other parts of the milking machine are not covered by warranty!

Sheep milking machine, with 4 clusters, 2 inox bucket 30 liters

0590

Portable sheep milking machine, with 4 milking clusters and 2 inox 30 liters bucket, pulsator 50/50, vacuum pump 230 liters/minute, vacuum tank of 18 liters.

Technical specifications

Buckets	2 × 30 liters, inox
Milking clusters	4 clusters, for sheep
Pulsators	2 pcs., 50/50, 120 pulses/minute
Vacuum pump	230 liters/minute, with oil
Vacuum pump motor	230 V, 550 W
Vacuum tank	18 liters
Weight	70.9 kg

Please note: the 2 year warranty is for the vacuum pump motor, the other parts of the milking machine are not covered by warranty!

Cow milking machine, with 1 cluster, 1 aluminum bucket 25 liters, eco

0591

Portable cow milking machine, with one aluminum 25 liters bucket, pulsator 60/40, vacuum pump 200 liters/minute, without a vacuum tank.

Technical specifications

Bucket	1 × 25 liters, aluminum
Milking cluster	1 cluster, for cows, 200 cm ³
Pulsator	1 pc., 60/40, 60 pulses/minute
Vacuum pump	200 liters/minute, with oil
Vacuum pump motor	230 V, 550 W
Vacuum tank	No vacuum tank
Weight	45.85 kg

Please note: the 2 year warranty is for the vacuum pump motor, the other parts of the milking machine are not covered by warranty!

Cow milking machine, with 1 cluster, 1 aluminum bucket 30 liters

0592

Portable cow milking machine, with one aluminum 30 liters bucket, pulsator 60/40, vacuum pump 230 liters/minute, vacuum tank of 18 liters.

Technical specifications

Bucket	1 × 30 liters, aluminum
Milking cluster	1 cluster, for cows, 240 cm ³
Pulsator	1 pc., 60/40, 60 pulses/minute
Vacuum pump	230 liters/minute, with oil
Vacuum pump motor	230 V, 550 W
Vacuum tank	18 liters
Weight	56.3 kg

Please note: the 2 year warranty is for the vacuum pump motor, the other parts of the milking machine are not covered by warranty!

Cow milking machine, with 2 clusters, 1 aluminum bucket 40 liters

0593

Portable cow milking machine, with 2 milking clusters and one aluminum 40 liters bucket, pulsator 60/40, vacuum pump 230 liters/minute, vacuum tank of 18 liters.

Technical specifications

Bucket	1 × 40 liters, aluminum
Milking cluster	2 clusters, for cows, 240 cm ³
Pulsators	2 pcs., 60/40, 60 pulses/minute
Vacuum pump	230 liters/minute, with oil
Vacuum pump motor	230 V, 550 W
Vacuum tank	18 liters
Weight	61.3 kg

Please note: the 2 year warranty is for the vacuum pump motor, the other parts of the milking machine are not covered by warranty!

Cow milking machine, with 2 clusters, 2 aluminum buckets 30 liters

0594

Portable cow milking machine, with 2 milking clusters and 2 aluminum 30 liters buckets, pulsator 60/40, vacuum pump 230 liters/minute, vacuum tank of 18 liters.

Technical specifications

Buckets	2 × 30 liters, aluminum
Milking clusters	2 clusters, for cows, 240 cm ³
Pulsators	2 pcs., 60/40, 60 pulses/minute
Vacuum pump	230 liters/minute, with oil
Vacuum pump motor	230 V, 550 W
Vacuum tank	18 liters
Weight	70.4 kg

Please note: the 2 year warranty is for the vacuum pump motor, the other parts of the milking machine are not covered by warranty!

Sheep milking machine, with 2 clusters, 1 aluminum bucket 25 liters, eco

Portable sheep milking machine, with 2 milking clusters and 1 aluminum 25 liters bucket, pulsator 50/50, vacuum pump 200 liters/minute, without a vacuum tank.

Technical specifications

Bucket	1 × 25 liters, aluminum
Milking clusters	2 clusters, for sheep
Pulsator	1 pc., 50/50, 120 pulses/minute
Vacuum pump	200 liters/minute, with oil
Vacuum pump motor	230 V, 550 W
Vacuum tank	No vacuum tank
Weight	45.5 kg

Please note: the 2 year warranty is for the vacuum pump motor, the other parts of the milking machine are not covered by warranty!

Sheep milking machine, with 2 clusters, 1 aluminum bucket 30 liters

Portable sheep milking machine, with 2 milking clusters and 1 aluminum 30 liters bucket, pulsator 50/50, vacuum pump 230 liters/minute, vacuum tank of 18 liters.

Technical specifications

Bucket	1 × 30 liters, aluminum
Milking clusters	2 clusters, for sheep
Pulsator	1 pc., 50/50, 120 pulses/minute
Vacuum pump	230 liters/minute, with oil
Vacuum pump motor	230 V, 550 W
Vacuum tank	18 liters
Weight	55.3 kg

Please note: the 2 year warranty is for the vacuum pump motor, the other parts of the milking machine are not covered by warranty!

Sheep milking machine, with 4 clusters, 1 aluminum bucket 40 liters

Portable sheep milking machine, with 4 milking clusters and 1 aluminum 40 liters bucket, pulsator 50/50, vacuum pump 230 liters/minute, vacuum tank of 18 liters.

Technical specifications

Bucket	1 × 40 liters, aluminum
Milking clusters	4 clusters, for sheep
Pulsators	2 pcs., 50/50, 120 pulses/minute
Vacuum pump	230 liters/minute, with oil
Vacuum pump motor	230 V, 550 W
Vacuum tank	18 liters
Weight	59.9 kg

Please note: the 2 year warranty is for the vacuum pump motor, the other parts of the milking machine are not covered by warranty!

Sheep milking machine, with 4 clusters, 2 aluminum bucket 30 liters

0598

Portable sheep milking machine, with 4 milking clusters and 2 aluminum 30 liters bucket, pulsator 50/50, vacuum pump 230 liters/minute, vacuum tank of 18 liters.

Technical specifications

Buckets	2 × 30 liters, aluminum
Milking clusters	4 clusters, for sheep
Pulsators	2 pcs., 50/50, 120 pulses/minute
Vacuum pump	230 liters/minute, with oil
Vacuum pump motor	230 V, 550 W
Vacuum tank	18 liters
Weight	69.1 kg

Please note: the 2 year warranty is for the vacuum pump motor, the other parts of the milking machine are not covered by warranty!

Goat milking machine, with 2 clusters, 1 inox bucket 30 liters

0936

Portable goat milking machine, with 2 milking clusters and 1 inox 30 liters bucket, pulsator 60/40, vacuum pump 230 liters/minute, vacuum tank of 18 liters.

Technical specifications

Bucket	1 × 30 liters, inox
Milking clusters	2 clusters, for goats
Pulsator	1 pc., 60/40, 90 pulses/minute
Vacuum pump	230 liters/minute, with oil
Vacuum pump motor	230 V, 550 W
Vacuum tank	18 liters
Weight	55.4 kg

Please note: the 2 year warranty is for the vacuum pump motor, the other parts of the milking machine are not covered by warranty!

Goat milking machine, with 2 clusters, 1 aluminum bucket 30 liters

0937

Portable goat milking machine, with 2 milking clusters and 1 aluminum 30 liters bucket, pulsator 60/40, vacuum pump 230 liters/minute, vacuum tank of 18 liters.

Technical specifications

Bucket	1 × 30 liters, aluminum
Milking clusters	2 clusters, for goats
Pulsator	1 pc., 60/40, 90 pulses/minute
Vacuum pump	230 liters/minute, with oil
Vacuum pump motor	230 V, 550 W
Vacuum tank	18 liters
Weight	54.3 kg

Please note: the 2 year warranty is for the vacuum pump motor, the other parts of the milking machine are not covered by warranty!

Goat milking machine, with 4 clusters, 1 inox bucket 40 liters

0938

Portable goat milking machine, with 4 milking clusters and 1 inox 40 liters bucket, pulsator 60/40, vacuum pump 230 liters/minute, vacuum tank of 18 liters.

Technical specifications

Bucket	1 × 40 liters, inox
Milking clusters	4 clusters, for goats
Pulsators	2 pcs., 60/40, 90 pulses/minute
Vacuum pump	230 liters/minute, with oil
Vacuum pump motor	230 V, 550 W
Vacuum tank	18 liters
Weight	60.5 kg

Please note: the 2 year warranty is for the vacuum pump motor, the other parts of the milking machine are not covered by warranty!

Goat milking machine, with 4 clusters, 1 aluminum bucket 40 liters

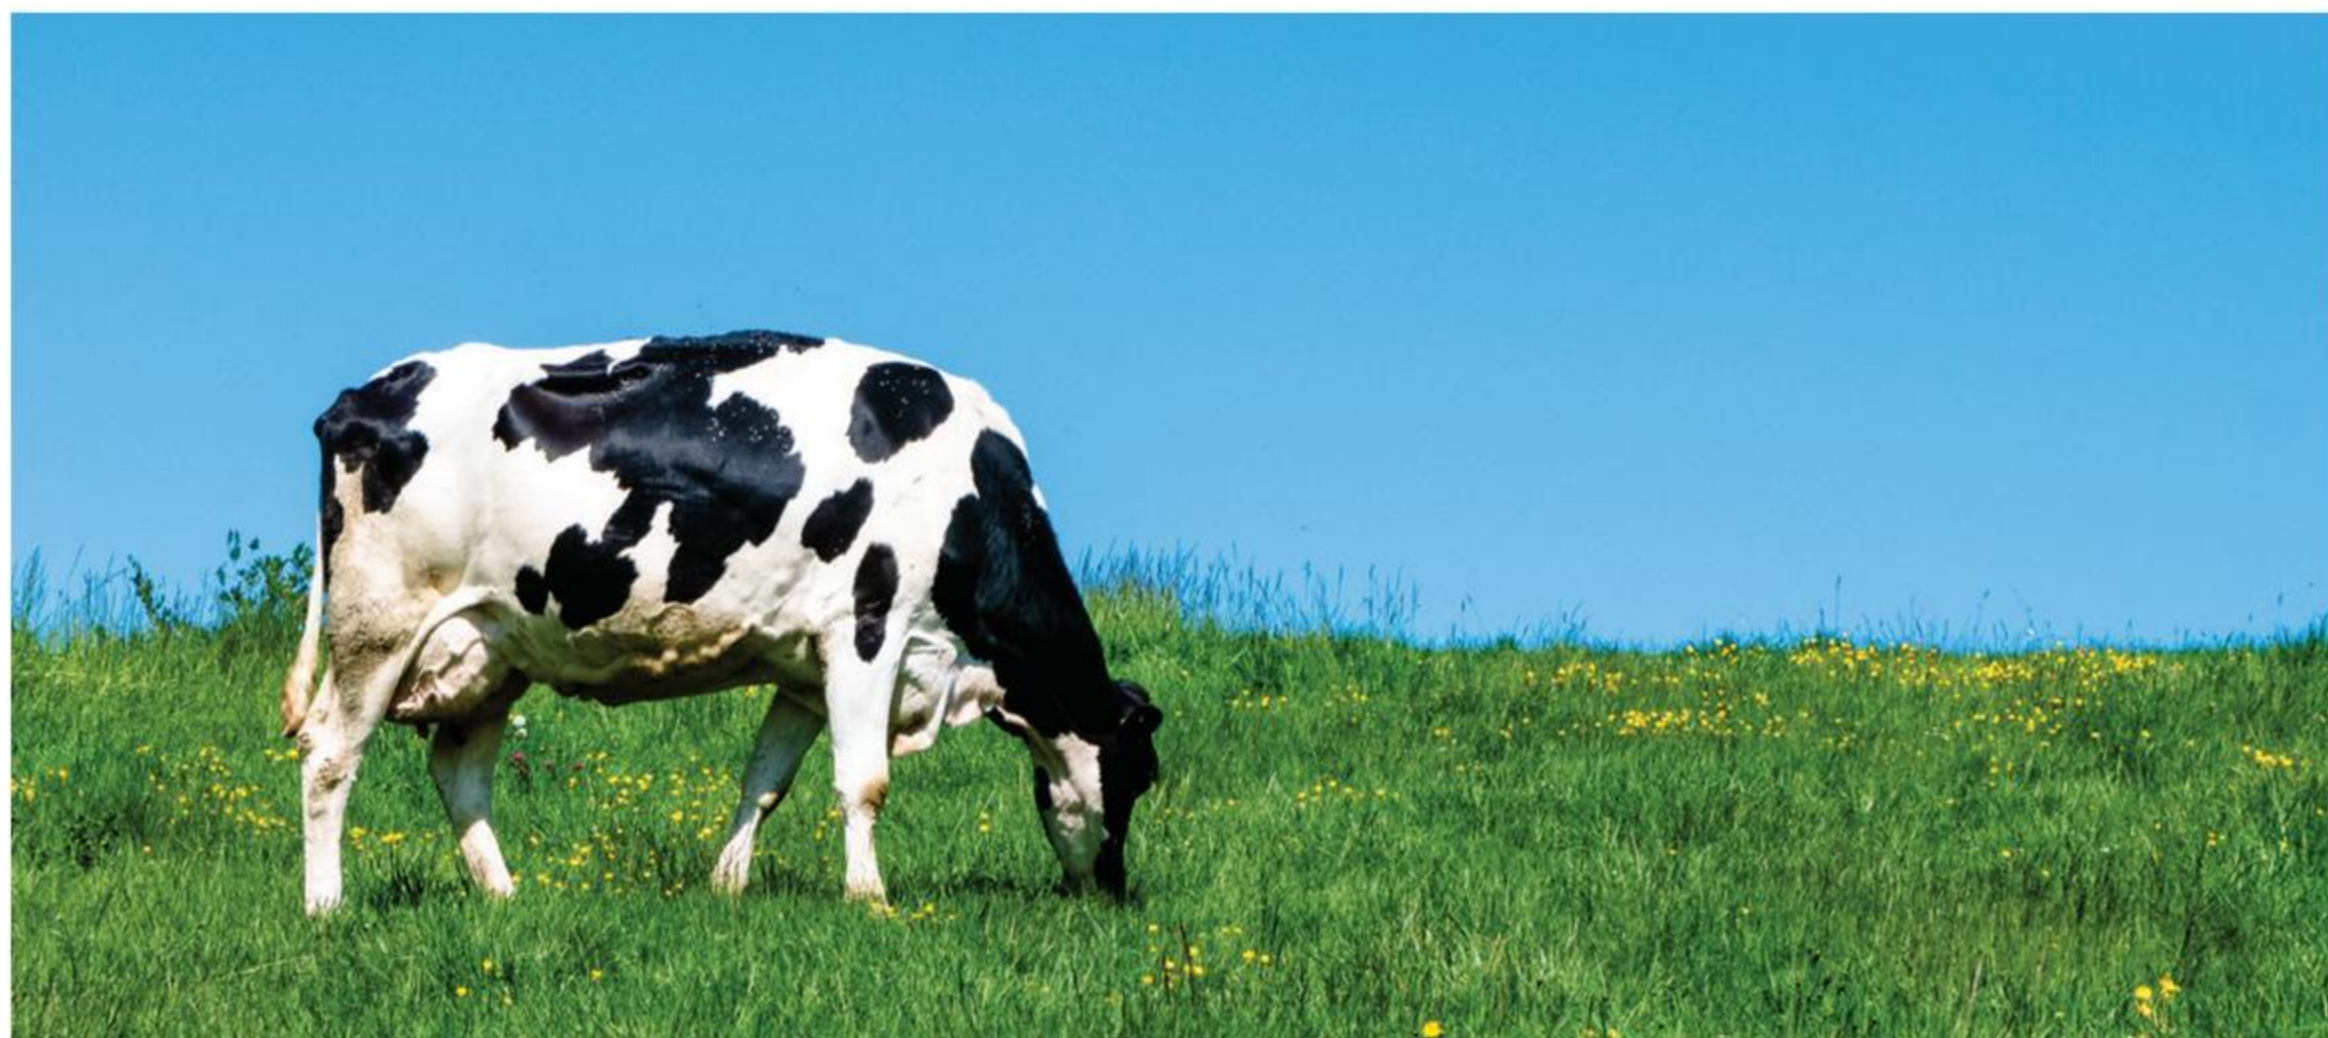

0939

Portable goat milking machine, with 4 milking clusters and 1 aluminum 40 liters bucket, pulsator 60/40, vacuum pump 230 liters/minute, vacuum tank of 18 liters.

Technical specifications

Bucket	1 × 40 liters, aluminum
Milking clusters	4 clusters, for goats
Pulsators	2 pcs., 60/40, 90 pulses/minute
Vacuum pump	230 liters/minute, with oil
Vacuum pump motor	230 V, 550 W
Vacuum tank	18 liters
Weight	59.25 kg

Please note: the 2 year warranty is for the vacuum pump motor, the other parts of the milking machine are not covered by warranty!

Inox bucket for milking machine, 25 liters

Capacity	25 liters
Interior width top	17.5 cm
Exterior width bottom	33 cm
Overall height	41 cm

0599

Aluminum bucket for milking machine, 25 liters

Capacity	25 liters
Interior width top	17.5 cm
Exterior width bottom	30 cm
Overall height	48 cm

0602

Inox bucket for milking machine, 30 liters

Capacity	30 liters
Interior width top	17.5 cm
Exterior width bottom	33 cm
Overall height	46 cm

0600

Aluminum bucket for milking machine, 30 liters

Capacity	30 liters
Interior width top	17.5 cm
Exterior width bottom	34 cm
Overall height	48 cm

0603

Inox bucket for milking machine, 40 liters

Capacity	40 liters
Interior width top	21.5 cm
Exterior width bottom	33 cm
Overall height	60 cm

0601

Aluminum bucket for milking machine, 40 liters

Capacity	40 liters
Interior width top	21.5 cm
Exterior width bottom	34 cm
Overall height	56.5 cm

0604

Inox milk transport can, 30 liters

0605

The can is fitted with a clip-type lid. The lid is sealed with a rubber ring.

Capacity	30 liters
Interior width top	21.5 cm
Exterior width bottom	33 cm
Overall height	46 cm

Aluminum milk transport can, 30 liters

0607

The can is fitted with a clip-type lid. The lid is sealed with a rubber ring.

Capacity	30 liters
Interior width top	18 cm
Exterior width bottom	30 cm
Overall height	55 cm

Inox milk transport can, 40 liters

0606

The can is fitted with a clip-type lid. The lid is sealed with a rubber ring.

Capacity	40 liters
Interior width top	21.5 cm
Exterior width bottom	33 cm
Overall height	58.5 cm

Aluminum milk transport can, 40 liters

0608

The can is fitted with a clip-type lid. The lid is sealed with a rubber ring.

Capacity	40 liters
Interior width top	18 cm
Exterior width bottom	34.5 cm
Overall height	58 cm

Graduated milk container, plastic, 30 litres

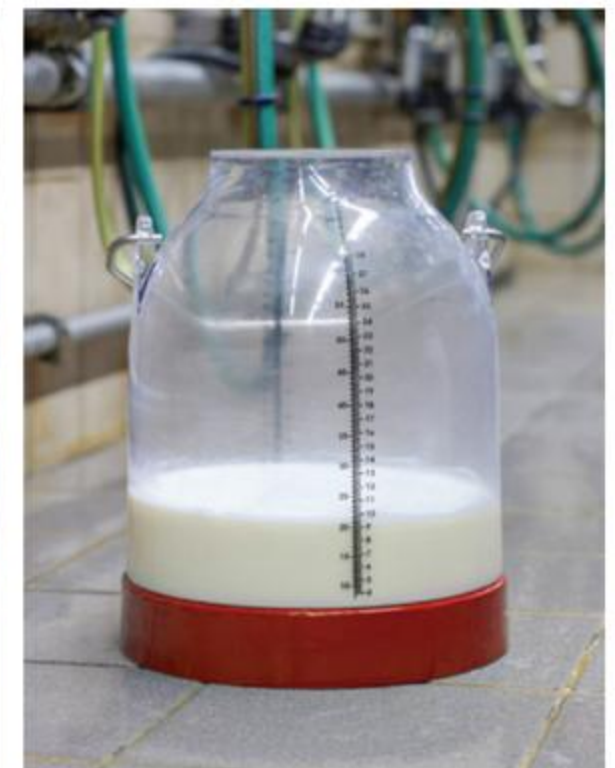

NEW

The graduated milk container is made of transparent food-grade polycarbonate and features a printed measuring scale. Supplied without lid.

Capacity	30 liters
Interior width top	17 cm
Exterior width bottom	36 cm
Overall height	45 cm

1858

Stainless steel bucket

NEW

Bucket made of AISI 201 stainless steel, used in activities requiring high hygiene standards, such as food processing or milk handling. The material is resistant to corrosion, high temperatures and frequent disinfection. The polished inner and outer surface allows easy cleaning and does not retain residues.

Measuring jug with scale, plastic

NEW

Graduated jug made of polypropylene, resistant to chemicals and oils, used for measuring and dosing liquids. The transparent design allows quick reading of the liquid level, while the embossed scale ensures long-term visibility and durability. The spout enables controlled pouring, and the design allows stacking for space-saving storage.

3 liters

2035

5 liters

Milk bucket lid, 25-30 liters

Plastic lid for 25-30 liter milking buckets (with an inner opening width of 17.5 cm).

0609

Milk bucket lid, 40 liters

Plastic lid for 40 liter milking buckets (with an inner opening width of 21.5 cm).

0610

Lid with 2 outlets, for 25-30 liter buckets

Plastic bucket lid with 2 outlets for milking machines, for 25-30 liter buckets.

0611

Lid with 3 outlets, for 25-30 liter buckets

Plastic bucket lid with 3 outlets for milking machines, for 25-30 liter buckets (with an inner opening width of 17.5 cm).

0612

Lid with 3 outlets, for 40 liter buckets

Plastic bucket lid with 3 outlets for milking machines, for 40 liter buckets (having an inner opening width of 21.5 cm).

0613

Milk bucket stopper

Simple device to automatically stop the milking process if the milk bucket fills up.

0887

Lid gasket for 25-30 liter buckets

Gasket for 25-30 liter milk buckets (having an inner opening width of 17.5 cm).

0614

Lid gasket for 40 liter buckets

Gasket for 40 liter milk buckets (having an inner opening width of 21.5 cm).

0615

Double vacuum tube, 7/14 mm

7/14 mm double vacuum tube for milking machines – for connecting the pulsator and the claw.

Milk tube, 14/22 mm

14/22 mm milk tube for milking machines – for connecting the bucket and the claw.

Milk tube, 16/25 mm

16/25 mm milk tube for milking machines – for connecting the bucket and the claw.

Double tube, 14/22 + 7/14 mm

Double tube – vacuum tube (7/14 mm) and milk tube (14/22 mm) for milking machines – for connecting the claw, the bucket and the pulsator.

Triple tube, 7/14 + 14/22 + 7/14 mm

Triple tube – vacuum tube (2 × 7/14 mm) and milk tube (14/22 mm) for milking machines – for connecting the claw, the bucket and the pulsator.

Milk tube tap

Plastic tap for milk tube.
Connection diameter: Ø16 mm.

Milk tube holder

Milk and vacuum tube holder ring.

Y connector, 16 mm

Y connector for milk tubes.
Connection diameter: Ø16 mm.

Y connector, 8.5 mm

Y connector for vacuum tubes.
Connection diameter: Ø8.5 mm.

Pulsator 60/40, 60 pulses/minute

Mechanical pulsator for cow milking machines, 60/40, 60 pulses/minute.

0652

Pulsator 50/50, 120 pulses/minute

Mechanical pulsator for sheep milking machines, 50/50, 120 pulses/minute.

0653

Pulsator 60/40, 90 pulses/minute

Mechanical pulsator for goat milking machines, 60/40, 90 pulses/minute.

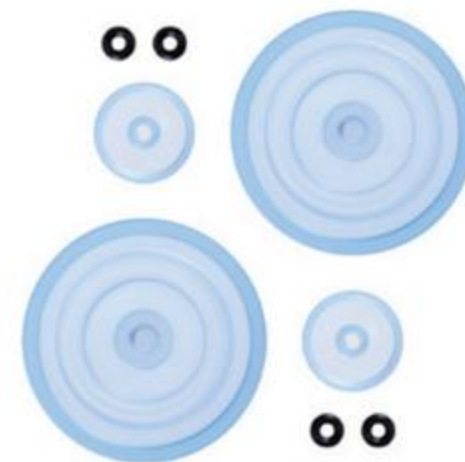

0931

Pulsator repair kit

The kit contains two small membranes, two large membranes and four gasket rings.

0654

Cow milking cluster, 240 cm³

0636

Complete milking cluster for cow milking machines with 4 liners and 240 cm³ claw.

Sheep milking cluster, rubber, 150 cm³

0637

Complete milking cluster for sheep milking machines with 2 rubber liners and 150 cm³ claw.

Sheep milking cluster, silicone

Complete milking cluster for sheep milking machines with 2 silicone liners and universal claws.

0638

Sheep milking cluster, rubber

0639

Complete milking cluster for sheep milking machines with 2 rubber liners and universal claws.

Goat milking cluster, rubber

Complete milking cluster for goat milking machines with 2 rubber liners and universal claws.

0933

Goat milking cluster, silicone

0932

Complete milking cluster for goat milking machines with 2 silicone liners and universal claws.

Complete milking claw, 240 cm³

Complete claw for milking machines, 240 cm³.

0641

Top body for 240 cm³ milking claw

Spare top + gasket ring for 240 cm³ milking machine claw.

0642

Bottom body for 240 cm³ milking claw

Spare bottom body for 240 cm³ milk claw.

0643

Claw gasket for 240 cm³ collector

Sealing gasket for 240 cm³ milk claw.

0644

Inner gasket for 240 cm³ collector

Seals the 240 cm³ milk collector body. Two gaskets have to be fitted on opposite sides of the body to seal the fixing screw.

1358

Plastic nut for 240 cm³ milk collector

M6 plastic nut with metallic (brass) thread for the 240 cm³ milk collector.

1357

Shut-off valve for 240 cm³ collector

Rubber shut-off valve for 240 cm³ milk collector.

1356

Complete milking claw, 200 cm³

Complete claw for milking machines, 200 cm³.

0645

Claw top for 200 cm³ milking claw

Spare top + gasket ring for 200 cm³ milking machine claw.

0646

Milk claw bottom body, 200 cm³

Spare bottom body for 200 cm³ milk claw.

0647

Milk claw gasket 200 cm³

Sealing gasket for 200 cm³ milk claw.

0648

Shut-off valve for 200 cm³ collector

Rubber shut-off valve for milk collector 200 cm³.

1359

Button for 200 and 240 cm³ collectors

Knob for operating the valve of the 200 cm³ and 240 cm³ milk collector.

1355

Complete milking claw, 150 cm³

Complete claw for milking machines, 150 cm³.

0649

Milk claw gasket 150 cm³

Sealing gasket for 150 cm³ milk claw.

0650

Universal milking claw for sheep and goats

Universal milking claw (one-way valve) for sheep and goats.

0651

Rubber liner set for cows

Spare long rubber liner for cow milking machines.
Set of 4 pieces.

Milking cup for goat milking machines.

0935

1 pc.

Liner plug

Liner plug for stopping the operation of a cow milking machine liner.

0893

1 pc.

Short vacuum tube, 7/14 mm

Short rubber vacuum tube for connecting the liners to the milk claw or to the Y-connector.

0632

Vacuum pump with oil, 200 liters/minute

0616

Monophasic vacuum pump with oil.

Motor type	Monophasic
Supply voltage	~230 V
Consumption	550 W
Capacity	200 l/min
Lubrication	Oil

Vacuum pump with oil, 230 liters/minute

0617

Monophasic vacuum pump with oil.

Motor type	Monophasic
Supply voltage	~230 V
Consumption	550 W
Capacity	230 l/min
Lubrication	Oil

Vacuum pump 70 mm, 200 liters/minute

Spare vacuum pump without motor for milking machines. 70 mm, 200 liters/min.

0899

Vacuum pump 80 mm, 230 liters/minute

Spare vacuum pump without motor for milking machines. 80 mm, 230 liters/min.

0900

Oil tank

0897

Oil tank for milking machines with vacuum pump 200 liters/minute.

Waste oil tank

0898

Waste oil tank for milking machines with vacuum pump 200 liters/minute.

Vacuum pump silencer

0886

Noise reduction (silencing) device for milking machines with vacuum pump type 200 liters/min.

200 l/min vacuum pump vane set

Spare vane set for **200** liters/minute vacuum pump. 4.9 × 43 × **69.85** mm.

0618

230 l/min vacuum pump vane set

Spare vane set for **230** liters/minute vacuum pump. 4.9 × 43 × **79.85** mm.

0619

Graphite vanes for vacuum pump

Spare vane set for vacuum pump, 4.9 × 43 × **70** mm.

1348

Graphite vanes for vacuum pump

Spare vane set for vacuum pump, 4.9 × 43 × **79.95** mm.

1349

Vacuum tank, 18 liters

Vacuum tank for milking machines, 18 liters.

0888

Vacuum regulator

Pressure regulator for vacuum tank. Thread: 3/4 inch.

0622

Vacuum tank lid

Spare transparent lid for the vacuum tank (Ø167 mm).

0620

Vacuum tank lid gasket

Spare gasket for sealing the vacuum tank lid.

0621

Discharge plug for vacuum tank

Quick discharge plug for the vacuum tank of milking machines.

1354

Vacuum distributor for milking machines

Plastic vacuum distribution unit for milking machines.

0884

Long tube for vacuum tank

Special tube for connecting the vacuum tank to the vacuum distributor.

0890

Short tube for vacuum tank

Special short tube for connecting the vacuum pump to the vacuum tank.

0889

Vacuum gauge, 63 mm, 1/4 inch

Vacuum gauge (manometer) for milking machines.
Scale: -1...0 bar
Connection: 1/4 inch
Diameter: 63 mm

0623

Vacuum gauge, 100 mm, 1/2 inch

Vacuum gauge (manometer) for milking machines.
Scale: -1...0 bar
Connection: 1/2 inch
Diameter: 100 mm

0624

Vacuum gauge connector

Special tube for connecting the 1/4-inch vacuum gauge (manometer) of milking machines.

0892

Vacuum pump oil, Agro Electro

Vacuum pump oil for milking machines.

0625

1 liter

0626

4 liters

Vacuum pump oil, Viscano (Kerbl)

Vacuum pump oil for milking machines.

0751

1 liter

0752

5 liters

1251

10 liters

Wheel for milking machines

Spare wheel for milking machines.
Diameter: 250 mm.

0894

Milk tube cleaning brush

Long brush for cleaning milk tubes.

0655

Total length	150 cm
Diameter of bristles	2.2 cm
Length of the brushing part	15 cm
Handle length	10 cm

0994

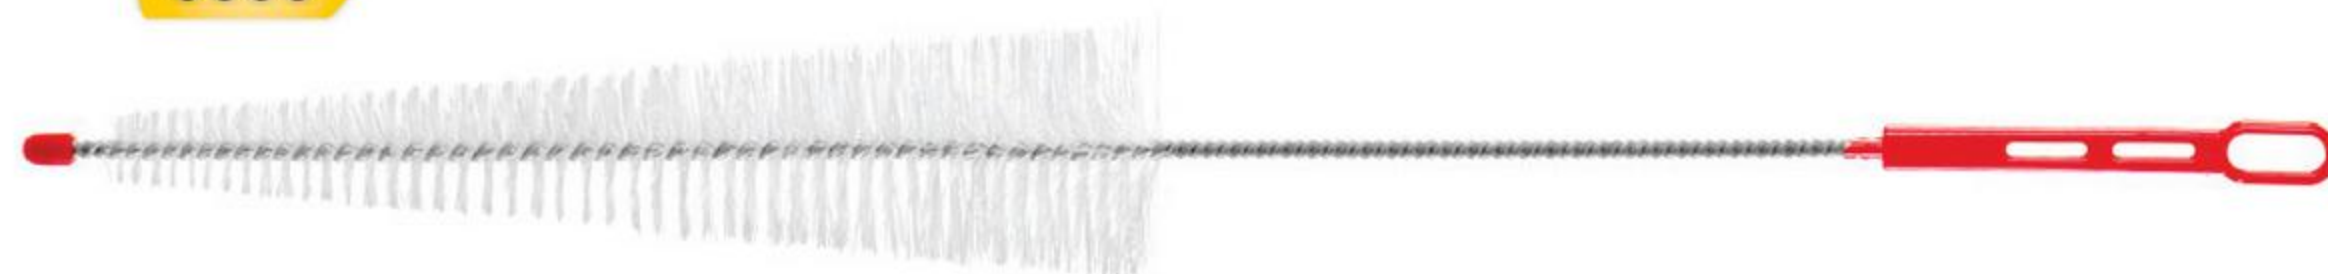

Total length	155 cm
Diameter of bristles	1.6 cm
Length of the brushing part	20 cm

Liner cleaning brush

The gradually narrowing bristles fit perfectly with the inner walls of the liner, ensuring efficient cleaning.

0656

Total length	52 cm
Diameter of bristles	1.5–5.5 cm (conic)
Length of the brushing part	24 cm
Handle length	10 cm

0995

Total length	40 cm
Diameter of bristles	2–5.8 cm
Length of the brushing part	23 cm

1221

Total length	50 cm
Diameter of bristles	2–6 cm
Length of the brushing part	30 cm

MCLEAN-B, alkaline detergent for cleaning milking machines

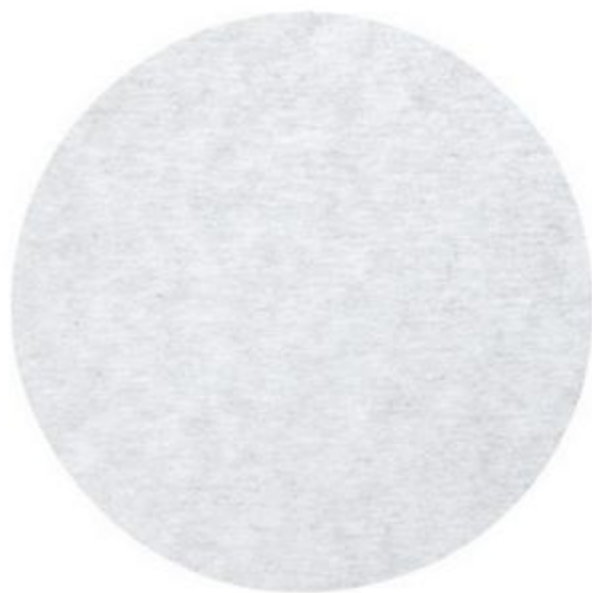

Alkaline pH detergent for cleaning the piping systems of milking machines, milk tanks and automatic feeders. For effective cleaning, alternating use with MCLEAN-A is recommended.

MCLEAN-A, acidic detergent for cleaning milking machines

Acid pH detergent for cleaning the piping systems of milking machines, milk tanks and automatic feeders. For effective cleaning, alternating use with MCLEAN-B is recommended.

Sana milk filter disc, 200 pieces

Disposable milk filter disc, made of food-safe non-woven polyester fibers. The filter can be used to remove the smallest impurities and deposits from freshly milked milk. The filter is placed in a special milk filter funnel.

The filter is specially designed for food use and it does not alter the taste of the milk.

Each pack contains 200 filters.

Eutra udder lotion

A Swiss medicinal cream containing lanolin and natural care ingredients to maintain the health of the udder and the teats. Regular use increases udder resistance and promotes the production of good quality milk.

Wet udder cleaning towel

Wet paper towel for cleaning udders before and after milking. Effective and quick cleaning, made of 100% raw cellulose.

The cleaning agent is safe and does not contain ammonium compounds.

800 sheets,
in bucket

0663

800 sheets,
refill pack

0664

KerbaMint udder care gel

Peppermint oil gel for teat and udder care. Nourishes affected teats and udders. Healing ingredients keep tissues soft and moisturized. The cooling effect of the product is also appreciated by the animal. Regular use increases udder strength and helps produce good quality milk.

0711

500
ml

0712

1000
ml

UPROTECT post-milking udder care gel

Lactic acid based preparation, ensures proper udder hygiene after milking.

The solution forms a protective film on the teats, which protects against infections and accelerates the regeneration of the udder skin.

0902

Clay udder paste, KerbaSan

NEW

It is used daily in cattle farms for udder skin care. The clay-based formula has a cooling and soothing effect and is suitable after milking or during periods of increased stress. The product is water-resistant, repels dirt and contains no chemical additives.

2042

Green udder gel

NEW

It is used for regular skin care and has a gel consistency that is easy to apply and remove. It contains vegetable oils and essential oils that help maintain skin elasticity and protect the udder tissue. The menthol effect provides a cooling sensation after milking. It is applied by gentle massage on a clean udder, with no waiting time.

Udder care cream, NJP Liniment

NEW

Plant-based udder care cream containing approximately 33% pure Japanese peppermint oil. It absorbs easily after application, provides a cooling effect and helps maintain tissue elasticity during periods of increased stress. Suitable for frequent use with no withdrawal time.

2046

Dip cup for teat disinfection

Cup for teat disinfection before and after milking.

Classic

300 ml

0657

Cup for teat disinfection before and after milking. With special valve to prevent the disinfection solution from flowing back into the tank.

Non return

300 ml

0960

Cup for teat disinfection before and after milking.

Classic

300 ml

0961

The cup is intended for disinfecting nipples after milking. It generates a dense foam which increases the contact surface and improves the effectiveness of the disinfection products.

Foam Expert

300 ml

1592

Refractometer for measuring colostrum quality

NEW

1950

The refractometer determines the immunoglobulin (IgG) content expressed in % Brix. It operates on the principle of refraction and features automatic temperature compensation (ATC); calibration is performed at 20 °C.

It is used for cow and mare colostrum to evaluate quality immediately after birth. A drop placed on the prism allows reading the value on the internal scale. After use, it should be cleaned and stored in a dry place.

Colostrometer for measuring colostrum quality

NEW

1951

The colostrometer determines the gammaglobulin (IgG) content by measuring specific density. The result is read on the color scale, and the measurement is performed at 20 °C.

The device includes a glass pipette, a floating shaft with color marking, a suction bulb and a hose. The scale indicates the quality level:

- green – high quality
- yellow – medium quality
- red – low quality.

Mastitis indicator paper, 25 pcs **NEW**

Indicator paper for rapid mastitis detection by applying the first milk streams onto the four marked areas. A color change indicates possible secretion disorders:

- green – minor issue;
- green-blue/blue – major issue.

25 pcs.

1847

Mastitis test solution, KerbaTEST **NEW**

1000 ml

1744

Solution for determining somatic cell content in raw milk, used for detecting sub-clinical mastitis. A viscous reaction after mixing with milk indicates elevated cell levels. Used with a CMT test paddle (4 compartments). 1 litre ≈ 125 tests.

Mastitis test paddle **NEW**

Four-compartment test paddle for separate samples from each quarter of the udder. After adding the solution and gentle swirling, the reaction indicates the level of inflammation. Reusable.

1953

Teat catheter, 10 pieces

0810

Plastic teat catheter for dilating the udder.
Length: 45 mm

10 pcs.

Wool teat dilator, 20 pieces **NEW**

1854

Wool dilator plug impregnated with petroleum jelly, used to keep the teat canal open. Equipped with a safety stop, intended for single use, maximum 12 hours.
Length: 55 mm.

20 pcs.

Teat catheter, Fürstenberg model, Ø2.5 mm

Fürstenberg-type teat catheter for temporary drainage or clearing of the teat canal. Metal tube with lateral openings and separate guide rod, equipped with rings for handling. Made of stainless steel, sterilizable.

Teat catheter, Fürstenberg model, Ø3 mm

Fürstenberg-type teat catheter for temporary drainage or clearing of the teat canal. Metal tube with lateral openings and separate guide rod, equipped with rings for handling. Made of stainless steel, sterilizable.

Teat catheter with olive-type guiding tip

Used to restore milk flow in case of teat blockage. The rounded tip allows controlled insertion, and the detachable inner rod helps remove obstructions. Made of stainless steel, sterilizable.

Teat lesion extractor, Hug model, 15 cm

Used for removing formations or blockages from the teat canal. The circular handle mechanism allows precise control of the active tip during intervention. Made of stainless steel, sterilizable. Length: 15 cm.

Teat knife, Schnecker type, 12 cm

Designed for removing blockages or treating narrowings of the teat canal. The gradual tip allows controlled insertion. Made of stainless steel, sterilizable. Length: 12 cm.

Teat incision instrument, Danish model, 18 cm

Designed for opening or clearing the teat canal in cases of obstruction or narrowing. Equipped with a circular handle and adjustable stopper to control incision depth. Made of stainless steel, sterilizable. Length: 18 cm.

Feeding bucket for calves, 8 liters

0431

Ideal for feeding calves. The bucket can be hung from the front or rear through the suspension holes. The sloping bottom ensures total milk/water drainage. Embossed measuring scale helps to accurately dose the fill amount. The package includes teat and valve.

Feeding bucket for lambs and kids, with 1, 3 or 5 teats, 8 liters

0449

0450

0451

Ideal for feeding lambs and kids. The bucket can be hung from the front or rear through the suspension holes. The sloping bottom ensures total milk/water drainage. Embossed measuring scale helps to accurately dose the fill amount.

The package includes teat, valve and suspension holder.

Feeding bucket for lambs and kids with 6 teats of 50 mm, 10 liters

0475

This bucket is ideal for feeding several lambs and kids at the same time, as it comes equipped with six 50 mm teats with valve (included). Fence mountable, easy to clean, sanitize and transport.

It is made of very stable and durable plastic, developed for everyday use.

The embossed measuring scale helps to accurately dose the filling quantity.

Feeding bucket for lambs and kids with 6 teats of 70 mm, 10 liters

This bucket is ideal for feeding several lambs and kids at the same time, as it comes equipped with six 70 mm teats with valve (included). Fence mountable, easy to clean, sanitize and transport.

It is made of very stable and durable plastic, developed for everyday use.

The embossed measuring scale helps to accurately dose the filling quantity.

0476

Feeding bucket for lambs and kids, with 6 teats, 8 liters

0452

Ideal for feeding lambs and kids. The bucket can be hung from the front or rear through the suspension holes. The sloping bottom ensures total milk/water drainage. Embossed measuring scale helps to accurately dose the fill amount.

Package includes teat, valve and suspension holder.

Feeding bucket for lambs and kids, with 6 teats, 12 liters

NEW

2040

Ideal for feeding lambs and kids. The bucket can be hung from the rear through the suspension supports. The sloping bottom ensures total milk/water drainage. Embossed measuring scale helps to accurately dose the fill amount.

Package includes teat, valve and suspension supports.

Calf drinker with 5 rubber teats, 30 liters

0827

Used for simultaneous feeding of 5 calves, with a total capacity of 30 liters. The first 15 liters are divided into 5 equal compartments of 3 liters each, ensuring uniform milk distribution and equal access for every calf. Equipped with 5 interchangeable rubber teats.

The thick plastic housing, resistant to acids and suitable for food contact, can be mounted on a metal pipe frame. Fixing is carried out using the included steel hanging profiles and rubber straps, providing stable attachment and quick removal for cleaning. Multiple feeders can be stacked with the teats removed.

Package contents:

- Feeder body
- 5 × rubber teats
- 2 × steel hanging profiles
- 8 × M8 bolts
- 2 × rubber straps
- 2 × self-locking M8 nuts and 2 washers

Calf drinker with 5 drinking stations, 30 liters

NEW
2053

Used for feeding up to 5 calves simultaneously, with a total capacity of 30 liters. The container consists of a single common reservoir and is equipped with 5 rubber teats that are easy to remove and replace. The thick plastic housing, suitable for food contact, can be mounted on a wall or metal pipe using the included fittings. The smooth surface allows easy cleaning, and multiple feeders can be stacked with the teats removed.

Contents: housing, 5 × teats + 5 × valves, 2 × steel profiles, 8 × M8 bolts, 2 × rubber straps, 2 × nuts + 2 × washers, 1 × reinforcement bar.

Cover for feeding bucket

Prevents insects and impurities from getting into the milk during storage or feeding.

0432

Cover for feeding bucket, 10 liters

Prevents insects and impurities from getting into the milk during storage or feeding.

0477

Spare valve gasket

Spare gasket for feeding bucket vent. Compatible with products 0434 and 0437.

0435

Valve mounting wrench

Special wrench for mounting feeding bucket valve. Compatible with products 0434 and 0437.

0436

Metal bracket for 8-liter feeding buckets

Metallic bracket to replace similar plastic brackets.

0433

Metal protective holder for feeding buckets

Metal holder for bucket fixation, prevents calves from tipping the bucket.

NEW
1722

Feeding bucket valve

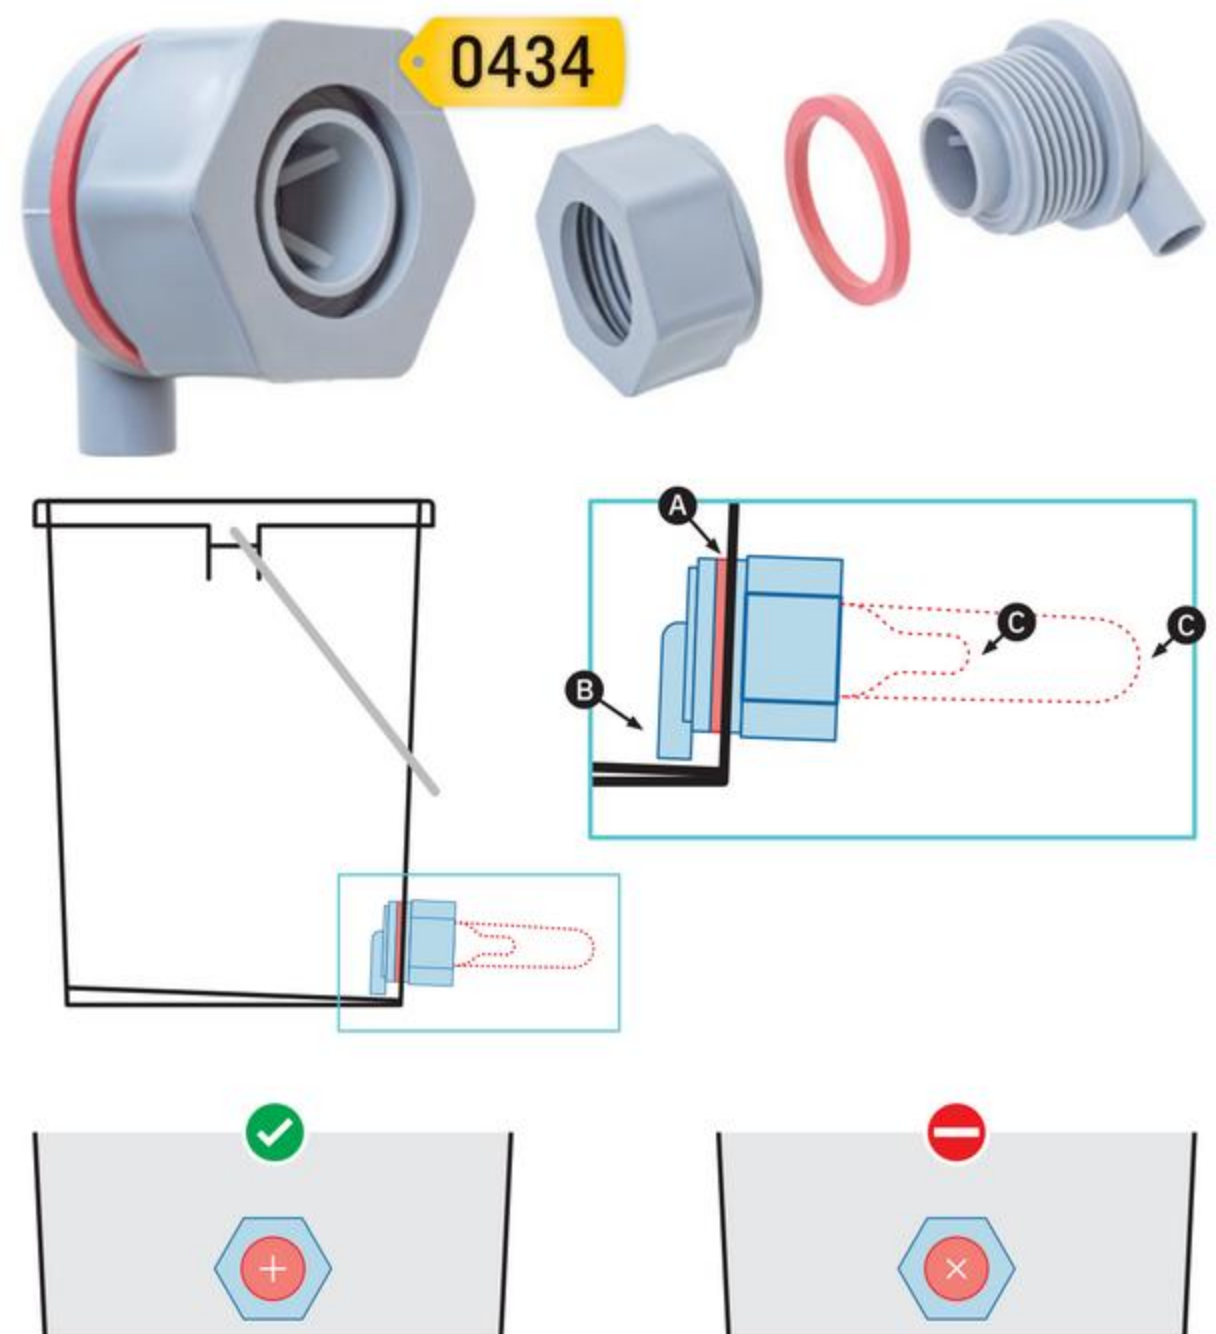

High quality plastic valve, compatible with the following feeding buckets: 0431, 0449, 0450, 0451 and 0475.

The valve has two functions: fitting the teat and ensuring the correct milk flow direction. It has a ball inside which prevents the milk from flowing back into the bucket when the teat is squeezed by the animal, so that the only outlet for the liquid is the tip of the teat.

Assembly

The valve is fitted to the bucket taking into account three very important aspects:

1. The rubber gasket **A** has to be placed inside the bucket.
2. The extended suction part **B** should be towards the bottom of the bucket. This is the only way to ensure total milk consumption!
3. The teat is fitted in such a way that, when viewed from the front, **C** the cross-shaped cut at the top of the teat forms a **+**. This is the only way to ensure a proper milk flow.

Super-Clean valve for feeding bucket

The new Super-Clean valve is easy to assemble and clean. It is compatible with the following feeding buckets: 0431, 0449, 0450, 0451 and 0475.

The valve has two functions: to attach the teat and to ensure the correct milk flow direction.

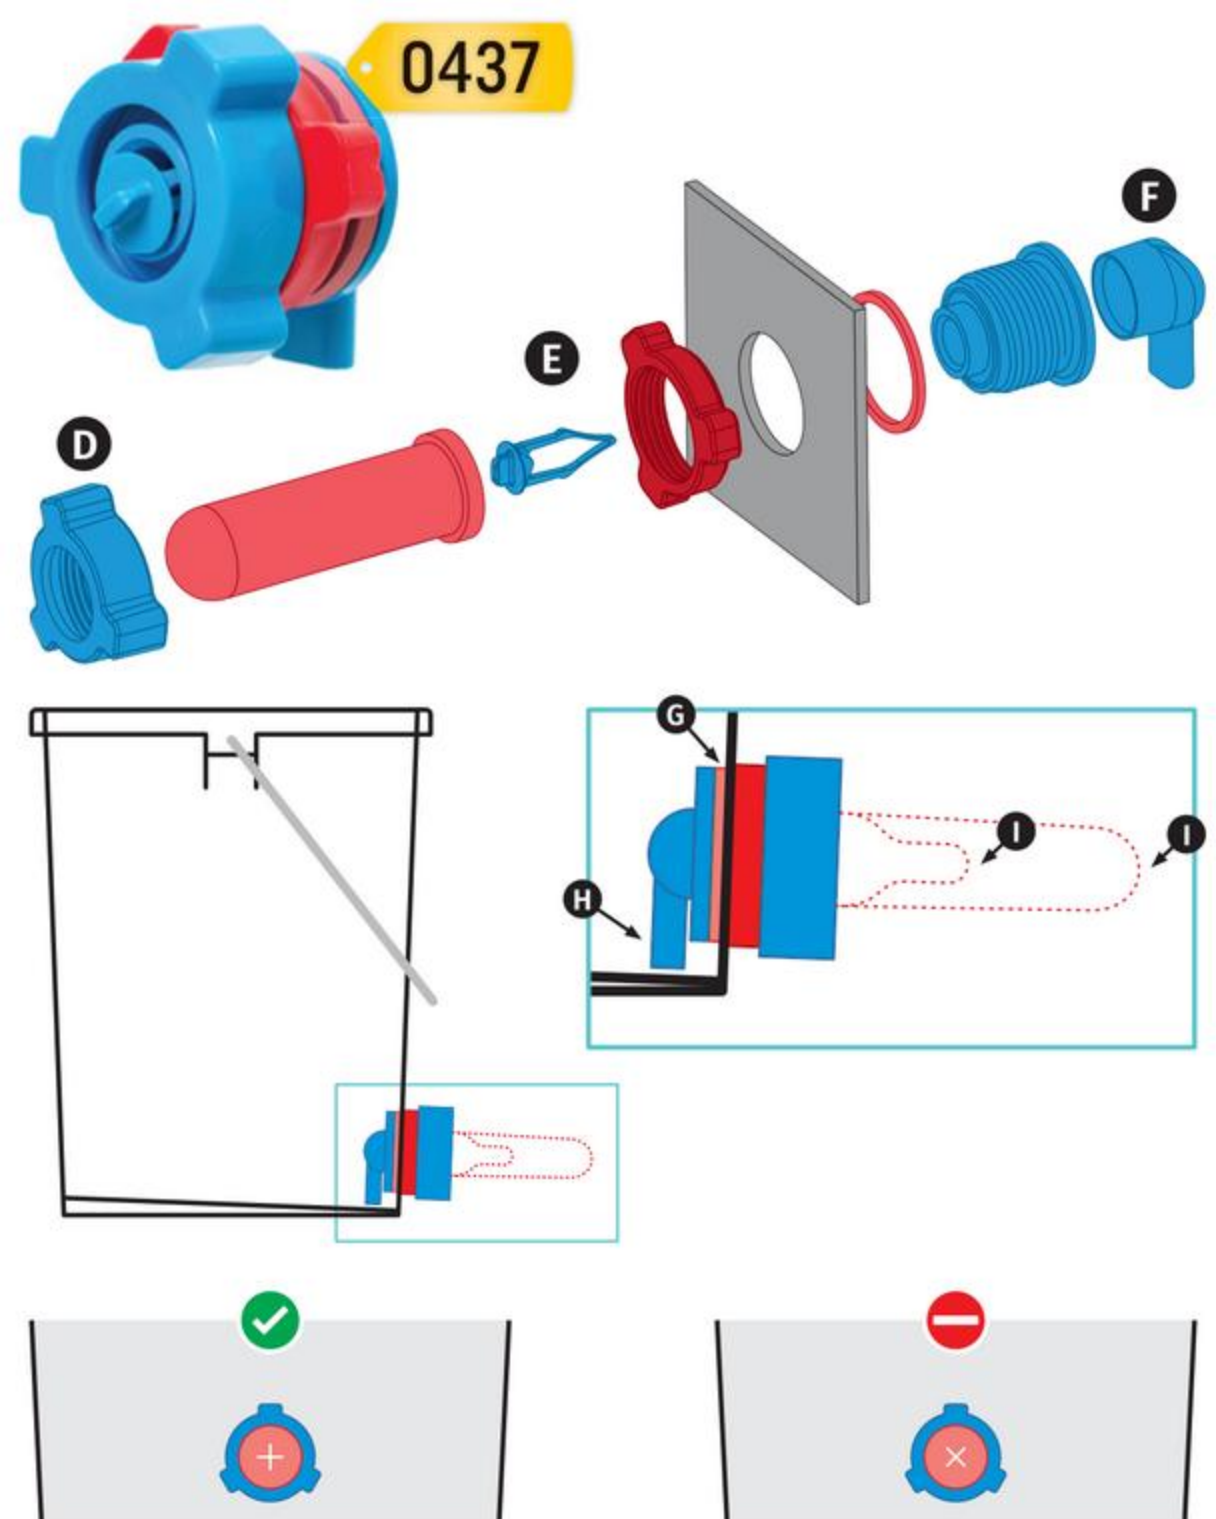

Easy cleaning

For quick cleaning, loosen the front nut **D** to remove the teat and the liquid control valve **E**. Just remove the suction piece **F** from the bucket and the valve can be easily cleaned.

Assembly

The valve is fitted to the bucket taking into account three very important aspects:

1. The rubber gasket **G** has to be mounted inside the bucket.
2. The extended suction **H** part should be towards the bottom of the bucket. This is the only way to ensure total milk consumption!
3. The teat is fitted in such a way that, when viewed from the front, the cross-shaped cut at the top of the teat **I** forms a **+**. This is the only way to ensure a proper milk flow.

Lamb and kid feeding bottle, 500, 1000, 2000 ml

Soft plastic bottle for the administration of milk and/or medicines. The easy-to-read scale helps the accurate dosing.

The bottles are compatible with all types of teats, so can be used for calves as well as lambs and kids, if the right teat is purchased.

The teat for lambs and kids is included.

Calf feeding bottle, 500, 1000, 2000, 3000 ml

Soft plastic bottle for the administration of milk and/or medicines. The easy-to-read scale helps for accurate dosing. The 500, 1000 and 2000 ml bottles are compatible with all types of teats, so can be used for calves as well as lambs and kids, if the right teat is purchased.

A teat for calves is included.

Calf teat for feeding bucket, conical

The conical calf teat can be used for both feeding buckets and bottles.

The teat is fitted with a cross-shaped opening that prevents liquid from dripping, but opens immediately as the calf starts sucking or chewing. Allows slow liquid flow.

Lamb and kid teat, 50 mm

The rubber lamb and kid teat can be used for both feeding buckets and bottles.

The teat is fitted with a cross-shaped opening that prevents liquid from dripping, but opens immediately as the lamb starts sucking or chewing. Allows slow liquid flow.

Correct fitting of teats

When fitting the teat to the bucket, the cross-shaped cut at the top of the teat has to form a ⊕ and not ⊗. If you fit the teat incorrectly, the milk flow rate decreases significantly, which can lead to longer feeding time and increased teat wear.

Lamb and kid teat, 70 mm

0990

The rubber lamb and kid teat can be used for feeding buckets.

The teat is fitted with a cross-shaped opening that prevents liquid from dripping, but opens immediately as the lamb starts sucking or chewing. Allows slow liquid flow.

The teat is compatible exclusively with the 0452 feeding bucket.

Valve for lamb and kid feeding bucket

0453

The valve prevents the liquid from flowing back into the bucket. Suitable for lamb and kid teat (product code 0990).

The valve must be placed inside the teat so that the openings of the valve are visible.

Spare teat for 3 liters calf feeding bottle

1790

NEW

Used for feeding calves with 3-liter feeding bottles. Made of durable rubber and ensures a constant milk flow. Compatible exclusively with 3-liter bottles with ventilation system or internal valve (product code: 1845). Not suitable for buckets.

Spare latex teat with cap

1580

NEW

The latex teat is used for feeding lambs, kids, or piglets during the first days of life. Made of soft latex, it allows easy suckling and a constant milk flow, adjustable by cutting the tip. It can be mounted on a PET bottle using the included cap.

Rubber teat for young, PET bottle mount

0749

Soft rubber teat that can be used on PET bottle. The teat is fitted with a cross-shaped opening that prevents liquid from dripping but opens immediately when the animal starts sucking or chewing. It allows slow milk flow, which ensures a small amount of air can reach the animals' digestive system.

Lamb and kid feeding bottle, AntiVac

The 450 ml AntiVac Lamb and Rabbit Feeding Bottle is a transparent, graduated container ideal for supplemental feeding of small animals such as lambs, mares, piglets and even puppies of large breed dogs. It is equipped with a durable teat, called AntiVac, which prevents vacuum build-up during suckling, ensuring a constant milk flow and a natural suckling.

450 ml

AntiVac teat

AntiVac spare nipple for nursing bottle.

0992

0991

Calf drencher bottle, with probe

NEW

The bottle, made of durable plastic, is used for administering liquids to sick or weakened calves requiring medical treatment.

It is equipped with a flexible hose with a total length of 105 cm, connected to a rigid tube measuring 34 cm. The special tube tip facilitates safe insertion into the pharynx and reduces the risk of liquid entering the lungs.

Milk heater for calf feeding

Electric heater with thermostat. For heating and maintaining the temperature of milk before feeding to young animals.

The heater is equipped with a thermostat for pre-setting the desired temperature up to max. 80 °C. The temperature sensor is at the bottom, so it measures the milk temperature directly. The device can be left alone in the milk heating vessel, no need to hold it in your hand.

2300 W

0662

Milk thermometer with alcohol, -10...+110 °C

Suitable for accurately determining the temperature of milk for calves. The thermometer works with alcohol (non-toxic in case of breakage). The thermometer is enclosed in a plastic case for protection.

Boil-proof up to +110 °C.

0438

Digital milk thermometer, -50...+200 °C

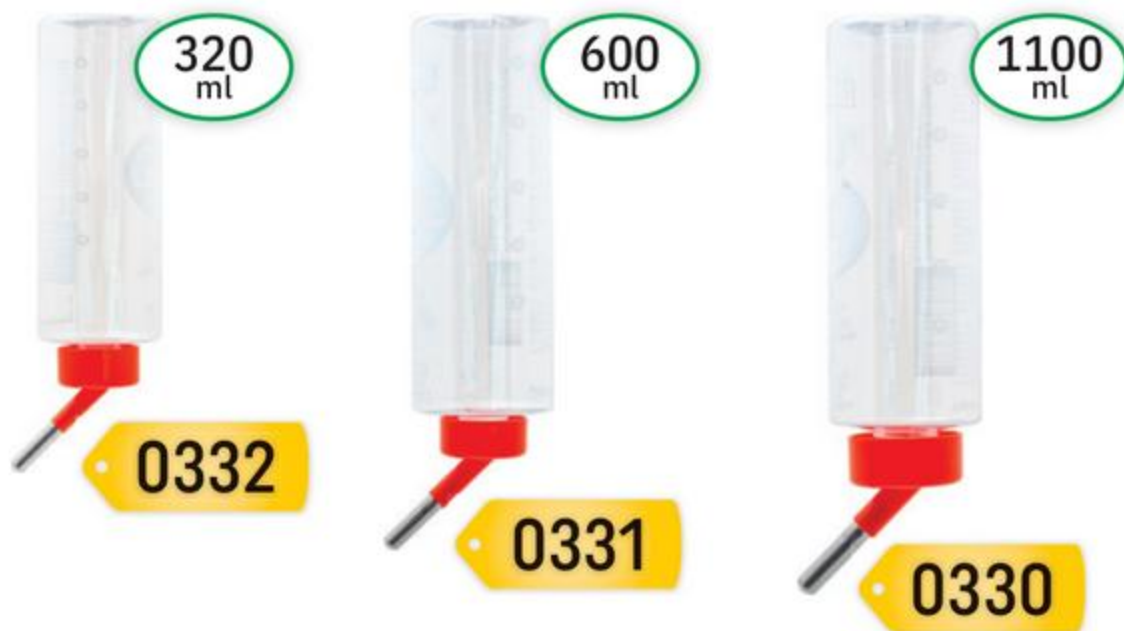

Digital thermometer for measuring the temperature of milk or other liquids and food preparations. Measuring range: -50...+200 °C. Minimum/maximum temperature memory function.

The thermometer is equipped with an LCD display and three buttons – two on the front (ON/OFF), (MAX/MIN) and one on the back (°C/°F).

0919

Ball drinkers for rabbits, 320, 600 and 1100 ml

The transparent plastic drinker ensures optimal hydration of caged rodents – rabbits, chinchillas, guinea pigs, nutrias.

The drain tube is resistant to gnawing and is fitted with two balls to prevent leakage, thus preventing water wastage and wetting of the cage substrate. Water drips only when the ball is touched by the animal.

The container is mounted using the attached wire. The drinker can be placed either outside or inside the cage.

Drinkers for rabbits, 500 ml, 1000 ml

The drinker is positioned on the outside of the cages, on the bars or wire mesh. Only the tap is inserted into the cage so that the animals do not have direct access to the water container.

It can be easily refilled. Being suspended, it remains clean and free from contamination at all times, protecting rabbits from disease and infection.

Metal clip for fixing included in the package.

Drinkers for rabbits, 1000 ml

The drinker is positioned on the outside, only the tap is situated inside the cage, therefore it can be easily refilled. As it is made of transparent plastic, the water level can be easily checked.

Drinkers for rabbits, green, 500, 1000 ml
NEW

The drinker is positioned on the outside of the cages, on the bars or wire mesh. Only the tap is inserted into the cage so that the animals do not have direct access to the water container.

It can be easily refilled. Being suspended, it remains clean and free from contamination at all times, protecting rabbits from disease and infection.

The two fixing springs are included in the package.

Poultry drinker, conical

The conical drinker is ideal for watering backyard poultry and for the controlled dosing of special solutions.

It is made of semi-transparent plastic, which allows you to monitor the quantity and quality of water.

To be used at temperatures above freezing.

PET bottle drinker

The PET bottle drinker is ideal for watering backyard poultry and for the controlled dosing of special solutions.

It consists of two separate, interlocking sections to which any size PET bottle can be attached. Easy to handle and clean, it is stable on a flat surface.

A 2 liter bottle provides enough water for about 12-15 adult hens for one day. For use at temperatures above freezing.

Attention, the product does not include the bottle!

Poultry drinker with plastic tank, 24 liters

24
liters

0487

The drinker is ideal for households with many birds (up to 100 adult birds), free-range or backyard. Keeps water clean and uncontaminated due to the closed reservoir.

Automatically supplements water: as soon as the bowl under the tank is empty, it automatically refills until the tank is empty.

Premium poultry drinker, Optimus, 25 liters

NEW

25
liters

1794

Used for watering poultry, with a capacity of 25 liters, suitable for up to 25 birds, indoors or outdoors above 0 °C. Made of very strong, durable premium plastic, designed for long-term use. The two-part detachable reservoir allows quick cleaning, while the closed design keeps the water clean.

It is equipped with three stable legs, a brass valve and silicone seals for tightness. The water level can be adjusted using the included silicone tubes; the plastic features UV protection and anti-algae treatment.

Cast-iron automatic drinker, 2 liters

0236

Self-feeding drinker with nose paddle for cattle, horses, etc. Made of cast iron, volume approx. 2 liters. The drinker is automatically filled with water as soon as the animal presses the metal paddle with its nose, which opens the valve and the water flows through it.

Wall or post-mounted. It is equipped with a replaceable valve. The valve connection is of 1/2 inch.

Replacement parts

- A** Nose paddle [0274]
- B** Valve [0281]
- C** Valve spring [0275]

F

G51 cast-iron drinker, with tube valve, 1.7 liters

Cast-iron drinker for domestic animals – cattle, horses or small animals. It has a capacity of 1.7 liters and a 1/2 inch automatic replaceable tube valve (1211).

The valve has a brass inner part. By pressing the valve, the water starts flowing immediately.

The drinker can be mounted on a pipe or on a wall.

Tube valve for G51 automatic drinker

The tube valve is for the 1.7 liter cast-iron drinker. The valve is activated by touch, and animals quickly learn to open it with their noses.

Made of brass.

Water flow rate: 20 liters/min (under 5 bar pressure).

Inox and cast-iron drinker with tube valve, 5 liters

Automatic inox drinker for farm animals – cattle, horses or other, smaller animals. It has a capacity of 5 liters and a 1/2" with replaceable tube valve (0804).

The stainless steel material of the bowl prevents corrosion of the drinker. The cast-iron body ensures a solid fixing.

The drinker can be mounted on a pipe or wall.

Tube valve for 5 liter automatic drinker

The tube valve is for the 5 liter inox/cast-iron drinker. By pressing the valve, the water starts flowing immediately. The valve has a 1/2" inlet at the top and bottom. The unused inlet can be sealed with a plug.

Made of brass.

Water flow rate: 20 liters/min (under 5 bar pressure).

Cast iron drinker with float, 2 liters

1447

Automatic inox drinker with constant water level, 2.5 liters capacity, with floating valve, for domestic animals: sheep, cattle, horses or small animals.

The stainless steel material prevents corrosion of the bowl.

The drinker can be mounted on a pipe or on a wall. It has a replaceable valve (0767).

The inlet thread diameter is 1/2".

Spare float valve

0767

Automatic valve for drinkers. Can be used for any watering construction to limit the water level in a tank.

Thread diameter: 1/2".

Automatic inox drinker, 2.5 liters

0766

Automatic inox drinker with constant water level, 2.5 liters capacity, with floating valve, for domestic animals: sheep, cattle, horses or small animals.

The stainless steel material prevents corrosion of the bowl.

The drinker can be mounted on a pipe or on a wall. It has a replaceable valve (0767).

The inlet thread diameter is 1/2".

Plastic drinker with float, 5 liters

1445

Thick and extremely durable plastic water basin with a capacity of 5 liters. The constant water level is controlled by an automatic float valve (0767).

Water can be supplied from the side. Depending on the placement of the water source, the automatic valve can be mounted on either side of the water trough.

The bottom of the trough is fitted with a plug for easy cleaning.

Plastic drinker with constant level, adjustable, 5-8 liters

0910

Special plastic drinker with constant level, adjustable capacity of 5-8 liters.

The water level is controlled by an automatic float valve (0767).

The water can be supplied from the side. Depending on the position of the water source, the automatic valve can be mounted on either side of the drinker.

The bottom of the bowl is fitted with a plug to facilitate cleaning.

Automatic plastic drinker, 2.2 liters

0906

Automatic drinker with a capacity of ~2.2 liters, made of durable plastic, for domestic animals – cows, horses, but also ideal for smaller animals.

Can be mounted on a pipe or a wall. The plastic material prevents damaging of the bowl due to corrosion.

Adjustable valve for 2.2 liter drinkers

0907

Adjustable valve for automatic drinker. Compatible with 2.2 liter plastic automatic drinker.

The valve is fitted with a metal filter to stop impurities from clogging and blocking the valve. Water flow can be adjusted in 3 steps between 7.5 and 11 liters/minute at 3 bar water pressure.

Plastic drinker with constant level, S522, 3 liters

0941

Plastic drinker with constant level, having the capacity of 3 liters.

The water level is controlled by an automatic float valve (1207).

Water can be supplied from the side. Depending on the position of the water source, the automatic valve can be mounted on either sides of the bowl.

The bottom of the drinker is fitted with a plug to facilitate cleaning.

Float valve for S522 drinkers

1207

Automatic valve for S522 plastic drinkers with constant level, 3 liters, but can also be used for other types of drinkers with 1/2" inlet. The valve automatically controls the water level using a float.

Body material: plastic.

Frost-free drinker with float valve and heating cable, 5 liters

NEW

1930

The frost-protected drinker is used for watering animals during cold seasons, preventing water from freezing in the bowl and around the valve. It is made of durable (PP) plastic and equipped with an automatic float valve that maintains a constant water level. The water connection is made from the side.

The integrated heating cable in the lower section is controlled by a thermostat, which switches on at approximately +3 °C and off at approximately +13 °C. The cable can also be used to protect the supply pipe (up to Ø40 mm) and should be thermally insulated for efficiency. The bowl is equipped with a drain plug for cleaning, has a power cable of approx. 230 cm, and must be connected to a protected 230 V socket.

Frost-free drinker with cylindrical valve and heating cable, 2.8 liters

NEW

1931

The frost-protected drinker is used for watering animals during cold seasons, preventing water from freezing in the bowl and around the valve down to approximately -25 °C. It is made of durable (PP) plastic and equipped with an animal-operated cylindrical valve with an adjustable flow rate of up to approx. 11 l/min. The water supply can be connected from above or below, depending on the installation.

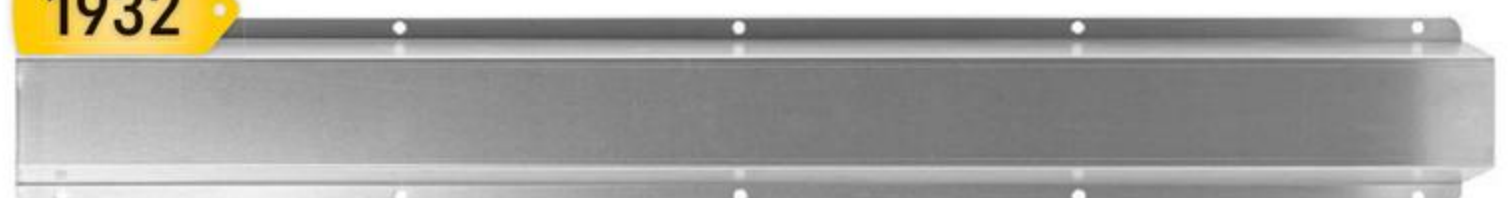

The integrated heating cable in the lower section is controlled by a thermostat, which switches on at approximately +3 °C and off at approximately +13 °C. The cable can also be used to protect the supply pipe (up to Ø40 mm) and should be thermally insulated for efficiency. The bowl includes a drain plug for cleaning, has a power cable of approx. 230 cm, and must be connected to a protected 230 V socket.

Protective plate for drinking pipes, 100 cm

NEW

Used to protect water pipes and heating cables against mechanical damage and chewing by animals. Made of 1 mm galvanized steel sheet, it is mounted over the pipe and insulation for durable protection.

1932

Frost-free double drinker with balls for cattle and horses, 100 liters

Frost-free drinker with two floating balls. Ideal for watering cattle and horses.

Capacity 100 liters, maximum water flow 35 liters/minute. The tank and lid material are shockproof even in cold weather. The casing and lid are double-walled and filled with insulating foam to prevent the water from freezing in winter and overheating in summer.

The drinker must be connected to a water pipe. Once connected, it can be fixed to a concrete base with the screws supplied. The filling of the tank is automatic and controlled by an adjustable float valve (0904).

The tank cover can be fixed to the body with 6 screws. The lid is insulated with a foam insulation tape. The tank is fitted with two threaded plugs to facilitate draining and cleaning of the tank.

0768

Frost-free drinker with ball for cattle and horses, 40 liters

Frost-free drinker with one floating ball. Ideal for watering 10-15 animals (cattle or horses). It has a volume of 40 liters and a water flow of max. 35 liters/minute. The filling of the tank is automatic and controlled by an adjustable float valve (0904).

The tank is double-walled with thick insulation between the walls. In continuous use (continuous water flow) the tank can withstand a minimum temperature of -30 °C.

1446

Plastic double drinker with constant level, 58 liters

Special plastic constant-level double drinker with a maximum capacity of 58 liters. The drinker body is reinforced with 4 mm aluminum sheet.

It can be mounted on the wall or on metal pipe structures with a maximum diameter of 50 mm.

Water can be supplied from both the top and the bottom. Connection diameter: 3/4". The water level is controlled by an automatic float valve (0909).

0908

Cattle water trough with float and hose connection, 42 liters

1209

The cattle water trough with float and hose connection has a capacity of 42 liters and offers a simple solution for watering pets.

Its fiberglass-reinforced plastic construction makes it durable and the adjustable float, which can be mounted on either side, ensures a constant water level is maintained. A 1/2-inch hose connection is included for quick connection to a garden hose.

Water heating and recirculation system C10
NEW

1656

Provides heating and recirculation of water in drinking systems, preventing freezing and keeping the water in continuous motion. The integrated pump and heating element can operate separately or together, with a three-position switch for mode selection.

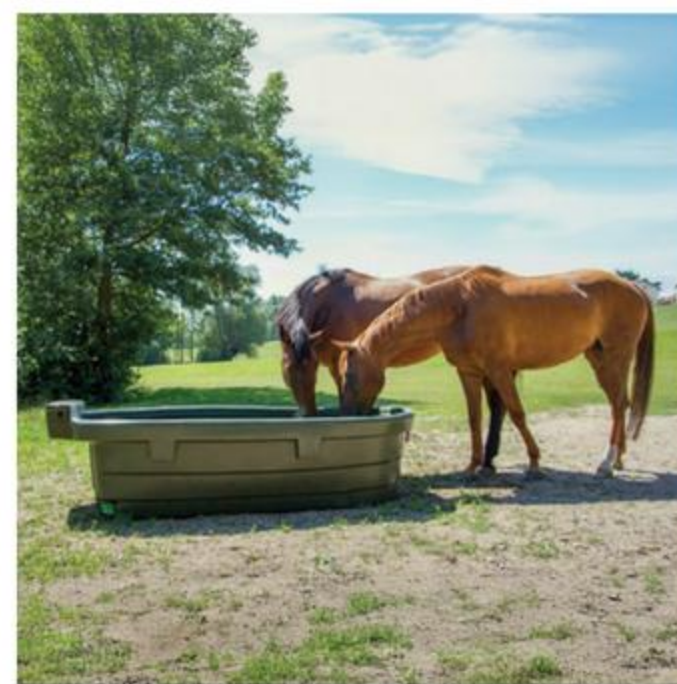

Temperature control is automatic between 5 and 15 °C, with overheating protection and an LED indicator. The stainless steel housing ensures durability; the maximum recommended system length is 250 m for 3/4" pipes. Spare heating element included.

Pasture drinker, 550, 1000 liters
NEW

1771

Designed for pasture use, made of thick-walled (3–4 mm) UV- and frost-resistant plastic for year-round operation, except below 0 °C. Can be filled from a tanker or connected to the water network and is compatible with constant level valves (product codes: 0909 and 1785, not included).

Draining is done via a large external drain plug. Curved upper edges and rounded corners reduce the risk of injury, while the smooth surface allows easy cleaning. Can be placed directly on the ground or securely anchored with sealed bolts.

1772

Sow nipple drinker, 3/4" thread, 3/4" nipple

0276

Piglet nipple drinker, 1/2" thread, 3/8" nipple

0277

Pig nipple drinker, 1/2" thread, 1/2" nipple

1665

NEW

Sow nipple drinker, 1/2" thread, 3/4" nipple

1666

It provides optimal water flow for the animals, reducing water loss. Ideal in livestock production, especially for fattening piglets and sows.

High quality stainless steel drinker with filter.

Piglet drinker,
15 × 21 × 9 cm

1427

Fattening pig drinker,
19 × 27 × 11 cm

1428

Sow drinker,
21 × 29 × 16 cm

1429

Spare valve
for pig drinkers

1634

Automatic drinker for pigs.

Has to be mounted vertically on the wall. The water inlet has an internal thread of 1/2 inch size.

The valve opens as soon as the animal touches it and stops immediately after releasing. The bowl retains a small amount of water, so water waste is minimized.

Replacement valve for pig drinkers.

Spare float valve for frost-free drinkers

0904

Automatic valve for drinkers. It is compatible with the frost-free ball-type drinker, but can be used for any watering trough construction to limit the water level in a tank.

The floating element can be adjusted in height by ± 10 cm.

APEX 220P float valve, 3/4"

0909

Automatic valve for drinkers. Compatible with the 58 liter plastic double drinker and with pasture drinkers with constant level, but can also be used with any other drinker to control the water level in the tank.

XtraFlo Top Entry float valve, 3/4"
1785
NEW

Maintains a constant water level in drinkers and tanks, designed for high flow rates. Operates between 0.28–12 bar, with a simple self-cleaning mechanism and 3/4" connection. UV- and corrosion-resistant construction with integrated filter.

Adjustable float valve, 1/2"
1834
NEW

Automatically regulates the water level in drinkers. The adjustable float allows level setting according to depth. 1/2" connection, constant flow rate, compatible with constant-level and anti-freeze systems.

Float valve for 42 liter cattle drinker, 1/2"
1888
NEW

Automatically regulates the water level in 42-liter cattle drinkers. Side mounting with stainless steel bracket, 1/2" threaded water connection. Includes quick hose connector and sealing tape.

Float valve in stainless steel housing

Universal valve that can be mounted in any water tank or animal watering trough.

The mechanism is protected by a stainless steel casing which incorporates the valve itself and a float to control the water level.

The water inlet has a 1/2 inch connection.

The package contains two nozzles, with different openings (Ø2 mm and Ø3.5 mm) that can be mounted depending on the water flow rate.

APEX 220P automatic float valve, stainless steel housing, 3/4"

NEW

Universal valve that can be mounted in any water tank or animal watering trough.

The mechanism is protected by a stainless steel housing that incorporates the APEX 220P valve and a float for water level control.

The water inlet has a 3/4" threaded connection.

The housing features four cut-outs (two on each side), allowing the float to be mounted in multiple directions.

Without the housing, the valve is identical to the APEX 220P model (code 0909).

Poultry feeder, 5/10 liters

The feeder can be placed directly on the ground, or suspended by means of a thick, sturdy ring at the top. Special slots prevent feed from leaking out, minimizing feed loss. When the feeder is used by hanging, feed spillage is almost impossible so feed losses are close to zero. Suitable for feeding grain feeds (maize, wheat, millet, etc.), ground crops and compound feeds.

The feeder has two filling slots on the top which can be opened or closed by sliding the red protective cover.

Hanging poultry feeder, green, plastic
NEW

Used for feeding cage and ornamental birds, with a 2 kg feed capacity. It can be suspended using the included hanger or placed on the ground.

The protective ring reduces feed spillage, while the umbrella-shaped cover protects the feed from rain and snow. Made of durable plastic, easy to clean.

Poultry feeder, 50 cm

A thick, durable plastic feeder for feeding up to 35 chickens or 6-7 adult hens at a time.

The feeder can be placed directly on the ground, with cross bars at the bottom to ensure stability and prevent accidental tipping. Suitable for feeding grain feeds (maize, wheat, millet, etc.), ground crops and compound feeds. The grid cover is removable.

The feeder can be easily dismantled for regular cleaning and disinfection.

Chick feeder, plastic, anthracite-yellow, 50 cm
NEW

A thick, durable plastic feeder for feeding up to 30-35 chickens or 6-7 adult hens at a time.

The feeder can be placed directly on the ground and its side legs ensure stability, preventing accidental tipping. Suitable for feeding grain feeds (maize, wheat, millet, etc.), ground crops and compound feeds. The grid cover is removable.

The feeder can be easily dismantled for regular cleaning and disinfection.

Poultry feeder, galvanized sheet, 50 cm

0537

1
liter

The galvanized sheet metal feeder is designed for feeding approximately 12 chickens or 8-10 adult hens at a time.

The feeder can be placed directly on the ground and its side legs ensure stability, preventing accidental tipping. It is suitable for feeding grain feeds (maize, wheat, millet, etc.), ground crops and compound feeds. The grid top of the feeder can be lifted up to allow easy filling with forage, regular cleaning and disinfection.

Poultry feeder, galvanized sheet, 24 holes, 50 cm

0539

0.66
liters

The galvanized sheet metal feeder is designed for feeding approximately 12 chickens or 8-10 adult hens at a time.

The feeder can be placed directly on the ground and its side legs ensure stability, preventing accidental tipping. It is suitable for feeding grain feeds (maize, wheat, millet, etc.), ground crops and compound feeds. The upper part with holes can be removed.

The feeder can be easily disassembled for regular cleaning and disinfection.

Poultry feeder, galvanized metal, 100 cm

0538

8
liters

A thick, durable plastic feeder for feeding up to 35 chickens or 16 adult hens at a time.

The feeder can be placed directly on the ground and its side legs ensure stability, preventing accidental tipping. It is suitable for feeding grain feeds (maize, wheat, millet, etc.), ground crops and compound feeds. The grid top of the feeder can be lifted up to allow easy filling with forage, regular cleaning and disinfection.

Poultry feeder, premium plastic, 9/20 liters

9
liters

0490

20
liters

0491

A thick, durable plastic feeder for simultaneous feeding of adult poultry.

This type of feeder ensures a continuous supply of feed. The closed container keeps the feed clean and free from contamination. The raised rim of the feeding bowl prevents the feed from spilling on the ground.

The feeder can be placed directly on the ground or suspended.

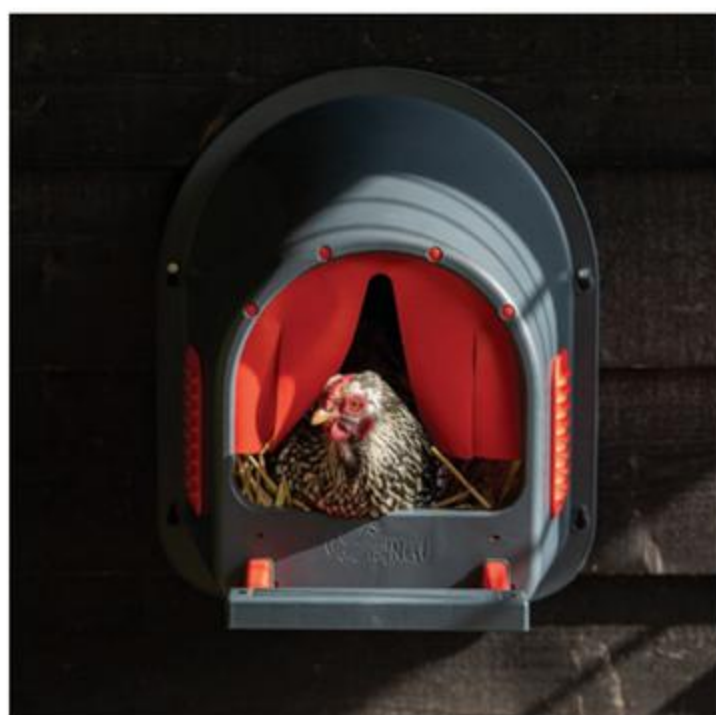

Poultry feeder, galvanized metal, 8/22 liters

Galvanized sheet metal feeder for simultaneous feeding of several adult poultry. Highly resistant to extreme weather conditions, it can be used both indoors and outdoors and does not break. This type of feeder ensures a continuous supply of feed. The closed tank keeps the feed clean and free from contamination. The raised rim of the bowl prevents the feed from spilling on the ground.

Poultry nesting box
NEW

Provides a safe, clean and well-ventilated nesting space, made of durable plastic which is resistant to moisture, dirt and temperature variations. The sturdy, rounded design reduces the risk of egg breakage and protects against drafts.

Side ventilation openings ensure proper air circulation inside. It can be mounted on a wall or any stable vertical surface using 4 screws (not included). For added comfort, a layer of straw or hay is recommended and should be replaced regularly to maintain hygiene.

Stainless steel bowl for cats

0338

Ø12cm
230ml

The bowl made of stainless steel is resistant to all environmental conditions, so it can be used both indoors and outdoors.

The rubber ring prevents the bowl from slipping and reduces noise produced by the animal during use. Can be used for both food (wet or dry) and liquids. It is easy to clean, does not alter the taste of the food and does not retain food odor.

Stainless steel bowl for dogs

0339

Ø16cm
450ml

The bowl made of stainless steel is resistant to all environmental conditions, so it can be used both indoors and outdoors.

The rubber ring prevents the bowl from slipping and reduces noise produced by the animal during use. Can be used for both food (wet or dry) and liquids. It is easy to clean, does not alter the taste of the food and does not retain food odor.

0342

Ø26cm
2800ml

Set of 2 stainless steel pet bowls, Ø13 cm, 450 ml

0795

Ø13cm
2 x 450ml

Stainless steel bowls for dogs or cats. The two bowls sit stable and firm in the metal frame. Rubber stoppers prevent slipping. The smooth surface of the bowls allows easy removal of food scraps. The bowls are also dishwasher safe. As the product is resistant to all environmental conditions, it can also be used outdoors. Two pets can be fed simultaneously.

Rabbit feeder, galvanized metal, 2.2 liters

0329

A self-feeding metal feeder for medium to large rodents (rabbit, chinchilla, nutria) kept in a cage. Refills from the top with significantly more feed than the actual capacity of the tank. Depending on consumption, the tank refills automatically.

Can be used for feeding animals with pellets, dry feed, or seed, significantly reduces feed waste. The bottom of the tank has holes to remove dust or liquids.

Dimensions: 14 × 13 × 23 cm.

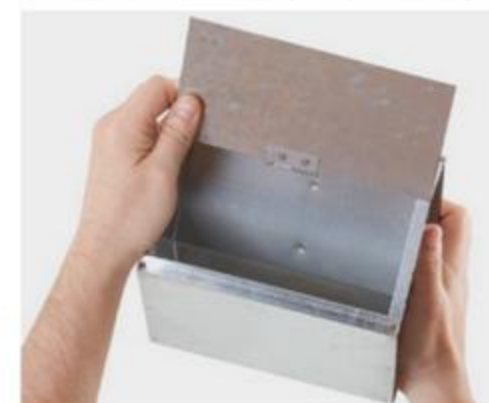

Rabbit feeder, galvanized metal, 3 liters

0328

A self-feeding metal feeder for medium to large rodents (rabbit, chinchilla, nutria) kept in a cage. Refills from the top with significantly more feed than the actual capacity of the tank. Depending on consumption, the tank refills automatically.

Can be used for feeding animals with pellets, dry feed, or seed, significantly reduces feed waste. The bottom of the tank has holes to remove dust or liquids.

Dimensions: 19 × 13 × 23 cm.

Metal feed rack for rabbits

NEW

Used for storing hay and roughage in rabbit cages and hutches. The galvanized metal construction keeps the feed elevated from the ground, reducing waste and contamination. The spacing between the bars allows easy access without excessive scattering of feed. Can be mounted on a wall or wire mesh, depending on the cage type.

1997

20 × 10 × 15 cm

25 × 10 × 15 cm

1999

30 × 10 × 15 cm

Feeding bucket for horses, 12 liters

0465

12
liters

Portable feeding bucket for selective feeding. Especially suitable for individual feeding of horses.

The sturdy webbing strap is attached to the bucket with two metal carabiners, its length can be easily adjusted to the size of the animal.

Stable and feeding bucket

1255

12
liters

Robust plastic bucket, ideal for use in animal husbandry, agriculture, construction or household.

It is made of break-resistant material and has a thick wall. It has a solid metal handle for easy transportation and handling. The smooth bottom allows complete drainage for easy cleaning.

20
liters

1011

Plastic feed bowl for cattle, 6 liters

1112

1113

1114

1115

All-purpose container, ideal for farm or pet food. Having a capacity of 6 liters, this bowl is perfect for short-term feed storage. The bowl fits neatly in the foldable holder or in the ring holder that can be mounted on a wall or on a pole. The color variations help to keep track of the feeding amounts.

1313

Galvanized metal holder frame for feeding buckets

0956

Wall-mounted metallic bracket, **removable**, basically for supporting feeding buckets or feeding bowls.

Folding bucket holder

1257

Wall-mounted metallic bracket, **foldable**, basically for supporting feeding buckets or bowls.

Salt lick holder

0447

21.5 × 21 × 20 cm

Extremely sturdy salt lick holder, made of non-toxic plastic, with anti-chewing rim, to hold blocks of up to 10 kg.

Salt lick holder, dark green

NEW

1655

21.5 × 23 × 21.5 cm

Designed for mounting salt licks in shelters, made of durable, impact-resistant plastic for daily use. Suitable for round, square or polygonal salt blocks, with no sharp edges accessible to animals.

The base features drainage holes to reduce premature dissolving caused by moisture. The back has 6 mounting points for stable wall installation; screws are not included.

2000

21.5 × 23 × 21.5 cm
With round insertion

Plastic cattle feeder, 15 liters

1483

42 × 32 × 30 cm

Without protective rim

Durable plastic feeder, ergonomic design, dark green color, practical and suitable for any livestock feeding area.

Available with and without protective rim.

1484

With protective rim

Sheep feeder, plastic, 6 liters

1558

The 6 liter capacity plastic sheep feeder is a useful accessory for breeders. The container allows easy cleaning to prevent feed contamination. The durable and shock-resistant material makes it suitable for different environmental conditions.

23 × 22 × 21 cm

Plastic calf feeder, 9 liters

1485

The plastic calf feeder, with a capacity of 9 liters, is a useful accessory for breeders. It provides a safe way to administer concentrated feed suitable for various animal species, including calves.

The container has a drain plug at the base, allowing easy cleaning and preventing feed contamination.

33 × 33,5 × 28 cm

Plastic corner feeder with protective rim, 31 liters

1486

The corner feeder with a capacity of 31 liters is practical for feeding animals. It is made of high-quality plastic, making it durable and hard-wearing. It has a bite-protection edge to prevent damage and loss of food.

The feeder has an attractive appearance and a dark green color, blending perfectly into any livestock space.

60 × 30 × 45 cm

Plastic feeder for cattle, 42 liters

1116

100 × 35 × 24 cm

The feeder has a capacity of 42 liters and offers a simple solution for feeding cattle or other domestic animals.

Its fiberglass-reinforced plastic construction makes it durable. It can be mounted by hanging on a wall-type structure (metal frame or plank) 5-6 cm wide. The ergonomic design and compact dimensions make it easy to maintain and clean. The durable and shock-resistant material makes it suitable for different environmental conditions.

The feeder can be mounted by hanging it on a wall-type structure (metallic or plank frame) 5-6 cm wide. The hanging hooks are provided with holes in the upper part, allowing the feeder to be screwed on to prevent accidental detachment by animals.

Plastic feeder for foals, 9 liters

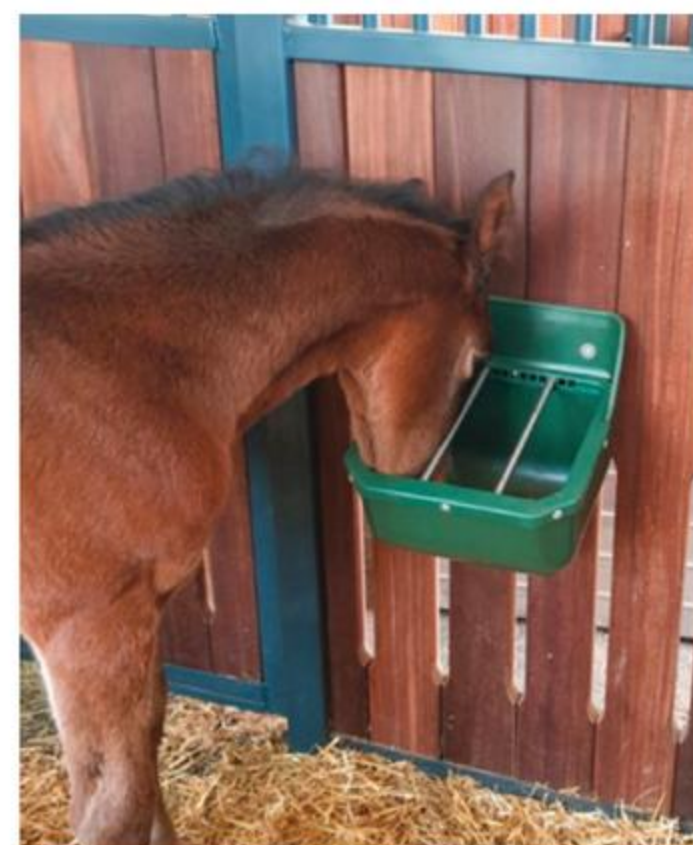

NEW

1764

The plastic feeder for foals is used for feeding concentrated feed to foals and has a capacity of 9 liters. It is made of impact-resistant plastic suitable for low temperatures, allowing year-round use in stables.

It is equipped with stainless steel bars on the top that limit access and can be adjusted by removal to allow feeding exclusively to foals. The reinforced front panel adds strength, and a drain plug at the base allows easy cleaning. It can be mounted on a wall or rail.

Rectangular galvanized steel feeder, 35 liters

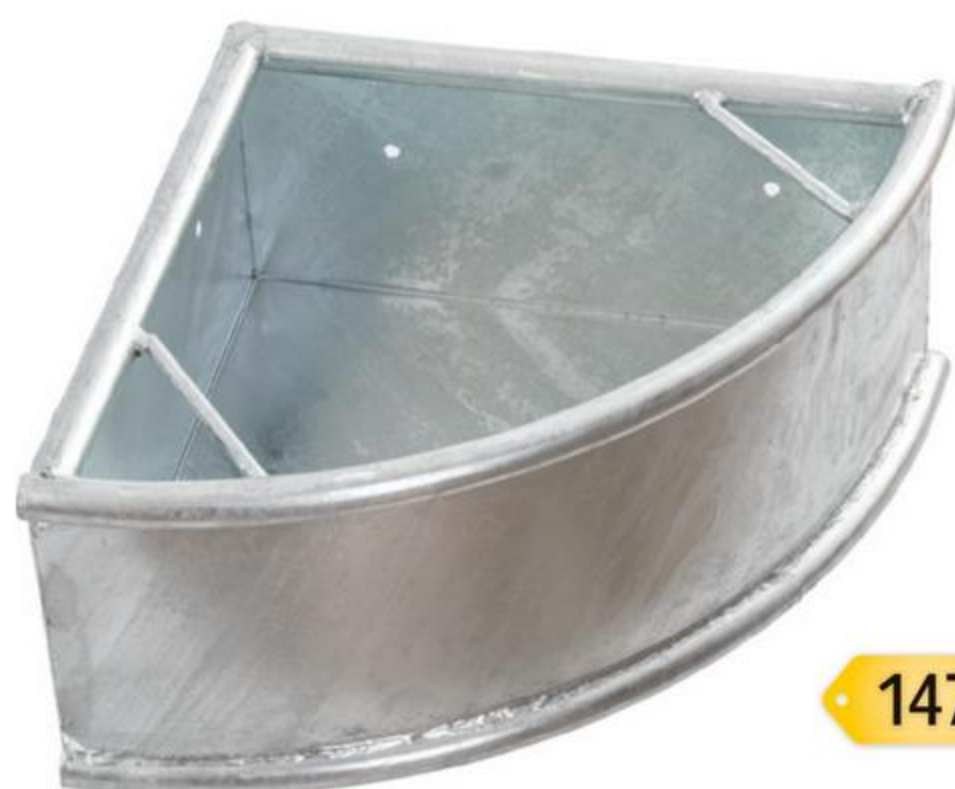

1477

The rectangular galvanized steel feed trough is ideal for feeding domestic animals such as cattle and horses. It has a capacity of 35 liters and is extremely durable and hard-wearing.

The pipe structure is also galvanized on the inside, providing long-lasting protection against corrosion.

45 × 34 × 24 cm

Galvanized steel corner feeder, 35 liters

1478

The semicircular galvanized steel corner feed trough is ideal for feeding domestic animals such as cattle and horses. It has a capacity of 35 liters and is extremely durable and hard-wearing.

The pipe structure is also galvanized on the inside, providing long-lasting protection against corrosion.

44 × 44 × 24 cm

Semi-circular galvanized steel feeder, 28 liters

1479

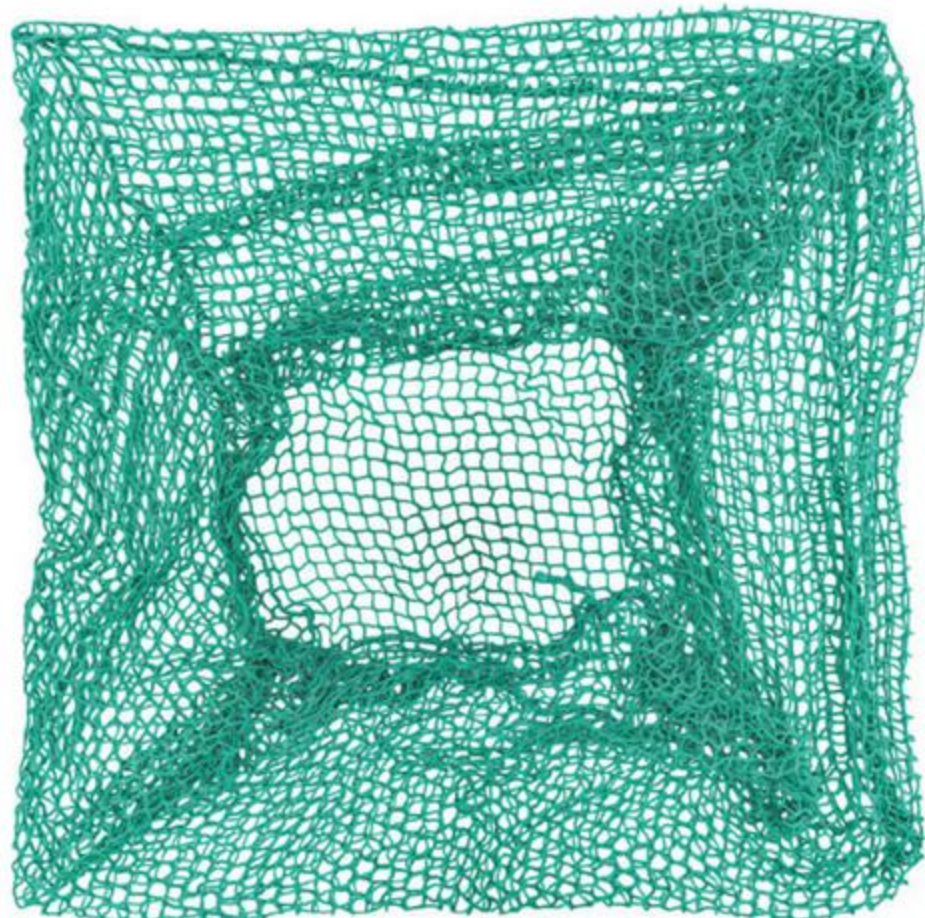

The semicircular galvanized steel feed trough is ideal for feeding domestic animals such as cattle and horses. It has a capacity of 28 liters and is extremely durable and hard-wearing.

The pipe structure is also galvanized on the inside, providing long-lasting protection against corrosion.

55 × 35 × 24 cm

Hay net for horses

NEW

The hay net for horses allows controlled feeding of hay or silage by limiting rapid access to bales. It significantly reduces waste, keeps the feed clean, and slows down the rate of consumption, supporting more natural digestion.

It is secured with the included elastic cord. Made of durable polypropylene. Not recommended for shod horses due to the risk of entanglement.

The 20-liter rectangular rubber feeder is designed for use in stables or on pasture, made from a durable and flexible rubber compound. The elastic material reduces the risk of injury and does not crack on impact.

It can be easily carried and mounted on gates and doors up to 50 mm thick. Suitable for feed, supplements or water, with an easy-to-clean surface and food-safe material.

Automatic feeder and drinker for piglets, 60 liters

NEW

1741

60-liter automatic feeder for piglets with integrated drinker, designed for wet-dry feeding systems. It allows multi-stage feed adjustment, ensuring controlled distribution and reduced waste.

The durable polypropylene body is reinforced with stainless steel components in high-wear areas, including the lower edge and feed flap. The 1/2" nipple drinker is positioned at the bottom for easy access, and the water connection can be mounted on the left or right side.

Continuous access to feed and water supports uniform growth and reduces competition among piglets. Wall-mounted installation using the marked fixing points on the back.

Automatic feeder for piglets, 120 liters

NEW

2039

Automatic feeder for piglets, 120-liter capacity, designed for dry feed distribution. The 5 front feeding spaces allow simultaneous access for multiple piglets. The dosing system is fully adjustable and can be completely closed, with feed quantity adjustable even when the hopper is full.

The thick plastic body is suitable for intensive use, while all metal components are made of stainless steel. Bite-exposed areas are additionally protected, and the integrated legs provide stability.

The upper lever enables quick adjustment of feed flow, reducing waste and ensuring uniform supply. Regular cleaning with warm water is recommended.

Feed scoop, 0.7 liters

0468

The small dosing scoop is suitable for accurate weighing of the feed. The ergonomic handle allows a comfortable and secure grip.

Feed scoop, 1.3 and 2.1 liters

0462

Round feeding rack with 8 feeding places

The modular round stall is ideal for feeding cows and horses, providing simultaneous access to feed for animals of different sizes and ages.

It is made of 4 compact elements, easy to assemble and disassemble for easy transportation. Its round design makes it easy to move around the pasture and it can be turned upside down and rolled. The elements can also be used to create feed managers for walls or corners.

Can be loaded manually or from the top with a front loader.

Round feeding rack with 12 feeding places

The modular round stall is ideal for feeding cows and horses, providing simultaneous access to feed for animals of different sizes and ages. It can be loaded manually or from the top with a front loader.

The stall is made of 3 compact elements, easy to assemble and disassemble for easy transportation.

Cattle clippers, Aesculap Econom NOVA CL

Accessories

- Battery charger.
- Spare battery.
- Bottle with special trimmer oil, 90 ml.
- Combination flat screwdriver for changing knives.
- User manual.

The machine is equipped with a 21/23 knife set, i.e. the lower one contains 23 teeth and the upper one 21 teeth. This pair of knives is suitable for relatively dirty fur as well as for dry and clean fur. The battery has a 5 LED test button. By pressing the button you can check the battery charge level in 25% increments.

Sheep clipper machine, Aesculap Econom NOVA CL

Hoof oil, MagicBrush

MagicBrush hoof oil is a product for the care and protection of horse hooves. It is enriched with high quality oils such as laurel, avocado and macadamia, which deeply nourish the hoof. Regular use ensures healthy and flexible hooves.

2012

2081

NEW

425 ml

500 ml

Hoof oil with vitamin E and brush

The formula, enriched with natural oils such as rapeseed, avocado, thyme, wintergreen and eucalyptus, together with vitamin E, provides a nourishing and regenerating effect. This product is ideal for daily hoof care, helping to stabilize and increase the elasticity of hooves, preventing drying and cracking.

1468

475 ml

Hoof hardening oil with brush

It is formulated with 100% pure vegetable oils such as avocado, jojoba, sesame and orange oils, along with marigold extract. The oil penetrates quickly into the keratinous structure of the hoof without clogging pores. Daily use helps prevent inflammation, promotes healthy hoof growth and prevents damage.

1466

475 ml

Hoof grease, Pharmakas

A grease made from carefully selected materials for the daily care of horses' hooves, specially formulated to maintain optimum hoof quality. It effectively protects against external influences such as moisture, dryness and dirt.

1469

1000 ml

Hoof grease, MagicBrush

MagicBrush's Hoof Grease is formulated with plant oils, natural waxes and bay extract, providing complete protection for your horse's hooves. The product prevents hoof dryness and leaves hooves looking groomed and healthy.

Hoof and Claw spray

1415

Black film-forming and oil-containing spray. Specially developed for the care of hooves, claws and other horny tissues. It forms a protective film that guards against moisture and other damaging factors such as urine or manure.

Hoof balm, Pharmakas

1471

1470

This hoof ointment is an essential care product for hoof health, helping to prevent dry and cracked hooves.

Its high quality formula, enriched with natural ingredients such as propolis, helps to strengthen and maintain the elasticity of the hoof, providing effective protection against dryness and brittleness.

Applied daily, it supports the natural regeneration of the hoof and stimulates healthy hoof growth.

Anti-inflammatory gel for horses, Eimermacher

0750

Anti-inflammatory gel balm for tendons and joints of horses with herbal extracts. The gel cools and relaxes, refreshes and vitalizes muscles after stress and fatigue. Activates overworked muscles, tendons and joints.

1419

1418

Horse balm, Pharmakas

1457

The massage balm is mainly intended for horses. It is a refreshing and relaxing gel that helps stimulate blood circulation in the muscles, providing an effective massage for tendons, muscles and joints. The balm contains natural ingredients such as menthol, peppermint oil, eucalyptus and arnica, with a refreshing and soothing effect.

Horse balm, MagicBrush

2019

NEW

Provides care for stressed or irritated equine skin exposed to friction, moisture or insects. Absorbs quickly without leaving a greasy residue. Calendula, carrot and St. John's wort extracts support skin resilience, while fluid sulphur helps reduce itching and rubbing tendency.

Cooling balm for horses, MagicBrush

2021

NEW

Designed for the care of legs, tendons, joints and muscles after exercise. Applied directly to the skin, it absorbs quickly without leaving residue. Menthol, arnica, ginkgo and chamomile provide a cooling effect and post-exercise comfort.

Lip balm for horses, MagicBrush

2022

NEW

Provides care for the sensitive mouth corners exposed to bit friction. Helps maintain skin elasticity and prevent dryness and cracking. Contains calendula extract and mango butter for hydration and protection. Free from doping substances.

Clay gel for horses, Pharmakas Tonerde

1458

Special gel for the relaxation and regeneration of tendons, ligaments, muscles and hip joints after intense efforts. It helps to reduce muscle tension, to quickly eliminate metabolic products that cause muscle fever and to accelerate the regeneration process in case of strains or inflammation.

Garlic powder against insects

1476

Garlic powder is a natural food supplement, recommended for supporting the health of horses and protection against insects. The product contains 100% dried garlic, providing multiple benefits such as boosting the immune system, supporting metabolism and digestion, as well as acting as a natural repellent against flies, mosquitoes and ticks.

Beech tar paste, TarPaste

1412

1 kg

1577

NEW

5 kg

Paste made from special beech tar, a natural product known for its antiseptic and anti-inflammatory properties, also an attractant for wild boar and red deer.

The high viscosity of the paste makes it suitable to remain applied to the hooves, protecting and facilitating healing of the affected area.

Podoseptan hoof paste

NEW

1836

450 ml

For the care of stressed hooves in cattle, sheep and goats, particularly in wet or dirty conditions. Supports recovery of sensitive areas.

Plant wax, chitosan and zinc PCA form a protective layer, while thyme and rosemary extracts promote tissue regeneration.

Nutritional supplement for calves and piglets with diarrhea

NEW

1846

2,5 kg

Apple pectin-based powdered feed supplement for calves and piglets. Supports intestinal balance and helps reduce fluid loss in cases of diarrhea or mild digestive disturbances.

Free from antibiotics and suitable for use during stress periods, weaning or after medical treatments.

Fly repellent spray, CIT MuscaBlock

NEW

1616

500 ml

1498

1000 ml

Spray for protection against flies and other flying insects in farms and households. Provides protection for up to 6 hours after application and is well tolerated by animals.

Contains pyrethrins, pyrethroids, PBO and Citriodiol, active substances with repellent and insecticidal properties. Classified as a biocidal product.

Insect repellent spray, Pharmakas CLAC

The spray contains Icaridin, an active ingredient designed to repel insects such as flies, horseflies and ticks.

This product comes as a spray with a specially designed sprayer head with a silent mechanism to avoid scaring horses.

Its formula works immediately after application and provides optimal protection for horses, especially those that sweat profusely or have sensitive skin.

Insect repellent gel, Pharmakas CLAC

The gel contains Icaridin, an active ingredient designed to repel insects such as flies, horseflies and ticks. It works immediately after application and is suitable for horses, especially those that sweat profusely or have sensitive skin. The gel should be applied directly to the exposed areas of the animal, including sensitive areas, using the included sponge.

Horse shampoo, Dermocan

NEW

The gentle shampoo, specially designed for horses, helps to remove dust, dirt, sweat from the horse's mane.

Helps regeneration and growth of coat and mane. Its special formula respects the pH of the skin, ensures gentle cleansing, detangles the coat, leaving it shiny.

The product contains ceratin, aloe vera extract and argan oil.

Horse shampoo, MagicBrush, 1000 ml

NEW

2016

1000 ml

MagicBrush horse shampoo for cleaning the coat, mane and tail, suitable for frequent use. Removes impurities without disturbing the skin's natural balance.

Contains wheat proteins and D-panthenol to support hair structure, improve combability and help maintain skin elasticity.

Horse shampoo, MagicBrush, 500 ml

500 ml

OrientalNights fragrance

2025

500 ml

FrenchKiss fragrance

2026

500 ml

FruitExplosion fragrance

Gentle shampoo available in several fragrance variants, for cleaning the coat, mane and tail, formulated with naturally derived ingredients and adapted to the horse's skin pH. Suitable for regular use, including for sensitive skin.

The fine foam removes impurities without affecting the skin's natural protective layer and supports coat elasticity and shine.

Hoof gel for horses, MagicBrush

2027

NEW

200 ml

For the care of stressed hooves, particularly in the frog area. Adheres well to the surface and dries quickly, reducing dirt adhesion after application.

Contains aluminium sulphate and zinc sulphate. Regular use supports hoof condition, especially in wet environments.

Gel for horses, Equimint, MagicBrush

2028

NEW

500 ml

Cooling gel for stressed areas after training, riding or intensive work. Applied to legs, tendons, joints and muscles, it helps reduce fatigue sensation and supports muscular comfort.

Contains menthol and peppermint oil for a cooling effect and stimulation of local circulation. ADMR withdrawal period: 48 hours.

Leather soap, Pharmakas

The Pharmakas soap with glycerine is ideal for intensive cleansing of all leather products. It creates a protective layer that keeps the leather soft and supple even after frequent use.

For best results rub the soap into the leather with a soft damp brush or sponge using lukewarm water.

Leather soap, MagicBrush

For regular cleaning of saddles, bridles, boots and other leather equipment. Cleans effectively without affecting the material structure, suitable also for suede and nubuck leather.

Contains coconut oil and glycerine to help maintain leather flexibility and prepare the surface for further care treatment.

Horse cleaning spray, MagicBrush

Spray lotion for removing light dirt from the coat without using water. Allows quick cleaning between training sessions or before competitions.

Contains D-panthenol to help maintain skin and coat hydration and reduce dryness caused by frequent use.

Leather grease, Pharmakas

Intensive care grease for the intensive care of all smooth leather articles, giving them waterproofness and durability. It is ideal for saddles, harnesses and other equestrian accessories, but also for shoes, wallets or other leather items.

It is perfect for both professional and recreational riders and leather lovers.

Leather grease, MagicBrush

NEW

It is used for regular care of smooth leather equipment such as saddles, bridles and boots. Vegetable oils penetrate deeply and help maintain material flexibility. Beeswax forms a protective layer against moisture and cracking, supporting a well-maintained appearance and natural shine.

Leather oil, Pharmakas

Leather care oil to provide protection and basic care to smooth leather, keeping it supple, waterproof and durable without leaving residue. Ideal for saddles, bridles and other leather products.

The oil has a fast-absorbing formula that leaves no residue, deeply caring for the leather and keeping it looking its best.

Leather oil, MagicBrush

NEW

For the care of smooth leather equipment subject to regular use. Carefully selected oils penetrate deeply, helping maintain flexibility and reduce the risk of cracking or stiffening.

Provides protection against moisture and supports the restoration of the leather's natural appearance and shine. Contains macadamia oil to nourish the material without leaving sticky residues.

3-in-1 leather oil, MagicBrush

2015

NEW

1000 ml

For the care of smooth leather equipment, combining cleaning, conditioning and lubrication in one product. Reduces maintenance time without intensive rubbing.

Can be used diluted in cold water or applied with a sponge on saddles, bridles and other equipment, maintaining leather flexibility and appearance.

Leather oil spray, MagicBrush

2017

NEW

225 ml

For the care of smooth leather equipment such as saddles, bridles and boots. Quality oils penetrate deeply and nourish the material.

Protects against drying, limits moisture penetration and reduces the effects of UV radiation. The spray format ensures even distribution without overloading the leather.

2-in-1 leather lotion, MagicBrush

NEW

2023

500 ml

For quick maintenance of smooth leather equipment, combining light cleaning with conditioning and protection. Removes surface dirt and forms a protective layer against drying and cracking.

Contains aloe vera extract and almond oil to help maintain leather suppleness and natural shine.

Leather cream with beeswax, Pharmakas

1490

500 ml

Cream for cleaning and caring for the skin of animals or leather objects. With a waterproofing effect, it creates a natural barrier against moisture and dirt. Contains beeswax, which intensely moisturizes, deeply cleanses and forms a natural barrier against moisture and dirt.

Leather oil with beeswax, Pharmakas

1464

1000 ml

The beeswax skin oil moisturizes and protects the skin, preventing dryness, cracking and damage, while providing a waterproofing effect and keeping the leather soft and supple. The oil is absorbed quickly without leaving any residue, ensuring well-maintained, water and dirt resistant leather. The product is suitable for all smooth leather types.

Hair shine spray, Pharmakas Foxfire

Hair and coat care spray for pets' fur and hair, making it denser, smoother and easier to comb.

The spray contains organic ingredients such as argan oil, keratin and biotin, which help to improve the quality of the hair, making it denser, stronger and smoother. After use, hair becomes easy to comb.

Mane care spray, MagicBrush

NEW

For daily care of the mane and tail, facilitating combing and reducing tangles without weighing down the hair. Provides even shine and protection against external factors, including UV radiation.

With regular use, the hair remains smooth, supple and easy to manage, suitable for routine care as well as before training or presentations.

OrientalNights fragrance FrenchKiss fragrance FruitExplosion fragrance

Hair shine spray, Manecare, MagicBrush

NEW

Spray for coat, mane and tail combining shine, protection and hydration. Suitable for regular use without weighing down or sticking the hair.

Contains D-panthenol and almond oil to support hydration, improve combability and reduce breakage and tangling, providing a long-lasting smooth and glossy finish.

2-in-1 leather care and cleaning spray

The 2-in-1 spray combines deep cleaning and leather care in one product.

It is effective against dirt, grease and perspiration and is ideal for the care of riding boots, bridles and saddles, useful both on tour and for daily use in the stable.

Being grease-free, it leaves no stains or residue on clothes, ensuring safe and practical use.

Metal curry comb for horses

Serrated metal brush for cleaning the skin and hair of cattle and horses.

Spiral metal curry comb for horses

Round spiral metal brush for cleaning the skin and hair of cattle and horses.

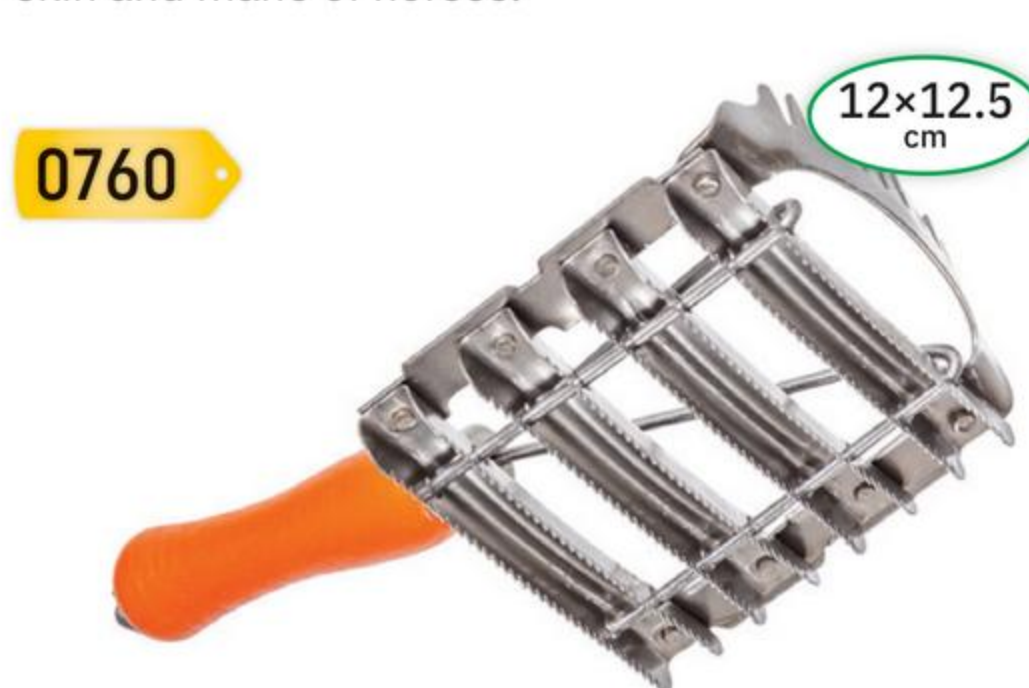

Metal curry comb for cows and horses

Serrated metal brush for cleaning the skin and hair of cattle and horses.

Metal curry comb with mane comb

Serrated metal brush with mane comb for cleaning the skin and mane of horses.

Scrubbing brush

Rough cleaning brush made of moisture-resistant plastic, suitable for wet and dry cleaning.

Infrared heat bulb holder

0335

Infrared heat bulb holder for domestic animal shelters. The holder consists of an aluminum cone (heat reflector) and adjustable length suspension chain (maximum length = 2 m). The holder hangs at a height of min. 60 cm from chickens, piglets, quail, etc.

The holder has a safety grid to protect the bulb (heat source). The power supply cable is 2.5 meters long, long enough to power the assembly from a significant distance.

Bulb socket type: E27 (normal threaded bulb).

Suspension chain length: 2 m.

Power supply cable length: 2.5 m.

Infrared heat bulb holder with power switch

0336

Infrared heat bulb holder for domestic animal shelters.

The holder has a power switch with 2 positions – in position 1 the system operates at half power, in position 2 at full power.

Power switch

Mounting the grid

Infrared heat bulb

Heat bulb with infrared light source, suitable for heating livestock rearing shelters.

The infrared light is suitable for heating small animals – chickens, poultry, piglets, lambs, etc. rearing shelters. It is a safe source of heat without fire hazard.

Apart from animal husbandry, the bulb is also suitable for keeping fresh food warm.

Green hoof spray

NEW

1837

For daily hoof care in cattle and sheep, especially in wet or muddy conditions. Supports the health of the hoof tissue and protects sensitive areas.

Contains tea tree oil, aloe vera, oregano, calendula and cod liver oil, forming a protective layer and supporting natural regeneration.

Wound care spray

1467

Spray to accelerate the natural healing process of superficial wounds and skin lesions in animals.

Its formula with peppermint oil and allantoin helps to dry wounds quickly and accelerates the self-healing process. The affected skin remains velvety soft and itching during healing is reduced. The protective film formed prevents the wound from reopening, allowing complete healing.

Spray Powder – for sensitive skin

1416

Powder spray for the natural regeneration of animal skin and fur, helping to maintain health and shine, also for the protection and care of sensitive skin.

The special powder in the composition quickly dries the wet skin surface. Does not contain antibiotics.

Suitable for both pets and farm animals.

Silver spray for minor wounds

1413

Silver (aluminum) spray for the protection of minor wounds, minor accidents or post-operative injuries, helping to dermitize the affected skin.

The spray is useful for minor wounds, minor accidents or post-operative injuries, helping to dermitize and protect the affected skin.

Zinc oxide spray – skin regeneration

1414

Zinc oxide spray – spray ointment to facilitate the natural regeneration of animal skin. The spray protects the skin against dehydration, smoothing the dry and cracked skin. It works like a balm dressing, keeping the skin supple and providing an excellent caring effect, thus supporting the natural regeneration processes of the skin.

Boar scent spray

0824

0739

1401

This preparation comes to the aid of farmers and breeders who need help to determine the optimal time to inseminate sows.

It contains natural boar pheromones that induce and increase estrus in sows.

It can also be used to increase libido of reluctant boars.

adOPT lamb adoption spray

0855

The spray containing aromatic oils neutralizes the natural smell of sheep and lambs to help the ewe/goat accept the strange lamb/kid.

The scientific blend of aromatic oils is designed to mask the natural odor of the baby animal to be adopted, suppress the ewe's sense of smell and reduce her natural instinct to reject the lamb.

No Fight anti-aggression spray

0738

This preparation is excellent against cannibalism and excessive aggression in the herd. It is useful in keeping poultry, pigs and wild animals: pheasants, partridges, etc. The preparation neutralizes the smell in the animal room, thus calming the animals. Noticeable improvement and lack of aggression usually occurs after 2-3 days.

No Bite anti-cannibalism spray

0737

Prevents animal cannibalism: biting and nibbling among piglets and other farm animals, which in overcrowded or deteriorated living conditions show mutual aggression.

The preparation is used in livestock units by direct spraying on the animals. It produces lasting changes in the olfactory stimuli of pigs.

Veterinary gloves, long, 100 pcs.

Disposable long veterinary gloves made of transparent polyethylene, orange, 100 pcs./box.

Long veterinary gloves, shoulder protection

Long veterinary gloves with shoulder protection, polyethylene, transparent, green, 50 pcs/box.

Lubricating gel, VetGel

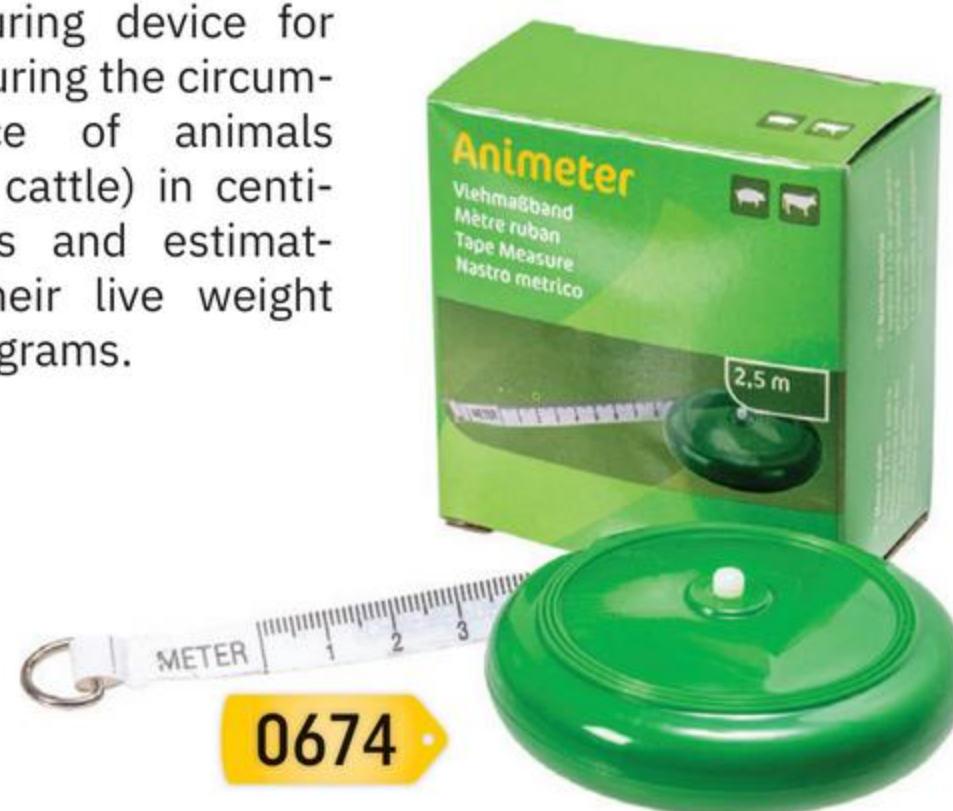

1417

It is recommended for veterinarians for professional use. It effectively protects the skin during rectal and vaginal examinations. The formula of the preparation is harmless to spermatozoa, which allows its use during artificial inseminations (except for boars).

Animeter measuring tape, 2.5 m

Measuring device for measuring the circumference of animals (pigs, cattle) in centimeters and estimating their live weight in kilograms.

Wire saw handle set

Metal handle set for wire saw – recommended especially for dehorning adult cattle.

0755

Steel wire for wire saw

Spare saw wire – mainly for dehorning adult cattle, but also suitable for a wide range of other soft materials.

0753

0754

Electric dehorner with 18 mm tip

Electric dehorner for removing the horns of small animals (calves, lambs or kids). Package includes 18 mm tip, suitable for calves.

Dehorner burning tip

Dehorning tip for electric dehorner. The 18 mm tip is suitable for calves and the 15 mm tip for lambs and kids.

Electric cordless dehorner for calves, Buddex

Professional device with integrated battery for removing horn buds in calves, operating without a power cable for flexible use on the farm. The burning ring reaches approximately 700 °C and is electronically controlled, with heating starting only upon contact with the horn bud.

The device automatically switches off after approximately 6.5 seconds. One full charge allows dehorning of up to 40 calves.

Gas dehorner, Portasol 3, with Ø18.5 mm tip

Professional butane-powered device for removing horn buds in calves, operating without a power cable. The stainless steel dehorning tip with a Ø18.5 mm diameter reaches a working temperature of approximately 600 °C.

The device is equipped with an automatic “click-ignition” system and allows temperature adjustment as needed. The gas reservoir is refillable.

Burning tip for Portasol 3 dehorner

Replacement tip for the Portasol 3 gas dehorner, made of metal resistant to high temperatures. The 18.5 mm tip is suitable for calves, while the 15 mm tip is suitable for lambs and kids.

Gas cartridge, 200 ml

Gas cartridge for refilling devices that operate with liquefied gas, such as gas dehorner or portable burners. Equipped with a standard filling valve.

Capacity: 200 ml.

Hornstick

The hornstick is made from potassium hydroxide which acts to destroy horn cells in calves or lambs and prevents horn growth.

0814

IceCool cooling spray

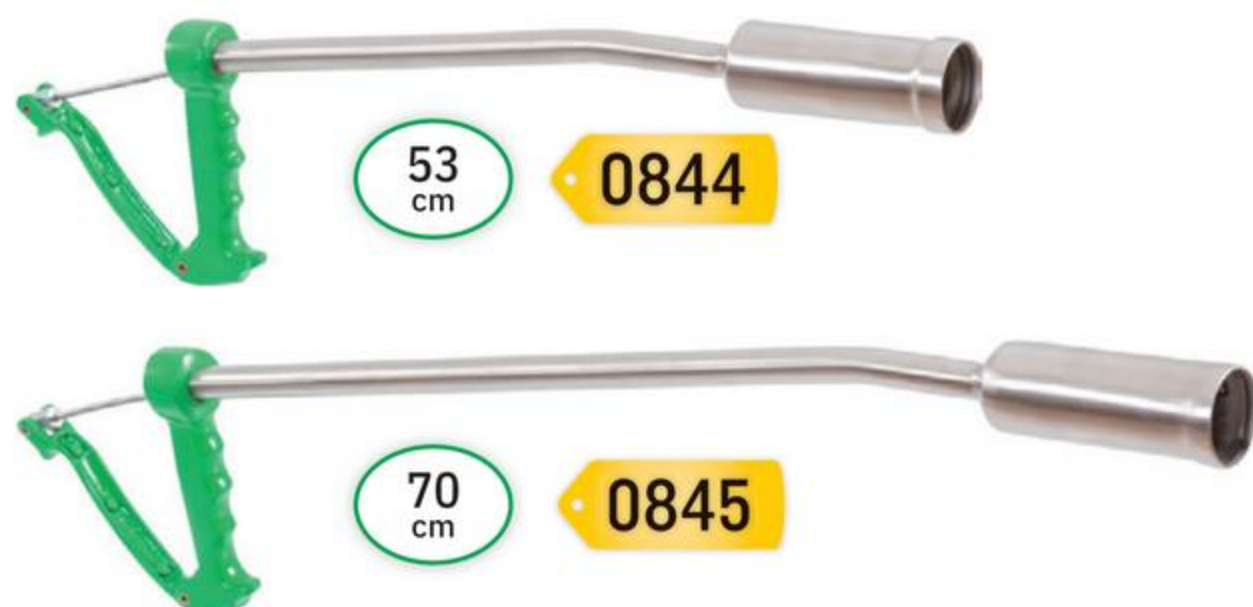

Cooling spray for cold shock treatment in preparation for dehorning.

0901

Ruminal magnet introducer

The device allows easy insertion of ruminal magnets into the digestive tract of cows. Made of stainless steel with plastic handle. Easy to use with one hand.

Ruminal magnet

Magnet for the prevention of internal injuries caused by metal objects accidentally present in the feed, and thus entering the digestive system of cows.

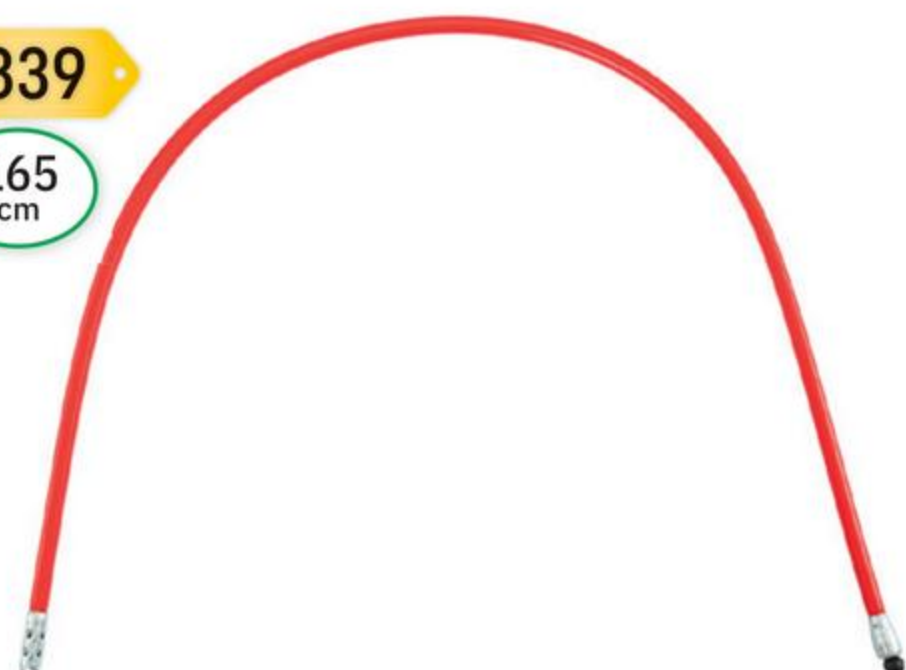

Oesophageal probe for cattle

NEW

Veterinary probe used for administering liquids directly into the stomach of adult cattle. Made of spiral wire covered with plastic, with a rounded tip. The 165 cm length is adapted to the anatomy of adult cattle.

1839

165 cm

Adjustable cattle head holder

NEW

Device used for controlled fixation of the cattle's head during treatments or veterinary procedures. Allows safer administration of medicines and insertion of boluses or rumen magnets.

1766

Veterinary trocar

Stainless steel veterinary instrument for abdominal perforation in ruminants, cattle, sheep, in case of bloat.

Calving sensor, Mocall

NEW

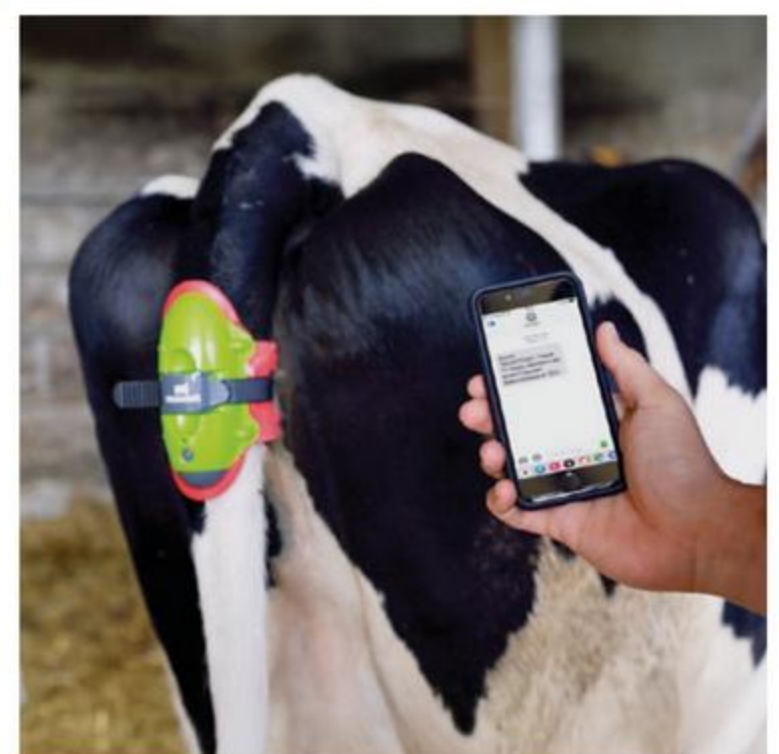

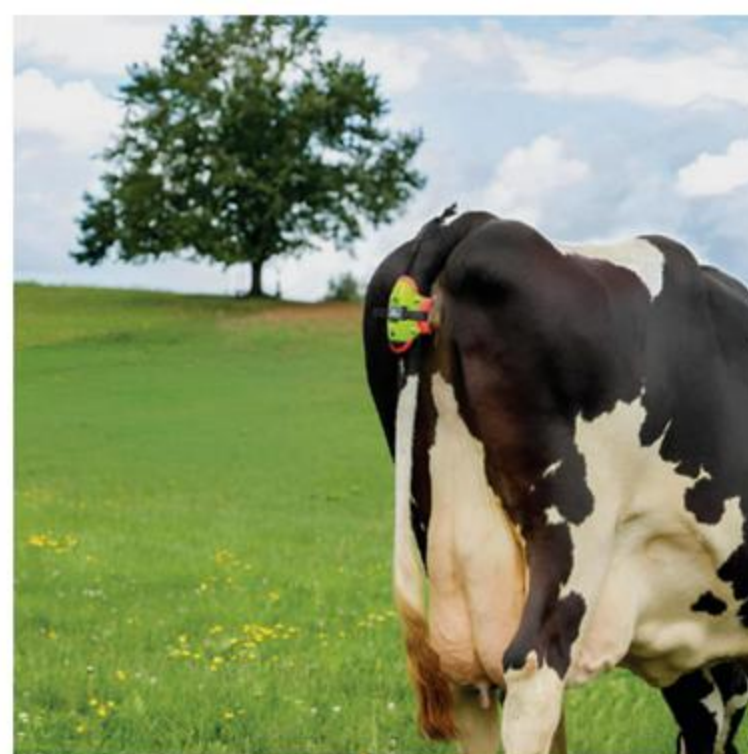

1636

The Mocall Calving Sensor is an electronic device designed to monitor pregnant cows close to calving. The sensor is attached to the cow's tail and detects movement patterns associated with labour, sending automatic alerts when calving begins.

Notifications are delivered via SMS, email, or through the Breedmanager mobile app (Android and iOS), enabling timely intervention by the farmer. The adjustable mounting system allows use on different cattle breeds.

The integrated battery provides more than four weeks of operation on a single charge. The included SIM card enables one year of service, and the device can be cleaned and reused after each calving.

Stainless steel calf puller

A veterinary instrument particularly suitable for difficult and complicated deliveries. Made of stainless steel, with two curved arms at the end that fit around the calf's head so it can be pulled out of the mother's birth canal.

The use of this device is standard veterinary practice and helps to minimize birth stress for both the newborn and the mother.

Waterproof digital animal thermometer

NEW

Digital thermometer designed for veterinary use, suitable for cattle, pigs, sheep and other species. Allows accurate rectal temperature measurement with an approximate reading time of 10 seconds. The memory function allows checking the last recorded temperature.

With rigid probe

With flexible probe

With large display and flexible probe

Digital rectal thermometer for animals

2077

NEW

Digital thermometer designed for measuring the body temperature of animals via rectal use. The ergonomic shape allows controlled handling adapted to the animal's anatomy.

The measured temperature is displayed on the LCD screen, and the device stores the last measured value. Battery operated, with a rigid measuring tip.

Veterinary scalpel handle, size 4

1987

NEW

Swann-Morton surgical blade, size 24

Carbon steel surgical blade for performing incisions in veterinary or laboratory procedures. Supplied in non-sterile condition. Compatible with type 4, 4L, 4 Graduated and 6B scalpel handles. The package contains 5 blades.

1788

NEW

5 pcs.

Foldable veterinary scalpel handle, size 4

Stainless steel veterinary scalpel handle No. 4, compatible with large standard blades, including blade No. 24. The stainless steel construction allows repeated sterilization and disinfection. The blade can be folded into the handle for easier storage.

1988

NEW

Piglet teeth cutter pliers

Pliers used for cutting the needle teeth of newborn piglets during the first days after birth. The procedure reduces the risk of injuries to the sow's teats and to other piglets in the farrowing pen.

1732

NEW

Bloodless castrator for lambs

Precise veterinary instrument for bloodless castration of sheep and goats. Can be used for bloodless crushing of the vas deferens. Simply squeeze it for 20 seconds to freeze it.

0736

23 cm

Castration forceps for pigs

Stainless steel castration forceps for piglets. The special design of the cutting blade crushes blood vessels and spermatic cords. The tweezers are designed for piglets weighing up to 35 kg.

0735

19
cm

Elastrator pliers

The tool can be used for quick and easy application of the castrating (elastrator) rubber rings.

0733

21
cm

Elastrator rubber rings

Elastrator (castrating) rubber rings, for bloodless castration of various domestic animals.

0734

100
pcs.

1757

NEW

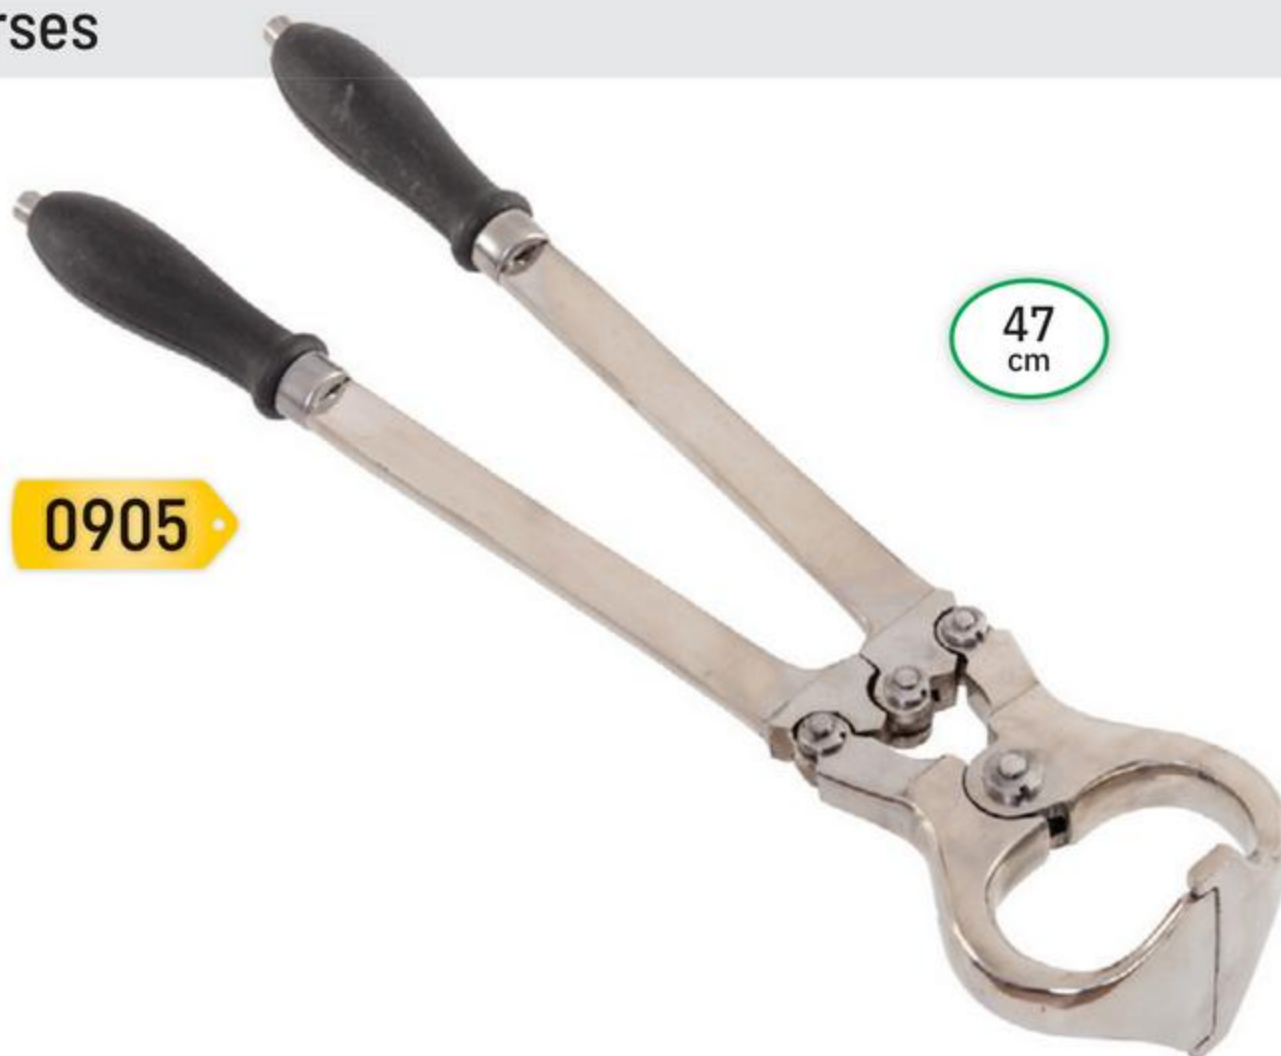

500
pcs.

Bloodless castrator for bulls and horses

Precise veterinary instrument for bloodless castration of bulls and horses. It can be used for bloodless crushing of the vas deferens.

The bloodless castration method can also be used in adult animals, but the best results are always obtained in young animals. From a practical point of view, this is the best method of castration, as the clamps do not leave large open wounds.

0905

47
cm

Calf weaning nose rings

Weaning rings for cattle. Super elastic material with high UV resistance. With adjustment screw.

0864

For calves and young cattle

0865

For young and adult cattle

0866

For adult cattle

0815

0953

0816

Calf weaning nose rings, aluminum

0955

Aluminum weaning rings for young and adult calves. Length: 14.5 cm.

Bull holder with coil spring

A device for immobilizing and guiding cattle. Made of nickel-plated cast iron.

0671

HARMS adjustable bull holder

A device for immobilizing and guiding cattle. Made of stainless steel.

0672

Bull holder with rope

A device for immobilizing and guiding cattle.
Made of nickel-plated steel. Rope: 1.7 m.

0673

Nose ring applicator

Nose ring insertion pliers for cattle. Suitable for rings with an inner diameter of 52-54 mm (outer diameter ~70 mm).

0822

Nose ring for cattle

Nickel-plated nose ring for cattle (calves, cows, bulls), with screw lock. Inner diameter: 54 mm.

0817

72/54
mm

Nose ring pliers for pigs, large

Galvanized steel tweezers for applying nose rings to pigs.

0981

Pig nose ring

Ring nose for pig manure with locking mechanism.

1444

30
mm

Nose clip applicator for pigs

Galvanized steel pliers with a robust structure for applying wire nose rings.

0871

Pig nose clips, 100 pcs.

Steel wire nose clip for pigs. The nose rings are inserted using the pig nose ring applicator.

0873

0874

Cow tail clip

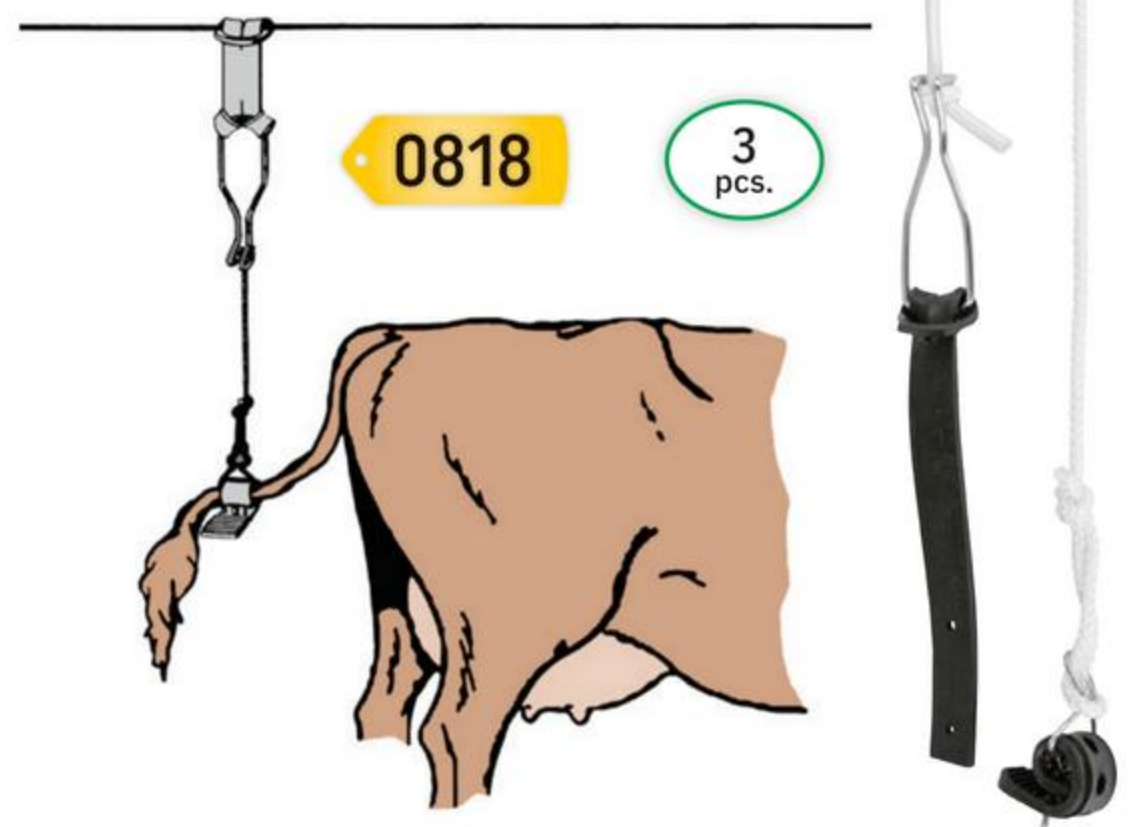

The cow tail clip prevents the animal's tail from moving or wagging during grooming, treatment or milking.

0748

Cow tail holder, 3 pcs.

Tail holder to prevent cows from getting dirty. Package contains 3 holders.

0818

3 pcs.

Cow immobilizer

When positioned correctly, it can prevent the animal from kicking during milking. It is manually adjustable for different sizes using the side holes and stop bolt: allows ergonomic lengthening and prevents accidental opening.

0747

Leg restraint for cattle

The belt is designed to provide comfort for the animal and includes a soft padding that minimizes discomfort and prevents injury. It also helps cows stand up more easily after calving.

1433

Leg strap for cattle

Used to stabilize the legs of cattle during the post-partum period or when the animal has difficulty standing up. Made of strong webbing reinforced with leather around the buckle, with a roller buckle for quick fastening.

1841

40 cm

NEW

Adjustable leg strap for cattle

Used to stabilize the legs of cattle during the post-partum period or when the animal has difficulty standing up. Made of strong webbing reinforced with leather around the buckle, with adjustable length from 22 to 42 cm.

1842

22-42 cm

NEW

Adjustable cow lifting frame

0809

Max. 800 kg

Simple cattle lifting device. The width of the device can be adjusted to the size of the animal. After fixing the device to the animal's pelvis, lifting can be carried out, for example with a forklift.

1402

Max. 1500 kg

Lifting strap for cattle, 20 × 240 cm

NEW

Used as an auxiliary component with cattle lifting devices to support animals that cannot stand up on their own. Positioned behind the front legs to help distribute the animal's weight more evenly during lifting.

Made of durable PVC with reinforced edges and D-shaped metal rings at both ends for secure attachment.

1949

240 cm

AniShock PRO 2500 prodder

0785

70
cm

High voltage electric prod for animals. Maximum voltage = 6000 V.

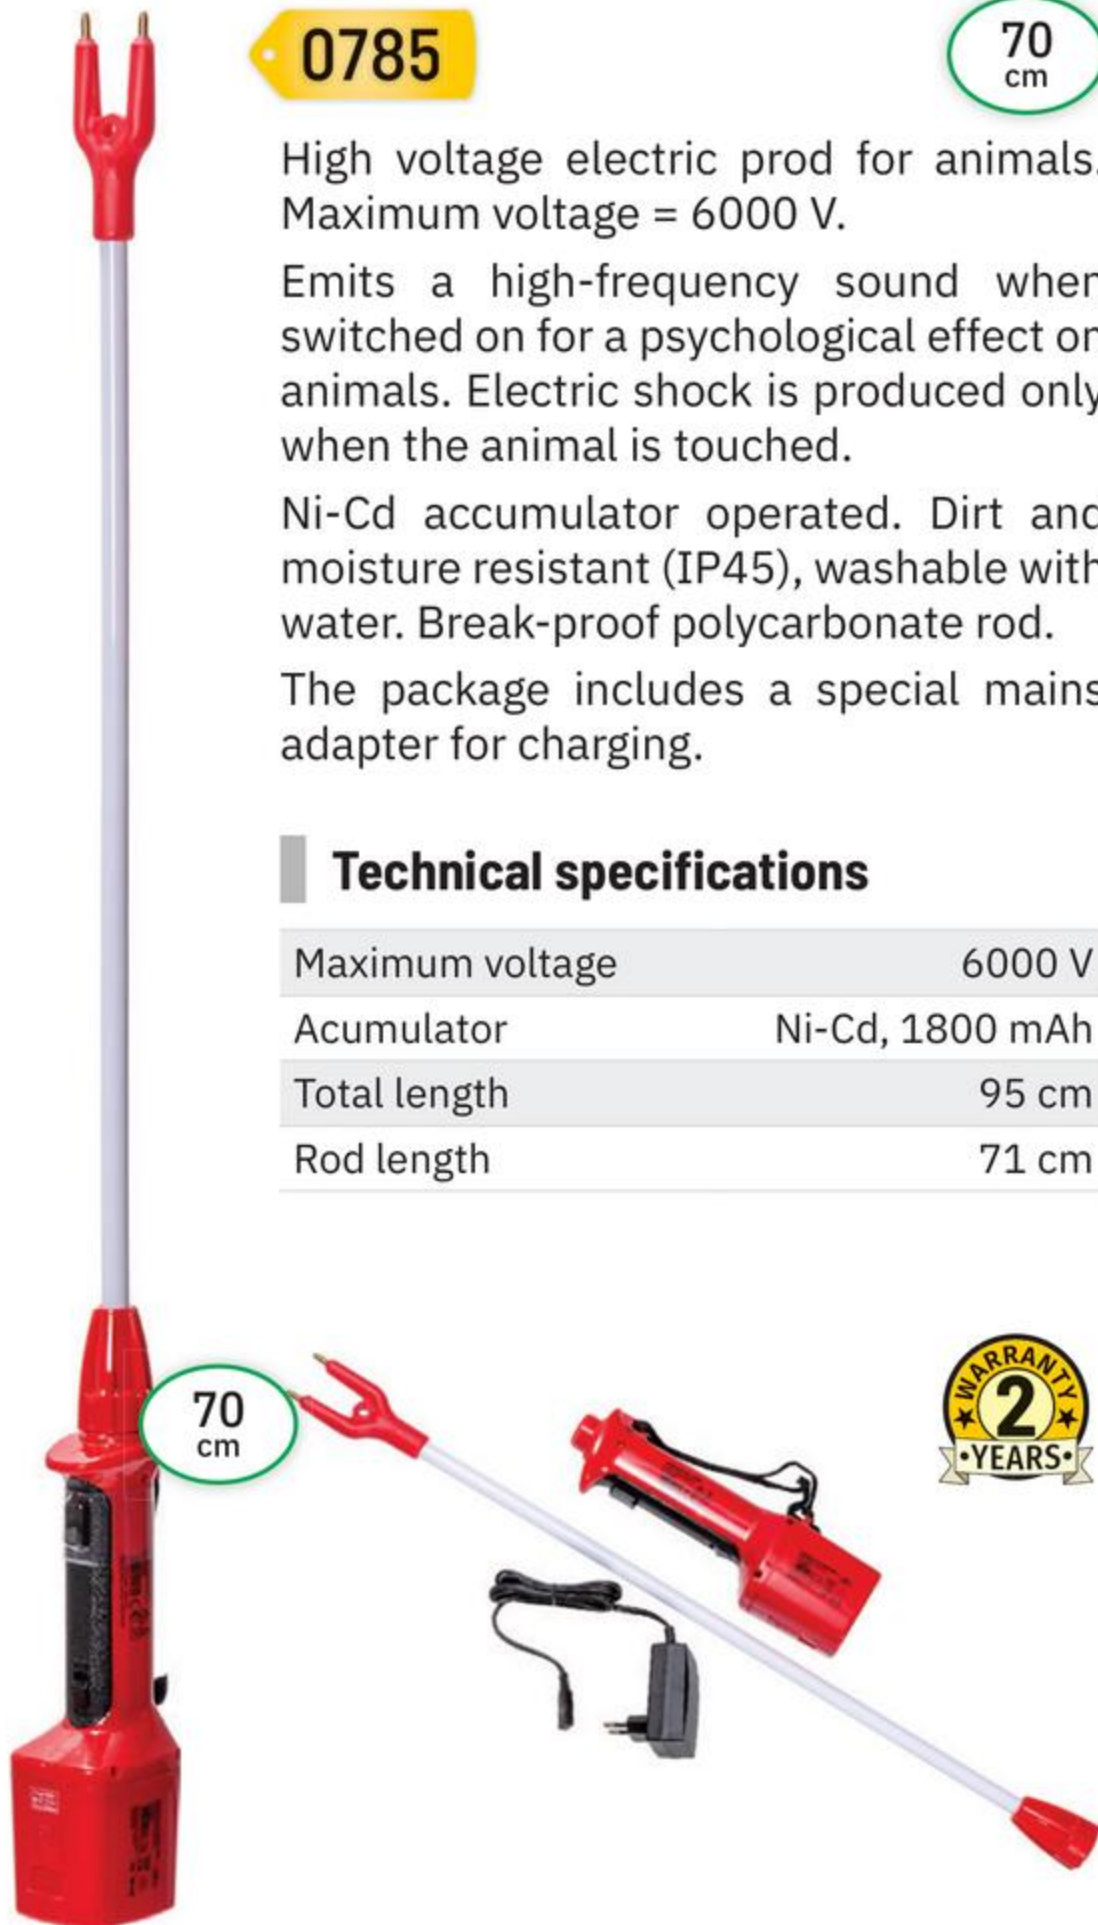

Emits a high-frequency sound when switched on for a psychological effect on animals. Electric shock is produced only when the animal is touched.

Ni-Cd accumulator operated. Dirt and moisture resistant (IP45), washable with water. Break-proof polycarbonate rod.

The package includes a special mains adapter for charging.

Technical specifications

Maximum voltage	6000 V
Acumulator	Ni-Cd, 1800 mAh
Total length	95 cm
Rod length	71 cm

70
cm

Electric prod, AniShock Comfy

1391

70
cm

High voltage electric prod for animals. Maximum voltage = 6000 V.

Emits a high-frequency sound when switched on, for a psychological effect on animals. Electric shock is produced only when the animal is touched.

Powered by Li-ion battery. Dirt and moisture resistant (IP45), washable with water. Break-proof polycarbonate rod.

The package includes a 5 V/1 A USB-A universal mains adapter and a 8.4 V voltage booster cable.

Technical specifications

Maximum voltage	6000 V
Acumulator	Li-ion, 2600 mAh
Total length	94 cm
Rod length	70 cm

Electric prod, HandyShock

NEW

Device used for guiding and directing cattle and adult pigs during handling. It generates an electric impulse when the electrodes touch the animal and is operated by a touch-sensitive button protected by an on/off switch.

The ergonomic plastic housing ensures a secure grip during use. Powered by 4 × 1.5 V AA batteries (included).

1859

16.2
cm

Pig holder

Taming bar for guiding pigs or boars. The long, rubber coated handle allows you to guide even a strong and vicious animal with confidence. A practical mechanism automatically locks the possibility of slack in the rope, so the rope remains tight until the operator releases the lock.

Pig restraining bar with handle

NEW

Pig restraining pole used for capturing and controlling pigs during handling, veterinary treatments or transport. The device is equipped with a steel cable and a self-tightening mechanism that allows quick fixation of the animal. The ergonomic handle ensures a secure grip and good control during use.

Simple pig restraining device, 108 cm

NEW

Device used for capturing and controlling pigs during handling or veterinary procedures. It is equipped with a steel cable and a self-tightening mechanism that allows quick fixation of the animal. The handle ensures a secure grip during use. Cable length: 108 cm.

Blitz Kerner stunner

0980

An extremely safe stunning gun that allows fast and painless stunning of livestock. It is not classified as a fire-arm and complies with EU animal welfare legislation. The use of this device is not subject to authorization.

Green cartridges for stunning gun, MaxxTech

Stunning gun cartridge for small animals (piglets, lambs, kids, calves).

1662

50 pcs.

NEW

9x17 mm

Yellow cartridges for stunning gun, MaxxTech

Stunning gun cartridge for medium-sized animals (sheep, cattle and medium-sized pigs).

1663

50 pcs.

NEW

9x17 mm

Red cartridges for stunning gun, MaxxTech

Stunning gun cartridge for large animals (horses, cattle and adult bulls).

1664

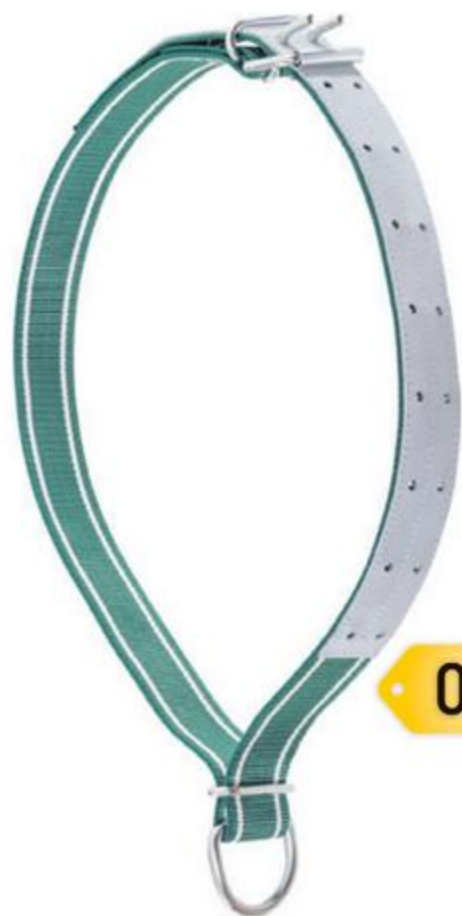

50 pcs.

9x17 mm

Synthetic collar for cows and bulls

The collar is made of comfortable synthetic material. It is very stable, with a double row of holes, leather-reinforced, adjustable in 11 positions and fitted with a D-ring.

Collar length: 150 cm
Strap width: 5 cm

0471

Cow neck strap

A universal calf and cow neck strap made of high-quality nylon with a D-ring. The metal parts are galvanized, protecting the strap against corrosion.

Collar length: 85 cm
Strap width: 4 cm

0677

Universal cattle collar with chain

Leather-reinforced universal cattle collar. Made of high quality nylon, equipped with single chain, rotating carabiner and ring.

The metal parts are galvanized.

0678

Collar length: 100 cm
Collar width: 4 cm
Chain length: 60 cm

Halters for calves

The collar is reinforced with leather for durability and strength. The adjustable buckle makes it easy to adjust to the animal's head. The metal parts are galvanized.

0903

Head strap length: 55 cm
Collar width: 4 cm

Halters for cattle

Comfortable halter made of synthetic material with leather reinforcement. Head and nose strap adjustable in 6 positions.

0366

Head strap length: 100-120 cm
Nose strap length: 23-30 cm
Collar width: 4 cm

Halters for cattle, with chain

Comfortable halter made of synthetic material with leather reinforcement and adjustable chain. Head strap adjustable in 6 positions.

0367

Head strap length: 100-120 cm
Chain length: 35 cm
Collar width: 4 cm

Halter for sheep and rams

Durable and comfortable halter made of synthetic material for sheep and rams. The metal buckle on the head can be adjusted to the desired size so that it can be used with animals of different sizes and breeds.

0988

Strap width: 2 cm
Diameter at head: ~60 cm
Diameter at the nose: ~44 cm

Halter for cows and bulls

0675

0676

Universal halter, made of durable and comfortable synthetic material. The metal parts and buckles are galvanized.

Strap width: 2.5 cm
Large diameter (back): 94-104 cm
Small diameter (front): 62-72 cm

Alpaca halter, black

NEW

2083

Halter used for handling and guiding alpacas. Its design avoids direct pressure on the sensitive nasal area.

The adjustable buckles allow fitting to the animal's head size, while the side clip closure enables quick fastening and removal. The material is wear-resistant and easy to maintain.

Adjustable leather halter for sheep and rams

Halter used for handling and guiding sheep and rams. Made of natural leather with adjustable size to fit different head shapes.

1945

NEW

Leather collar for sheep and rams

Collar used for identifying and handling sheep and rams. Equipped with a D-shaped metal ring for attaching a leash or other accessories. Made of natural leather with adjustable length.

1946

NEW

Strap width: 2,5 cm
Strap length: 65 cm
Max. diameter: ~Ø18 cm

Leather collar for sheep and rams

NEW

Collar used for identifying and handling sheep and rams. Equipped with a D-shaped metal ring for attaching a leash or other accessories. Made of nylon with adjustable length.

Max. diameter: ~Ø15 cm

Cow chain, Ø5, Ø6, Ø7 mm

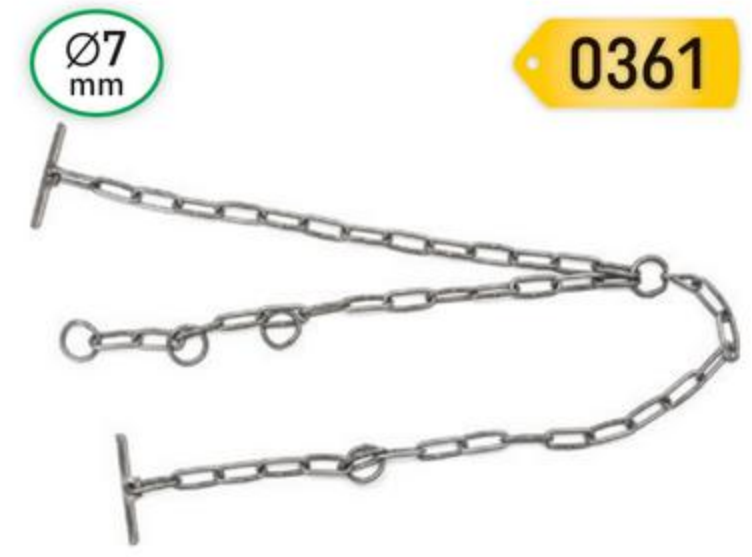

The chain is fitted with T-stops and rings for diameter adjustment. It is also fitted with a rotator that allows the animal to move for long periods without twisting or shortening the chain.

Link thickness	5 mm
Suspension chain length	80 cm
Collars	65 + 65 cm

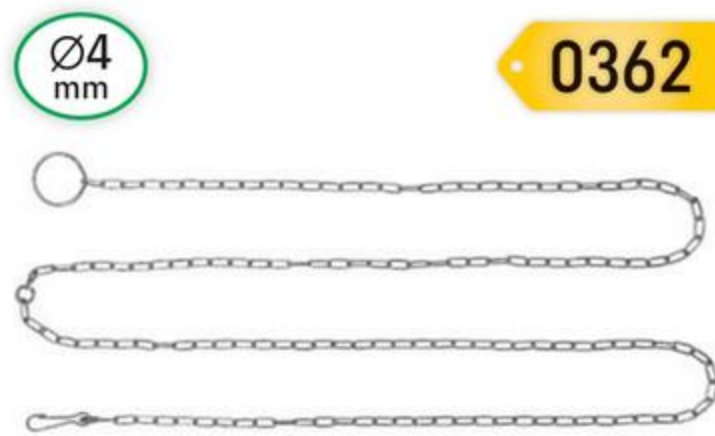

Link thickness	6 mm
Suspension chain length	80 cm
Collars	60 + 60 cm

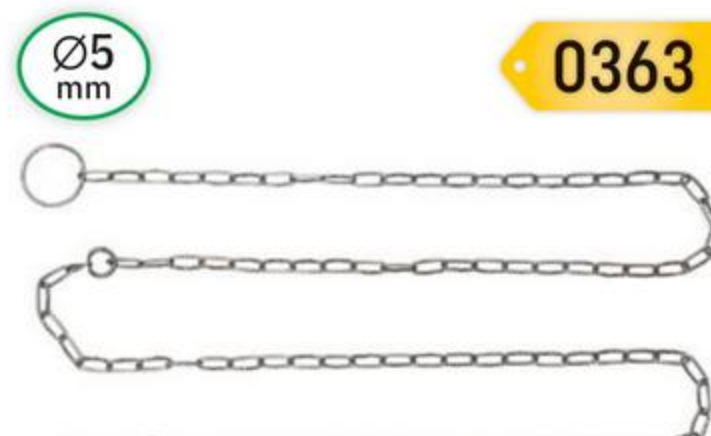

Link thickness	7 mm
Suspension chain length	85 cm
Collars	70 + 70 cm

Cow chain with carabiner, Ø4, Ø5, Ø6 mm

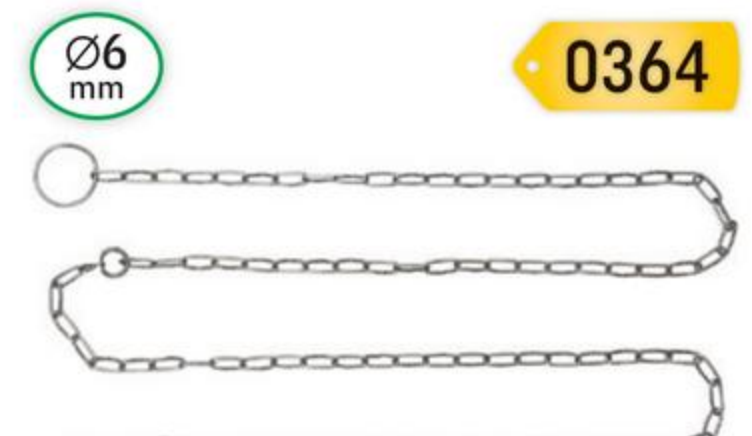

Cow chain with carabiners for cattle. The chain is fitted with a 9 cm diameter ring at one end and a 10 cm carabiner at the other.

Link thickness	4 mm
Chain length	5 m

Link thickness	5 mm
Chain length	5 m

Link thickness	6 mm
Chain length	5 m

Rotating ring for chain, Ø6 mm

The combination of rotating rings allows the rings to rotate around the shaft, preventing the chain or rope from twisting.

Link thickness	6 mm
Ring diameter	4.5 and 5 cm

Sheep catching hook, without handle

NEW

1153

The shepherd's hook, an essential animal management tool. Delivered without shank.

The aluminum material ensures corrosion resistance.

Sheep marking spray

High quality, fast drying, intensely colored spray for temporary marking of sheep. After shearing, the dye can be easily removed from the wool. Alcohol based.

500 ml

Spray grip

Handle for comfortable application of sprays.

TopMarker marking spray for cows, pigs and goats

A high quality, fast drying, intensely colored spray for temporary marking of cows, sheep, goats and pigs. Alcohol based.

500 ml

Short-term animal marking pen

Animal marking pen for short-term marking of cattle, pigs or sheep. Intense color with high opacity. Wax and paraffin oil based.

60 ml

Ear tag pliers for FlexoPlus and MultiFlex

Garden bag

NEW

Garden bag used for collecting and transporting leaves, plant waste, cut grass, or fodder in gardens, yards, or farms. The self-standing construction keeps the bag in shape during filling.

Made of durable material for repeated use, and the bottom handle makes lifting and emptying easier.

Wettschliff scythe, without handle

Standard scythe, hand-forged, oil-hardened, polished and grinded. The surface is coated with anti-rust paint.

Hahnkopf scythe, without handle

NEW

Standard scythe, factory sharpened and supplied with a plastic blade protector. Delivered without a handle.

Silicar scythe sharpening stone

NEW

Sharpening stone for scythes and other agricultural tools, made of pure silicon carbide. The medium grit ensures efficient and even sharpening.

Can be used with water or dry. Made in Germany.

Aluminum shovel, without handle

Lightweight and stable shovel made of aluminum with galvanized steel edge. The profiled shape allows you to load more material on the shovel and prevents material from spilling during use.

Bended handle for tools (shovel, fork)

Bended handle for various tools – shovel, fork, etc. Made of ash wood, shock-resistant. The handle has a conical profile at that end which fits into the tool.

Tool handle, Ø30 mm × 150 cm

NEW

Bended handle for various tools – shovel, fork, etc. Made of poplar wood, shock-resistant. The handle has a conical profile at that end which fits into the tool.

Broom handle

Shock-resistant broomstick made of poplar wood. With rounded end.

0731

130×2.4
cm

Wooden back broom without handle

Wooden backed broom for large surfaces with red elastane bristles. The handle holder is fastened with screws. Delivered without handle.

+ blade
for scraping

Manure rake, black

NEW

Rake for collecting manure or bedding in stables and animal housing areas. The sturdy tines and the rear plate make scraping from hard surfaces easier.

Made of durable materials for long-term use in farm conditions.

Manure shovel with rake

NEW

Mistboy shovel with rake, used for collecting manure or bedding in stables, pens, or animal transport trailers. The combination of shovel and rake allows quick and efficient material collection.

The robust rake is designed for intensive use, while the lightweight construction makes daily handling easier.

Mistboy Mini, 60 cm

Mistboy, 75 cm

Mistboy, 90 cm

Box rake

A straight manure scraper and rake in one, made of fibreglass plastic, with a wide range of uses. The straight, scraper side is suitable for removing manure and animal droppings, while the rake is suitable for litter removal and stable cleaning.

Muck and slurry pusher

Powder-coated steel straight scraper for removing manure and excrement. Equipped with a replaceable ammonia-resistant rubber blade.

Muck and slurry pusher, half-round

Powder-coated steel half-round scraper for removing manure and excrement. Equipped with a replaceable ammonia-resistant rubber blade.

The rubber blade contains mesh inserts that guarantee a high level of flexibility and prevent fractures and cracks.

Muck and slurry pusher, half-round, galvanized

NEW

Galvanized steel half-round scraper for removing manure and excrement. Equipped with a replaceable ammonia-resistant rubber blade.

The rubber blade contains mesh inserts that guarantee a high level of flexibility and prevent fractures and cracks.

Plastic manure pusher head

NEW

Tool for pushing manure or other materials in stables and animal housing areas. Made of durable and lightweight plastic for comfortable use in daily tasks. Available without handle.

Galvanized metal water squeegee

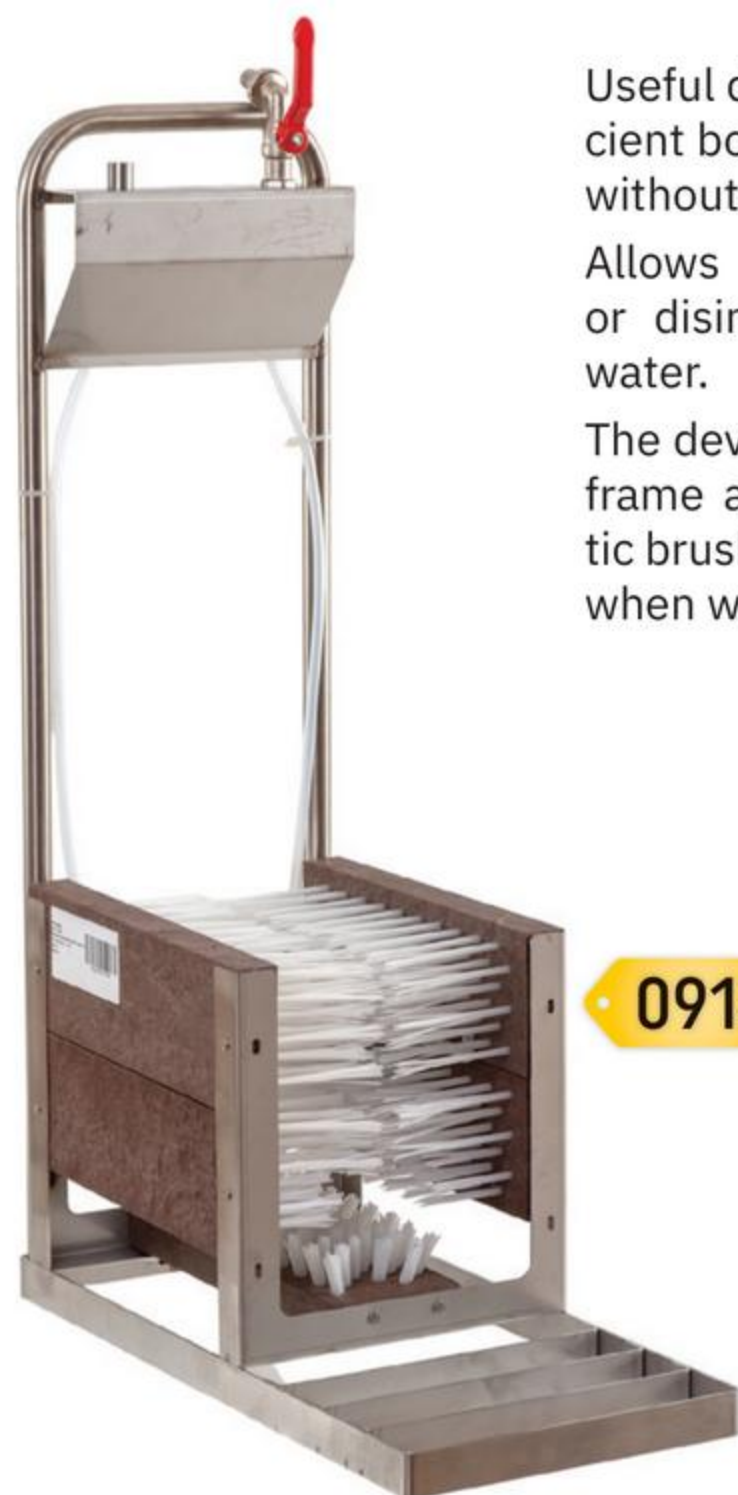

NEW

Water squeegee made of galvanized steel, suitable for removing water from stables, animal housing areas, or other wet environments. The rubber blade ensures efficient cleaning without damaging the surface.

Its robust construction provides resistance to corrosion and frequent use. Available without handle.

Boot cleaner

Useful device for quick and efficient boot cleaning. Easy to use without removing the boots.

Allows you to mix detergent or disinfectant into the wash water.

The device has a stainless steel frame and comes with 5 plastic brushes that can be changed when worn out.

Electric fly trap, EcoKill LED 2.0

1487

Electric trap with UVA LED lamp for catching flies and other flying insects. It is intended for use in spaces up to 150 m².

Replacement tube for EcoKill 2.0

1488

7w

Replacement tube for EcoKill LED electric insect trap.

mouseStop mouse trap set with bait

Hard plastic spring-loaded mouse traps with bait.

0771

Replacement bait tongue for mouseStop

Pack of 6 replacement tongues for mouseStop mouse trap.

1325

6 pcs.

ratStop rat trap with bait

Hard plastic rat trap with bait.

0772

Replacement bait tongue for ratStop

Pack of 3 replacement tongues for ratStop rat trap.

1326

3 pcs.

Mouse trap set with wooden base

Mouse traps made of high quality wood and steel.

0769

Set of 2 mouse traps, 11 × 5 cm

Hard plastic spring-loaded mouse traps with bait.

1152

NEW

Gilmour water spray gun

Water spray gun, suitable for hot and cold water.

0811

Udder spraying and washing gun, RB35

Spray and washing gun suitable for hygienic cleaning of the udder before and after milking, with adjustable spray jet.

1855

NEW

General water spraying gun, Rinser Komfort

Spray gun for general washing tasks with adjustable water jet.

1856

NEW

Udder spraying and washing gun, Rinser Super Jet

Spray and washing gun suitable for hygienic cleaning of the udder before and after milking, with adjustable spray jet.

1857

NEW

Rain gauge, 40 liters/m²

Rain gauge for small amounts of precipitation.

0745

Kerbl thermo-hygrometer

Thermometer-hygrometer for measuring temperature and humidity in indoor spaces.

1869

NEW

Digital thermometer with min-max function

Digital thermometer for measuring air temperature, with min-max memory function.

2048

NEW

Chainsaw lubricating oil, Viscano

Special lubricating oil for chainsaw bar and chain, having a viscosity suitable for both summer and winter use. There is a short movable tube under the plug to facilitate the pouring of the oil.

IBC container tap, 3/4"

0863

NEW

Tap for controlling the flow of water or other liquids from IBC containers, compatible with the standard connection. It features a 3/4" outlet for connecting hoses or quick couplings.

IBC container tap, 3/4", with 2 outlets

2047

NEW

Tap for controlling the flow of water or other liquids from IBC containers, compatible with the standard connection. It features two outlets for connecting hoses or quick couplings, each with its own valve for independent control.

Heating cable for poultry drinkers

2049

NEW

Heating cable for poultry drinkers designed to keep water in liquid state during cold periods. Operates at 12 V and distributes heat evenly to prevent the water from freezing.

7-in-1 digital weather station with WiFi connectivity and mobile app

NEW

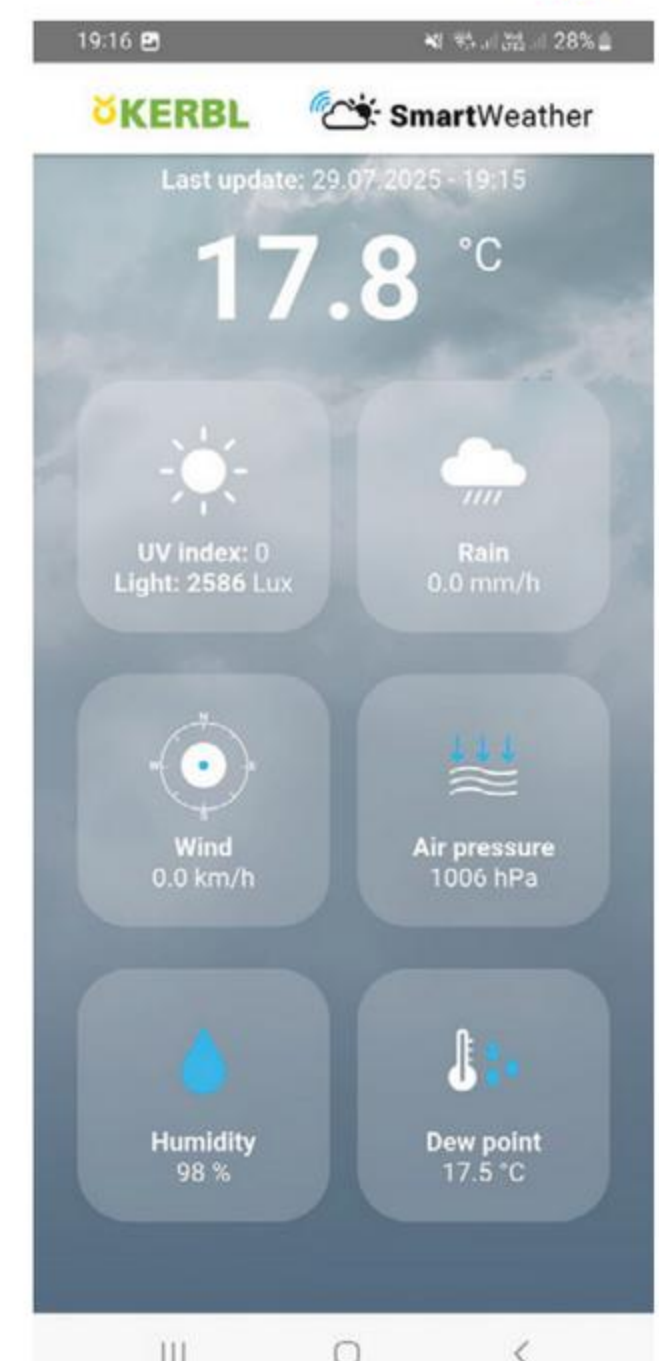

1740

Digital weather station designed for monitoring climatic conditions in households, farms, or gardens. The system provides real-time weather data visible on the indoor display or via the Kerbl Smart Weather mobile application through a WiFi connection. The station measures and displays:

- air temperature
- humidity
- rainfall amount
- wind speed and direction
- atmospheric pressure
- UV index
- dew point

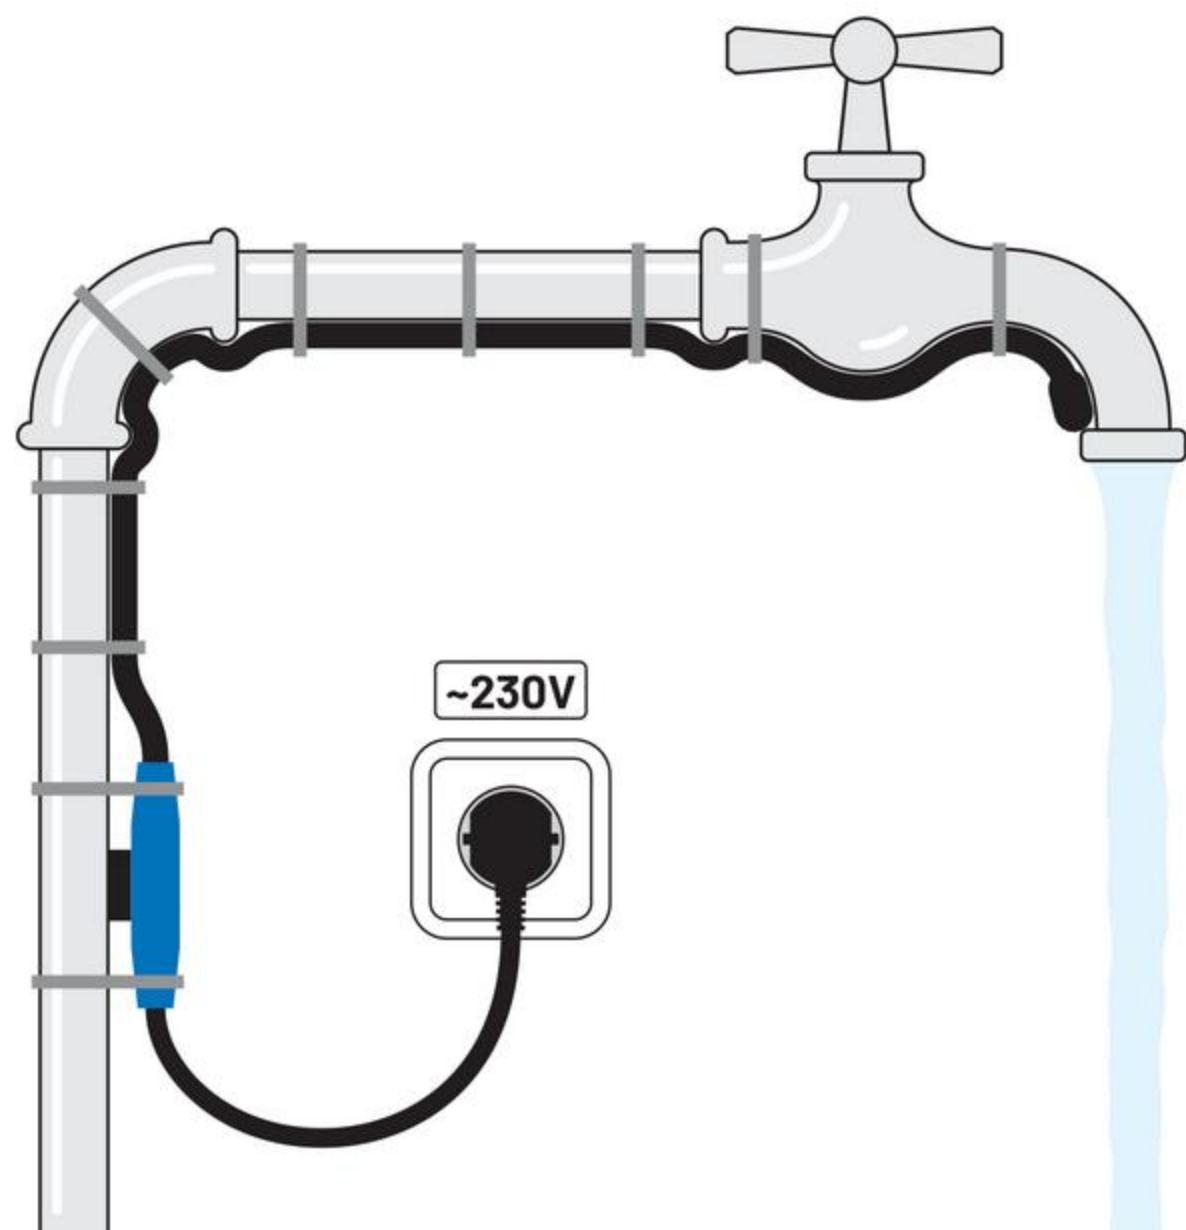

The outdoor unit transmits data wirelessly to the indoor unit and is primarily powered by an integrated solar panel. The mobile app allows real-time monitoring of measurements and weather trends.

Heating cable with thermostat, 1-48 meters

The system for heating pipes is designed to prevent damage caused by freezing. It operates smoothly down to a minimum temperature of $-45\text{ }^{\circ}\text{C}$.

When the temperature drops below $3\text{ }^{\circ}\text{C}$, the thermostat activates the heating, and once the temperature rises above $13\text{ }^{\circ}\text{C}$, the thermostat turns off the heating.

Premium, robust and accurate hanging scale. It is ideal for professional uses, such as feed control, food measuring or suspended objects.

It has a robust, generously sized, high quality spring mechanism built into a solid metal housing.

Before use the scale must be set to zero by the screw on top of the housing. Zero adjustment is possible within $\pm 0.5\%$ of the maximum measurable weight.

Nora IDRO High work boots

Milking and washing apron

0670

Lightweight apron made of resistant plastic. Resistant to water, tears, splits and chemicals.

Ideal for agricultural, home and yard work. Features an adjustable plastic buckle for a comfortable fit.

Heat resistance: -25...+70 °C.

Dimensions: 120 × 80 cm.

Hoof trimming and treatment apron

Protective apron designed for hoof trimming and treatment of cattle, sheep, or goats. Made of durable PVC material that protects against water, dirt, and substances used during treatments.

The flexible material allows freedom of movement and easy cleaning, while the adjustable fastening system adapts to different body sizes. The apron is equipped with pockets for storing tools used during work.

100
pcs.

Disposable long shoe covers designed to protect against dirt and contamination in environments where hygiene is essential. Made of thin nylon and provide full coverage for shoes or boots, including the lower part of the trousers. The pack contains 100 pieces.

Hay bale cover

Bale cover tarpaulins offer a cost-effective solution for farmers – their use is very efficient as they cost a fraction of the price of a covered structure. Another advantage is its mobility, i.e. it is not fixed in one place like a building. We offer six types of tarpaulins, each capable of covering rails constructed from three types of standard bales.

Tarpaulin dimensions Product code	Number of bales $\varnothing 1.2 \times 1.2$ m that can be covered	Number of bales $\varnothing 1.5 \times 1.2$ m that can be covered	Number of bales $1.2 \times 2.4 \times 0.9$ m that can be covered

Bale cover fixing nail

Galvanized metal fixing nail for fixing the bale covers.

0551

28 × 13 cm

Bale cover fixing ring

A special fixing ring designed for fixing the bale covers.

0552

Sandbag for bale covers

A sandbag to hang on the bale cover tarpaulin to anchor the bale cover.

0840

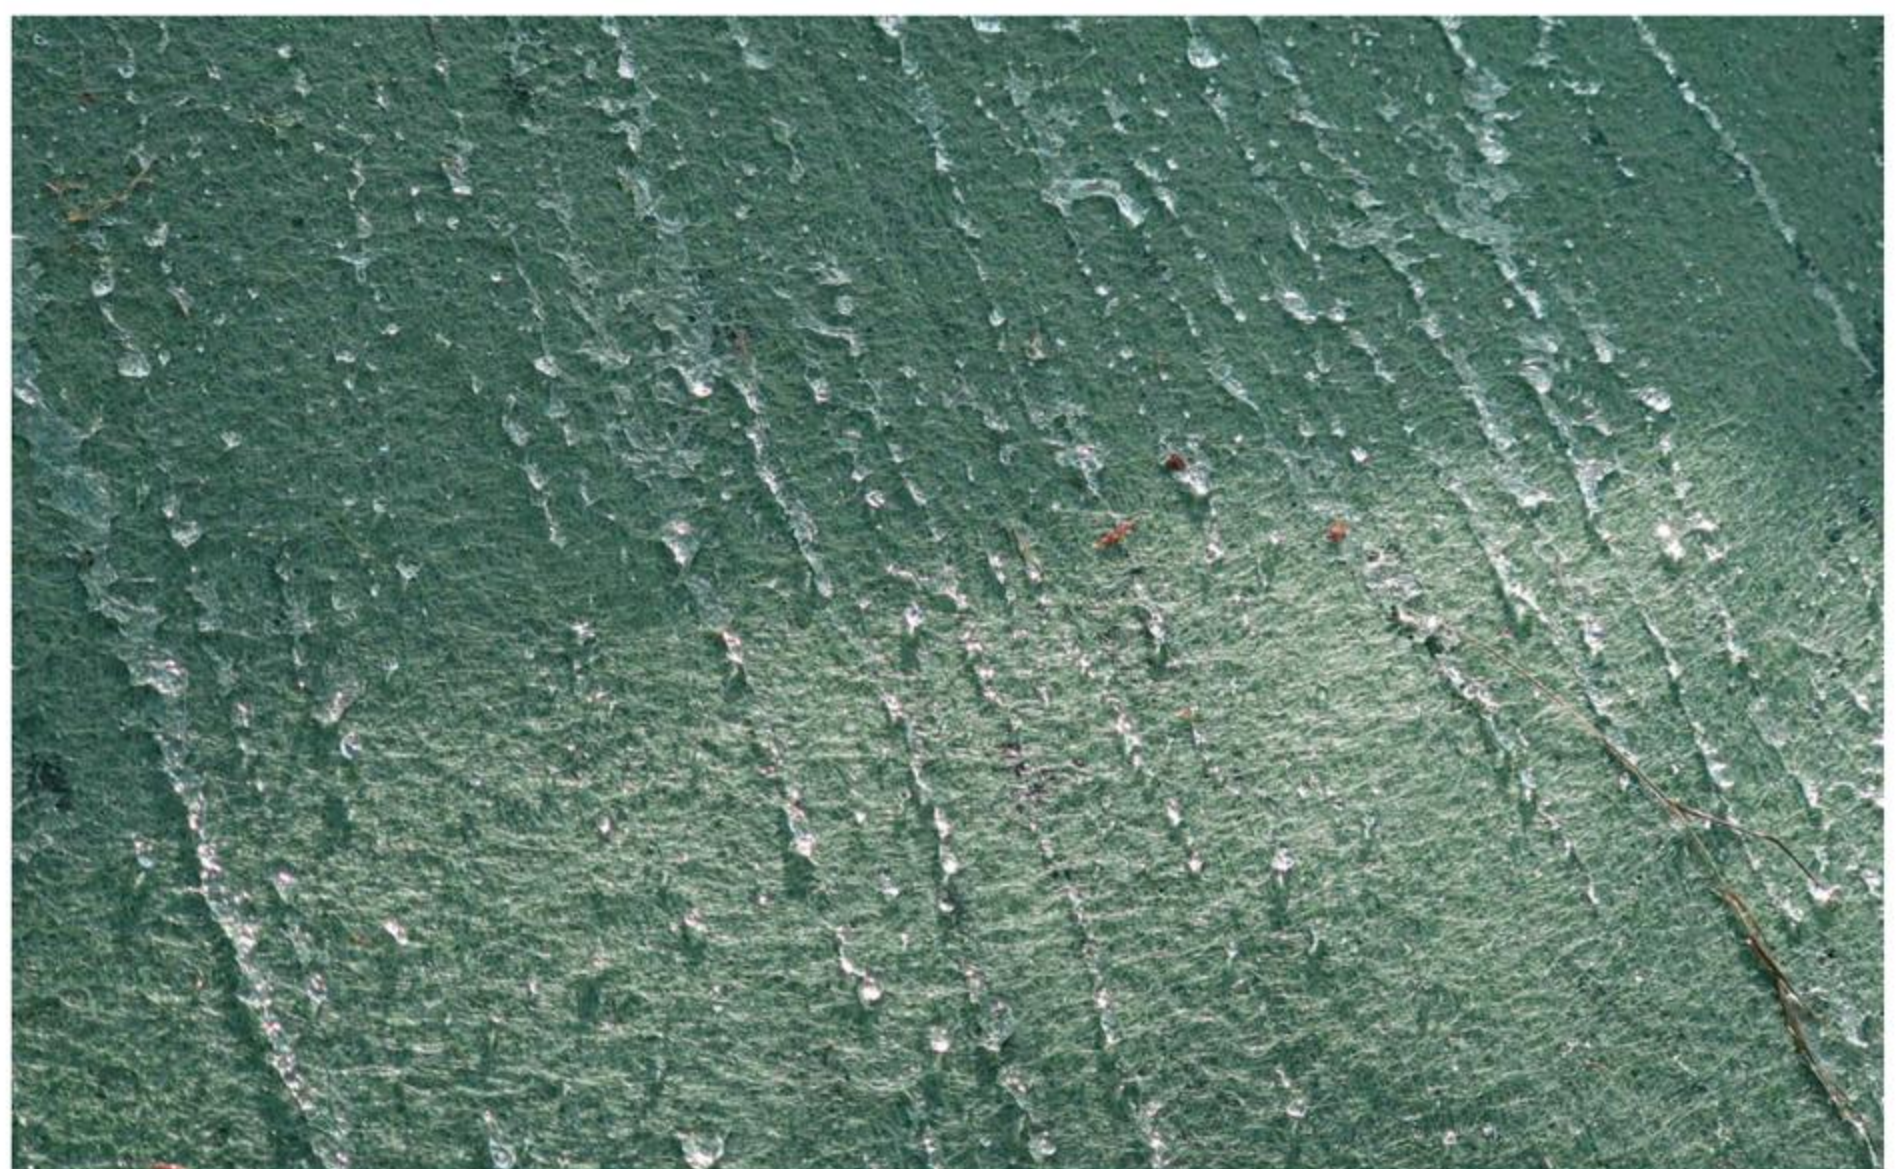

120×27
cm

Bale cover sandbag mounting clip

A special fixing clip designed to attach sandbags on the bale cover.

0841

Moisture meter for hay and straw, Draminski

Digital device for measuring moisture and temperature in baled hay, straw and tobacco.

This tool is indispensable for any farmer – by monitoring the moisture and temperature inside the bales, you can effectively prevent the risk of loss or fires caused by self-heating.

Grain moisture meter, TwistGrain Pro

Dramiński's TwistGrain pro Moisture Tester is a compact device designed to measure grain moisture in field conditions. This easy to handle device is suitable for agricultural users and provides a fast and accurate measurement. The TwistGrain pro Moisture Tester is compatible with a wide range of cereals and seeds, providing accurate measurements for each species.

1442

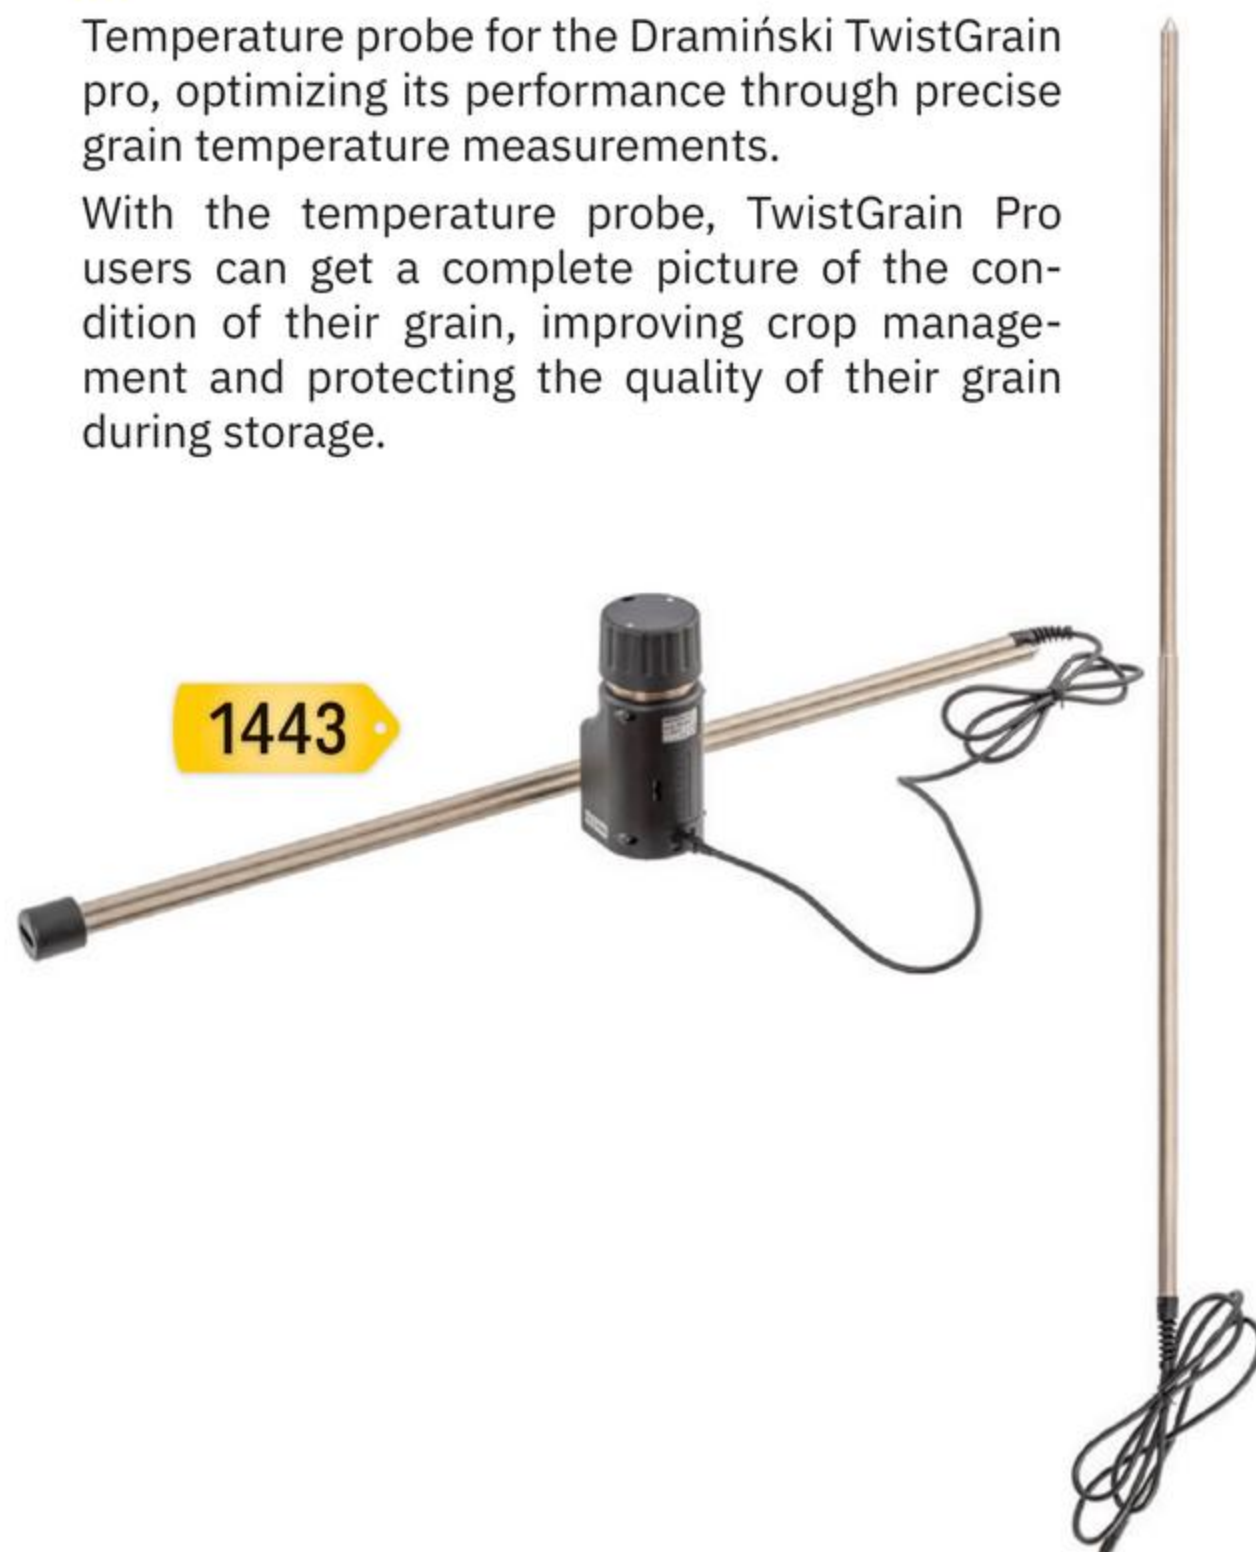

Temperature probe for TwistGrain Pro

Temperature probe for the Dramiński TwistGrain pro, optimizing its performance through precise grain temperature measurements.

With the temperature probe, TwistGrain Pro users can get a complete picture of the condition of their grain, improving crop management and protecting the quality of their grain during storage.

1443

Bale net, XES Extreme

Net-covered bales minimize the loss of fibre fodder during baling and transport. The net prevents wind or other environmental factors from blowing the fibres away.

The even surface of the bale net allows moisture to drain away from the bale, which helps reduce feed storage losses. This is particularly important in wet weather where moisture can damage the quality of the forage. Bales surrounded by netting are more stable and retain their shape better, which makes them easier to move and store.

Technical specifications

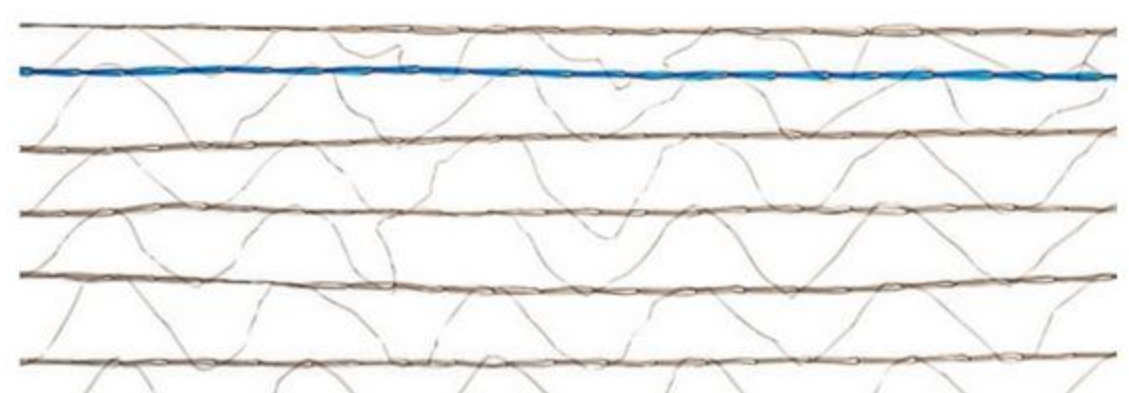

Width	1.23 m
Length	3000 m
Breaking strength	300 kg
Weight	11.9 g/m
Material	HDPE
UV resistance	12 months

DLG certification

The bale net is continuously tested in DLG quality assurance tests, where its parameters are evaluated on test benches and under laboratory conditions. Various parameters, such as mechanical, physical and ageing properties, as well as the running length of the net are measured. In addition, practical tests are carried out to assess the manageability of the mesh.

Protective tarpaulin, PolyGuard, 210 g/m²

NEW

Protective tarpaulin designed for covering and protecting materials against rain, snow, and moisture. The durable 210 g/m² material is UV-stabilized and suitable for outdoor use. The edges are reinforced and the tarp is equipped with metal eyelets at regular intervals for secure fastening. Suitable for covering firewood, stored materials, trailers, or other items that require protection.

1928

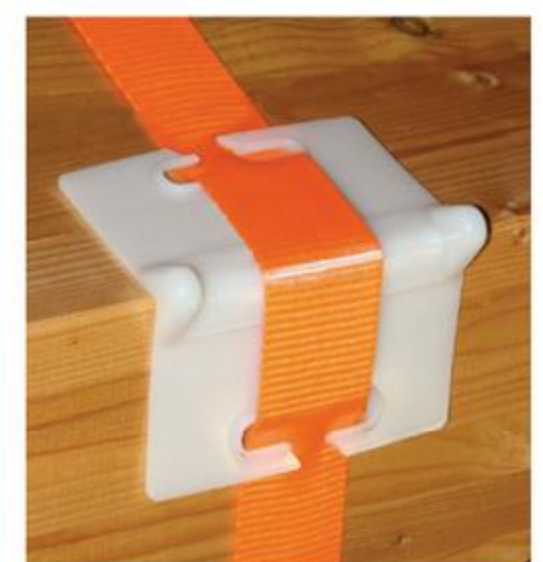

Edge protector for tie-down straps, up to 55 mm

NEW

1929

Edge protector for tie-down straps used to protect both the load and the strap during load securing. The durable plastic construction distributes pressure over a larger surface and reduces the risk of damage on edges or hard surfaces. Compatible with tie-down straps up to 55 mm wide.

Silo repair adhesive tape

Self-adhesive tape, ideal for repairing perforations on the surface of silo wrap or stretch bale wrap. The tape is strongly adhesive, water and UV resistant.

Its prompt use helps maintain the quality of stored crops and prevents the risk of mold growth by eliminating direct contact with air. Immediate repair of damaged areas prevents the formation of air pockets in the green mass, thus protecting the crop.

G51 cast-iron drinker, with tube valve, 1.7 liters	91
Galvanized metal holder frame for feeding buckets	108
Galvanized metal water squeegee.	179
Galvanized steel corner feeder, 35 liters.	111
Garden bag	172
Garlic powder against insects.	133
Gas cartridge, 200 ml	149
Gas dehorner, Portasol 3, with Ø18.5 mm tip	149
Gate connector kit for 2-4 mm wire.	49
Gate handle for 10 mm wide tape	37
Gate handle for 20 mm wide tape	38
Gate handle for 40 mm wide tape	38
Gate handle set with 5 m spring and 2 gate insulators	38
Gate handle with 5 m spring.	38
Gate insulator for permanent fence.	36
Gate insulator with M6 screw.	35

Gate insulator with wood screw	35	Hornstick	150
Gate types	6	Horse balm, MagicBrush	133
Gel for horses, Equimint, MagicBrush	136	Horse balm, Pharmakas	133
General water spraying gun, Rinser Komfort	182	Horse cleaning spray, MagicBrush	137
Gilmour water spray gun	182	Horse shampoo, Dermocan	135
Goat milking cluster, rubber	65	Horse shampoo, MagicBrush, 500 ml	136
Goat milking cluster, silicone	65	Horse shampoo, MagicBrush, 1000 ml	136
Goat milking machine, with 2 clusters, 1 aluminum bucket 30 liters	57	Horseshoe nail pliers, 35 cm	125
Goat milking machine, with 2 clusters, 1 inox bucket 30 liters	57	IBC container tap, 3/4"	183
Goat milking machine, with 4 clusters, 1 aluminum bucket 40 liters	58	IBC container tap, 3/4", with 2 outlets	183
Goat milking machine, with 4 clusters, 1 inox bucket 40 liters	58	IceCool cooling spray	150
Graduated milk container, plastic, 30 litres	61	Impulse output cable	47
Grain moisture meter, TwistGrain Pro	190	Infrared heat bulb	144
Graphite vanes for vacuum pump	69	Infrared heat bulb holder	144
Graphite vanes for vacuum pump	69	Infrared heat bulb holder with power switch	144
Green cartridges for stunning gun, MaxxTech	161	Inner gasket for 240 cm ³ collector	65
Green hoof spray	146	Inox and cast-iron drinker with tube valve, 5 liters	91
Green udder gel	76	Inox bucket for milking machine, 25 liters	59
Grounding	8	Inox bucket for milking machine, 30 liters	59
Hahnkopf scythe, without handle	172	Inox bucket for milking machine, 40 liters	59
Hair shine spray, Manecare, MagicBrush	140	Inox milk transport can, 30 liters	60
Hair shine spray, Pharmakas Foxfire	140	Inox milk transport can, 40 liters	60
Halter for cows and bulls	163	Insect repellent gel, Pharmakas CLAC	135
Halter for sheep and rams	163	Insect repellent spray, Pharmakas CLAC	135
Halters for calves	162	Insulator for AKO Oval Premium	46
Halters for cattle	162	KerbaMint udder care gel	75
Halters for cattle, with chain	163	Kerbl thermo-hygrometer	182
Hanging poultry feeder, green, plastic	102	Kromberg hoof bandage tape, black, 45 mm x 25 m	128
HARMS adjustable bull holder	155	Lamb and kid feeding bottle, 500, 1000, 2000 ml	84
Hay and bale fork, without handle	174	Lamb and kid feeding bottle, AntiVac	85
Hay and manure fork, with handle	174	Lamb and kid teat, 50 mm	84
Hay and manure fork, without handle	174	Lamb and kid teat, 70 mm	85
Hay bale cover	188	Leather collar for sheep and rams	164
Hay net for horses	112	Leather collar for sheep and rams	164
Heating cable for poultry drinkers	183	Leather cream with beeswax, Pharmakas	139
Heating cable with thermostat, 1-48 meters	184	Leather grease, MagicBrush	138
Heating plate for chicks, CosyHeat	145	Leather grease, Pharmakas	137
High-voltage cable	48	Leather oil, MagicBrush	138
Holstein shovel, without handle	173	Leather oil, Pharmakas	138
Hoof abrasive disc, 115 mm	123	Leather oil spray, MagicBrush	139
Hoof abrasive disc, 125 mm	123	Leather oil with beeswax, Pharmakas	139
Hoof and claw cutter for cows	123	Leather soap, MagicBrush	137
Hoof and Claw spray	132	Leather soap, Pharmakas	137
Hoof balm, Pharmakas	132	Leg restraint for cattle	157
Hoof bandage, Equilastic	129	Leg strap for cattle	158
Hoof bandage, Vetlastic	128	Lid gasket for 25-30 liter buckets	62
Hoof care knife, ProfiLoop	124	Lid gasket for 40 liter buckets	62
Hoof gel for horses, MagicBrush	136	Lid with 2 outlets, for 25-30 liter buckets	62
Hoof grease, MagicBrush	131	Lid with 3 outlets, for 25-30 liter buckets	62
Hoof grease, Pharmakas	131	Lid with 3 outlets, for 40 liter buckets	62
Hoof hardening oil with brush	131	Lifting strap for cattle, 20 x 240 cm	158
Hoof nippers, 36 cm	126	Lightning protection for electric fence	48
Hoof nippers, Knipex, 30 cm	126	Liner cleaning brush	72
Hoof oil, MagicBrush	131	Liner plug	68
Hoof oil with vitamin E and brush	131	Lip balm for horses, MagicBrush	133
Hoof rasp	126	Long disposable shoe covers, 100 pcs	187
Hoof rasp	126	Long ring insulator with M6 metric screw	33
Hoof treatment kit, Technobase 8000	127	Long ring insulator with wood screw	32
Hoof trimmers for sheep and goats, Felco 50	122	Long ring insulator with wood screw, 220 mm	33
Hoof trimmers for sheep and goats, Felco 51	122	Long tape insulator with wood screw, 200 mm	34
Hoof trimmers, serrated blade	122	Long tube for vacuum tank	70
Hoof trimmers, serrated blade, ClawCut Pro	122	Long veterinary gloves, shoulder protection	148
Hoof trimmers, straight blade	122	Lower blade for Constanta4 clipper, 13 teeth	120
Hoof trimmers, straight blade, ClawCut Pro	122	Lower blade for Wellington clipper, 13 teeth	120
Hoof trimming and treatment apron	187	Lubricating gel, VetGel	148

M12 threaded metallic rod for grounding	31	Pig restraining bar with handle	160
Mane care spray, MagicBrush	140	Pin set for FlexoPlus and MultiFlex pliers	167
Manure fork with 4 tines, bent at 90 degrees	174	Plastic calf feeder, 9 liters	109
Manure rake, black	176	Plastic cattle feeder, 15 liters	109
Manure shovel with rake	177	Plastic corner feeder with protective rim, 31 liters	110
Marking harness for sheep breeding	169	Plastic double drinker with constant level, 58 liters	97
Mastitis indicator paper, 25 pcs	78	Plastic drinker with constant level, adjustable, 5-8 liters	93
Mastitis test paddle	78	Plastic drinker with constant level, S522, 3 liters	94
Mastitis test solution, KerbaTEST	78	Plastic drinker with float, 5 liters	93
MaxiFork stable manure fork, black	175	Plastic feed bowl for cattle, 6 liters	107
MCLEAN-A, acidic detergent for cleaning milking machines	73	Plastic feeder for cattle, 42 liters	110
MCLEAN-B, alkaline detergent for cleaning milking machines	73	Plastic feeder for foals, 9 liters	110
Measuring jug with scale, plastic	61	Plastic manure pusher head	179
Metal curry comb for cows and horses	141	Plastic nut for 240 cm ³ milk collector	65
Metal curry comb for horses	141	Plastic post	44
Metal feed rack for rabbits	106	Podoseptan hoof paste	134
Milk bucket lid, 25-30 liters	62	Potato fork with 9 tines, without handle	174
Milk bucket lid, 40 liters	62	Poultry drinker, conical	88
Milk bucket stopper	62	Poultry drinker with plastic tank, 24 liters	89
Milk claw bottom body, 200 cm ³	66	Poultry feeder, 5/10 liters	102
Milk claw gasket 150 cm ³	67	Poultry feeder, 50 cm	102
Milk claw gasket 200 cm ³	66	Poultry feeder, galvanized metal, 8/22 liters	104
Milk heater for calf feeding	86	Poultry feeder, galvanized metal, 100 cm	103
Milking and washing apron	187	Poultry feeder, galvanized sheet, 24 holes, 50 cm	103
Milking cup for cow milking machines, 27/40 mm	67	Poultry feeder, galvanized sheet, 50 cm	103
Milking cup for goat milking machines	68	Poultry feeder, premium plastic, 9/20 liters	103
Milking cup for sheep milking machines	68	Poultry nesting box	104
Milk thermometer with alcohol, -10...+110 °C	86	Powering the impulse generator	8
Milk tube, 14/22 mm	63	Premium calf blanket, insulated, waterproof, black	143
Milk tube, 16/25 mm	63	PremiumFork stable manure fork, black	175
Milk tube cleaning brush	72	Premium hanging scale	185
Milk tube holder	63	Premium poultry drinker, Optimus, 25 liters	89
Milk tube tap	63	Prima-Flex ear tags for sheep	167
Mixing tips for two-component adhesive	127	Protective milking sleeves, 2 pcs	187
Moisture meter for hay and straw, Draminski	190	Protective plate for drinking pipes, 100 cm	95
Mounting clamp for M6 insulators	36	Protective tarpaulin, PolyGuard, 210 g/m ²	192
mouseStop mouse trap set with bait	181	Pulsator 50/50, 120 pulses/minute	64
Mouse trap set with wooden base	181	Pulsator 60/40, 60 pulses/minute	64
Muck and slurry pusher	178	Pulsator 60/40, 90 pulses/minute	64
Muck and slurry pusher, half-round	178	Pulsator repair kit	64
Muck and slurry pusher, half-round, galvanized	178	PVC boot, Dunlop Dee	186
No Bite anti-cannibalism spray	147	Rabbit feeder, galvanized metal, 2.2 liters	106
No Fight anti-aggression spray	147	Rabbit feeder, galvanized metal, 3 liters	106
Non-recommended methods	9	Rain gauge, 40 liters/m ²	182
Nora IDRO High work boots	186	Ratchet tie-down strap	193
Nora IDRO Low work boots	186	ratStop rat trap with bait	181
Nose clip applicator for pigs	157	Rectangular galvanized steel feeder, 35 liters	111
Nose ring applicator	156	Rectangular rubber feeder, black, 20 liters	114
Nose ring for cattle	156	Red cartridges for stunning gun, MaxxTech	161
Nose ring pliers for pigs, large	156	Reel 32 × 15 cm	30
Numbers for animal marking belt, 10 pcs	171	Reel 32 × 15 cm with sole and strap	30
Nutritional supplement for calves and piglets with diarrhea	134	Refractometer for measuring colostrum quality	77
Oesophageal probe for cattle	150	Reinforced ring insulator	32
Oil for clippers	121	Replacement bait tongue for mouseStop	181
Oil tank	69	Replacement bait tongue for ratStop	181
Pasture drinker, 550, 1000 liters	98	Replacement blade for bandage cutting knife	130
Permanent gate insulator X ³	36	Replacement blade set for hoof grinding disc, 3 pcs	124
PET bottle drinker	88	Replacement tube for EcoKill 2.0	181
Pig holder	160	Ring insulator set 100 pieces + gift	32
Piglet drinker, 15 × 21 × 9 cm	99	Ring insulator set 300 pieces + gift	32
Piglet nipple drinker, 1/2" thread, 3/8" nipple	99	Ring insulator with M6 metric screw	31
Piglet teeth cutter pliers	153	Ring insulator with wood screw	31
Pig nipple drinker, 1/2" thread, 1/2" nipple	99	Rope connector 4-6 mm	49
Pig nose clips, 100 pcs	157	Rope connector 4-6 mm, single	49
Pig nose ring	156	Rotating ring for chain, Ø6 mm	165

Round diamond sharpening file, Dick	125	Special insulated cable for energizer to fence connection	48
Round feeding rack with 8 feeding places	116	Spray grip	166
Round feeding rack with 12 feeding places	116	Spray Powder – for sensitive skin	146
Rubber liner set for cows	67	Spring-loaded cow scratching brush	142
Rubber liner set for sheep	67	Stable and feeding bucket	107
Rubber teat for young, PET bottle mount	85	Stable manure fork, black	175
Ruminal magnet	150	Stainless steel bowl for cats	105
Ruminal magnet introducer	150	Stainless steel bowl for dogs	105
Salt lick holder	108	Stainless steel bucket	61
Salt lick holder, dark green	108	Stainless steel calf puller	152
Sana milk filter disc, 200 pieces	74	Steel angle post	45
Sandbag for bale covers	189	Steel post for electric fence, Ø8 mm × 107 cm	46
Scrubbing brush	142	Steel wire 1.6 mm – 0.12 Ω/m • 200 kg • 200/400/1000 m	28
Semi-circular galvanized steel feeder, 28 liters	111	Steel wire for wire saw	148
Set of 2 mouse traps, 11 × 5 cm	182	Straight hoof knife, 30 cm	125
Set of 2 stainless steel pet bowls, Ø13 cm, 450 ml	105	Straight hoof knife, Dick, 36 cm	125
Set of spare blades for hoof cutters	123	Super-Clean valve for feeding bucket	83
Sheep catching hook, without handle	165	Swann-Morton surgical blade, size 24	153
Sheep clipper machine, Aesculap Econom NOVA CL	117	Synthetic collar for cows and bulls	162
Sheep feeder, plastic, 6 liters	109	Tape insulator with M6 screw	33
Sheep marking spray	166	Tape insulator with wood screw	33
Sheep milking cluster, rubber	64	Teat catheter, 10 pieces	78
Sheep milking cluster, rubber, 150 cm ³	64	Teat catheter, Fürstenberg model, Ø2.5 mm	79
Sheep milking cluster, silicone	64	Teat catheter, Fürstenberg model, Ø3 mm	79
Sheep milking machine, with 2 clusters, 1 aluminum bucket 25 liters, eco	56	Teat catheter with olive-type guiding tip	79
Sheep milking machine, with 2 clusters, 1 aluminum bucket 30 liters	56	Teat incision instrument, Danish model, 18 cm	79
Sheep milking machine, with 2 clusters, 1 inox bucket 25 liters, eco	53	Teat knife, Schneckert type, 12 cm	79
Sheep milking machine, with 2 clusters, 1 inox bucket 30 liters	53	Teat lesion extractor, Hug model, 15 cm	79
Sheep milking machine, with 4 clusters, 1 aluminum bucket 40 liters	56	Technovit-2-Bond two-component adhesive	127
Sheep milking machine, with 4 clusters, 1 inox bucket 40 liters	54	Temperature probe for TwistGrain Pro	190
Sheep milking machine, with 4 clusters, 2 aluminum bucket 30 liters	57	Tester 1-10 kV	50
Sheep milking machine, with 4 clusters, 2 inox bucket 30 liters	54	Tester 1-10 kV, model 2023	50
Sheep shear, 25 cm	121	Tester 1-10 kV, without grounding, AKO	50
Sheep shear, 31 cm	121	ThermoPlus calf blanket, waterproof, dark blue	143
Shoeing hammer with wooden handle, 33 cm	125	Tool handle, Ø30 mm × 150 cm	175
Short-term animal marking pen	166	Top body for 240 cm ³ milking claw	65
Short tube for vacuum tank	70	TopMarker marking spray for cows, pigs and goats	166
Short vacuum tube, 7/14 mm	68	T-profile metallic rod for grounding	31
Shut-off valve for 200 cm ³ collector	66	Triple tube, 7/14 + 14/22 + 7/14 mm	63
Shut-off valve for 240 cm ³ collector	66	Tube valve for 5 liter automatic drinker	91
Side hoof trimming pliers, 60 cm	123	Tube valve for G51 automatic drinker	91
Silbertape hoof bandage tape, silver, 50 mm × 50 m	128	Twintag ear tag applicator pliers	168
Silicar scythe sharpening stone	172	Udder care cream, NJP Liniment	76
Silicone liner set for cows	67	Udder spraying and washing gun, RB35	182
Silicone liner set for goats	67	Udder spraying and washing gun, Rinser Super Jet	182
Silicone liner set for sheep	67	Universal cattle collar with chain	162
Silo fork, without handle	174	Universal gate handle, type 1, 7 colors	37
Silo repair adhesive tape	194	Universal gate handle, type 2	37
Silver spray for minor wounds	146	Universal milking claw for sheep and goats	67
Simple pig restraining device, 108 cm	160	Upper blade for Constanta4 clipper, 4 teeth	120
Single-edged hoof and claw knife	124	Upper blade for Wellington clipper, 4 teeth	120
Single-edged hoof and claw knife	124	UPROTECT post-milking udder care gel	76
Snow and grain shovel, without handle	173	Vacuum distributor for milking machines	70
Solar lighting system	21	Vacuum gauge, 63 mm, 1/4 inch	71
Solar system charge controller	20	Vacuum gauge, 100 mm, 1/2 inch	71
Solar systems	20	Vacuum gauge connector	71
Sow drinker, 21 × 29 × 16 cm	99	Vacuum pump 70 mm, 200 liters/minute	68
Sow nipple drinker, 1/2" thread, 3/4" nipple	99	Vacuum pump 80 mm, 230 liters/minute	68
Sow nipple drinker, 3/4" thread, 3/4" nipple	99	Vacuum pump oil, Agro Electro	71
Spare float valve	92	Vacuum pump oil, Viscano (Kerbl)	71
Spare float valve for frost-free drinkers	100	Vacuum pump silencer	69
Spare latex teat with cap	85	Vacuum pump with oil, 200 liters/minute	68
Spare teat for 3 liters calf feeding bottle	85	Vacuum pump with oil, 230 liters/minute	68
Spare valve for pig drinkers	99	Vacuum regulator	70
Spare valve gasket	82	Vacuum tank, 18 liters	70

Vacuum tank lid	70
Vacuum tank lid gasket	70
Valve for lamb and kid feeding bucket	85
Valve mounting wrench	82
Veterinary gloves, long, 100 pcs	148
Veterinary scalpel handle, size 4	153
Veterinary trocar	151
Voltage indicator	50
Warning sign	48
Waste oil tank	69
Water heating and recirculation system C10	98
Waterproof digital animal thermometer	152
Wax block for sheep breeding marking	169
Wellington clipper blade set, 13/4	120
Wettschliff scythe, without handle	172
Wet udder cleaning towel	75
Wheel for milking machines	71
Wire saw handle set	148
Wooden back broom without handle	176
Wooden block hoof pad for cows	126
Wooden farrier mallet, Dick, 30 cm	125
Wool teat dilator, 20 pieces	78
Wound care spray	146
XtraFlo Top Entry float valve, 3/4"	100
Y connector, 8.5 mm	63
Y connector, 16 mm	63
Yellow cartridges for stunning gun, MaxxTech	161
Zinc oxide spray – skin regeneration	146
